- Eastern Section - Blue Option - Working Alignment by Status**
- Conceptual Stage - Engineered Alignment Needed
 - Conceptual Stage - Field Selected Alignment
 - Preliminary Stage - Engineered Alignment Needed
 - Preliminary Stage - Field Selected Alignment
 - Final Stage - Engineered Alignment Needed
 - Final Stage - Field Selected Alignment
- Eastern Section - Violet Option - Working Alignment by Status**
- Conceptual Stage - Engineered Alignment Needed
 - Conceptual Stage - Field Selected Alignment
 - Preliminary Stage - Engineered Alignment Needed
 - Preliminary Stage - Field Selected Alignment
 - Final Stage - Engineered Alignment Needed
 - Final Stage - Field Selected Alignment
- Orange Working Alignment By Status**
- Conceptual Stage - Engineered Alignment Needed
 - Conceptual Stage - Field Selected Alignment
 - Preliminary Stage - Engineered Alignment Needed
 - Preliminary Stage - Field Selected Alignment
 - Final Stage - Engineered Alignment Needed
 - Final Stage - Field Selected Alignment
- Approximate Property Boundaries

Definitions

- "Conceptual Stage" - These portions of the trail have conceptual alignments which are based largely on aerial photos, 2 foot contours provided by the City and on the constraints described in the alignment study.
- "Preliminary Stage" - These portions of the trail have been surveyed and the alignments have been preliminarily designed to verify reasonableness and technical feasibility and to better assess impacts. They are intended to become the final alignments with minor modifications as necessitated by additional information"
- "Final Stage" - No portions of the trail have reached the final design stage yet. A final designed section is one for which the alignment has been approved and detail design is in progress.
- "Engineered Alignment Needed" - These portions of the trail are subject to critical technical design constraints such as stream crossings and steep cross slopes that require an engineered alignment.
- "Field Selected Alignment" - These portions of the trail are subject to fewer technical constraints and will be selected in the field by a team made up of Parks staff and design consultants.
- All limits indicated by this linework are approximate and subject to change as new information surfaces.
