

## **A RESOLUTION**

declaring the necessity for construction of roadway pavement improvements on Clark Lane, between Woodland Springs Court and McKee Street; stating the nature of and the estimate of the cost of the improvement; providing for payment for the improvement; providing for compliance with the prevailing wage law; and setting a public hearing.

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF COLUMBIA, MISSOURI, AS FOLLOWS:

SECTION 1. The City Council deems the construction of roadway pavement improvements on Clark Lane, between Woodland Springs Court and McKee Street, necessary to the welfare and improvement of the City. Specific roadway improvements are as follows:

- Widening the pavement by five-feet on both sides of Clark Lane.
- Narrowing the driving lanes from 12-feet to 11-feet.
- Re-striping the driving lanes to provide six-foot wide shoulders on both sides of Clark Lane,
- Replacement of approximately 4,300 feet of stormwater pipe east of Robert Ray Drive.

SECTION 2. The nature and scope of the improvement shall consist of furnishing all labor, materials, transportation, insurance and all other items, accessories and incidentals thereto necessary for the complete construction of the improvements.

SECTION 3. The estimated cost of this improvement is \$600,000.00.

SECTION 4. Payment for this improvement shall be made from Capital Improvement Sales Tax funds and such other funds as may be lawfully appropriated.

SECTION 5. Any work done in connection with the construction of the improvement specified above shall be in compliance with the provisions of the prevailing wage laws of the State of Missouri.

SECTION 6. A public hearing in respect to this improvement will be held in the Council Chamber of the City Hall Building, 701 E. Broadway, Columbia, Missouri, at 7:00 p.m. on January 21, 2014. The City Clerk shall cause notice of this hearing to be published in a newspaper published in the City.

ADOPTED this \_\_\_\_\_ day of \_\_\_\_\_, 2013.

Re: Public Hearing - Clark Lane Improvements - Woodland Springs Court to McKee Street

#### **EXECUTIVE SUMMARY:**

Staff has prepared for Council consideration legislation setting a public hearing for January 21, 2014, for the construction of roadway pavement on Clark Lane from Woodland Springs Court to McKee Street. The project includes widening the pavement and re-striping the driving lanes to provide 6' wide shoulders on both sides of the road. The total project concept cost estimate is \$600,000. An Interested Parties (IP) meeting was held November 6, 2013.

#### **DISCUSSION:**

The project under consideration involves widening the pavement five feet on both sides and narrowing the driving lanes from 12 feet to 11 feet, in order to provide six-foot-wide shoulders on both sides of Clark Lane from Woodland Springs Court to McKee Street, as shown on the attached diagram. Additionally, a stormwater pipe just east of Robert Ray Drive, that carries water under Clark Lane, is extensively corroded and will need to be replaced. This will result in the closure of Clark Lane for at least three days. The total project length is approximately 4,300 feet.

This project can be completed relatively quickly; no federal funding is involved and all work is expected to be accomplished within the existing right of way, and no additional permanent easements will be needed. This stretch of Clark Lane is currently in the jurisdiction of MoDOT; therefore, the improvements will be coordinated with MoDOT.

These improvements will provide a safer path for non-motorized users. In addition, the full-depth asphalt pavement will allow the shoulders to serve as future travel lanes, with a forthcoming project to improve Clark Lane to a complete street with dedicated bicycle lanes and sidewalks, as shown in the attached cross-section. The cost estimate for the complete street improvement is \$6.2M; MoDOT funds for the project could be available in 2016.

An IP meeting was held on November 6, 2013, with eighteen (18) people in attendance. Thirty-seven (37) comments were received and are attached. The majority of comments received expressed the urgent need for sidewalks and pedestrian safety improvements along Clark Lane.

#### **FISCAL IMPACT:**

The project cost estimate for widening the pavement five feet on both sides and narrowing the driving lanes from 12 feet to 11 feet, to provide six-foot-wide shoulders on both sides of Clark Lane from Woodland Springs Court to McKee Street, is \$600,000. The funding source is Annual Streets 0.25% Capital Improvement Sales Tax.

#### **VISION IMPACT:**

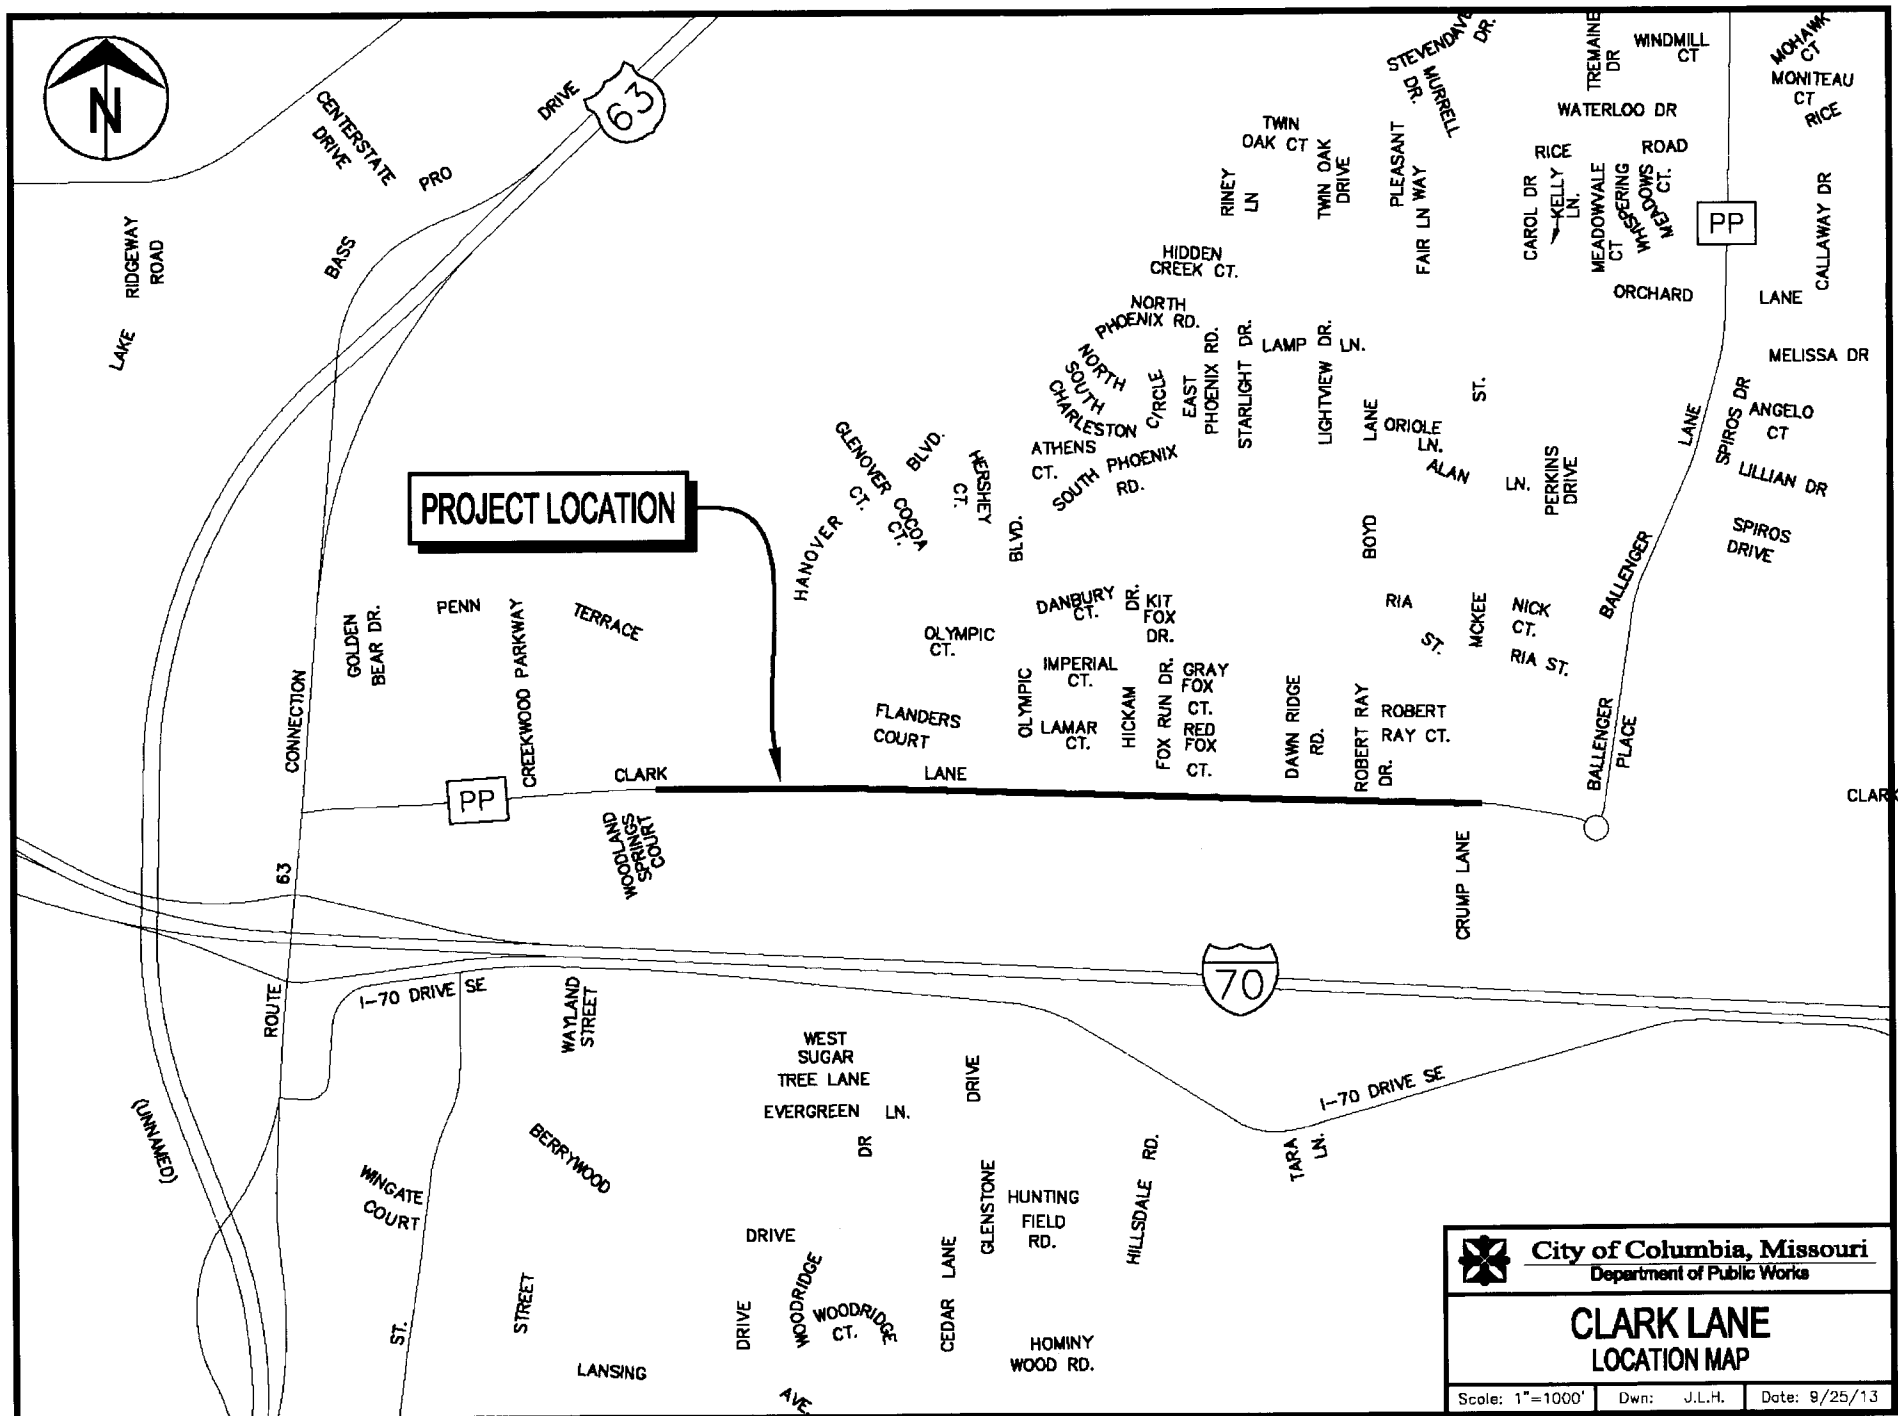

<http://www.gocolumbiamo.com/Council/Meetings/visionimpact.php>

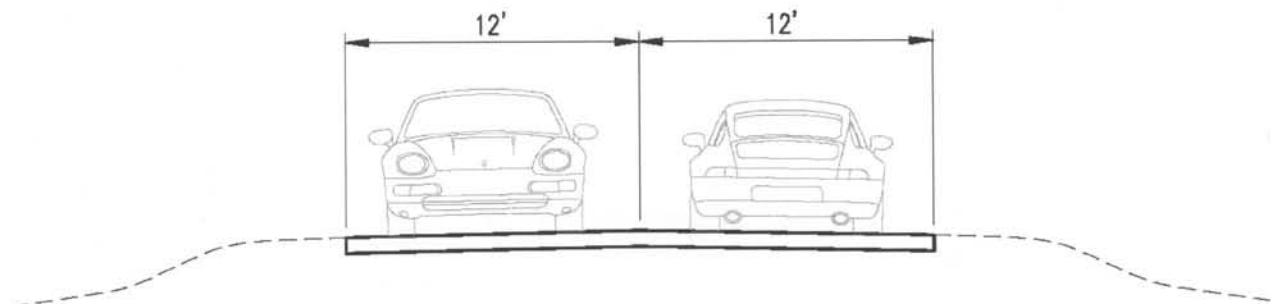

A network of safe roadways in and around the City will provide sustainable, efficient mobility to vehicular travel and other modes in a complimentary manner.

#### **SUGGESTED COUNCIL ACTIONS:**

Following Council discussion and public input, Council should make a motion directing staff to proceed with plans and specifications for the project.

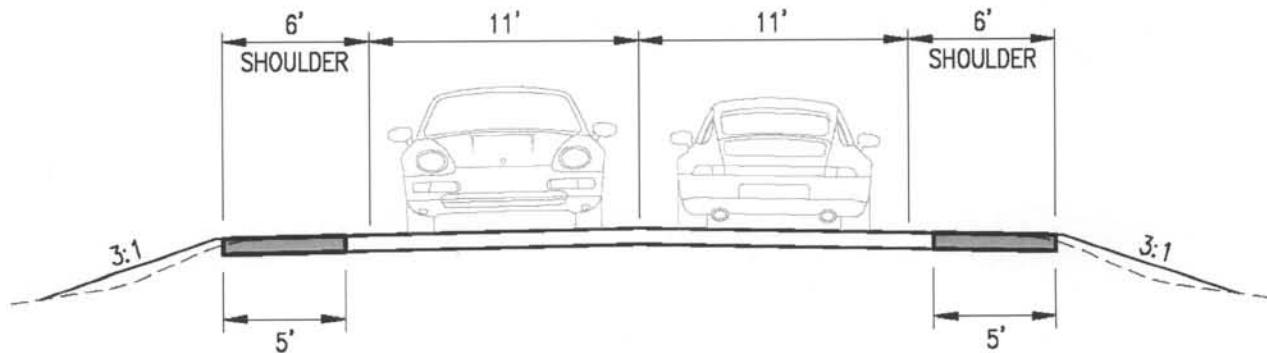

FISCAL and VISION NOTES:					
City Fiscal Impact Enter all that apply		Program Impact		Mandates	
City's current net FY cost	\$7,934.00	New Program/ Agency?	No	Federal or State mandated?	No

Subject: [PubW]: Pine Grove Sub; Clark Ln. Non Motorized Improvement  
To: "[pubw@gocolumbiamo.com](mailto:pubw@gocolumbiamo.com)" <[pubw@gocolumbiamo.com](mailto:pubw@gocolumbiamo.com)>

Good morning. I attended the informal open house meeting on 11/06/13 concerning the project above. Central owns the property just southwest of the Casey's convenience store on Clark Lane.

Central has no objections at this time with widening the paved surface 5' on each side of Clark Ln. It should, however, be noted that from time to time Central has trucks, trailers and equipment that will need to access our substation property. Currently, there is a vacant lot across from our property that gives our personnel an area to pull off the road so that the gate may be opened to allow any needed equipment access to the substation.

It was also brought to my attention at this open house that there are preliminary plans to widen the road even further in the future. Central would be very interested to be a part of this design process as early on as possible. Any further widening past the 5' discussed above could potentially restrict access to a point that would create a hazardous situation to personnel as well as the general public.

Please keep me in the loop on the design process of both of these projects.

Subject: [PubW]: Input on Clark Lane  
To: "PubW@GoColumbiaMo.com" <pubw@gocolumbiamo.com>

To whom it may concern,

I read the article in the newspaper about input on Clark Lane. I think the biggest change that needs to be done is having at least one sidewalk on either side. Throughout the day and night people are walking on the side of the road. It is especially dangerous at night, I felt like I could have hit a person couple of times because I did not see them walking beside the road until I was right near them. I hope you consider making a sidewalk to make it safer for pedestrians and drivers.

Thanks,  
Jessica Clark

We really need sidewalks, not  
an "apron" along Clark Lane. I  
have seen people, myself included,  
many times walking in the ditch  
to avoid being hit by a car. This  
includes children on bikes. With  
the addition of the Links, traffic  
on Clark Lane has increased tremendously.  
The new round-a-bout @ Clark/Ballenger  
is loaded with sidewalks, AND bike  
lanes... to nowhere!!! People even  
waiting for the bus are hoping for the  
best everyday! Please realize the north/  
east side is part of Columbia also &  
includes many taxpayers!!! Bring us trail & >

Sidewalks, like the rest of Columbia

**Comments:** I recommend incorporating a center turning lane (if not for the overall distance at least at turning points). Also only place the pedestrian walkway only on one side (North) rather than both & add cross walks ever so often from the South side to the North. I advise caution if the walking lane is attached to the auto lane because I fear autos will also use it & place pedestrians at risk. Either a grassy separation or alternatively a rumble strip to caution drivers. There is more space on the back of this form.

Please send comments by November 20, 2013. Thank you for your input!

- ☐ I support the project as proposed.  
☒ I support the project with the following exception noted below.  
☐ I do not support the project.

**Comments:** We don't want asphalt extensions, we want real sidewalks and we want them now, not in 2014, or 2015!

Do some one have to get killed or hurt bad in order for you council people to really understand the importance of a real need for sidewalks now!!!!

**Comments:**

No to current plans. The city should not be involved in making building something that is unsafe and dangerous

## Clark Lane Non-Motorized Improvement

While we agree that the shoulders of Clark Lane from Woodland Springs to McKee are bad and not suitable for pedestrians or cyclists, we see a real problem with people thinking that Clark Lane should be made handicap accessible. Your info clearly says that Clark Lane is a Minor Arterial and as such is built to carry traffic. There are several forms of transportation available to the handicapped and elderly and there is the city bus system. That being said we have a couple suggestions to consider in the plan.

1. Rip strips on driving lane side of shoulder.
2. White slash marks on shoulder for 4' from lane then a solid white stripe two feet from edge of shoulder to form a suggested walk area.
3. Crosswalk at Pine Grove Trailer Park - lots of people cross there.
4. Advertising campaign for all city streets encouraging reflective stripes on clothing when walking at night. Also, advise to walk toward traffic especially at night.
5. LOWER SPEED LIMIT IN THIS AREA!!!
