3	$45	$96.70
4	$60	$114.29
5	$75	$131.89

The City of Columbia offers Commercial Food Waste Collections Services to local businesses and schools. **Throw** your food scraps away and help **Grow** new plants in an organic way.

Organic waste can be collected separately for composting for **less than the cost of trash disposal**. The action is the same, you simply change the container that your food scraps go into.

By using this service, your establishment is reducing the waste that goes into our landfill and recycling valuable, organic resources. The food and yard waste make a valuable soil amendment to help grow future harvests once it's composted.

Food Waste Recycling

Look for this symbol on containers and bags to denote where you can dispose your food waste.
