**Last Modified:** Wednesday, January 14, 2015 11:44:37 AM  
**Time Spent:** 01:16:51  
**IP Address:** 69.27.196.165

PAGE 2: Housing & Neighborhood Character

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

eclectic, centrally located, affordable, livable

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

More sidewalks, better outdoor lighting

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family

PAGE 3: Transportation & Infrastructure

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, street light needs

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

*Respondent skipped this question*

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

*Respondent skipped this question*

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Sidewalks along some of the streets between worley and west ash would be awesome!

PAGE 4: Land Use & Zoning

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9. 2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

*Respondent skipped this question*

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

*Respondent skipped this question*

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

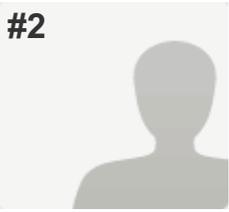

*Respondent skipped this question*

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

**IP Address:** 161.130.21.12

---

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

friendly, eclectic, grid streets, centrally located,  
narrow streets, small blocks, social, deep lots,  
well-connected, narrow lots, affordable, walkable,  
livable, historic,  
Other (please specify) Bikes and dogs

---

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Streets with sidewalks  
Crosswalks  
Porches  
Bike Boulevards

---

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes,  
Other Styles (please be specific)  
Think there may be some foursquares, and tudors.  
Compact is the key.

---

**Q4: Choose any or describe other types:**

Accessory Dwelling Units, Single-Family

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

other utility or infrastructure issues ,  
potholes or other street issues ,  
sidewalks in poor condition, sidewalk gaps,  
Use this box to describe other problems or provide specific details and locations  
crosswalks, the right hand west bound lane of Broadway has a steep drop off into the gutter, hard to drive on

---

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Ash/Aldeah/Alexendar - limited site due to hill, hard to cross Ash; Aldeah/Broadway/Edgewood cars speed and intentionally refuse to stop.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

We are actually pretty close to everything where we live on Aldeah, it's just that the walk between our house and downtown (around Broadway, First and Second) is very pedestrian unfriendly.

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

South side of Ash between Aldeah and Glenwood. Sidewalk around lot on Ash--although that would also be a nice park! Bike Boulevard will be a great addition.

---

PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

With R-2, perhaps standards that they look like single family dwellings? I'm less certain of current zoning code there. I think the area around Madison/Banks/Sexton needs assistance--perhaps requiring absentee owners to fix and maintain properties for tenants better? Also, lots of aging folks that need help with maintenance throughout the area.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Park at Ash and Aldeah (WANA has no park).

I do think that encouraging rehabs and assisting seniors would do wonders. I'd be in favor of a "most notable neighborhood" designation with guidelines to encourage appropriate upgrades and neighborhood pride -- but not super strict historic preservation requirements.

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. **Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

friendly, eclectic, centrally located, small blocks, lots of trees, walkable, livable, historic

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Pedestrian lighting, beautification (gardens, art, etc.), sidewalks, walking police, neighborhood events (national night out).

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalks in poor condition, stormwater or drainage issues ,  
Use this box to describe other problems or provide specific details and locations  
more bike lanes, less street parking, more pedestrian lighting

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Speeding through on Jefferson to/from Bus 70.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

Having Lucky's market on Gary St. is great! I wish there were more corner stores / bodegas (not a city problem necessarily). But more sidewalks, bike lanes, & better lighting.

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

From Ash north to Bus 70, From Alexander east to West Blvd: put in some sidewalks! People are walking in the middle of the street! Make sure that on streets with bike lanes that street side parking is not allowed during commuter times. Extend bike lanes on west blvd and add one to Garth.

---

**PAGE 4: Land Use & Zoning**

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

I would suggest that no additional commercial zoning or multi-family residential be added. It is important to preserve the small, affordable, single-family zoning in this central area.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Rezoning and relocating public housing in the neighboring area would help increase property development and revitalization north of Ash, west of West Blvd. Beautification and investments of sidewalks by the City would help. Also, ensuring that the area is not over developed - ensuring design standards for refurbs (Bungalows, cottage, etc) would keep the vibrancy and personality of the area, attracting young families.

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

I stress the importance of single family, bungalow style housing. But it's also important to have walkable coffee shops, bodegas, and cafes close by. If light rezoning and pedestrian investment can be done together - it should inspire drastic improvements.

---

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

centrally located, deep lots, affordable, lots of trees, walkable

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

well kept houses with character.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Neighborhood Office or Commercial, Single-Family

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sewer backups,

Use this box to describe other problems or provide specific details and locations  
I have requested that the city take over the private sewer line that runs from Hardin st to West blvd., Manholes number 3g32c to 3g32b. This is a private sewer line in immediate danger of failure and all the sewage from the city sewer line on Hardin drains through this line as it travels down to West blvd. There has been no progress on this despite the petition and phone calls for the last 4 years. I originally talked to Nathan Runyan in July of 2010.

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Yes, the intersection at West Blvd and Worley is too tight. It is difficult to make a right turn on Worley when traveling south on West Blvd. Especially if you have a larger truck like I do or pulling a trailer as I often do.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

I miss having Nowels Grocery store on Worley

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

I don't know what the codes mean. There is no key. What's the difference between r-1 and r-2? Ect. Sidewalks and lighting always encourages people to be out in the neighborhood I believe.

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Education is a big part of the answer. The banks have made it nearly impossible for low income families to transition from renters to home owners, so where do you get pride in your home and neighborhood. It is important to bring back into our schools basic citizenship goals and responsibilities. How about practical arts such as wood shop, metals, electrical classes, automotive classes. Teach the youth today to be productive with their hands. These classes are all but gone and not everyone is going to be headed to college. Expose kids to the practical arts of life so we don't continue to graduate students that cannot provide a living for themselves. What would it look like if there was a community education building to provided continued education for free. I bet there are businesses in Columbia that would support this, because they have trouble finding good workers. To bring up the community we need to educate our citizens better to match our desired standards.

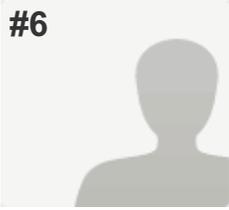

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

I have seen this neighborhood improve and get better in the 12 years since we have lived here.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

*Respondent skipped this question*

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

friendly, centrally located, narrow streets,

lots of trees, livable,

Other (please specify)

I wouldn't say Glenwood is unsafe but we did just get robbed a couple of weeks ago.

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

nothing I can think of.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

No

**Q4: Choose any or describe other types:**

Single-Family

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalks in poor condition, sewer backups,

Use this box to describe other problems or provide specific details and locations

some houses on Glenwood still have orangeburg piping for water. Update the water lines from house to street PLEASE.

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Widening the street would be beneficial as it's very narrow.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

n/A

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Sidewalks could be updated. Lots of cracked and uneven cement on Glenwood. Hard to push our daughter in a stroller over the sidewalk when it's like this.

PAGE 2: Housing & Neighborhood Character

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

historic, livable, walkable, tight-knit, lots of trees, affordable, narrow lots, well-connected, deep lots, unsafe, social, poor infrastructure, narrow streets, centrally located, grid streets, eclectic

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Safe! More walkable.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family, Multi-Family, Neighborhood Office or Commercial, Accessory Dwelling Units

PAGE 3: Transportation & Infrastructure

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition, sewer backups, potholes or other street issues

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Speeding is a constant problem on Hirth - I can hear cars going far too fast on a residential street without sidewalks - it's scary to have children and pets living so close to people driving 40+

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

I don't believe our neighborhood can be considered walkable until all have sidewalks - especially with six "schools" within our borders.

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

All transit stops should have sidewalk access.

---

**PAGE 4: Land Use & Zoning**

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). Use this box to describe other problems or provide specific details and locations  
most streets don't have any sidewalk

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Ridgeway between Worley and Mikel has a problem with speeding vehicles.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

*Respondent skipped this question*

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Ridgeway, Hirth, Mikel.

**Q9:** The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.

*Respondent skipped this question*

**Q10:** Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.

*Respondent skipped this question*

**Q11:** Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!

*Respondent skipped this question*

**Q12:** Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.

*Respondent skipped this question*

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, friendly, centrally located, narrow streets, narrow lots, affordable, walkable

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Homes designed to match the neighborhood in architectural style and size.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps,  
Use this box to describe other problems or provide specific details and locations  
No sidewalks

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Speeding on Florence Avenue

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

No

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

There are no walks at the Florence Avenue/ Independence area and none on many other streets north of Worley and people walk in the street (Florence & Independence) all of the time. People speed from Donnelly to Worley on Florence and it can be hazardous for these walkers and children. My great grandchildren live there.

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

Obviously I have interest in the Florence Avenue area and believe most in that area are keeping their property up. I am concerned about the vacant house that has had a full dumpster in front for several months. Many properties on Worley look like the owners could use assistance or if they are rentals they should be made to do some upgrades.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

I do not favor any change in zoning or adding multi family residences. I would like to see the area stay owner or family occupied. Most people I know there are good solid people, friendly and have pride in ownership. I will say I was horrified that all of those duplexes were allowed to build on W. Broadway just west of Pershing. I think zoning should be more strictly controlled to the character and density of the neighborhood.

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

*Respondent skipped this question*

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

---

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

walkable, affordable, poor infrastructure,  
Other (please specify)  
Dirty, poorly maintained, low adherence to building codes, ugly

---

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

People picking up their garbage, putting siding on their houses, keeping construction materials out of sight.

---

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

No,  
Other Styles (please be specific)  
I do not want to see any gentrification of my neighborhood. How about you just enforce existing building and health codes?

---

**Q4: Choose any or describe other types:**

Single-Family,  
Other (please specify)  
Leave us alone, we are fine how we are with the exception of the trash and dereliction.

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition,  
sewer backups, stormwater or drainage issues,  
potholes or other street issues, water main breaks,  
electric outages, other utility or infrastructure issues,  
Use this box to describe other problems or provide specific details and locations  
I'm using this box to emphasize that these are important problems and known city responsibilities. We've been complaining about them for decades. How about spending city resources on repairing these before messing with our building codes? We don't need "visioning" we need pipes repaired, etc. Get to work.

---

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

There should be a crosswalk and pedestrian walking sign at Worley and Providence. It's a major pedestrian intersection and divides a residential area from its park. We don't need a million dollars worth of brick work, just a normal crosswalk and pedestrian light.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

No.

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

No, no, and no. If traffic is slow enough, walking on residential streets is fine. Many of our side streets are mixed use already, full of bikes and people playing ball and all that. If you build sidewalks, they will cut deeply into our already tiny front yards and put strangers practically in our living rooms. No.

**PAGE 4: Land Use & Zoning**

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

This should be obvious to city leadership. Go ahead and develop programs to help with these properties. If you are trying to get us to provide fodder for you to blight out community you are not getting it here.

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Leave us alone

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

The city govt. is already NOT doing what it should and has been fantastic at ignoring citizens in the past few years. Deal with the back log and get back to us on this. Fix the mess you've already made. Fix the stuff that has lingered in disrepair. I'm sure there is a list.

PAGE 2: Housing & Neighborhood Character

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

safe, centrally located, affordable, walkable, livable

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

More connected sidewalks.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family,  
Other (please specify)  
Single family only. Too many multi-family

---

PAGE 3: Transportation & Infrastructure

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition,  
Use this box to describe other problems or provide specific details and locations  
Not enough sidewalks for children to walk to school safely.

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Speeding in school zones and backup at West Blvd. and Ash.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

The ARC should have more outdoor facilities, such as a pool and tennis courts and basketball courts.

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Transit is fine. The sidewalks need to be put in throughout the neighborhoods because the majority of the people who live in this community walk.

---

PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

Yes, all that is marked should be upgraded. There should be a standard of the outside of a home. No junkyards in the front with broken down vehicles should be allowed in any park of the city.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Sidewalks! ARC expansion. Coffee shop between ARC and Family Health Center.

---

Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

pedestrian signals at Worley and Bernadette

**PAGE 4: Land Use & Zoning**

## Neighborhood Planning- Initial Kick-Off for West Central Area of Columbia

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

*Respondent skipped this question*

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

*Respondent skipped this question*

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

**IP Address:** 69.27.196.163

---

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, affordable, narrow lots,  
well-connected, deep lots, social, centrally located,  
eclectic, safe, friendly

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Neighborhood Art installations... like street murals. Through traffic is very fast and anything we can do to slow that down would be great.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Other (please specify)  
All of these already exist... and that is what makes the neighborhood nice.

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalks in poor condition

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Parking in bike lanes on West Blvd. and Ash Street. Either go to a complete "Bikes May Use Entire Lane" with sharrows properly placed or prohibit parking in bike lanes. Debris swept from traffic lane, pushed into bike lanes and never cleaned up. Slow is safe, but cyclists forced to weave in and out of bike lanes into traffic is dangerous.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

Gas station (Gerbes) at Clinkscales and Ash is forthcoming, but I think a commercial hub ID is more fitting. FYI... Worley Street Park is not indicated.

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Many are broken and trip hazards, which should be fixed prior to extending new walks. Some sidewalks at intersections (especially along Broadway) sit below the grade of the road, collecting water, mud, and debris.

---

**PAGE 4: Land Use & Zoning**

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

There's no box to answer 9.1.

Columbia Honeysuckle Abatement Team (CHAT)  
Some residents are unaware of the damage it is causing.

I think the property value map is grossly exaggerated . Low property values together are acceptable... it is the small spots in the middle of larger high values that should be of concern.  
New tenants in the blue house on Ash near West Blvd... cleaned up nicely and taking much better care of the property.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Multi-Family housing at Ash and West Blvd has potential for much improvement, possibly some mixed use to add a small corner grocery that residents can walk to... not drive to.

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. PAGE 2: Housing & Neighborhood Character

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

historic, livable, walkable, affordable,  
well-connected, centrally located, eclectic, friendly

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Improved sidewalks/bike paths/pedways. Park improvements - Again St. Park doesn't feel particularly safe to me. Support for preserving historic character of homes/streets.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes,  
Other Styles (please be specific)  
Minimal traditional (ex:  
<http://architecture.about.com/od/periodsstyles/ig/House-Styles/Minimal-Traditional.htm>)

**Q4: Choose any or describe other types:**

Single-Family, Multi-Family,  
Neighborhood Office or Commercial,  
Accessory Dwelling Units, Mixed Use Development

PAGE 3: Transportation & Infrastructure

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Only that people often drive too fast down Clinton Dr.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

The sidewalk/bike bath along Ash, between Gerbes/the ARC and Providence is insufficient - needs to be a dedicated safe path in both directions (for kids walking/biking to West Middle School). Same problem along Broadway.

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

See above (Ash - from Clinkscales to Providence, and Broadway from West to Providence). I love the new Gold bus route - more frequent service/extended hours.

---

**PAGE 4: Land Use & Zoning**

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

The apartments at Ash/West - they are better than they used to be but still seem sketchy. Investment there and at Again St. Park would make the area seem safer for pedestrians, kids walking to/from school.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

I would like to see a concentrated focus on improving Ash - safety, housing condition, sidewalks/bike paths on both sides of the streets in both directions. It could be a great walking/biking route connecting downtown, schools and the Stadium commercial area. it would build upon and extend the areas w/better housing condition,

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

A challenge for those of us who want to improve our homes is that it's difficult to get an appraisal high enough b/c nearby comps drop vary so much. I think focusing on walking/biking connectivity to downtown would help our area become more desirable.

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

*Respondent skipped this question*

---

### PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

Since there is no box for 9.1, I'll write my response here. Regarding zoning, I feel it is very important to keep the vacant lot on the corner of Ash and Aldeah zoned only for a single-family home. An apartment building or business could further decrease land values, and that intersection is a sensitive area on the property values map.

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

*Respondent skipped this question*

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

*Respondent skipped this question*

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

It would be helpful to keep the apartments out of this neighbor. The bungalows referenced earlier draw families into this area because of the charm. All that is lost with apartments and business popping up nearby. You want to make the area better. Increase community policing and the schools in this area.

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Revitalize some of the houses. Offer incentives for landscaping and housing renovations.

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

Why are police parked at Thorn Brook monitoring the area, and not where the bulk of crimes are committed? The city's solution to "improvement" has been to approve the development of apartments. What happens when MU's enrollment decreases again, or levels off, and those apartments become low-income housing? The city needs to invest or help the community itself invest. You can start by making everything the city oversees, look the 'same' on both sides of Broadway. Why is the sidewalk on the south side of Broadway without massive cracks, but the north side is impossible to push a stroller over?

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, lots of trees, affordable,  
deep lots, unsafe, poor infrastructure, large lots,  
friendly,  
Other (please specify)  
gunfire and drug and sex trafficking nearby

---

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

pocket parks, community gardens, front yard gardens, consistent sidewalking.

I would like to restrict the level of buildings to 2-story, and any business coming in [including apartments] provide all their own off street parking... unseen off street parking.

I would like to avoid predatory businesses: liquor stores, fast cash, and restrict the storage of hazardous materials to household-sized amounts.

---

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

---

**Q4: Choose any or describe other types:**

Single-Family, Neighborhood Office or Commercial ,  
Accessory Dwelling Units

sidewalk gaps, sidewalks in poor condition,  
sewer backups, stormwater or drainage issues ,  
potholes or other street issues , street light needs,  
Use this box to describe other problems or provide specific details and locations  
more street lights would keep all the car break-ins and other burglaries down, I think. [break-ins: Aldeah, Alexander, Hirth, Ridgeway, Independence, Anderson, Glenwood, and Sanford -- I think]

---

## Neighborhood Planning- Initial Kick-Off for West Central Area of Columbia

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

the stop sign at Garth and Ash gets awfully congested; and the traffic signal at Garth and Worley takes too long to cycle through it's specialty turn restrictions.

There is quite a bit of speeding down the wider streets: Sanford, Greenwood - - from what I've heard.

Even after the city has gone through and cut weeds and limbs the visual clearance turning from Alexander onto Ash remains an issue of creeping out into the lane... this also seems to be true on the north side of Anderson[ash]

---

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

Well, I think they ought to put the Schnooks back in at Worley Street ... or move a Mosers over there [City of Columbia / Boone County Public Health building]. I'm talking a proper grocery store, not a crap-tastic convenience store. The current Moser's is exceedingly hazardous to get to if one does not drive, nor walk fast enough. [no handy crosswalks]

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

There are a couple of elderly / somewhat disabled bus users over by the Hirth bus stops [Worley] a protected bus stop would be quite helpful. I would also suggest that there is one protected bus stop - - in each direction every quarter mile... 1/2 mile between east bounds .. etc.

I would also suggest completing the sidewalks along Ash since there are many walkers in the area...

I would suggest putting in a sidewalk along the PedWay route - - [except in front of my house on Alexander :D]

---

PAGE 2: Housing & Neighborhood Character

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, lots of trees, affordable,  
deep lots, social, large lots, centrally located,  
eclectic, safe, friendly

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

I love my neighborhood for the old houses, lack of student apartments, and abundance of trees and green space. Improved sidewalks would be nice, though.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family, Accessory Dwelling Units

---

PAGE 3: Transportation & Infrastructure

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalks in poor condition,  
stormwater or drainage issues, water main breaks,  
Use this box to describe other problems or provide specific details and locations  
Last summer there were 3 water main breaks that caused the water to my house to be shut off, all within several weeks of each other

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

*Respondent skipped this question*

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

*Respondent skipped this question*

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

The sidewalks on the north side of Broadway (at least from West Boulevard down to Garth) are in pretty rough condition and could use some updating.

---

PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

*Respondent skipped this question*

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

*Respondent skipped this question*

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

*Respondent skipped this question*

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

## PAGE 2: Housing & Neighborhood Character

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, lots of trees, affordable,  
deep lots, unsafe, social, narrow streets,  
centrally located, friendly

---

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

sidewalks, streets with speed inhibitors, a corner grocery [sans liquor and cigarettes], bus shelters

---

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes,

Other Styles (please be specific)  
single-family and ADU, neighborhood office/limited  
commercial [nothing predatory: fast cash, liquor,  
cigarettes]

---

**Q4: Choose any or describe other types:**

Single-Family, Neighborhood Office or Commercial,  
Accessory Dwelling Units, Other,  
Other (please specify) homeless shelter

---

## PAGE 3: Transportation & Infrastructure

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition,  
sewer backups, stormwater or drainage issues,  
potholes or other street issues, street light needs,  
Use this box to describe other problems or provide  
specific details and locations  
more street lights would reduce the car break-ins and  
house break-ins

---

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Sanford, Hirth, Greenwood are those that I've heard of. Both the Garth intersections are congested: Worley and esp. the 4-way stop at Ash.

---

## Neighborhood Planning- Initial Kick-Off for West Central Area of Columbia

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

I think a proper grocery store [staples: milk, bread, vegies and tp] would be welcomed along Ash and Aldeah? Or the Suttons old place on McBaine.

Like the grocer / barber combo such as on Sexton???

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

If I were to make a list, first I would say that fully side-walking Ash would be a priority. Then, I would say a couple of bus shelters every block or so along Worley. There are quite a few elderly bus riders in the area, and having a shelter would be very helpful.

PAGE 2: Housing & Neighborhood Character

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, affordable, centrally located

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

*Respondent skipped this question*

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family

PAGE 3: Transportation & Infrastructure

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalks in poor condition

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

parking should not be allowed on West Blvd.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

*Respondent skipped this question*

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

sidewalks need to be wider so two people can walk together

PAGE 4: Land Use & Zoning

Neighborhood Planning- Initial Kick-Off for West Central Area of Columbia

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9. 2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

*Respondent skipped this question*

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

*Respondent skipped this question*

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

*Respondent skipped this question*

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

historic, livable, walkable, lots of trees, narrow lots, well-connected, deep lots, centrally located, eclectic, safe, friendly

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

tiny homes in back yards.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

No

**Q4: Choose any or describe other types:**

Single-Family

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition, street light needs

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

not so much.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

the north area along I70 drive is in what I would call a food desert. There are groceries along the business loop but not within easy walking distance.

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Better sidewalks and biking lanes along Broadway.

---

**PAGE 4: Land Use & Zoning**

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9. 2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. PAGE 2: Housing & Neighborhood Character

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, affordable, centrally located, friendly

---

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

I enjoy the residential feel of the neighborhood. Small single family properties with a good size yard. I'm not a fan of one or two of the newer properties that don't allow for some yard. It crowds the space.

---

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

---

**Q4: Choose any or describe other types:**

Single-Family

---

PAGE 3: Transportation & Infrastructure

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalks in poor condition,  
Use this box to describe other problems or provide specific details and locations  
The sidewalks on Ash near McBain are crumbling.

---

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Not that I am aware of.

---

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

No, I am happy with the proximity of gas stations/grocery stores and other commercial services in the area.

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

The sidewalk on Ash near McBain needs repair/improvement. It is crumbling and very narrow.

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). sidewalks in poor condition,  
potholes or other street issues, street light needs

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

The businesses along I-70 (such as BMW) really like to park along the residential streets which makes everything difficult.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

I think it's fine

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Spencer, especially, needs sidewalks.

---

**PAGE 4: Land Use & Zoning**

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9. 2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

*Respondent skipped this question*

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

*Respondent skipped this question*

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

I really enjoy the ethnic and cultural diversity of our neighborhood. It would be incredibly upsetting if that went away.

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

---

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

safe, centrally located, affordable, walkable, livable

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

better sidewalks on main streets; better maintenance upkeep of homes and properties; less chip and seal and more overlay for street maintenance

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family, Multi-Family,  
Neighborhood Office or Commercial ,  
Mixed Use Development ,  
Other (please specify)  
this question is really vague; on my block single family only, in the study area these other uses are applicable

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition, potholes or other street issues ,  
Use this box to describe other problems or provide specific details and locations  
less chip and seal and more asphalt overlay projects would be preferred. Some streets may need reconstruction and green infrastructure should be implemented at that time.

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

speeding on Donnelly, Mikel and Hardin; Mikel street is very dangerous with the funny angle, parking on the street and speed of cut thru traffic.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

Not for our family.

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Sidewalk on Broadway in very poor shape. Major streets and cut thrus with sidewalk gaps need to be prioritized over the more residential blocks. Bernadette, Clinkscales, Pershing, I70 Drive and Mikel should be a priority.

---

**PAGE 4: Land Use & Zoning**

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

Offices just west of Westlakes hardware could use some revitalization. Areas around West Middle school could use some extra care to help the preteens feel safe. Incentivize property owners to do maintenance on their homes for the "poor" conditions.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Prefer that the neighborhood blocks be R-1 instead of R-2. There are some areas that could transition to being PUD or multifamily, especially areas near Gerbes or the West Worley area.

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. **Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Sidewalks everywhere. Along Worley would make sense.

PAGE 4: Land Use & Zoning

## Neighborhood Planning- Initial Kick-Off for West Central Area of Columbia

**Q9:** The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.

*Respondent skipped this question*

---

**Q10:** Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.

Stricter enforcement for existing houses. Some are so bad that they discourage others in that area.

---

**Q11:** Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. ---

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, lots of trees, affordable, narrow lots, deep lots, social, poor infrastructure, wide streets, centrally located, friendly, Other (please specify)  
Its a great neighborhood where people are friendly and generally take care of their property. Although it is mixed w/ lots of rentals, they are also adequately maintained and generally rent to good neighbors. It is diverse somewhat in race/ethnic makeup and also retirees as well as young families. Our street is broad w/ lots of older trees. We can easily walk downtown , to work, to library, and many people walk, run, and bike down our street.

---

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

*Respondent skipped this question*

---

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

---

**Q4: Choose any or describe other types:**

Single-Family, Neighborhood Office or Commercial , Accessory Dwelling Units

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition, sewer backups, electric outages

---

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Too many cars for the # of pedestrians and children playing, cars speed down greenwood between Ash & Broadway; no sidewalks!

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

It would be nice if we could walk to a restaurant around garth and Broadway is already commercially toned so that are would be good.

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

the sidewalk on the northside of Broadway is so broke and uneven it is difficult to use. There are no sidewalks down our street (Greenwood) despite the fact that there is a lot of traffic, along with many people running, biking, and walking.

---

#### PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

See above response.

For 9.1

I can't speak to the greater area of the map but our neighborhood has as much traffic as it can bear. The property values map make me nervous as I don't want to see smaller housing units destroyed so large developments can move in, forcing people out that have fewer options.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

PAGE 2: Housing & Neighborhood Character

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, affordable, deep lots, social, small blocks, centrally located, eclectic, safe, friendly

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

better sidewalks  
more distinctive bike lanes

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes,

Other Styles (please be specific)  
I would prefer to conserve the craftsman style, as noted above, to maintain the charm of this area. New houses are cookie cutter boxes with no soul.

**Q4: Choose any or describe other types:**

Single-Family

---

PAGE 3: Transportation & Infrastructure

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sewer backups,  
potholes or other street issues

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

I live on the east side of again st. and people drive far too fast down towards Anderson. I would love to have more speed bumps placed to slow people driving speed.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, affordable, narrow lots, well-connected, deep lots, poor infrastructure, centrally located, grid streets, friendly

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

sidewalks.  
Good bike lane on ash.  
Home and community gardens, green building  
funky dyi innovations  
Wish there were coffee shops, local restaurants a little closer.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes,  
Other Styles (please be specific)  
The craftsman bungalows are precious. (Preservation)  
New buildings in the style would be good only in very limited spaces. Otherwise, I want to see eclectic, innovative, sustainable, energy-efficient homes. This part of town could be creative, vibrant, environmental.

**Q4: Choose any or describe other types:**

Other (please specify)  
single family and ADU in central part, with multi-family near commercial or along main streets.

---

**PAGE 3: Transportation & Infrastructure**

---

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

The west-blvd worley corner. A neighborhood coffee-shop or restaurant or west-B'dway.

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Sidewalks for kids play and getting to school -- dont know where they are needed.

---

**PAGE 4: Land Use & Zoning**

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

9.1  
Commercial area around health dept could be used for cafe or some kind of community hang out, or offer services-esp if density and non-motorized transportation use increase.  
9.2 Low property values on ridgeway, hirth, sunford, alexander reflect that houses are small, old and AFFORDABLE. This is a fixer up neighborhood for many people and a pretty good place to live. The WANA neighborhood assoc. was born in this area. Maybe there should be another metric for value.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Some mixed-use and multi family along worley, clinkscales could be nice if done well. Multi family on atkins. Emphasis on affordable re-dev.

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? **Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

*Respondent skipped this question*

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

*Respondent skipped this question*

PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9. 2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

*Respondent skipped this question*

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

*Respondent skipped this question*

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

*Respondent skipped this question*

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

lots of trees, poor infrastructure,  
Other (please specify)  
Infrastructure is very very poor

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

*Respondent skipped this question*

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes,  
  
Other Styles (please be specific)  
New homes to emulate their styles.

**Q4: Choose any or describe other types:**

Other (please specify)  
A mixture of development would help to improve the neighborhood

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sewer backups, potholes or other street issues ,  
electric outages,  
Use this box to describe other problems or provide specific details and locations  
The specific area is off of banks ave

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

None

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

We need more neighborhood planning around the dean, banks, and madison area.

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

I would like to see sidewalks on one side of the street. At the present time people are walking in the middle of the street.

---

**PAGE 4: Land Use & Zoning**

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

Neighborhood area is at risk and is in need of assistance. Improvement in the residential area would greatly benefit the blight in the neighborhood.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

Rezoning of the deteriorating area would greatly help in revitalizing the community.

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. **PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, lots of trees, deep lots, social, wide streets, centrally located, safe, friendly, Other (please specify) Gary St. is very wide

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Keep it residential

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family, Multi-Family

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

Use this box to describe other problems or provide specific details and locations  
I walk from Gary st to Natural Grocers. It would be safer if the sidewalk went through on Bernadette

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

*Respondent skipped this question*

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Might be good to put a sidewalk on the north side of gary st. As I wrote before on Bernadette the sidewalk does not go through, so I have to push my cart in the street on the gaps.

PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9. 2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

we have a lovely green area partly wooded, partly wildflower meadow that we and our neighbors enjoy. We do NOT want it labeled undervalued; we do NOT want it developed. You have it marked "No Cant Land" It is being used for green space to walk in on paths.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

**IP Address:** 50.81.66.35

---

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, lots of trees, affordable,  
deep lots, social, poor infrastructure, grid streets,  
eclectic, safe, friendly,  
Other (please specify)  
Small homes with large back yards- mature trees. A  
place where lots of folks walk the streets for  
recreation.

---

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

single- family home and ownership  
limited through traffic on side streets

---

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes,  
Other Styles (please be specific)  
Shouldnt the preservation commission be tasked with  
creating browd design guidelines for this  
neighborhood? That said, one of the neighborhoods  
charms is small homes in a variety of styles. I think  
size and footprint are more important to maintain the  
architectural style.

---

**Q4: Choose any or describe other types:**

Single-Family, Accessory Dwelling Units,  
Other (please specify) Question mark next to ADU

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition,  
sewer backups, street light needs, electric outages,  
Use this box to describe other problems or provide  
specific details and locations  
North Greenwood Ave could use a couple more  
streetlights.

---

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

North Greenwood Ave has a problem with speeding thru traffic. Its width makes it a favorite for those taking a short cut or trying to avoid the stop light at Broadway and West Blvd.

Broadway is a mess in the afternoon commute.

---

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

West Blvd. north of Broadway

Broadway west of West Blvd.

---

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Our street does not have sidewalk, but it is so wide, sidewalks probably wouldnt be used. I would like to see some sort of traffic softening elements added to our street to slow down the large amount thru traffic that uses it.

---

#### PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

I worry about low property values moving south of ash. I feel that our neighborhood (Anderson and N. Greenwood is vulnerable, I worry about more properties falling in the hands of absentee owners and being exploited as rentals

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

These are great affordable homes for young and first time home owners. I would like to see the city encourage live in ownership of these homes

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

Given the city's recent interest in declaring large parts of the neighborhood blight to encourage tiff deals, I am concerned about the future of this neighborhood. I would like this area to remain predominantly in the hands of the home owners and not fall in to the hands of absentee land owners with no connection to the community.

I also would like to see us help this remain a place where first-time home owners can find affordable properties. That is how we came here 16 years ago.

PAGE 2: Housing & Neighborhood Character

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

walkable, affordable, deep lots, wide streets,  
large lots, centrally located

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

*Respondent skipped this question*

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family

---

PAGE 3: Transportation & Infrastructure

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

street light needs,  
Use this box to describe other problems or provide specific details and locations  
street needs blacktop. West Blvd N- Exposed rods in road noisy. Also possible speed limit enforcement.  
Noise pollution is a real issue.

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

West Blvd in general, but especially west blvd n as people enter.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

A neighborhood market would be helpful.

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

It would be ideal to have sidewalks on both sides of the whole of the each road.

---

**Q9:** The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9. 2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.

*Respondent skipped this question*

**Q10:** Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.

Low income senior housing would be a great asset in the community

**Q11:** Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. PAGE 2: Housing & Neighborhood Character

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, tight-knit, deep lots, social,  
centrally located, eclectic, friendly,  
Other (please specify) Anderson Ave

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Trees

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family,  
Other (please specify) None

---

PAGE 3: Transportation & Infrastructure

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

Use this box to describe other problems or provide specific details and locations  
None

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Lots of street parking due to inadequate driveways to many shared driveways.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

No.  
I am in a yellow one. But I am very close to D+H drug and feel well served. However I am not a bus user. Broadway needs better sidewalks.

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Broadway sidewalks between Garth and west blvd are in horrible shape. These are (or would be) heavily trafficked.

---

PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9. 2. PAGE 2: Housing & Neighborhood Character

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, lots of trees, large lots, friendly

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

We live on west blvd n. The traffic and road noise is the worst thing about living here. Noise pollution from the concrete road an fast [way over the speed limit] traffic and big trucks is the issue. We love our house and neighbors but hate the noise.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family

---

PAGE 3: Transportation & Infrastructure

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sewer backups, street light needs, electric outages

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

703 West Blvd north is our homes. The amount of traffic is heavy. The road noise pollution is intense from the breaks in concrete road to the large, heavy trucks that are numerous. We can literally feel the vibration from big trucks on the road in our house.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

*Respondent skipped this question*

**PAGE 4: Land Use & Zoning**

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

- 9.1  
I would not like for more business to be added to the area of west blvd north. I am concerned our neighborhood will be consumed and value decreased.
- 9.2  
If people had more opportunity to own their own home instead of being rental property people would be more likely to invest in appearance and care of the home and neighbors.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

No more businesses  
More home owner opportunities.

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

As Columbia grows I would like to preserve the bungalow look and feel to our neighborhood. My concern in the excitement to grow and prosper via business the small home owners will literally be bulldozed out of the way. I would like to know what is going on but am not in a position for leadership.

---

**PAGE 3: Transportation & Infrastructure**

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

Use this box to describe other problems or provide specific details and locations

There is no sidewalk. Other wise fewer problems.

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

The traffic is under control.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

n/a

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

No sidewalks

---

**PAGE 4: Land Use & Zoning**

Neighborhood Planning- Initial Kick-Off for West Central Area of Columbia

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9. 2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

9.1

As is limited

9.2

The neighborhood has improved in recent years. Could be updated

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

I do not want rezoning

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

Glad the city is looking into things.

---

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

**PAGE 2: Housing & Neighborhood Character**

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, walkable, tight-knit, lots of trees, social, centrally located, grid streets, eclectic, friendly

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Affordable and low income housing. I see a bit of gentrification.

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes

**Q4: Choose any or describe other types:**

Single-Family, Multi-Family, Accessory Dwelling Units

---

**PAGE 3: Transportation & Infrastructure**

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalk gaps, sidewalks in poor condition, sewer backups, stormwater or drainage issues, potholes or other street issues, water main breaks, electric outages

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

Speeding on Anderson is very bad.

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

Almost all the commercial hubs on the map are places I wouldn't walk to, I would like small grocery/general stores instead of convenience stores/ gas stations

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

Sidewalks all over on BOTH sides of streets. Poor traffic engineering encourages speeding.

---

**PAGE 4: Land Use & Zoning**

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

9.1 We should be down-zoned to R-1

9.2 Plenty of areas I would like to help people buy their rental property and reduce the number of tenants and increase home ownership

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

See above

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

Sorry to be suspicious but I'm not sure I trust this process. Seems we regularly get asked for our ideas of what we want and then whatever was decided originally in advance gets done, once trust is lost it doesn't come back easily.

---

**Q12: Are you interested in serving in a leadership or advisory role for this neighborhood plan or others? Want more information? Please provide your contact information and staff will get in touch.**

PAGE 2: Housing & Neighborhood Character

---

**Q1: How would you describe the character of your neighborhood? You may refer to your street or the broader area if you like. Example options are available to choose from or you may provide information in the comment box.**

livable, lots of trees, affordable, small blocks, large lots, centrally located, eclectic, friendly, Other (please specify)  
One of the older neighborhood that have character and we are losing these areas in Columbia

---

**Q2: What characteristics (of streets, places or buildings) would you like to see more of in your neighborhood?**

Keep as single family homes. If new have then keep up what is currently there or build with similar character. Less rental. Paved driveways.

---

**Q3: Would you like to see conservation standards to protect this style of housing and/or encourage new homes to emulate this style? Or any other styles?**

Yes,  
Other Styles (please be specific)  
This type of character is what Columbia needs to keep.

---

**Q4: Choose any or describe other types:**

Single-Family

---

PAGE 3: Transportation & Infrastructure

---

**Q5: Please describe any infrastructure-related problems within your neighborhood:**

sidewalks in poor condition

---

**Q6: Are there any traffic-related problems in your neighborhood (e.g., congestion, speeding, poor street conditions, poorly functioning traffic signs/signals)? If so, please describe the location and where the problem exists.**

My house is near the corner of Broadway and Clinkscales. The light has lots of traffic and causes issues getting out of the driveway. Adding a business or anything outside of a single family home would add to the congestion.

---

**Q7: A neighborhood is considered to be walkable when commercial services are within a five-minute walk of any residence (approx. 1/4 mile). Using this guideline, and map below, are there any locations that you believe might benefit from additional neighborhood services? Please be specific.**

Farmers market- help make a year around pavilion that can be used by many farmers.

---

## Neighborhood Planning- Initial Kick-Off for West Central Area of Columbia

**Q8: Sidewalks and public transit services are important to facilitating safe and efficient alternatives to automobile transportation, and are part of a sustainable transportation network. Where do you feel sidewalk extensions or improvements are needed in your neighborhood? What transit improvements would you like to see? The map above may provide assistance.**

sidewalk on both sides of Clinkscapes would be great.

---

### PAGE 4: Land Use & Zoning

---

**Q9: The following maps (Land Use and Zoning, Property Values, & Housing Condition), provide key indicators of a neighborhood's health. Please use the comment box below to answer questions for questions 9.1 and 9.2. 9.1. The Zoning and Land Use Map shows how land is being used presently (existing land use), and what it can be used for (zoning). After looking at the map, do you have any suggestions for zoning changes that will encourage positive development opportunities and/or limit incompatible development opportunities? 9.2. Property values and housing conditions show where land may be undervalued, underutilized, or unmaintained. In some cases these circumstances may lead to further disinvestment, deterioration, blight, and even increased crime. Based on these maps and your own local knowledge, are there any areas within the neighborhood that you think may be at risk and would benefit from assistance to help stimulate reinvestment and stability.**

9.1

Single family home or senior citizen housing. Rezone to R-1

9.2

Area is high density in need to be revitalized to keep cheaper homes in central columbia. Make it rental- make landlords have to keep up property to neighborhood standards.

---

**Q10: Based on these maps and your own knowledge of the area, what revitalization opportunities do you see for the neighborhood? Responses may include specific project areas and ideas, as well as changes in land use and/or rezoning of property.**

rezone to R-1

---

**Q11: Thank you for taking this survey. Do you have any additional comments or questions regarding this neighborhood plan? Survey responses will be collected and analyzed for the next steps in the planning process: finalizing the neighborhood planning boundary for this area, identifying issues and opportunities and developing priorities and recommendations prior to the development of the plan draft. Please also consider forwarding this survey link to others in the area you think should be involved!**

I hope that you truly listen to what people say without already having ideas.
