Maternal Child Health Services Contract Work Plan
Federal Fiscal Year (FFY) 2012-2014; Contract Period October 1, 2011-September 30, 2014

LPHA Contractor: Columbia/Boone County Department of Public Health & Human Services

Selected Priority Health Issue: Prevent and reduce obesity among children, adolescents and women.

Statement of Problem: In 2010 Boone County WIC data showed 10.4% of WIC children 2-5 years of age as overweight or obese, with another 17.1% at risk of becoming overweight or obese. Boone County WIC would like to do more with clients on physical activity, however there is no local or state funding for Fit WIC. Self reported data obtained in spring 2009 from 1,721 Missouri middle school and 1,987 high school students from randomly selected schools showed 16.7% of the middle school students overweight and 12.9% of them obese, while 15.6% of the high school students reported being overweight and 13.1% reported being obese (Missouri 2009 Youth Tobacco Survey). The 2009 Missouri Youth Risk Behavior Survey showed 51.7% Missouri high school youth were physically active for at least 60 minutes per day on less than 5 days, which leaves 49.3% not getting the recommended amount of exercise. On this same survey, over three-fourths (79.6%) of Missouri high school youth are not getting the recommended amount of fruits and vegetables (5 per day) and just over 13% of respondents did not eat fruits at all in the seven days prior to the survey. Missouri Department of Health & Senior Services's Health and Preventive Practices Survey of Boone County shows of the 783 adult respondents 35.52% reported being overweight and 25.95% being obese. This survey showed a disparity between rural and urban residents in the obesity category with 31.8% of rural respondents reporting being obese vs. 21.6% of urban respondents. In the 2009 Boone County Healthy Lifestyle Survey, conducted by the Columbia/Boone County Department of Health and Human Services, adults indicated five factors contributing to unhealthy lifestyles: lack of time, cost of healthy foods, convenience of fast food restaurants and vending machines, too much screen time and lack of awareness about food choices for good health. When asked if they would support local governments in developing policies and environments to promote healthy lifestyles, an overwhelming 83.9% said yes. 2011 data compiled by the National Initiative for Children's Healthcare Quality ranks Boone County 9th best in the state related to adult obesity, though the above statistics show that personal and environment factors, in addition to lack of policies supporting good health, continue to contribute to the problem.

Area of Focus: Working with governmental agencies, non-profits, community coalitions and schools to address obesity prevention and reduction through evidenced based best practices (i.e. CDC recommended strategies).

Instructions: Develop a three-year work plan, stating activities in each level of the Spectrum of Prevention for each contract period year that progress toward the planned System Outcomes (see MCH Services Contract Proposal Guidance)
