Attachment 3: Criteria for Acceptable Co-share or In-kind Contributions (per OMB Circular A-110 Section 23)

(a) All contributions, including cash and third party in-kind, shall be accepted as part of the recipient's cost sharing or matching when such contributions meet all of the following criteria.

- (1) Are verifiable from the recipient's records.
- (2) Are not included as contributions for any other federally-assisted project or program.
- (3) Are necessary and reasonable for proper and efficient accomplishment of project or program objectives.
- (4) Are allowable under the applicable cost principles.
- (5) Are not paid by the Federal Government under another award, except where authorized by Federal statute to be used for cost sharing or matching.
- (6) Are provided for in the approved budget when required by the Federal awarding agency.
- (7) Conform to other provisions of this Circular, as applicable.

(b) Unrecovered indirect costs may be included as part of cost sharing or matching only with the prior approval of the Federal awarding agency.

(c) Values for recipient contributions of services and property shall be established in accordance with the applicable cost principles. If a Federal awarding agency authorizes recipients to donate buildings or land for construction/facilities acquisition projects or long-term use, the value of the donated property for cost sharing or matching shall be the lesser of (1) or (2).

- (1) The certified value of the remaining life of the property recorded in the recipient's accounting records at the time of donation.
- (2) The current fair market value. However, when there is sufficient justification, the Federal awarding agency may approve the use of the current fair market value of the donated property, even if it exceeds the certified value at the time of donation to the project.

(d) Volunteer services furnished by professional and technical personnel, consultants, and other skilled and unskilled labor may be counted as cost sharing or matching if the service is an integral and necessary part of an approved project or program. Rates for volunteer services shall be consistent with those paid for similar work in the recipient's organization. In those instances in which the required skills are not found in the recipient organization, rates shall be consistent with those paid for similar work in the labor market in which the recipient competes for the kind of services involved. In either case, paid fringe benefits that are reasonable, allowable, and allocable may be included in the valuation.

(e) When an employer other than the recipient furnishes the services of an employee, these services shall be valued at the employee's regular rate of pay (plus an amount of fringe benefits that are reasonable, allowable, and allocable, but exclusive of overhead costs), provided these services are in the same skill for which the employee is normally paid.

(f) Donated supplies may include such items as expendable equipment, office supplies, laboratory supplies or workshop and classroom supplies. Value assessed to donated supplies included in the cost sharing or matching share shall be reasonable and shall not exceed the fair market value of the property at the time of the donation.

(g) The method used for determining cost sharing or matching for donated equipment, buildings and land for which title passes to the recipient may differ according to the purpose of the award, if (1) or (2) apply.

(1) If the purpose of the award is to assist the recipient in the acquisition of equipment, buildings or land, the total value of the donated property may be claimed as cost sharing or matching.

(2) If the purpose of the award is to support activities that require the use of equipment, buildings or land, normally only depreciation or use charges for equipment and buildings may be made. However, the full value of equipment or other capital assets and fair rental charges for land may be allowed, provided that the Federal awarding agency has approved the charges.

(h) The value of donated property shall be determined in accordance with the usual accounting policies of the recipient, with the following qualifications.

(1) The value of donated land and buildings shall not exceed its fair market value at the time of donation to the recipient as established by an independent appraiser (e.g., certified real property appraiser or General Services Administration representative) and certified by a responsible official of the recipient.

(2) The value of donated equipment shall not exceed the fair market value of equipment of the same age and condition at the time of donation.

(3) The value of donated space shall not exceed the fair rental value of comparable space as established by an independent appraisal of comparable space and facilities in a privately-owned building in the same locality.

(4) The value of loaned equipment shall not exceed its fair rental value.

(5) The following requirements pertain to the recipient's supporting records for in-kind contributions from third parties.

(i) Volunteer services shall be documented and, to the extent feasible, supported by the same methods used by the recipient for its own employees.

(ii) The basis for determining the valuation for personal service, material, equipment, buildings and land shall be documented.

RE: 2011 Five Star Restoration Challenge Grant Program – 3M Urban Ecological Restoration

EXECUTIVE SUMMARY:

The Department of Parks and Recreation recently received notice of final approval (grant agreement) of a Five Star Restoration Challenge Grant award for the 3M Urban Ecological Restoration project. The grant amount is \$25,000 and is administered by the National Association of Counties Research Foundation (NACoRF) with funding being provided by a contract award by the National Fish and Wildlife Foundation. The grant will allow for further development of the restoration site. Construction is currently underway and will continue through the spring, 2012. Work will be done by a combination of contract and park staff. The project is estimated to be substantially completed early 2012.

DISCUSSION:

Of the \$25,000, \$13,700.00 will be used for grading activities in the first one hundred foot pool of the wetland system and those materials will be used to backfill the abandoned pump house building to manageable grades. This activity is also being performed to alleviate fall concerns from the platform. The remaining balance of \$11,300.00 will be used primarily for supplies and materials related to erosion control for the new trail, tree protection and native plantings to be installed in the wetlands and on the green roof of the pump house structure. Specifically, just over \$6,000 will be used for aquatic plants.

The grading work will be done by a contractor with park staff performing the installation of all storm water BMP's, plantings and final turf landscaping. The project is estimated to be completed by spring 2012, but since the majority of the project requires numerous plantings, it is likely that horticulture and forestry staff will be adding to the site over the next year or two.

FISCAL IMPACT:

Original funding in the amount of \$40,000 was provided by the 3M Foundation Environmental Stewardship Grant program. The City accepted this grant with the understanding that the City would provide \$20,000 in Park Sales Tax funds to address the vacant treatment building. This grant will bring the total project budget to \$85,000. This grant will add to the current council approved project and the additional work being done by this grant will not greatly impact the operating budget of the department.

VISION IMPACT:

12.1 Goal: A variety of attractive, well-maintained parks throughout Columbia-including neighborhood parks, regional parks, nature parks, and urban parks-will ensure all residents have access to a full range of outdoor and indoor recreational opportunities.

Implementation task #40: Fund and complete capital improvement program projects (parks).

SUGGESTED COUNCIL ACTIONS:

Approve the ordinance authorizing the City Manager to execute the grant agreement and appropriate the grant funds to the project.
