Executive Summary

Setting a public hearing for March 16, 2015, for the construction of County House Trail Phase 2, as shown on the attached location map. Interested parties (IP) meetings were held June 12, 2014, and August 26, 2014. The construction concept cost estimate for the project is approximately $775,000.

Discussion

The County House Trail Phase 2 project consists of constructing a ten-foot-wide concrete trail from the north terminus of Phase 1 of the County House Trail at the intersection of Stadium Boulevard and College Park Drive, continuing west around the Southwest Swim Club to Oxford Drive. From there the trail will continue north along City-owned right of way to Rollins Road.

The trail construction will include ten-foot-wide, six-inch-thick reinforced concrete, and will be constructed mostly on City right of way. There is an existing path used for utility maintenance access that will be utilized where feasible. Approximately eight (8) permanent easements will be needed, and approximately 85 trees, 6” and larger, are expected to be removed.

The first IP meeting was held on June 12, 2014; forty-three (43) people signed in and thirty-six (36) comments were received. The second IP meeting was held on August 26, 2014; sixty-one (61) people signed in and seventy-six (76) comments were received. Different options were presented at the IP meetings and the proposed alignment was selected based on the comments received.

The construction concept cost estimate is $775,000, and will be paid for using GetAbout Columbia funds. Earlier cost estimates for this project came in at $445,000. The increase in cost stems from the change in alignment as a result of the IP meetings. The new alignment results in a longer trail and includes additional retaining walls, extending the box culvert under Stadium Boulevard, additional tree clearing, and one additional crossing of the County House Branch.
Fiscal Impact

Short-Term Impact: The construction cost estimate for this project is $775,000, and will be funded by GetAbout Columbia.

Long-Term Impact: The additional cost of maintenance for this trail is approximately $4,000 per year.

Vision, Strategic & Comprehensive Plan Impact

Suggested Council Action

Following Council discussion and public input, Council should make a motion directing staff to proceed with plans and specifications for the project.

Legislative History

8/26/14 - Interested Parties meeting #2
6/12/14 - Interested Parties meeting #1
9/03/13 - (REP 134-13) Council approved remaining priority projects, including County House Trail Plase 2, for implementation with GetAbout round 2 funding.
3/19/12 - (REP 48-12) Council approved top five priority projects for implementation with GetAbout round 2 funding
7/29/10 - (REP 74-10) Staff reported the City would receive an additional $6 million for Non-motorized funding.

☐ I support Option 1.
☐ I support Option 2.
☑  I support either option.
☐ I support the project with the following exception noted below.
☐ I do not support the project.

Comments: Looking at the map option 2 looks
better simply because it does not run along side the road (College Park Dr) next to
the swim club, but I haven’t walked option 2
so I’m not certain if there are other
reasons not to support option 2.

There is more space on the back of this form.

☑️ I support Option 1.
☐ I support Option 2.
☐ I support either option.
☐ I support the project with the following exception noted below.
☐ I do not support the project.

Comments:
Option 1 is much preferable to Option 2. Option 2 is problematic for a number of reasons:
1. There are significant safety issues related to a street crossing so close to high speed traffic turning off Stadium to College Park. Cars traveling from the east on Stadium turning right on College Park oftentimes do this at fairly high speeds as they are trying to leave a high speed stretch of Stadium where there is no turn lane to allow traffic to slow sufficiently prior to the turn. Even cars turning left onto College Park from Stadium often turn quickly to get out of traffic. While the crossing for Option 2 appears to be set back from the intersection a bit, the combination of speed and the lack of visibility due to the hill are a significant risk to bicyclists.

2. The costs of Option 2 would also be substantially higher than Option 1 due to the topography and physical attributes of the site. The trail will be have to be longer following the curve of the creek resulting in increased construction costs. This option will be more expensive due to the need to deal with the sharp grade of a trail descending from College Park to the bottom land along the creek. A trail along the creek will likely be subject to flooding which will increase maintenance costs.

3. The costs of Option 2 will also be higher because of its impact on an existing activity. The trail would significantly disrupt several areas of the private swim club, including the sand volleyball court, tennis courts, shuffle board courts, swings, bike racks, a portion of the parking lot. This route would also require relocation of a major utility pole near the parking lot. In addition, this route would cut off access to a significant portion of swim club property reducing the overall value of the property. The cost of the easement from the swim club, along with the cost to replace disturbed amenities, and to maintain the privacy of the club, would likely be substantial.

6. Bicycle traffic already dangerous.

7. Drainage on road & creek already a problem.

Please keep stadium + Rollins as is. Enough road planning + invasion & destruction as it is!!!!

P.S.: Public already steals everything in yard. Has no pride in our neighbor hood. Let their "pets" roam. What public would this trail bring!

☐ I support either option.
☐ I support the project with the following exception noted below.
☐ I do not support the project.

Comments:

1. I am concerned about the existing wildlife in the woods. Enjoying the outdoors also includes enjoying the deer, foxes, etc.
2. I am concerned about the 'river' that appears after a rain. A trail would not be usable & the water would eventually damage a concrete trail.
3. I am concerned about the fact that the trail just ENDS. It goes nowhere.

There is more space on the back of this form.

It's like the "bridge to nowhere" in Alaska.

4. I am concerned about the possible parking situation on that section of Rolling. When I back out of my drive way, I won't have a clear view of Rolling west toward Stadium.

5. I am concerned about the amount of my property that will be "taken" from me. The proposal shows a zigzag trail coming up through my land. I love the woods. How many more trees will be cut down without my permission? I also own a dog who will become agitated with people in our back yard. Don't zigzag on my property.

Comments: We live at 1055 College Park Drive, and our driveway backs out onto Oxford Drive. When the swim club is open, Oxford Drive is already an extremely narrow street, as cars will park on both sides of the narrow street because of the swim club.

Not only does this make it difficult to get out your driveway (it's already backed into one vehicle!), but it also makes it very hard to see who is turning onto Oxford Drive from College Park or from the SWA parking lot. Collisions have been narrowly avoided more than once. Adding cyclists to the mix frankly terrifies me. (Note: we will be adding a new driver soon!) For safety’s sake, I strongly urge the city to choose Option 2.

I think this is a great idea.

Great use of existing platting right of way.

Don't use Swasa property.

Wendy Liston

1906 Princeton

Project of Oxford

Don't forget traffic calming on college park.
Comments:

1. Am supportive of extending bike trail, but the proposed model doesn't support the immediate community along College Park — in that there is no way to reach the trail w/o using College Park, which is not a good biking street.

   Improvements need to be made to College Park's bike trails in conjunction with this work.

   Project appears to serve broader community more than immediate community.

2. Presence riparian zone - is this really the best + only option? College Cure sécurisés are already being proposed. Would want assurance this isn't disturbing the environmental establishment.

Comments: I would prefer an option that runs the new extension straight up the east side of College Park Dr. This would serve to combine the need to do speed control with improved pedestrian access, without any eminent domain issues - would accelerate children riding to school, etc. (see back for sketch)

I am looking forward to this extension of the County House Branch Trail. I prefer Option 2, although crossing College Park that close to the Stadium intersection is dangerous (right turning traffic from stadium).

Comments: We have a driveway that connects to Oxford Drive. The Swim club traffic and parking already creates a hazard when it is open. Putting busses on Oxford Drive, plus the car, will be quite dangerous. If Option 1 is chosen, city will need limit parking on that part of Oxford Drive.

Comments: Looks like a good project. Some concern about homeless or indigent population having access to the back of property along proposed trail.

I would suggest repairing stormwater drain Rollins before trail construction to avoid costly repairs (if needed) due to water over flow issues.

COMMENTS:

I do not foresee any meaningful users of this trail extension. It ends/start between two of the steepest grades in Columbia on Rollins Road.

For bicycle commuters to downtown, this trail will not be sensible to use. It will add several miles to the ride.

For wheelchair users, this trail will not be of any use due to the steep grades in both directions on Rollins.

For recreational cyclists, the trail will be difficult due to the Rollins grades.

For pedestrians, there is no meaningful parking/access at either end.

It would be a better use of public resources to make College Park safer for pedestrians and cyclists. Please consider a widened trail/sidewalk on the east side of College Park. This will be used for families to walk to Russell Blvd & will aid others in the community.

Jeremy Boyd
2977 Beechwood Dr.
As long as tree loss is minimal at the back end of our property—good for whoever wants to use it. We won’t be able to see any traffic from our backyard. I just don’t want to lose the screening trees.

Judy L. Stiefel
811 Cornell.

I agree w/ Jeremy—on 2417 chaster.
Can be usefulness for anybody but the immediateondo: is that about the trail, Wester College Park Sidewalk?

Option 1 okay w/me.
County House Trail Phase 2
Public Comment
06.12.2014

I am, as an avid trail user and an owner of property which will abut Phase 2, absolutely in favor of this extension.

This judicious use of public funds on an existing right-of-way will open up a beautiful area to public use.

Thank you for all your efforts.

Scott Lincoln
811 Cornell
Steve Spellman
720 E Broadway

I support this project. I used to live on Ridgemoor before Phase I was built.

Option 1 seems most practical as it cuts though a good piece of the gym club land & across College Park so near Stadium.

Good job of following existing City right of way as much as possible.
I think this is a great trail. I love that it connects this neighborhood and surrounding neighborhoods to the MRT. It encourages more novice cyclists and pedestrians to get outdoors and enjoy nature. Anytime you build you’re going to run into issues, nothing will be perfect but that shouldn’t stop us from building such a great amenity to Columbia.

Thanks for all your hard work developing this trail.

I prefer option #2.

Abby St. George
a1stgev12@gmail.com
Great Trail! We need so many more of these. The adjoining neighbors will really love this once built.

John Riddiac
We are very in favor of this project and the connectivity it will provide for non-motorized transportation.

Option 1 has some challenges in that it funnels the bike/ped/wheelchair traffic down a what appears to be a fairly narrow, occasionally heavily trafficked street.

Option 2 is going to be easier and safer for cyclists in that it avoids interaction with the Swim Club traffic. We would encourage you to consider a route West of the creek through the Swim Club property if the ownership is opposed to the current alignment.

On the blue section, either alternate alignment seems fine. Ideally, the neighbors will grant the easements necessary to avoid the creek crossings.

Annette Triplett
PedNet Coalition
Hi:

I'm writing you about the proposals for County House Trail Phase 2. I hope to attend the open house this evening, but in the event that I am unable to make it, I provide these comments.

I am a member of Southwest Swim Club, and my wife grew up as a member of Southwest Swim Club. Presently, the swim club enjoys a great deal of privacy and seclusion based on its location, which is one of its greatest assets. The proposed trail would alter the enjoyment of the property and decrease the value of membership in the club. In particular, option 2 of the proposed trail extension has the trail going through and across the land that the Swim Club uses for its sand volleyball courts and swing set. I object to this placement of the trail and you should expect that many members of Southwest Swim Club will join in this objection.

With both options, the department envisions a trail routed up the creekbed behind the homes off of the streets that intersect with College Park up to Rollins Road. There are likely to be environmental concerns with this trail, as that area serves as a necessary runoff/stormwater catchment area for the neighborhoods on both sides of the proposed trail. There are likely to be similar privacy concerns from adjacent property-owners who presently enjoy a similar sense of seclusion as the members of Southwest Swim Club. There may also be public safety concerns that arise from running the trail up that creekbed, as it will be a relatively dark, isolated, and potentially dangerous trail for pedestrians. Our teenage members of the Swim Club may deem this trail to be a safe way to return home when the Club closes at 9:00 PM, and given the darkness that will prevail at that time along the proposed trail, it may become a place for predators to lay in wait. It is also unclear where the trail is intended to go once it connects with Rollins at the proposed terminus.

Instead of routing the trail up the creekbed to Rollins, the Department of Public Works should consider extending the paved trail that presently terminates at College Park up the east side of College Park Avenue to Rollins. This would improve the safety and walkability of the neighborhood for families who want to have their children walk to Russell Boulevard Elementary School at the top of the hill. This would also largely eliminate the privacy concerns from Swim Club members, as well as the privacy concerns of neighbors whose homes presently enjoy a similar sense of seclusion.

As another alternative, Public Works could designate the street that surrounds Kiwanis Park to be a designated Bike/Pedestrian trial. I forget the name of the street, but this would also allow access to Rollins with minimal additional cost. This would not have the advantage of a wider walk/bike lane along College Park, but it would be a low cost alternative that would still provide a greater connection between Stadium/College Park and Rollins Road.

I understand that there may be a desire to keep trails and streets as separate transportation systems, but that goal is only as laudable as the proposals to support it. Since College Park Boulevard is already a relatively low traffic street (with the exception of school drop-off and pick-up times), there would be minimal disruption to automobile traffic from the placement of a widened sidewalk along the east side of the street. This would displace some on-street parking on that side of the street, but there is not a tremendous demand for on-street parking on College Park right now.

These are my thoughts, and I would welcome further dialogue with any member of Public Works staff about the County House Trail Phase 2 proposal or these comments.

Thank you for your service to Columbia.

Best,
Jeremy Root

Sam Budzyna, E.I.T.  
Public Works – Engineering Division  
City of Columbia

Dear Sam Budzyna,

I write, at your suggestion and reflecting both my own views and those of my wife (Barbara J. Bank), to put on record the concerns about plans for County House Trail Phase 2—Stadium Blvd. to Rollins Road that I recently expressed to you over the telephone. And as you know, my wife and I are long-term residents of Columbia who have long enjoyed using its innovative public facilities, and we also own property adjacent to this proposed trail extension.

In brief, two issues concern us about plans for this proposed extension. First, should this trail extension be built at all? As you know, the venue for the extension is the bottom of a ravine, presently a wilderness, whose embedded stream is subject to unpredictable, sometimes raging floods, silting, erosion, and stream-bed wandering. Thus, any trail constructed in this venue would inevitably experience periodic episodes of flooding and wash-out requiring costly repairs. Worse, we cannot imagine that many persons would make use of this extension which—in sharp contrast with the KATY trail, for example, would: serve no obvious user population, offer few-to-no attractive features, and require that users contend with a steep slope between Rollins Road and the bottom of the ravine where the rest of the trail extension would be located. Even initial construction of this extension would be expensive, and surely Columbia can find better uses for the tax dollars that would be required for constructing and maintaining this costly, fragile, and questionable facility.

Second, as we understand it, present plans call for paving this trail extension in concrete, and the major reason given for this intention is that maintenance is less expensive when a trail is covered by concrete rather than crushed stone. But we suspect that even a concrete trail would be periodically washed out by the severe floods that sometimes inundate the ravine where it would be placed, a paved trail would surely increase the severity of those floods, and—as Columbia learned from similar, now discarded, plans to pave the KATY Trail—concrete is less user-friendly.

Other persons, such as owners of adjacent properties that would be more severely affected by the proposed extension, may want to raise additional concerns, but the ones noted in this letter are already sufficient to suggest that a serious rethinking of plans for the extension is now in order.

Sincerely yours,

Bruce J. Biddle
County House Trail phase 2

Dan Harder <dan@midwestpropertymgmt.com>
To: scbudzyn@gocolumniamo.com, Barbara Hoppe <ward6@gocolumniamo.com>

Barbara and Sam,

I grew up in the neighborhood off of College Park in the 80s and attended Southwest Swim Club for many years. We would have loved that trail, so many of my friends rode their bikes to Southwest and that trail would have been great. I think a lot of people will use it and it will open up the trail system to a larger area of the old southwest. I had explored that area as a kid and it is basically wasted space in the city limits. I hope you consider the proposed trail to increase trail use in the old southwest. I think a lot of people will benefit from it.

Thank You,
Dan Harder
1803 Bluff Pointe Dr
I object to the city spending over $400.00 on extending the hike/bike trail onto a trail that will disrupt the privacy of so many homes. I know the City has the right-of-way to do this, but the rationale seems flawed. You've already spent a lot of money creating bike lanes all over town, let's use those and leave the citizens alone who have purchased homes nestled in the woods on the hopes they would find peace and privacy. Please conserve the time and money we have to spend on trails and abandon this idea of an overland trail through these homesites. I lived in that neighborhood and I know how precious a quiet, private home can be.

Subject: [PubW]: County House Trail Phase 2 comment
To: pubw@gecolumbiamo.com, ward4@gecolumbiamo.com, Jeff <Pasley.J@missouri.edu>

Dear Public Works staff:

At the Interested Parties Meeting on June 12, I submitted a comment form on which I stated a preference for Option 2. After further consideration, I would like to change my vote to “I do not support the project.”

Obviously I have a vested interest in this, as the clearly favored Option 1 would take 8-plus feet of our driveway and lower yard — and all the vegetation thereon, which currently buffers us from the swim club — and send cyclists whizzing past the end of our now-shortened driveway. Having already managed to hit a parked vehicle when backing out of this driveway, I’m terrified of the idea of hitting a cyclist. As we have a teen who will soon begin driving, this fear is only heightened.

Nor are my concerns, besides safety, only self-centered ones. Our neighbors will also have their views impaired, the creek environment will be disrupted, and the wildlife we all so enjoy will have their habitat invaded. (And how many more trees, which dampen the sound from Stadium Drive, can we expect to lose?) Since all of this is in the service of connecting two things — Rollins Road and the County House trailhead on Stadium — that are already connected by bike lanes on College Park Drive, the benefits do not justify the costs. Judging from the steady stream of walkers and cyclists that go by our house every day, people seem to be managing to get between the two quite well already.

I recently spoke with an avid cyclist and near-daily user of the current trail (who accesses it from the north via College Park Drive), and he noted that the planned trail would let cyclists out onto Rollins in the trough between two large hills. So even though the proposed trail would moderate the initial climb somewhat (which is presumably the major point of the whole exercise), a cyclist would immediately face a challenging climb in either direction on Rollins Road. To his mind, this defeats the purpose, and he considers the whole project an ill-advised use of city funds. I agree.

I hope Public Works and the City Council will decide to forgo this project. There are many claims on the city’s funds, and this project doesn't need to be one of them.

Respectfully,

Karen Pasley
1015 College Park Drive
Columbia, MO 65203
Dear Public Works staff:

Karen said much of what needs to be said, but I would also like to change my vote to "do not support." I filled out my comment format at the June 12 meeting before closely studying the plans and understanding just how invasive this project is going to be. By replacing trees with concrete, either option is going remove much of the buffer that Southwest Swim Club has from passing traffic, and expose the whole neighborhood much more to Stadium Drive. Option 2 will take out most of the buffer between our house and the swim club and between the swim club and College Park, while of course putting a public thoroughfare through our yard and adding a whole new level to the occasional chaos on Oxford Drive.

While I am a supporter and user of bike trails, County House Phase 2 seem to be quite an unnecessary one. The bike lanes on College Park are heavily used now, without incident, and seem to carry bikers and walkers quite successfully from this part of town down to the existing County House Trail, Twin Lakes, and the MKT Trail. This project is not going to provide new access to any major destination or street.

If safety is the object then this project (especially Option #1) will actually create several new hazards, crossing our driveway, Oxford Dr., and then College Park, at a point where cars achieve maximum speed coming down the hill or out of the Stadium intersection. Oxford is also going to have pedestrians in the street whether there is a separate trail or not, with people coming from their cars and all over the neighborhood on foot or bikes, and kids exiting the trail or lane to go across to the swim club at random points. The bike trail through our yard will just create one more stream of people and vehicles into what is already an unpredictable spot. It would be much cheaper and more effective to make biking on College Park a little safer by slowing down the cars with a lower speed limit or more traffic calming up the hill and a STOP SIGN or proper crosswalk at corner of Oxford Drive. Occasional speed limit enforcement over here would be a help, too. (If the trail must be built, eliminating some of the parking and painting a bike lane on Oxford Drive would seem like a better, cheaper option.)

The north end of this trail seems to present another safety hazard, since it will require cyclists to make a sharp turn at the bottom of a hill which is almost impossible not to go down at relatively high speed.

To sum up, this project seems to do far more damage than good, and surely the funds could be better used elsewhere. I enjoy cycling myself, and can see many more pressing needs than this trail. What about a better connection to or across Broadway from the south and west? What about getting bikers and pedestrians from the west side across the freeway to Cosmo Park and the north side bike trails? Money spent there would solve problems rather than causing them.

Yours,
Jeff Pasley
1015 College Park Dr.
Columbia, MO 65203
To whom it may concern,
It is our opinion that this trail is redundant and College Park Dr. should continue to be used as the bike trail connecting through to Rolins Road. It seems senseless to cut down trees so that Southwest Swim Club members may continue parking on the side of the street which “had” been shaded.
Thank you for your attention.
Sincerely,
Heather O’Connor
and John Leigers

Subject: County house trail phase 2
To: "cgjarvis@jocolumniaco.com" <cgjarvis@jocolumniaco.com>
Cc:

Hello,

I hope I am directing my comments on this project to the right person.

I live near the proposed County House Trail phase 2. I often walk my dog in and around Kiwanis park. I am also a member at Southwest swim club, which of course is near the proposed trail.

I am a huge supporter of Columbia's parks and trails. Columbia's commitment to green space and outdoor recreation makes it a very pleasant place to live.

I wish we could add more parks, more green space and more nature preserves. The pressures of a growing and thriving city mean that green space will disappear very quickly over the next few years. I am hoping Columbia leads the way in making sure the pace of park and preserve acquisition speeds up.

I use a park or trail or nature area almost every day. It is a part of my daily habits.

All that being said, I wholeheartedly do NOT support the County House Trail phase 2 expansion. I think Phase 1 was great. But now it is time to leave it alone. We already have Bike lanes going up College Park Drive. College Park Drive is a scenic and lovely street. There is no need to go up the draw behind the homes on College Park with a trail. Redirect the half million to acquire more land that can be set aside as a park or preserve.

Resources are not unlimited. Let's leave well enough alone and go and acquire more green space.

Thanks,

Tron

To: Ian Thomas <ward4@gocolumniamo.com>
Subject: Proposed trail behind College Pk. Dr.

Dear Councilman Thomas,

My husband and I are your constituents at 923 College Pk. Dr. Frankly given the neighborhood property owners opposition to the idea, its going to be an uphill battle. Not only that but yesterday we walked the length of the proposed trail and its a nearly vertical climb up to Rollins Road when one completes the walk. If the trail proposed to connect with Rollins Road a huge staircase is going to have to be constructed. For me there is no clear reason to add this trail, given the expense, when College Park Drive has bike lanes and access to the trail at the intersection with Loop 740.

It presently is a utilities right of way owned by the city but it would require acquisition of several parcels of land in private ownership. The creek would be disrupted and habitat for critters destroyed. Frankly if you've walked the strip which goes from 2 tire tracks to one to jungle, it sort of brings to mind the construction of the Panama Canal, its pretty wild.

So if we had our druthers we would say, leave it as it is. At the most make a gravel path for walkers, because the biker are going to use the street. We would also like to know if there will be a presentation by the city, there was none at the meeting, which incidentally you did not attend. Lastly as we say in Boone County, "I have no skin in this game", our property is not contiguous with the proposed trail. We are frequent users of the Katy trail and there is already access from this neighborhood to the Katy. Please let us know when the next meeting about this will be and we hope you can attend too.

Best regards
Brooke and Ben Cameron

To whom it may concern,

My name is Suky Mortensen-Stuckey. My family and I live at 505 Longfellow Lane in Columbia Missouri. We hope we're not too late to submit our support for the County House Trail Phase 2. We support the project with either alignment. Please keep us in mind for future support of this project.

Thank you,
Suky Mortensen Stuckey
On Wed, Sep 10, 2014 at 11:07 PM, sara loe <sara1@gmail.com> wrote:

Marie:

Thank you for sharing the information from Mr. Budzyna with me as well as your talking points. Below is the email I mentioned from Mr. Tom Wellman that includes some numbers regarding runoff and how adding the paved trail/utility access road will impact that.

I have cc’d Mr. Budzyna and Mr. Thomas on this email to make them aware that I share concerns about the project’s impact on the riparian and wooded habitat. This neighborhood is organized around a network of naturally forested ravines and those spaces are a highly valued asset. While, when taken individually, these areas might fall below the threshold for certain considerations and protections, they work together as a network to create a habitat that supports an amazing variety of wildlife for an urban neighborhood – and I do not believe we are out of place in asking for assurances that any development or construction protects, or enhances, what is there.

I wanted to take a liberty and add a “talking point” to your list. It’s related to your last point of “Neighborhood Cohesiveness.”

My concern is that the CHTII trail project represents a lot of money being spent in the neighborhood – that doesn’t fully support the activities and residents of that same neighborhood. I believe Mr. Thomas’s 8/31/14 email correctly observes that the trail will serve: “neighborhoods north of Rollins and west of Stadium.” While I am happy the trail will benefit some target audiences, I feel it is a large missed opportunity that the trail appears to be conceived of as a “recreational trail” only and does not connect – and thereby promote activity and alternative transportation to: Russell Elementary School, the Russell Elementary School sports fields and Kiwanis Park. It will connect to the South-West Swim Club and College Park Christian Academy – but children and neighbors east of the proposed trail will still depend on traveling on College Park Blvd to those destinations.

Thank you for your interest and attention to this matter. You, like so many of the neighbors who have lived here for several decades, truly care about the neighborhood – which is what makes it so wonderful for newer residents like myself.

Best,
Sara

or forwarded via E-mail to... pubw@GoColumbiaMO.com
(please include “County House Trail Phase 2” in the subject line and provide your name and complete mailing address)

Please send comments by September 9, 2014. Thank you for your input!

☐ I support the project as proposed.
☐ I support the project with the alternate alignment.
☐ I support the project with either alignment.
☐ I support the project with the following exceptions:
☐ I do not support the project.

Comments: I support the Columbia trail system and the extension of the County House Trail from College Park and Stadium to Rollins Road.

This extension will help many people avoid having to climb the College Park hill, encouraging more people to bike for recreation and transportation.

It is important for folks living further south to be able to safely travel to popular places like the Columbia Mall and the Farmers’ Market.

I attended the public presentation of the plans and would like to voice my support for the trail extension. I use this access to the bike trail several times a week and find the hills to be the most dangerous part due to the grade and the traffic. It is particularly dangerous and hard for families with children I imagine. I hope the plan takes into account adjoining property owners’ concerns. So long as it does, I strongly support it.

Edward Brent
100 West Briarwood Lane
I am writing in support County House 2. I lived in that area for many years and always wished we’d had better access to the MKT trail. Since I’ve moved to another neighborhood the new trail has been built that now ends at Stadium and connects folks to the MKT. That’s great but extending it up to Rollins will be even better. People from all over the neighborhood and beyond will like it and use it. I’m also pleased that people living in areas that are more “central-city” can now have more convenient access to our wonderful trails. Thank you.

Dear Mr. Budzyna,

I strongly support the County House Trail Phase 2 project as proposed. The hills in my neighborhood are a significant barrier to biking. Completion of the Phase 2 project would allow me and my family to access Columbia's wonderful trail system much more easily. Further, as members of Southwest Swim Club, we have no concerns about the trail coming too close to the club. In fact, my family would be much more likely to leave the car at home and walk or bike to the club if the Phase 2 project is completed.

Thanks very much for considering these comments.

To Whom It May Concern:

As a health educator for many years and now an RN-in-training, I have devoted my professional life to helping people get healthy and/or stay fit. Columbia’s network of trails has long proven to be exceptionally popular, attracting people of all ages, abilities and fitness levels. My husband and I are regular users and often see young children with their parents, learning to enjoy a fit lifestyle as well as adults struggling with obesity who have been drawn to a beautiful trail working to regain their health. Our network serves tens of thousands of citizens every year and offers its benefits and beauty to everyone else. As it grows it reaches closer and closer to more and more people. Convenient access to the network makes it more likely more people will use it more often and help to improve our overall community health. For that reason, I support network extensions including the County House 2 project. I prefer the newest option that moves the trail further away from the Southwest Swim Club and I’d urge careful attention to the type of bike/pedestrian crossing built at College Park and Stadium.

The purpose of this email is to provide support for the proposed County House 2 trail project. Construction of other similar trails in Columbia and Boone County have been very well received and have proven to be an asset to the community. Given the revisions to the original plan (to appease concerns of the SW Swim Club), it seems that major planning issues have been addressed. The construction of this trail should help to encourage more people to bike or walk for recreation and transportation.

RE: County House Trail Phase 2

Dear Mr. Buzyna,

I strongly support the County House Trail Phase 2 project as proposed. As a 17-year resident of the neighborhood in question, I know this project would encourage more biking and walking by my family and my neighbors, while making the area an even more attractive place to reside. The steep hills around my home are a deterrent to biking, and the project would allow residents to bypass the most heinous hill on College Park Drive. My family and I have already made much use of the first phase of the County House Trail. Completing Phase 2 is the logical next step.

As for concerns about proximity to Southwest Swim Club, my family holds a membership at the club, and I have absolutely no concerns about noise or privacy resulting from the project. If anything, the project would encourage walking and biking to the club instead of driving.

Thank you very much for considering these comments.

Subject: [PubW]: County House Trail, Phase Two......Public Comment
To: "pubw@gocolumbiamo.com" <pubw@gocolumbiamo.com>

I am writing to endorse the expansion of the trail system in Columbia through the proposed County House Trail, phase two. As an enthusiastic user of the entire trail system of Columbia and the area, I have seen the benefit of having many alternatives and access points for the citizens of Columbia.

The area to be included in the Phase Two part of this project would add a scenic and safe option to persons wanting to connect with the MKT in the Twin Lakes area plus add to the availability for residents to bike north to Broadway, the ARC, and beyond. I believe this will be a positive route for members of the Southwest Swim Club, too.

The trail system of Columbia is admired by many when visiting our fine community. The trails contribute to the healthy lifestyle of Columbia and this phase will add to the essential core of our many bike paths.

I encourage the City of Columbia to complete this next phase of the County Branch Trail.

Regards,

Don Laird

Hello!

I wasn't able to make the county house trail phase 2 open house tonight, but I wanted to let you know that I am in favor of the project as proposed. I would also support the alternate alignment, however I think the proposed alignment is the better one as it would avoid having to cross College Park and would avoid the driveway to the pool which can be pretty congested when there are cars parked there.

Thank you for your work on this - and I look forward to riding on the trail frequently once it is built!!

Thank you!

Allie
Hi,

We live at 1700 Princeton Drive, and are avid users of the new connector to the MKT trail. As a daily bike commuter I strongly support trail projects. I would have liked to attend the open house to hear your rationale for the proposed alignment. Because I couldn't some of my opinions might be redundant.

Basically I find trails that are separate from roads much more attractive. In the case of phase 2 though I would like to see it being used by kids going to school at Russell. Crossing College Park is not ideal, and the trail would be perceived as a detour. It would be simpler and safer to have a pedway along College Park, in conjunction with the announced traffic calming measures (great news! please narrow College Park, some must be going 50 down that hill).

If this is considered anyway and the proposed phase 2 trail is in addition to a safe pedway along College Park, I fully support the proposed alignment (given the high speed on Stadium and how fast people turn off onto College Park I would favor the alternate route). I would assume that the proposed alignment is also designed to connect with a phase 3 north of Rollins, which a pedway on College Park would not do.

There might be a perception that there is opposition to a trail in our neighborhood. In talking to my neighbors I don't think there is. There might be disagreement what the best alignment is, but this neighborhood really benefits from improved access to the trail system. Thank you for holding open houses and getting information out, and getting people on board.

All the best,
Walter Gassmann

To Columbia Public Works:

I am fortunate to live immediately adjacent to one of Columbia's newly opened trails and use it many times each week. It is essential to my health and well-being. Before this trail was opened, my family had limited access to the trail network and had to travel quite a distance to access it. Even then we were regular trail users. I love the convenience provided by the new trail and my personal use has increased. There have been no problems (such as litter, noise or threatening people) and I feel certain that it has actually increased the value of my home. It's kind of like living lakeside or on a golf course; a really nice amenity.

I support the continued development of the Columbia trail network and efforts to provide more convenient access, like I now have, to as many neighborhoods as possible. The County House 2 trail will do just that by reaching deeper into the city, bypassing a big hill and providing improved access to many people. I have a good friend that lives in a neighborhood near the terminus of the proposed County House 2 trail and it will make it more likely that I will bike to his house from mine.

The more people that bike and/or walk the better. The environmental, health and community-building benefits of our trail network are clearly understood. For these reasons, I support the County House 2 trail and urge you to build it according to the new alignment.

I would also urge you to be very surgical in the trail construction process and limit the impact of the work. I recall the work done near Chapel Hill when the first link of the County House was built. Seemed like the easement was far wider than needed and too many trees were removed. That causes consternation in the community even though some of it is unavoidable. The work done on the Scott's Branch Trail was done with far greater care. I hope that all trails will be built with that kind of caring spirit in the days to come.

Respectfully,

Terry Skinner
3716 Lansing Ave
Columbia, MO
I live on East Rockcreek Drive in Columbia and am 100% in favor of this trail extension. Extending trails increases the health of those who live nearby...residents of all ages. An extension of this particular trail helps those on bicycles avoid the steep grade of College Park Drive, which can be a little dangerous. A safer, off street trail is a better choice for everyone.

Susan McCullough
September 2, 2014

I am writing in support of the proposed County House 2 trail project. I prefer the revised trail alignment that will route the trail further away from the Southwest Swim Club affording the members decent privacy. I also urge that the trail have a dependable safety buffer built between it and Stadium. Further, the crossing at College Park and Stadium should be designed with maximum safety in mind as there are cars traveling at high speeds on Stadium which often rush through the intersection on yellow lights or even through red lights. Cars also often make right turns on red from Stadium onto College Park which can be very dangerous for a pedestrian or cyclist who is crossing. It would be far preferable if a tunnel were constructed at Stadium and College Park to connect to the currently built segment of the County House trail.

When built, this extension will bring the trail network closer to my home and will allow me to avoid climbing the College Park hill on return trips.

Thank you.

Rick Wise

☐ I do not support the project.

Comments: The city will have a very difficult time with property acquisition due to the swain club. I am a member of the swain club and this plan will adversely affect the privacy and seclusion of the club – one of its main hallmarks. It also increases the risks to my children from bringing the public closer to the wall ball court and sets the utility of this trail in a quite negative light. The Rollins Road is both direct and safe which is more space on the back of this form.

Which is more space on the back of this form.
It was steep. So this will not improve accessibility for folks travelling east or west for the terminus. It would make it longer and more difficult. The City should consider shifting the trail from College Park to Edges - perhaps cutting through Phœnicis Park to connect to their other. This will be less invasive to property owners and the south city.

The alternative is less invasive to the south city. It will also be less costly to the City of them to less property to acquire.

I am still not persuaded that this extension will ever be useful to the City at large. I say this as a separate of the trail network. It might be better to use the D435K to find additional alternative GetAbout projects.

Also, the second IP Meeting was very well-organized and staffed. Thank you.
Hi:

Thank you for having the second interested parties meeting at the ARC last evening regarding the County House Trail Phase II. I was able to attend the meeting, and am grateful to the City staff for having the meeting well-supplied with comment forms and well-staffed with helpful employees. I submitted hand-written comments at the meeting, but want to supplement them here.

UTILITY OF TRAIL EXTENSION: ENDS AT THE BOTTOM OF A STEEP HILL IN EAST AND WESTWARD DIRECTIONS, AND NORTHWARD ROUTE IS OBSCURE

My primary concern is with the utility of this trail extension. The trail extension will emerge at the bottom of a steep grade heading both east and west on Rollins Road. My only disappointment with the IP meeting is that staff was not prepared to answer questions about the grade on Rollins Road, instead urging that users of this proposed trail extension are expected to continue traveling northward on Rock Creek Road and Longfellow Road. I have ridden my bicycle through those neighborhoods, and the street layout is obscure, and there are some hills that pose mild challenges to cyclists within those neighborhoods. As there are no sidewalks through those neighborhoods, it may not be a safe path for wheelchair users to continue northwards.

I understand that the proposed trail is less steep than traversing College Park Road, but the grade on Rollins Road at the proposed terminal will substantially limit the utility of this trail extension.

For wheelchair users, the grade on Rollins where the proposed trail ends will be insuperable in either direction. Having traversed these hills on a bicycle with some frequency, I believe the Rollins Road grade in either direction is steeper than any section of College Park.

For bicycle users, if they are intending to travel eastward on Rollins, it will be less onerous to travel up College Park to Rollins (or to go around Kiwanis Park to Maplewood) than to use this proposed trail extension. If the bicyclists are intending to travel westward on Rollins, it may be less onerous to travel westward on Stadium, though Stadium Boulevard presents substantial safety concerns due to the speed and volume of traffic.

While I support the trail network, I do not want to see it expanded through areas with limited utility, as I believe the costs could be better spent on extending the network in areas with higher likelihood of increased use. One idea to try and gauge the potential for this trail extension, which I do not believe has yet been tried, is to have an interested parties meeting at Shelter Insurance Company regarding this proposed trail. I know that Shelter has a sizable number of employees, but I do not know where they live or whether they would be inclined to use this trail as an alternative to cars as a commuting option. There remain substantial safety concerns with crossing Broadway near Shelter's headquarters (and the recent redesign of the intersection at Stadium and Broadway has amplified non-motorized traffic safety concerns there), but if a significant number of Shelter Insurance employees indicate a desire or willingness to use this trail extension as part of their commute, it could change my analysis of the utility of this trail extension. At present, though, I do not believe the costs of this trail justify the potential benefits.

IMPOSITION ON SOUTHWEST SWIM CLUB

Aside from its lack of utility, I am also concerned about the impact of this proposed trail extension on Southwest Swim Club. My family is a member of the Swim Club and my children enjoy the privacy and seclusion of the club environment. The preferred trail alignment presented at the Second Interested Parties meeting involves taking land from the Swim Club and creating a concrete public trail through the land. I believe this will adversely affect the value of swim club membership. If there are no fences between the trail and the swim club, it threatens the security as well as the privacy of swim club members.
While the utility concerns cited above remain paramount, the concerns relating to the swim club would lead me to recommend pursuit of the alternative presented at the second interested parties meeting — routing the initial portion of the trail extension up College Park. This would minimize the impact on the swim club, utilize existing surface streets, minimize disturbance of the woodlands near the stormwater drainage creek, and be much less costly for the City. For the reasons set forth above, I am still unconvinced that this trail extension has sufficient utility to justify the costs.

ANOTHER ALTERNATIVE: College Park/Through Kiwanis Park
The City should consider expanding the sidewalk up College Park on the east side of the street instead to extend the County House Trail to Rollins Road. This would have the added benefit of improving pedestrian traffic for families whose children walk to Russell Boulevard Elementary school. I think this would also have greater utility, as eastbound or northbound travelers could then travel safely to West Boulevard or Broadway along relatively straight and well-marked streets. Westbound travelers on Rollins would also have the benefit of the substantial downhill to assist in acceding the grade towards Stadium. Should the City want to route the trail through Kiwanis Park, which is south of Russell Boulevard Elementary, the trail could terminate at or near Manor Drive, which is already slated for pedestrian improvements (sidewalk, traffic calming).

Thank you for your service to Columbia.

Best regards,
Jeremy Root
2417 Beachview Drive
Mr. Budzyna,

My name is Darin Preis and I live at 4803 Chilton Ct. in Columbia. I jog and ride on the County House Trail fairly regularly and I am excited about the possibility of an extension. Phase II would give me an even better route for riding my bike to work. Unfortunately, I am unable to attend the upcoming information meeting but I wanted to get my support on record.

For the record, I support the County House Trail - Phase II as currently rendered (or the alternate).

Thanks to you and the City for our wonderful trail network and ped-friendly approach to quality improvements in our city.

Darin Preis, Executive Director
Central Missouri Community Action
807 B North Providence
Columbia, MO 65203
September 1, 2014

To whom it may concern:

I live just above the proposed County House trail extension to Rollins Road. Just completed a bike ride where I went down Ash to downtown and then back west on the MKT to Twin Lakes Recreation Area and then on to the current stretch of the County House trail including the climb up the College Park hill, the only part of the trip that I do not enjoy. It is a very long climb and I always have to get off my bike and walk.

The current stretch of the County House is great as it has given us direct access to the MKT and the rest of the network. We had to travel quite a ways to reach the MKT in the past which was a disincentive for me. The proposed extension of the County House would improve things even more as it will allow me to avoid the College Park hill. In addition, College Park is a busy street, particularly during the school year.

We have lived on Longfellow Lane for more than 25 years and were members of the Southwest Swim Club for many of those as we raised three daughters who trekked up and down College Park to reach the club. This trail would be very nice for kids. We love the neighborhood and look forward to making it even better by extending convenient access to the Columbia trail network.

I support the County House extension and encourage its development. Please minimize the land disturbance in the process. Some trails I’ve seen being build were done in a very careful manner. I hope this one will be done in that manner.

Jane Cooper

500 Longfellow Lane

Columbia, MO
Dear Sam,
I have attended both of the interested party meetings for the proposed County House 2 trail, a planned extension of the County House trail. I live nearby and am intimately familiar with the area surrounding proposed trail. I support this extension for the following reasons:

1. Columbia's topography consists primarily of beautiful, rolling, tree-covered hills, and valleys. Development has thus-far, generally avoided the areas within the valleys where the creeks run. Because of this pattern we have been afforded the opportunity to create a remarkable nature trail system in the valleys, usually along the creeks. This system serves recreational, transportation and many other needs of Columbians. Beginning with the MKT trail in the 1970s our trail system has grown to the point that we have created a 13-14 mile system **backbone** that runs from the intersection of the KATY trail and the MKT trail along a southwest-to-northeast diagonal that will soon terminate at Clark Lane just north of I-70. With the unpleasant exception of the mile long stretch that currently runs up and down a huge hill along Old Highway 63 between Stadium and Bluffdale Dr., the backbone is quite level and provides easy access and use to people of all ages and abilities.

*(Backbone: The 13-14 mile backbone begins at intersection of the KATY and the MKT to the Hinkson trail south of MU to Grindstone Park then north (currently along Old Highway 63 to the Moon Valley connector and on to the Hominy Branch trail to its future terminus at Clark Lane just north of I-70).*

2. As the backbone has grown so has the ability to connect neighborhoods, workplaces and other important destinations to it yielding an ever-expanding system through **backbone feeders**. Many thousands of Columbia residents now live and work within a short distance from either a feeder or the backbone, itself. Like the backbone, feeder trails also typically follow the valleys and creeks and are usually quite level. They often lessen the need for people to traverse large hills in order to reach the backbone or simply create more convenient access to the backbone; either way, expanding overall access to the system. Some examples of feeders include:

- Grassland neighborhood connector
- South Garth neighborhood connector
- Forum Shopping Center connector
- Planter Lane neighborhood connector
- Scott’s Branch Trail (connecting neighborhoods surrounding the Fairview Rd. area)
- MKT Trail from downtown to the Hinkson/MKT trail intersection
- Grindstone Trail
- MU Sports Park/MU Campus connector (MU Recreational Trail)
- UMC Drive neighborhood connector
- Arbor Drive neighborhood connector
- Country House Trail

3. The built leg of the County House Trail (referred to as County House Phase 1) is one of the best feeders in the system. It has greatly improved access to the MKT Trail (through Twin Lakes Park) for thousands of people who were previously required to use either Forum Blvd or Fairview to reach it. My family falls into this category as we live on the ridge/plateau near Russell Elementary School near the intersection of College Park and Rollins. Today, we ride our
bikes down the huge College Park hill and access the County House Trail at its base at Stadium and College Park. It is smooth sailing to the MKT but the return trip is very difficult as the College Park hill is approximately .5 miles long and quite steep. For those of us that live at the higher elevations this presents a significant disincentive.

4 The planned extension of the County House Trail (referred to as County House Phase 2) creeps up the outer reach of the valley hosting the full County House Trail. It skirts around the bottom of the College Park hill and emerges on Rollins near the end of that valley. The reduction in the required climb is substantial.

Approximately 500 homes located on the following streets will gain direct benefit as they sit on the higher elevations in the area. There are small hills that will still have to be negotiated in these areas but nothing like College Park hill. Eliminating the need to climb it is important. It will encourage more people to use the trail system for both recreation and transportation.

Even streets further away such as those in the Clinkscale area and west of Bourn will benefit.

5. There are plans to continue a bike route north of the terminus of the County House Trail that will take it to the ARC and someday across I-70 to Cosmo Park and a connection to the Bear Creek Trail. This will likely take many years to accomplish but when we consider how far we’ve come since the earliest days of the MKT one can have confidence that we will slowly but surely get it done.

6. I believe that the trail system is the wonderful and essential core of our bicycle-pedestrian network and valuable community asset that sets us apart from other cities. Biking, walking or wheeling on our trails is always a life-affirming experience. It is a place that builds a very positive sense of community. It takes us on journeys through nature and gives us glimpses of
areas of Columbia’s natural beauty that we wouldn’t otherwise see and experience. It has and will cause more and more people to seek to protect those areas from further development or pollution. People protect the things they love. People love our trail system and the beautiful areas that surround it.

The County House Trail leverages our trail system in the best way possible as it greatly improves the access for at least another one thousand citizens. To me that is a very good thing.

Sincerely,

Chip Cooper

P.S. My family was a member of the Southwest Swim Club for many years when our three daughters were growing up. We would have felt very good about the prospects of them using the trail to reach the club compared to biking along College Park had the option been there in those days.

☐ I support the project as proposed.  
☐ I support the project with the alternate alignment.  
☐ I support the project with either alignment.  
☐ I support the project with the following exceptions:  
☐ I do not support the project.

Comments:  I look forward to using this trail! My only concern is the intersection of College Park + Stadium. It would have to be very well marked with full service pedestrian crossing for safety.  

(P.S. My son and husband support this trail as well.)

I am submitting comments as a resident of the 5th ward and as a member of the PedNet board of directors. As a very frequent user of the trail system, including the County House Trail, I would submit that based on my experience the extension as proposed is very much needed to improve safety and accessibility at the Stadium Blvd terminus. It is very dangerous to enter and exit the trail on a bicycle as cars turn north on College Park at a high rate of speed. Extending the trail would allow much safer access to Rollins Av. which serves as an arterial pedway.

I would add that my child attends Russell Blvd Elementary School and I would very much like for him to be able to bike to school. He has relatively safe routes all the way but I would be very concerned about his exiting the terminus of the County House trail as is. The proposed extension would allow him to directly access his school on a very safe route.

Thank you for your consideration of these comments and for your excellent work.

Comments:
Reducing the hills there will be a huge improvement.
It will reduce the need for going around the hills
And biking along W. Broadway from Russell.

I want to express support for this project. Since we live in the neighborhood (E Rockcreek), having this will not only add value to our area, it will provide a safe option for my family to access the trail. The current bike lanes on College Park Dr suffice in lieu of an alternative trail; however, the speed in which cars travel (both ways) makes it too dangerous for children to use it. Having the trail extension will improve safety for accessing the main trail. I believe there is also a larger benefit to expanding the trail. The trail system and the philosophy of having this type of city asset is one of the top reasons we chose to move to Columbia. As we expand the trail, this is making a larger statement that a safe, environmentally friendly infrastructure is important to the values of Columbia. Finally, I understand that some neighbors are opposed to the expansion due to concerns about the potential for criminals and other "threats" to have new access to our neighborhood. In my eight years of running and biking on the trail, I have never encountered anyone that I would deem a "threat" or have heard of any direct crime (e.g. home break-in) that has occurred due to access via the trail. Also, I have never met someone who has complained about owning a home with close access to the trail. In fact, it seems that it's often cited as a selling point in real estate listings. Please feel free to contact me if I need to clarify further or need to provide any additional information, etc. Thank you.

☐ I support the project as proposed. First Choice  
☐ I support the project with the alternate alignment.  
☒ I support the project with either alignment. 2nd Choice  
☐ I support the project with the following exceptions:  
☐ I do not support the project.

Comments: Connecting South Columbia with the Central City is something that needs done. Bike lanes are great but trails are better suited for more people to use. I support this project because it creates more connectivity, connects South to Central and will have a positive impact on households near the trail.

Comments:

Sounds great. Well definitely use it. Well organized, clean presentation. I prefer the trail around the pool rather than the one down the street.

There is more space on the back of this form.

Comments may also be faxed to... (573) 874-7132
or forwarded via E-mail to... pubw@GoColumbiaMO.com
(please include “County House Trail Phase 2” in the subject line and provide your name and complete mailing address)

Please send comments by September 9, 2014. Thank you for your input!

☐ I support the project as proposed.
☐ I support the project with the alternate alignment.
☐ I support the project with either alignment.
☐ I support the project with the following exceptions:
☐ I do not support the project.

Comments:  This project will benefit most the most vulnerable users of our trail network and, unlike other options would be a usable and welcoming route for people with disabilities, the elderly, children, and bike riders. It's a matter of safety access for a vital user group.

There is more space on the back of this form.

Comments: College Park is a ridiculously steep hill and really hard to climb in hot days. It's hard to climb on cold days too.

I prefer the "preferred" route because the alternate route still has a small climb which is not a huge climb, it's dumb to climb a bit only have back down.

There is more space on the back of this form.

I support the extension of County House Trail. Last week I led a dozen riders on a very hot day with Trevor Harris around Columbia on the History Tour. The ride is for intermediate bicyclists. It was a very hot day and coming up College Park Dr several of our riders walked their bikes. After the next point of interest, about half of the riders left. One in particular was feeling pretty bad because of the hill and the heat.

The 9% grade of College Park Dr is insurmountable for beginning cyclists and many intermediate cyclists.

Comments: I often use this route as a connection between my house on the MKT and the farmer’s market. Anything that helps level out the bumpy roads (more smooth as I age!).
Also, we live close enough to 360 swim club that we would have joined it when our kids were home if they could have gotten there safely on bikes.
Now they can because of County House Phases 1-3. With dollars.

There is more space on the back of this form.

Lots of parents in 360 to swim club to send their kids without cars.

**Comments:**  
We all see with hindsight that well-planned, well-sited trails like this one add value for neighborhoods and the city as a whole.

No project will please everybody in the moment, but precedent is that most will be pleased ultimately.

Comments for IP Meeting: County House Trail Phase 2

Tuesday, August 26, 2014

This is an excellent project and should be built.

Benefits:

1. Significantly extend and add to Columbia’s very popular non-motorized trail system.
2. Connect neighborhoods and add a valuable link in a proposed route between the MKT trail and the ARC and Parade.
3. Has potential to increase non-motorized transportation in Columbia.
4. Provide safe, comfortable and beautiful neighborhood walking and cycling opportunities for neighborhoods to the east, west and north of the proposed trail (there is an existing muddy dirt rutted lane caused by no telling what located about where the trail is planned and there and there is evidence of paths from the neighborhoods to what is there now).
5. Help make up for the lack of sidewalks on the West side of College Park and many of the nearby neighborhoods.
6. Provide a bypass to the Rollins/College Park hill for many walkers and bicyclists.
7. Add significant value to the already popular County House Trail Phase 1.
8. Be nearly all built on city street right of way that already exists.
9. Provide to the neighborhoods all of the health, social, safety, increased property value, and general quality of life benefits trails have been proven to provide.
10. Complies with the long standing master trail planning and prioritizing process.

Objections that I have heard the switchbacks I planned and my responses:

1. Takes too much South West Swim Club Property and goes too close to the pool and tennis courts, thus interfering with privacy.
   a. Under the original plan the trail did pass through a significant amount of SW Swim Club property and close to the pool and tennis courts. Under the revised plan that is no longer the case. The new preferred route trail would be across the creek and be much farther from the pool and courts and other improvements. It offers advantage to the club as the trail provides new access for neighbors to the club. I don’t see how that objection has merit under the new plan.
   b. There is some irony here. There is no sidewalk on the west side of College Park, so the trail would provide the only walking path directly to the pool. As it is now,
c. Most of the members of the swim club living in the neighborhood probably feel
the necessity to drive to the club to engage in activity, when the trail would
provide an inviting active transportation alternative.
d. The Club will be entitled to monetary compensation for any property used for
trail easement.

2. Will destroy neighbors’ privacy.
a. There are very nice homes in the adjoining neighborhoods, but those on the
dge of the valley with the trail are nearly all situated at least as far back and
probably farther back than homes adjacent to other Columbia trails and as the
University of Missouri study of the MKT trail shows the residents are not finding
the privacy issue to be a significant problem and in fact enjoy being near enough
that they can use it on a regular and convenient basis.

3. The club will have a parking problem caused especially by people using the Swim Club
parking lot as a trail parking lot.
a. Of course there could be some problems, but serious problems are unlikely and
can be dealt with short of not building the trail
   i. Experience on other trail access points in Columbia neighborhoods has
      shown only minor problems. Examples include the Garth extension,
      Hillshire, and Lake Shore. None has had serious problems.
   ii. It is unlikely that people who drive to a trail will want to start at the swim
       club because there are better places for them to start, such as Twin Lakes
       and Forum Boulevard, both of which have adequate parking.
   iii. In the unlikely event, that a problem arises, it can be controlled by
        posting the parking lot as private property for members only and not
        available for trail use, and even having members’ parking decals, etc.

4. Will lead to too much noise. There will, no doubt, be some increase in noise from users,
but as the MKT trail study shows it is not the problem people imagine that it would be.

5. Costs too much money should be used for other purposes.
a. It is federal money that is to be used exclusively for non-motorized
   transportation purposes and there has been a lot of professional and community
   input into planning and prioritizing the routes to build. Many other projects
   have been considered and many have been and are being built and planned.
b. This project has been on the master trails plan and has been considered a
   priority for years.

6. The rise at the North (Rollins) end is too great and planned switchbacks take too much
land and have too large an impact on the adjacent homes.
a. This to me was the most compelling argument, until I viewed the property. The
steep rise necessitating the switchbacks is a result of the unfortunate way Rollins
was built on fill that was allowed to block the valley. The sides of the Rollins fill
are exceedingly steep making the property basically useless. The house on the
East has fenced off the area with opaque wood fence and the house on the West
is suitably far enough away. The steep slope blocks practical access to the valley preventing the neighbors, or anyone else, from enjoying it. The work on the trail switch backs will be coordinated with work to replace the storm drain pipe under Rollins, so construction on the hill side will occur with or without the trail being built, but the trail will make the area usable. The MKT study shows that nearly all of the neighbors love living by the trail because they use it. This improvement will give the neighbors access to a wonderful walking and cycling path in an area extremely short of sidewalks and good places to walk
b. The rise on the trail actually is much less than the rise on College Park. The entrance to the trail avoids the walk or ride from either the north or the south to the top of the College Park hill. Unnecessary hill climbing is a significant barrier to both walking and bicycling. Since the overall purpose of the Get About projects is to increase mode shift from cars to non-motorized transportation, removing or reducing the unnecessary College Park/Rollins hill climb is an important positive. Surprisingly the elevations chart at the IP meeting shows that the maximum climb gradient on the trail, even at the north end is reduced to 4% on the proposed trail.

Summary. The community wide and neighborhood benefits are many. The objections, in general, are understandable but are the same as seem to always come up when a trail is proposed in a neighborhood. Many other trails in Columbia have been built over such objections and the result has as far as I know always been a turn around and acceptance, and in fact and embracing of the trail. There is nothing exceptional in this case that should keep the trail from being approved with the evidence based expectation that the benefits to the community will far outweigh any actual detriment to a few

☐ I support the project as proposed.
☐ I support the project with the alternate alignment.
☐ I support the project with either alignment.
☐ I support the project with the following exceptions:
☐ I do not support the project.

Comments: As a member of the swim club, I am concerned about the impact the trail will have on our property. The current proposed route takes "trail users" through our quiet, family oriented pool. Additional cars wanting to use our parking lot as a access points brings usage of a private facility into community hands. I would like to see negotiation for these points of impact.

☐ I support the project as proposed. That is, the “preferred route.”
☐ I support the project with the alternate alignment.
☐ I support the project with either alignment.
☐ I support the project with the following exceptions:
☐ I do not support the project.

Comments: As the property owner whose driveway was the former “preferred route,” I’m obviously relieved by the new configuration. I also appreciate that this shouldn’t ideally make the Swim Club the loser (especially if they’re compensated), since the route has been moved to the other side of the creek. I’m not looking forward to construction, but I think I can live with this.

Comments: My personal view: Project is un-needed. The bike lanes on College Park are just fine to use. Redirect the funding to new park acquisitions or other projects.

My view as a Southwest Swim Club Board member: This project materially changes the look and feel of the club and potentially carries financial perils. I say "No". Thank you.

Comments:

Please build the bridge across 40! There has been very limited investment in Ward 2. A bridge would allow for safer commuting in addition to recreational use.

Ken Dunn I probably won't be home until after 22:00, but I'd be happy to give you my proxy as an avid cyclist who thinks this is an unwise use of scarce resources. I just can't get past the fact that the entrance at your house/swim club as well as the one at the bottom of the Rollins hill are both *dangerous and difficult for bicycles.* I rode that route every day for years and shudder to think about coming down that hill, trying to stop, and then crossing the street. Ditto for trying to start pedaling at the bottom of that hill. Ditto for crossing College Park in a northbound/uphill direction.

Comments: This Phase 2 Trail Route is stupid - behind the homes - in a waterway that pours a lot of water onto the sidewalks on College Park instead - they are so cracked people trip & fall (I sprained my ankle walking on them). It is more lighted unsafe area on the street.

Have the trail cross @ Stadium & College Park where cars are parking is very much a safety issue.

Children will not use this path to get to school - it will be too isolated.

Stop this stupidity - we have enough trails.

Comments: A lot of people are against this trail for unjustified reasons that have been proven, time and time again, to never materialize. It is my hope that the city council can hear above the noise these individuals are making and remember the great benefit this trail will provide for the great many. This trail not only provides access to the surrounding neighborhoods who have historically been without. There is more space on the back of this form.

I like the idea of the trail as proposed... more level than College Park & more nature-based... with some concerns about effects on the stream & wildlife.

I want you to also consider a trail connection from College Park & Stadium east towards the path & road at the Forum & Stadium intersection so someone could walk or bike east to West Blvd & Westwood or somehow all the way to the MKT trail.

Comments:  As a regular user of Columbia's trails, I appreciate the value of such trails close to more people. I do not have the job of prioritizing projects, but I would focus on Old 63 to Mill Pond this project.

As a SW Southeast Swim Club board member, I can see that a few users might appreciate a nearby trail. I have some concerns that the trail might run next to the west side of the pool.

area too much. Pool users to enjoy their privacy.

Although I heard the arguments I remain concerned about a bike and pedestrian crossing close to stadium—because of the speed of stadium traffic turning onto College Park.

As a steward of the Swim Club property, the board is obligated to make sure that the membership (owners') property value is fully compensated. Should we decide that a 1-foot easement through our property I hope we can reach a fair agreement. We will have to oppose it if we aren't convinced that the easement is legitimate.

Also, we may have to discuss green barriers to protect privacy. Obviously, we will have to be assured that the creek will be protected.

We want to remain informed and are willing to listen to proposals, questions, ideas, etc. Please stay in communication with us.
I would like to see the proposed option B as well as option C to offer more non-motorized accessibility for residents.

Comments: I ride my bike through this area all the time. I support this phase as proposed. I currently go down Columbia Park to access the county house trail. I catch it at the MKT to get to work every morning. As it currently is, it scares me to ride down the hill then have to cross to the other side of the road to catch the trail. There are several cars whip off of Stadium and come near to hitting me. I would prefer it to be closer to crosswalks. I could see crossing traffic better. It would be easier to navigate.

Make my ride so much safer.
A RESOLUTION

declaring the necessity for construction of the County House Trail Phase 2 project from the intersection of College Park Drive and Stadium Boulevard to Rollins Road; stating the nature of and the estimate of the cost of the improvement; providing for payment for the improvement; providing for compliance with the prevailing wage law; and setting a public hearing.

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF COLUMBIA, MISSOURI, AS FOLLOWS:

SECTION 1. The City Council deems the construction of a ten-foot wide trail, water crossings, retaining walls and other miscellaneous work from the intersection of College Park Drive and Stadium Boulevard to Rollins Road, in accordance with City of Columbia Street and Storm Sewer Specifications and Standards, more specifically described as County House Trail Phase 2, necessary to the welfare and improvement of the City.

SECTION 2. The nature and scope of the improvement shall consist of furnishing all labor, materials, transportation, insurance and all other items, accessories and incidentals thereto necessary for the complete construction of the improvements.

SECTION 3. The estimated cost of this improvement is $775,000.00.

SECTION 4. Payment for this improvement shall be made from Non-Motorized Transportation Pilot Program Funds and such other funds as may be lawfully appropriated.

SECTION 5. Any work done in connection with the construction of the improvement specified above shall be in compliance with the provisions of the prevailing wage laws of the State of Missouri. The City shall also cause to be inserted into the contract a stipulation that all laborers and mechanics employed by the contractor or subcontractors in the performance of work under the contract shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act.

SECTION 6. A public hearing in respect to this improvement will be held in the Council Chamber of the City Hall Building, 701 E. Broadway, Columbia, Missouri, at 7:00 p.m. on March 16, 2015. The City Clerk shall cause notice of this hearing to be published in a newspaper published in the City.

ADOPTED this _____ day of ___________________________, 2015.
