## Executive Summary

Appropriating funds from the Clark Lane, from Route PP to St. Charles Road, project revenue account to the expenditure account relating to stormwater violations identified by the Missouri Department of Natural Resources (MDNR).

## Discussion

On January 25, 2012, MDNR inspected the Clark Lane, from Route PP to St Charles Road, improvement project and found failure in the sediment control Best Management Practices (BMPs). The inspection found 3 BMPs that were not installed properly and sediment had reached a body of water in an unnamed tributary of Hominy Branch. The Environmental Protection Agency (EPA) issued fines under the Clean Water Act that the National Pollutant Discharge Elimination System (NPDES) permit was violated. Because the project was a City funded project, the City was issued the fine. The City negotiated with EPA to reduce the amount of the fine and passed a portion of the fine onto the contractor, Emery Sapp & Sons (ES&S). The City received a payment from ES&S in the amount of \$2,500, which is now being appropriated from the project's revenue account to the expenditure account so the project can be closed.
