All maintenance needs must be addressed in a timely manner. The inspection and maintenance schedule may be modified for each facility based on results of the initial inspection program as deemed necessary to be fully compliant with the purpose of this article.

(c) The director may inspect any stormwater management facility as set forth in section 12A-192. Inspections may involve full evaluation of the physical structure and condition of the facility; review of the prior inspection, repair and maintenance records; and sampling of the surface water, discharges and groundwater as deemed necessary.

(d) Persons responsible for the operation and maintenance of stormwater management facilities shall make records of the inspection, repair, maintenance and any modifications to the facilities and shall retain these records for a minimum of five (5) years. These records shall be made available to the director during inspection of the facility or at any time upon request. Inspection and maintenance records shall be submitted to the director by ~~June 4~~ November 15 of each year.
