

Nifong Intersection Improvement Projects

Nifong & Sinclair Intersection

Nifong/Vawter School & Old Mill Creek Intersection

Interested Parties Meeting

Mill Creek Elementary School, 2200 W. Nifong Blvd, Columbia, Missouri
Tuesday, June 20, 2017

PURPOSE OF TODAY'S MEETING

Thank You for taking time to attend this meeting. This is an informal open house style meeting to inform local residents and other interested persons about the proposed project. This meeting is an opportunity for citizens to ask questions and offer input regarding the proposed project prior to a formal Public Hearing which will be held by the City Council at a later date.

PROJECT INFORMATION

- The design concept for the improvement at each intersection includes a 120-foot diameter single lane roundabout to accommodate large size vehicles and school buses at each intersection. The roundabouts will be designed and constructed such that they can be widened to a 150-foot diameter dual lane roundabouts in the future.
- The construction of the improvements is anticipated to begin in 2019.
- The estimated total project cost for the improvements is \$2,450,000. This estimated cost includes design, right of way acquisition, utility relocation, and construction.
- Nifong Boulevard and Vawter School Road are classified as major arterials, Sinclair Road is classified as a major collector, and Old Mill Creek Road is classified as a neighborhood collector, in both the Columbia Area Transportation Study Organization (CATSO) 2030 Major Thoroughfare Plan and the City Major Roadway Plan.
- Design also includes splitter islands and 5-foot wide sidewalk with ADA ramps placed off the back of the curb on all four sides.
- Additional street right of way, temporary construction easements (TCE), permanent utility easements (PUE), and permanent drainage easements (PDE) may be necessary for construction of the project.
- Roundabout lighting will be installed.
- The City is coordinating with Columbia Public Schools on the proposed improvements.
