

TO: CATSO Coordinating Committee

FROM: CATSO Staff

SUBJECT: Item 6 – 2040 Update to the Long-Range Transportation Plan

DATE: August 16, 2013

Attached is CATSO staff's status report and updated timeline for the ongoing 2040 update to the existing 2030 Long-Range Transportation Plan (LRTP). This was provided to CATSO's MoDOT and OneDOT (FHWA-FTA) contacts during the week of July 29, as were the initial drafts of Chapters 1 through 3. These chapters, plus chapters 4 and 5, are also attached for the Committee's review.

Future drafts of the 2040 LRTP draft will incorporate the goals, objective, priorities and needs identified by stakeholders and the public. The goals, objectives, priorities and needs input survey will continue to be open until August 31. This survey and more information on public input processes is available online at:
http://www.gocolumbiamo.com/community_development/planning/boards_and_commissions/catso/2040Plan.php

CATSO staff would appreciate any suggested edits or comments from the Committee on the attached draft chapters. Please provide such revisions or suggestions to staff by the first week of September if possible.

At present, the 2040 LRTP update does not include the CATSO modeling component, as this is dependent upon the availability of the Census Bureau's 2010 Census Transportation Planning Package (CTPP) data by Traffic Analysis Zone (TAZ) for the Columbia Metro area. The data delivery is scheduled for August, 2013. The LRTP update is scheduled for formal completion and adoption in December, 2013.

The updates to the land use and other components of the CATSO traffic model will be completed at a later date as practical. At that time, staff will bring an amendment forward for CATSO Technical Committee review and recommendation.
