

**A POWERFUL  
PARTNERSHIP**

## Load Shedding Agreement

Participation in the Load Shedding Program is open to all commercial and industrial customers who have demand levels of at least 250 kilowatts during July and August, except for customers on the High Load Factor or Thermal Storage electric rate. Load Shedding customers can not participate in any other Columbia Water & Light electric demand response program.

Customers with lower demand levels can participate by aggregating multiple commercial electric accounts. The total aggregated demand level must be 1,000 kilowatts or greater during July and August. One electric customer must be established as the main contact and the one to receive the credit to their utility account. The other aggregate load customers' addresses must be listed on the other side.

Contact Columbia Water & Light for complete program participation guidelines. Return this form to:  
**Columbia Water & Light, Utility Services Division, P.O. Box 6015, Columbia, MO 65205.**

As an authorized agent of my company, I agree to the Load Shedding program parameters. If the contacts for my company change, I will notify Columbia Water & Light. If approved for this program, Columbia Water & Light will credit my company's account for any measured load reductions during the defined times of the Load Shedding program.

*Applications are due before April 15 to be eligible for that year's participation in the Load Shedding program. To continue participation in following years, written notice must be submitted to Columbia Water & Light each year, by April 15. Participation in the Load Shedding program is conditional on Columbia Water & Light approval.*
