CITY OF COLUMBIA, MISSOURI

TRANSMITTAL LETTER

FINANCE DEPARTMENT
ADMINISTRATION
March 4, 2013

Mr. Mike Matthes
City Manager
City of Columbia
Columbia, Missouri 65201

The City of Columbia Ten Year Trend manual has been prepared for the period FY 2003 to FY 2012.

Detailed Departmental Information

The first section provides detailed financial information about each department and fund. This section is further divided between General Fund Revenues and the seven departmental functional groups of administrative, health and environment, parks and recreation, public safety, supporting activities, transportation, and utilities. Readers will see ten years of expenditure data as well as the breakdown of dedicated and general source funding used to support each department. For each fund, there is additional information which includes a ten year net income statement, funding sources and uses statement, and debt information. Numerous graphs have been included to more easily interpret the trends in the data.

Financial Trend Monitoring System

The second section is the Financial Trend Monitoring System. This system was developed by the International City/County Management Association (ICMA), under a grant from the National Science Foundation in FY 1980. The City of Columbia was designated one of 24 test cities and has produced this document every year since then.

The purpose in developing the City of Columbia's Financial Trend Monitoring System (CFTMS) was to enable the City to better understand the factors that affect the City's financial condition, and to present a clear picture of the City's financial strengths and weaknesses for review by City management, credit rating agencies and others with a need to know. The existing indicators were modified by the City's Finance Department to include new indicators identified by ICMA and to apply indicators not only to the general fund, but also to many of the City's diverse enterprise operations. The system monitors the indicators organized around environmental and financial factors such as external economic conditions, intergovernmental constraints, revenues, expenditures, operating position, and debt structure, the condition of capital facilities and community needs and available resources.

On page 221 – 222 we have provided an FY 2012 Columbia Financial Trend Monitoring System at a glance which provides a summary of each indicator used in the monitoring system and applies a rating which reflects the trend for the past ten years. A green light represents a positive trend, a yellow light represents a trend to watch or monitor and a red light represents a negative trend that needs attention in the next budget planning process.

Revenue Indicators:

During the last ten fiscal years, inflation has not completely eroded revenues per capita stated in constant dollars. However this is a trend that city staff needs to monitor. When examining the percentage relationship of elastic tax revenues to total operating revenues and transfers of the general fund, elastic tax revenues have experienced a fairly positive trend during the past ten years. Starting in FY 2008 the City's General Fund became more vulnerable to inflation due to expenditures being forced upward while some revenues were stagnating or declining. The City's revenue base had remained fairly stable prior to FY 2008. Although the economic downturn impacted city revenues, the city operations were maintained and citizens experienced only minimal reductions in services. In FY 2012, the revenues-surpluses/(shortfalls) estimated budget vs actual in the General Fund went from a positive trend to a trend that needs to be watched or monitored closely due to actual operating revenues coming in under estimated budget revenues. The city continues to take proactive measures to weather the current economic conditions that are prevalent across the country. All revenues continue to be examined very carefully, and future funding strategies have been implemented in an effort to deal with constraints.

Expenditure Indicators:

City staff decided to focus on the general fund expenses and the utility fund expenses when assessing the various expenditure trends. General fund expenditures have consistently been under budget each fiscal year for the ten year period. The utility fund expenses have remained extremely favorable when comparing to population growth and evaluating constant dollar calculations. Fixed costs for the general fund as a percent of operating expenditures and transfers have slowly

increased over the ten year period which is a negative trend for the City. The City's pension plans make up the bulk of the fixed cost expenses. In FY 2010 a task force was formed to develop a plan to reduce these rising costs. A plan was implemented in FY 2013 that places new employees (hired on or after October 1, 2012) in different pension plans that will require increased years of service. This change will help to reduce the rising costs of fully funding pensions for city employees. Fixed costs for the utility funds beginning in FY 2011 have increased which warrants close monitoring in the future.

Operating Position Indicators:

Again, City staff decided to focus on the general fund and the utility fund operations when monitoring operating positions because of the significant resources used in these areas. When examining all indicators in this category, the City's operating positions for the general fund, water, electric, sewer and solid waste has been relatively favorable during the last ten years. The City has been able to balance its budget on a current basis, maintain reserves for emergencies, and maintain sufficient cash to pay bills on a timely basis. Transit, airport, parking and storm water have experienced negative trends when evaluating their operating positions. Management has been working to create additional partnerships and identify new revenue sources for these operations. The FY 2012 liquidity ratio for Parking fell below the industry benchmark due to an increase in cash used for the Short Street garage project coupled with unearned revenue for future rent payments by REDI. Management will need to closely monitor future parking activities.

Debt Structure Indicators:

When examining all indicators for this category, the City's debt has remained well below what would normally be considered proportionate to a city of this size and tax base. The City's debt practices have not extended past the useful life of the capital facilities it finances. The City has not used debt as an instrument to balance the operating budgets, and the City requirements for repaying its debt have not been an excessive burden on operating expenditures for the City's operations who utilize debt. Most of the city's debt service to operating revenue percentages are within the industry standard of acceptable levels of debt. While sewer and parking's debt service percentages are above the acceptable industry standard, they have been declining for the past few years. The city will continue to monitor these operations closely to determine if future rate increases are needed to cover operating increases as well as debt.

Unfunded Liability Indicators:

This indicator looks at the future liability that has been incurred by the city and will need to be paid at a later date. The City has been experiencing decreases in value of pension assets as a percent of benefits paid due to market conditions and benefit enhancements. The City has met its annual required contribution; however, future costs of benefits have been increasing at a greater rate and the unfunded liability has been increasing. In the area of post-employment benefit liabilities, a GASB change in FY 2008 required cities to account for the liability of retiree health insurance which caused the city's liabilities to increase. However, in FY 2014, the City will no longer subsidize retiree health insurance, so the retiree health subsidy liability will be eliminated.

Condition of Capital Plant Indicators:

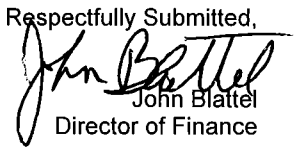

These indicators measure the physical assets of the city, such as streets, buildings, utility networks, vehicles etc. If they are not properly maintained or if replacement of a capital item is deferred beyond its practical life span, the city could be facing large capital expenditures beyond funding capabilities. The indicators in this category show some negative trends and trends the city needs to monitor in the area of rolling stock (vehicles and equipment). There has not been a steady long-term decline, but rather an under funding that needs to be addressed. City management has been and will continue to monitor needs for capital outlay. As the City comes out of the economic downturn and personnel issues of pension and health insurance costs are addressed, additional funding will be available to adequately fund capital outlay needs.

Community Needs and Resources Indicators:

Average annual unemployment continues to be less than the national average and growth in the population is increasing at a manageable level. The level of business activity has fluctuated slightly in terms of new businesses and retail sales from FY 2008 – FY 2012. Several of the indicators are ones that management will be closely monitoring; personal income per capital, poverty levels, crime rates, employment and business activity. Sales tax is a major revenue source for the general fund operations so the City's business activity must be carefully monitored. Retail sales in constant dollars decreased in FY 2009, but have continued to steadily increase through FY 2012. The city has been taking steps to reduce expenditures to a level more in line with total revenues. The fluctuating growth rate over the past ten years has caused the City to continue to closely monitor this major revenue resource.

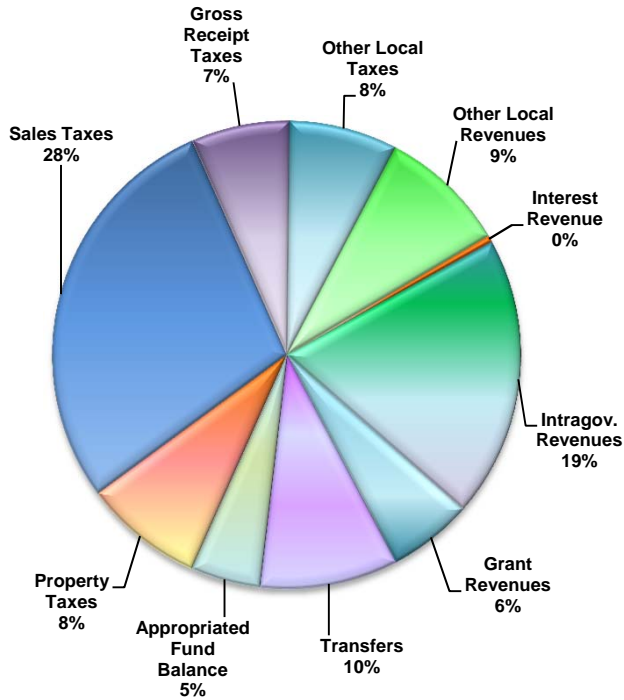

Conclusion:

It is hopeful that the financial information contained in this manual will provide a more efficient and better tool in analyzing the current financial and economic trends within the city organization.

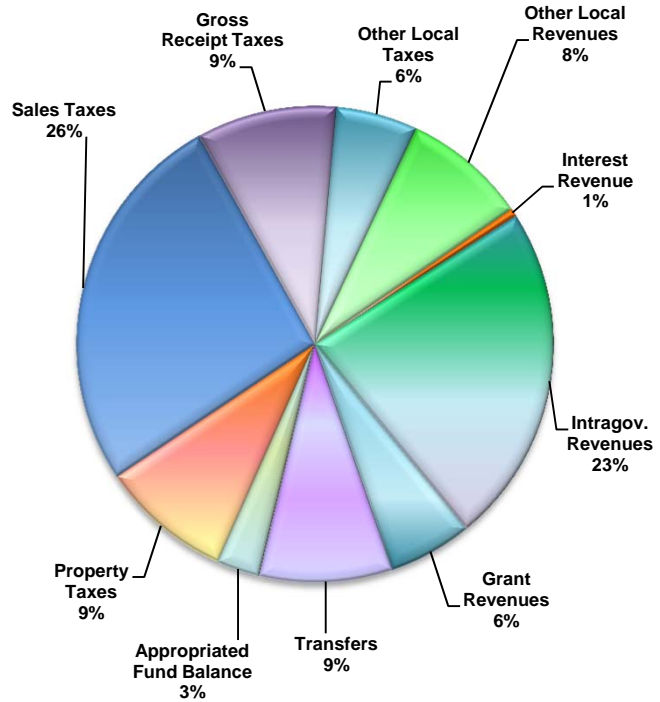

Respectfully Submitted,

John Blatt
Director of Finance

2012	\$7,097,767	229.6	\$3,091,497	112,414	\$27.50	(0.64%)

Description:

General Property taxes include the following: real property taxes, individual property taxes, railroad and utility property taxes, financial institutions property taxes, and penalties and interest. Property tax payments are due in full on December 31st. Delinquent taxpayers are penalized by 4% if payment is received in January, and the penalty is increased 2% for each succeeding month until reaching a maximum of 20% (the October subsequent to the due date). Further, the property can be sold if payment is not made within 18 months.

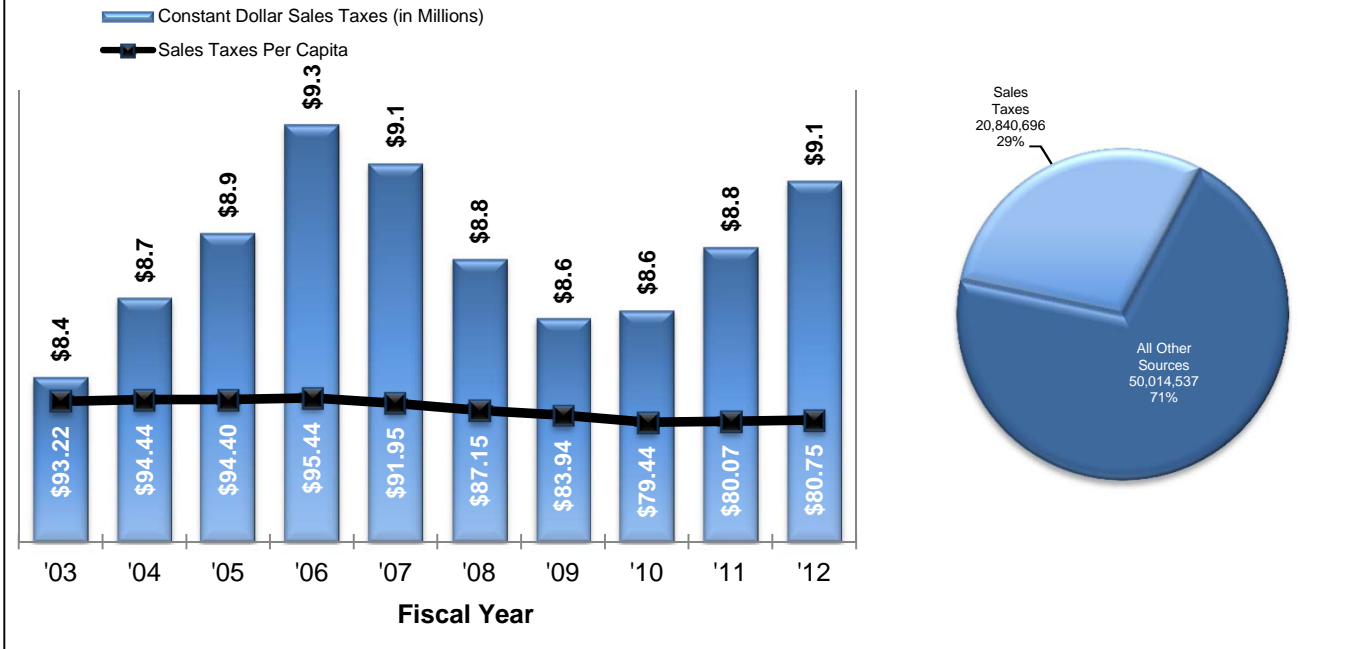

Analysis:

The general property tax rate has remained constant at \$0.41 per \$100 assessed valuation for the ten year period, and there has been no general obligation property tax levy. There has been an increase in both total general fund property taxes and in the property taxes per capita therefore this revenue source has had an overall positive trend in constant dollars. The slight decrease in property taxes from 2010 to 2011 was due to a decline in personal property taxes. The increase in property tax from 2011 to 2012 is due to an increase in personal and real property. Property taxes are approximately 9% of the total General Fund revenue sources.

2006	201.6	97,202	\$18,701,474	\$9,276,525	\$95.44	1.10%
2007	207.3	99,405	\$18,947,028	\$9,139,907	\$91.95	(3.66%)
2008	215.3	100,976	\$18,947,469	\$8,800,374	\$87.15	(5.21%)
2009	214.5	102,324	\$18,427,197	\$8,589,286	\$83.94	(3.68%)
2010	218.1	108,500	\$18,794,534	\$8,619,132	\$79.44	(5.36%)
2011	224.9	110,438	\$19,891,980	\$8,843,278	\$80.07	0.80%
2012	229.6	112,414	\$20,840,696	\$9,077,354	\$80.75	0.84%

Description:

A general sales tax is levied on all persons selling tangible personal property or rendering taxable services on a retail basis within the City limits. The City's entire portion of the tax amounts to a total of 2% gross retail receipts, of which 1% is for City General Revenues, 1/2% is a Transportation Sales Tax, 1/4% is Parks Sales Tax and 1/4% is for Capital Projects Tax. A portion of the 1% general sales tax is allocated to the General Fund and the rest is allocated to capital projects and recorded in the Capital Projects Fund. The table above shows the amount that is allocated to the General Fund.

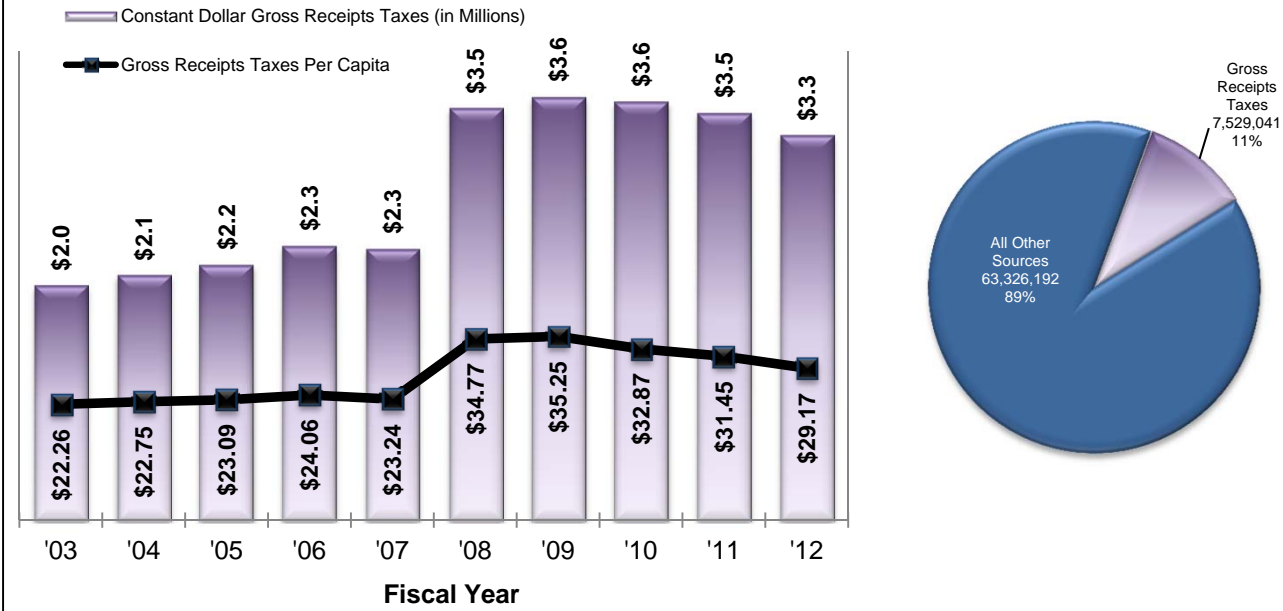

Analysis:

Sales tax revenues in actual dollars have experienced an overall positive trend for the ten year period shown; however, sales taxes per capita have decreased 13%. Decreases are reflected in FY 2007 - FY 2009 as a result of the economic downturn as well as increases in the consumer price index and population. Sales taxes account for 29% of the general fund revenues which makes this a major revenue source. Close monitoring of this revenue source is merited. FY 2010 to FY 2012 reflect increases in constant dollars and slight increases in sales taxes per capita. This trend indicates an improvement in economic conditions.

Legal Authorizations:

Local election: December 15, 1970
Ordinance 5276 (1970); pursuant to RSMo 144.010-144.510
Ordinance 9478 RSMo 94.600 et. Seq.

Gross Receipts Taxes

Source: Financial Management Information Supplement

Fiscal Year	Actual Gross Receipts Taxes	C.P.I.	Gross Receipt Tax Revenues (Constant Dollars)	Population	Gross Receipts Taxes per Capita (Constant Dollars)	Per Capita Percent Change Over Previous Year
2003	\$3,681,970	184.0	\$2,001,071	89,913	\$22.26	11.57%
2004	\$3,940,563	188.9	\$2,086,058	91,712	\$22.75	2.20%
2005	\$4,248,592	195.3	\$2,175,418	94,211	\$23.09	1.52%
2006	\$4,714,058	201.6	\$2,338,322	97,202	\$24.06	4.18%
2007	\$4,789,100	207.3	\$2,310,227	99,405	\$23.24	(3.39%)
2008	\$7,558,607	215.3	\$3,510,684	100,976	\$34.77	49.60%
2009	\$7,737,824	214.5	\$3,606,755	102,324	\$35.25	1.38%
2010	\$7,776,443	218.1	\$3,566,260	108,500	\$32.87	(6.75%)
2011	\$7,813,556	224.9	\$3,473,633	110,438	\$31.45	(4.31%)
2012	\$7,529,041	229.6	\$3,279,342	112,414	\$29.17	(7.25%)

Description:

Gross receipts taxes are collected from telephone, natural gas, electric, and cable television. The gross receipts tax rate is 7% for persons engaged in the business of supplying telephone service, natural gas service, or electric service. Video service providers are imposed a 5% gross receipts tax. All of the telephone, natural gas, and electric gross receipts tax support General Fund operations while approximately 30% of the video service providers gross receipts tax goes to the General Fund and the remainder is allocated to the Public Communications Fund. While telephone and video service provider gross receipts tax growth are best predicted by population growth and the year-to-year relative cost of the service, natural gas and electric gross receipts taxes are more closely correlated to the weather, population growth, and the year-to-year relative cost of service.

Analysis:

Gross receipts taxes have experienced an overall positive trend for the period shown. The significant increase in 2008 was due to the City receiving a settlement agreement with major mobile phone carriers which required them to pay a business license tax on wireless communications as they do for land line services. Decreases are shown in FY 2010 - FY 2012 and are due to decreases in gross receipts from natural gas. Gross receipts taxes account for 11% of general fund revenue sources.

Legal Authorizations:

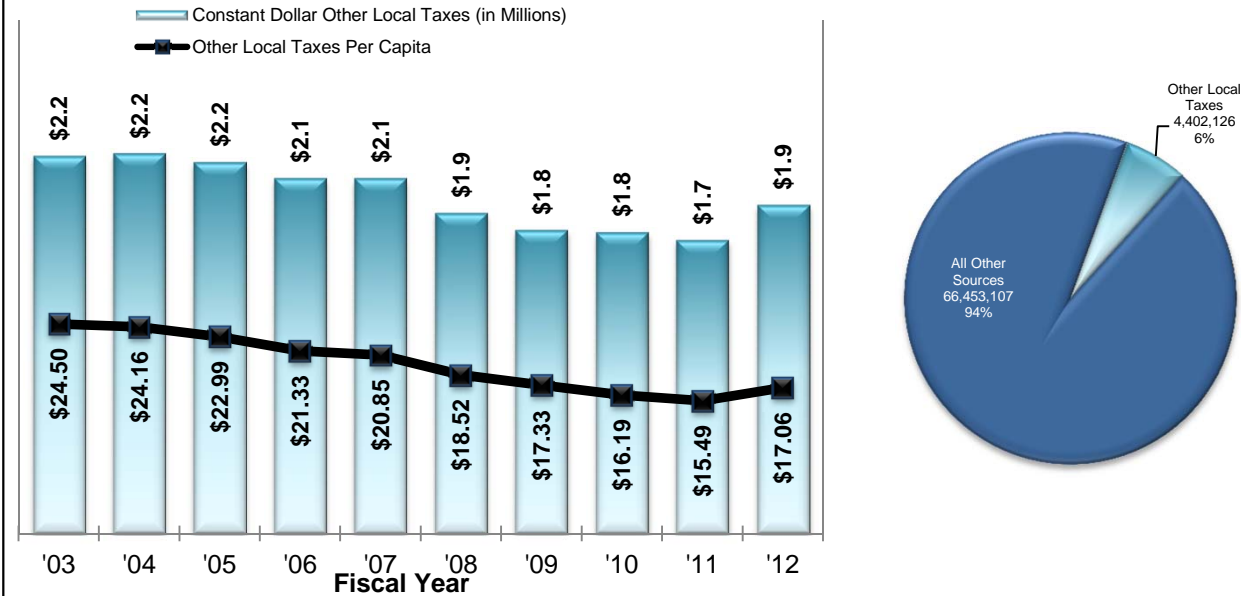

Telephone: City Code of Ordinances Chapter 26, Article V, Division 3

Natural Gas: City Code of Ordinances Chapter 26, Article V, Division 2; current rate is in Ordinance 6455

Electric: City Code of Ordinances Chapter 26, Article V, Division 4

Video Service Provider Fee: City Code of Ordinances Chapter 10, Section 10-2

Other Local Taxes

Source: Financial Management Information Supplement

Fiscal Year	Actual Other Local Taxes	C.P.I.	Other Local Tax Revenues (Constant Dollars)	Population	Other Local Taxes per Capita (Constant Dollars)	Per Capita Percent Change Over Previous Year
2003	\$4,052,665	184.0	\$2,202,535	89,913	\$24.50	(1.23%)
2004	\$4,185,746	188.9	\$2,215,853	91,712	\$24.16	(1.37%)
2005	\$4,230,168	195.3	\$2,165,985	94,211	\$22.99	(4.84%)
2006	\$4,180,577	201.6	\$2,073,699	97,202	\$21.33	(7.21%)
2007	\$4,296,580	207.3	\$2,072,639	99,405	\$20.85	(2.27%)
2008	\$4,027,044	215.3	\$1,870,408	100,976	\$18.52	(11.16%)
2009	\$3,803,358	214.5	\$1,772,821	102,324	\$17.33	(6.47%)
2010	\$3,829,765	218.1	\$1,756,322	108,500	\$16.19	(6.57%)
2011	\$3,848,379	224.9	\$1,710,854	110,438	\$15.49	(4.30%)
2012	\$4,402,126	229.6	\$1,917,386	112,414	\$17.06	10.10%

Description:

Other local taxes include gasoline, cigarette, and motor vehicle taxes. Gasoline tax provides funding for the construction and maintenance of highways. The City's portion is funneled through the state and has been seventeen cents per gallon for the period shown. Cigarette taxes are paid by every person selling, offering, or displaying cigarettes for sale within the City and the tax is ten cents per package. The motor vehicle tax has two components, a sales tax component and a license plate fee component. The motor vehicle sales tax is assessed on the cost of the vehicle and the City's portion is 1.5% or 1 1/2 cents per \$1.00. The license plate fee component varies depending on the total license plate fee, but the City's share is approximately \$12.50 per license plate.

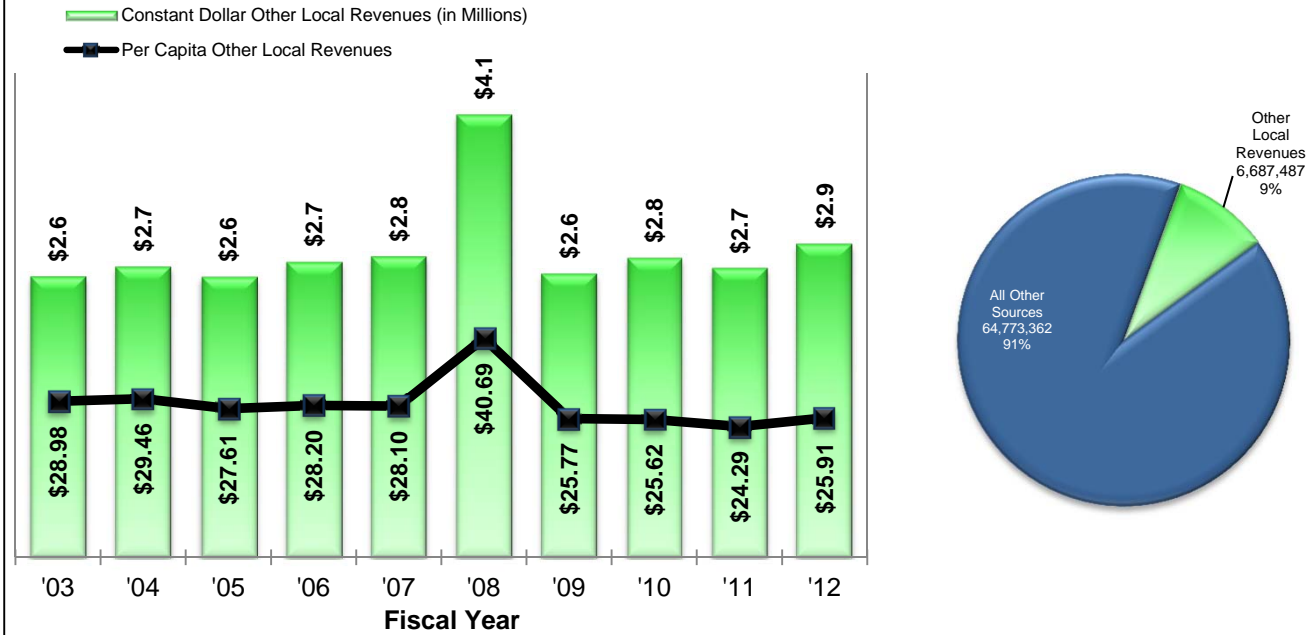

Analysis:

There has been an overall decrease in other local taxes in actual dollars, constant dollars, and per capita for the period shown. Beginning in FY 2008, gasoline, cigarette, and motor vehicle all experienced a significant decrease due to the economic downturn. In FY 2011, cigarette and motor vehicle taxes showed slight increases. FY 2012 experienced a significant increase in gasoline tax and motor vehicle, a trend that supports a start to an economic recovery. Other local taxes account for 6% of the general fund revenue sources.

Legal Authorizations:

Gasoline: Missouri Constitution, 1945; RSMo 142.009 & 142.803
 Cigarette: City Code of Ordinances Chapter 26, Article III pursuant to RSMo 94.110;

2008	\$8,846,361	215.3	\$4,108,796	100,976	\$40.69	44.81%
2009	\$5,657,355	214.5	\$2,637,007	102,324	\$25.77	(36.67%)
2010	\$6,061,670	218.1	\$2,779,868	108,500	\$25.62	(0.58%)
2011	\$6,034,688	224.9	\$2,682,811	110,438	\$24.29	(5.18%)
2012	\$6,687,487	229.6	\$2,912,795	112,414	\$25.91	6.66%

Description:

Other local revenues include the following: fines and court fees, licenses and permits, fees and service charges and miscellaneous revenues. Fines and court fees includes costs associated with and penalties assessed for violation of any City ordinance. Fines include corporation court fines, uniform ticket fines, meter fines, and alarm violations. Fees include warrant fees, court fees, and impoundment fees. License and permit charges are assessed for various business activities and animal ownership, such as business licenses, animal licenses, and liquor licenses. Fees and service charges are charged for the City's performance of construction inspections, street and sidewalk resurfacing (due to a person excavating them), animal control and health services. Miscellaneous Revenue include property sales, photocopies, and Housing Authority Payment-In-Lieu of Taxes as well as other miscellaneous sources of revenue.

Analysis:

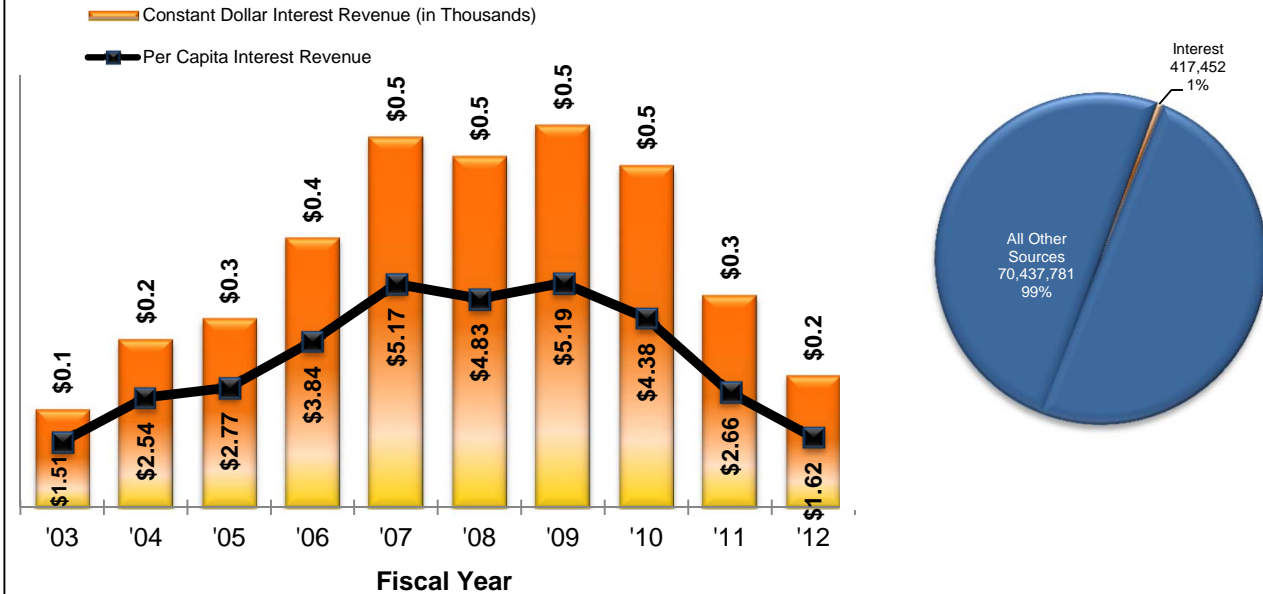

Over the past ten years other local revenues in constant dollar revenues have increased, however, per capita revenues have decreased. In FY 2008 miscellaneous revenues increased based on a one-time settlement agreement that was reached with major mobile phone carriers which now requires them to pay a "business license tax" on wireless communications. Construction inspection fees have not been increased during this time and have not kept pace with the cost to provide this service. Building and Site permit fees will be increased in the FY 2013 budget. Other local revenues account for 9% of the general fund revenue sources.

2012	\$417,452	229.6	\$181,825	112,414	\$1.62	(39.22%)

Description:

Investment revenue on external investment is allocated to the various participating funds based on each fund's ending cash balance each month.

The majority of investment revenue comes from Pooled Cash and Investments which combines cash balances from all funds. These funds are invested in U.S. Treasury and Agency securities in compliance with investment policies adopted by the City Council and Department of Finance.

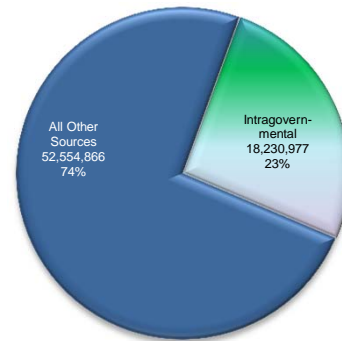

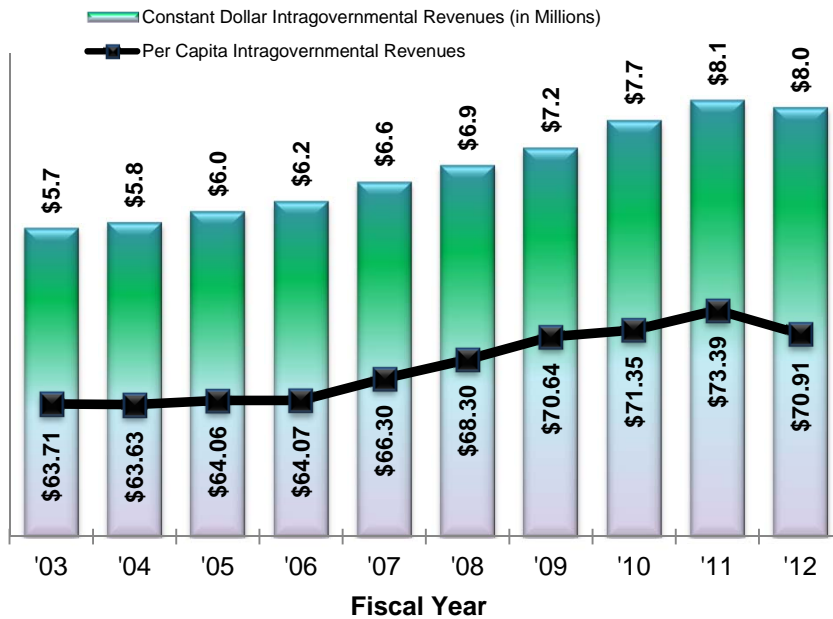

Analysis:

Decreases in investment revenues are due to lower rate of return on investments which decreases market value. Increases are due to increases in rates of return on investments and an increase in market values. While there has been a decrease in each of the past two years, this trend is not of serious concern as the revenue source accounts for only one percent of the general fund's total revenue sources.

Intragovernmental Revenues

Source: Financial Management Information Supplement

Fiscal Year	Intragovernmental Revenues	C.P.I.	Actual Intragov. Revenue (Constant Dollars)	Population	Intragovernmental Revenues Per Capita (Constant Dollars)	Per Capita Percent Change Over Previous Year
2003	\$10,539,788	184.0	\$5,728,146	89,913	\$63.71	0.81%
2004	\$11,023,118	188.9	\$5,835,425	91,712	\$63.63	(0.13%)
2005	\$11,787,400	195.3	\$6,035,535	94,211	\$64.06	0.69%
2006	\$12,555,382	201.6	\$6,227,868	97,202	\$64.07	0.01%
2007	\$13,662,448	207.3	\$6,590,665	99,405	\$66.30	3.48%
2008	\$14,849,683	215.3	\$6,897,109	100,976	\$68.30	3.02%
2009	\$15,506,487	214.5	\$7,227,885	102,324	\$70.64	3.42%
2010	\$16,880,859	218.1	\$7,741,525	108,500	\$71.35	1.01%
2011	\$18,230,977	224.9	\$8,104,854	110,438	\$73.39	2.86%
2012	\$18,300,367	229.6	\$7,970,890	112,414	\$70.91	(3.38%)

Description:

Intragovernmental Charges come from two different sources. First, the Water and Electric Utility Fund pays the General Fund a payment-in-lieu-of-taxes (P.I.L.O.T.) annually which is an amount substantially equivalent to the sum which would be paid in gross receipt taxes if the utilities were owned privately. The tax is equal to 7% of gross receipts and there is a property tax component equivalent equal to 33.33% of net fixed assets multiplied by the total City tax rate. The second source is General and Administrative Charges which are charges for services performed by general fund departments (such as payroll, accounting, human resources, etc.) to departments outside of the general fund. The charges are computed on the basis of an estimated percentage of time the various general fund departments spend providing these services to the other funds.

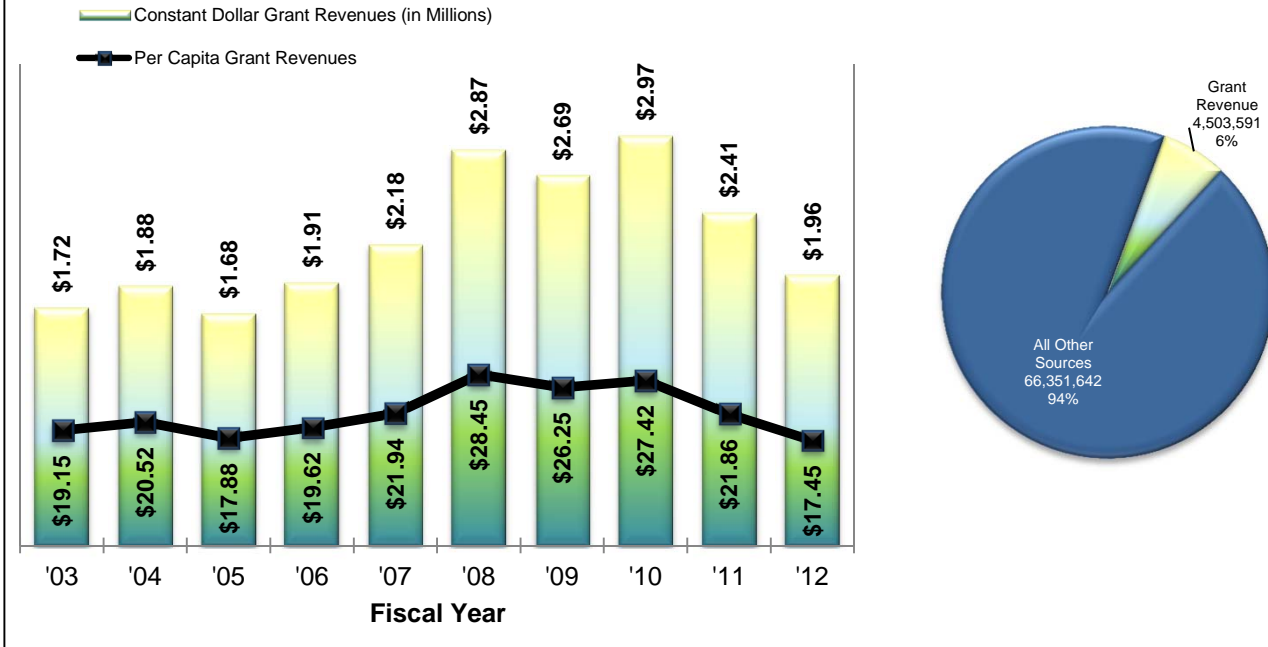

Analysis:

Intragovernmental revenues have shown a steady increase in actual dollars, constant dollars, and per capita for the period of FY 2003 - FY 2011, and a slight decrease for FY 2012. P.I.L.O.T. is the primary source of intragovernmental revenues (78%). P.I.L.O.T. increases are generally due to major capital projects or expansions in the water and electric utilities which can increase the value of the funds' fixed assets and thus impact the property tax component of the P.I.L.O.T. payment. As rates for water and electric increase, there are corresponding increases in the P.I.L.O.T. payment as well. There have been small increases in general and administrative charges over the years due to increases in the cost to provide the services to the other departments. Intragovernmental revenues account for 23% of general fund revenue sources and are considered to be a major revenue source. This revenue source has experienced an overall positive trend for the past ten years.

Grant Revenues

Source: Financial Management Information Supplement

Fiscal Year	Actual Grant Revenues	C.P.I.	Grant Revenue (Constant Dollars)	Population	Grant Revenues Per Capita (Constant Dollars)	Per Capita Percent Change Over Previous Year
2003	\$3,168,318	184.0	\$1,721,912	89,913	\$19.15	12.28%
2004	\$3,554,465	188.9	\$1,881,665	91,712	\$20.52	7.13%
2005	\$3,290,519	195.3	\$1,684,854	94,211	\$17.88	(12.83%)
2006	\$3,844,978	201.6	\$1,907,231	97,202	\$19.62	9.72%
2007	\$4,521,170	207.3	\$2,180,979	99,405	\$21.94	11.82%
2008	\$6,184,221	215.3	\$2,872,334	100,976	\$28.45	29.65%
2009	\$5,761,569	214.5	\$2,685,583	102,324	\$26.25	(7.73%)
2010	\$6,486,581	218.1	\$2,974,732	108,500	\$27.42	4.46%
2011	\$5,431,036	224.9	\$2,414,448	110,438	\$21.86	(20.26%)
2012	\$4,503,591	229.6	\$1,961,580	112,414	\$17.45	(20.18%)

Description:

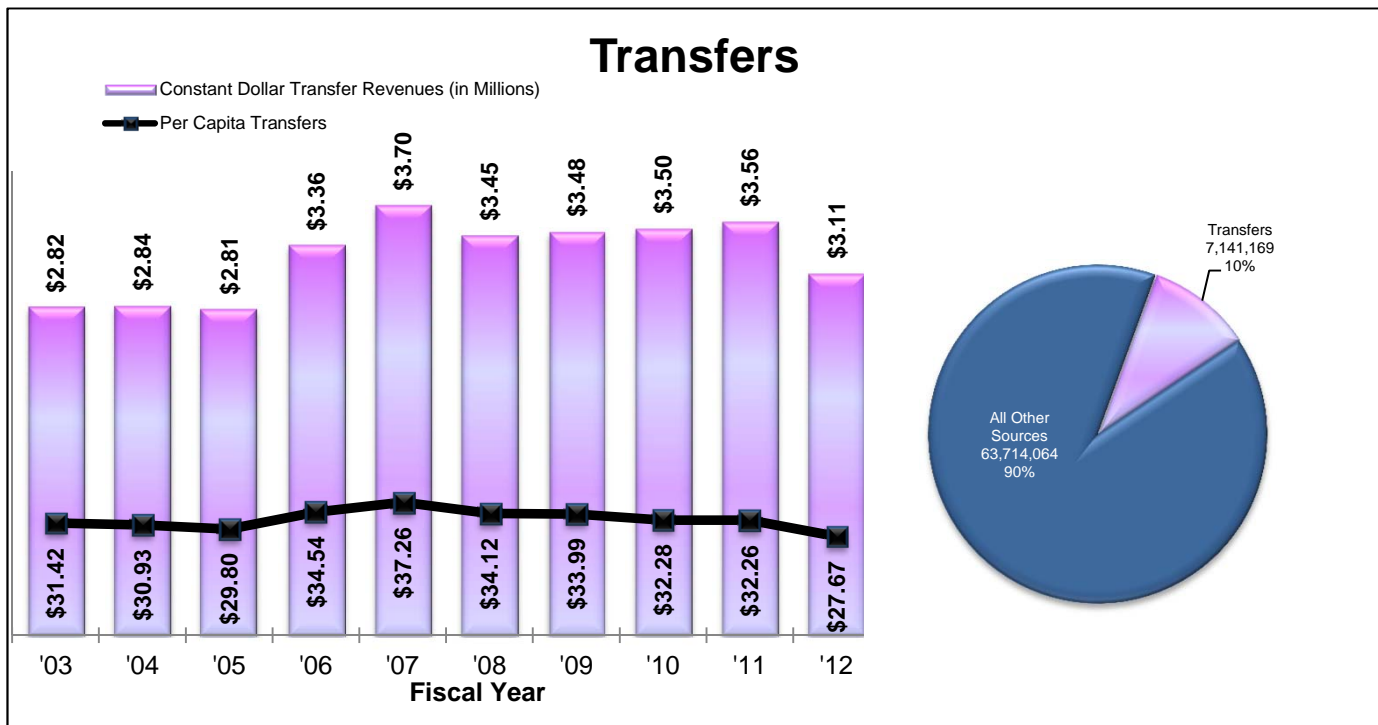

Grant revenues includes the following: federal grants, state grants and county grants. Federal grants consist of mass transit grants from the Department of Transportation, non-motorized grants, police grants, and stimulus grants. State grants cover diverse local service needs and provide funding for health, transportation, conservation, and police needs. County grants have a purpose of providing basic community services and are a reimbursement to the city for a portion of the functions performed by city employees/operations that also benefit the county which include Joint Communication (911), Public Health, Animal Control and notifications of county nuisance abatements.

Analysis:

Grant (intergovernmental) revenues has increased in actual dollars and constant dollars for the period shown. The fluctuations in FY 2008 - FY 2012 are primarily due to the City receiving the non-motorized federal grant. This grant allowed the City to build a number of sidewalks, pedways, and trails with the goal to increase non-motorized activity within the community. There were also funds included for education and promotion of non-motorized opportunities. In addition, the increase in FY 2010 was due to an increase in WIC caseloads, immunizations, a large DWI enforcement grant and stimulus money for the prevention of homelessness and a re-housing grant. Federal and state grants are often received for a one to three year period with the City having to absorb the costs after the grant timeframe has expired. The City has experienced a decrease in grant revenues for the past two years. Grant revenues currently account for 6% of general fund revenue sources.

2007	\$7,679,050	207.3	\$3,704,317	99,405	\$37.26	7.88%
2008	\$7,417,392	215.3	\$3,445,095	100,976	\$34.12	(8.44%)
2009	\$7,460,498	214.5	\$3,477,488	102,324	\$33.99	(0.39%)
2010	\$7,637,245	218.1	\$3,502,424	108,500	\$32.28	(5.02%)
2011	\$8,013,579	224.9	\$3,562,557	110,438	\$32.26	(0.07%)
2012	\$7,141,169	229.6	\$3,110,401	112,414	\$27.67	(14.23%)

Description:

The City utilizes transfers as a mechanism to move funding from other funds into the general fund. Primarily these transfers are from special revenue funds such as the Transportation Sales Tax Fund and the Parks Sales Tax Fund to fund streets, engineering, and park operations in the general fund. These transfers are on-going transfers which are adjusted annually during the budget process. Other types of transfers include one time transfers such as funds donated into the contributions fund to fund specific general fund requests.

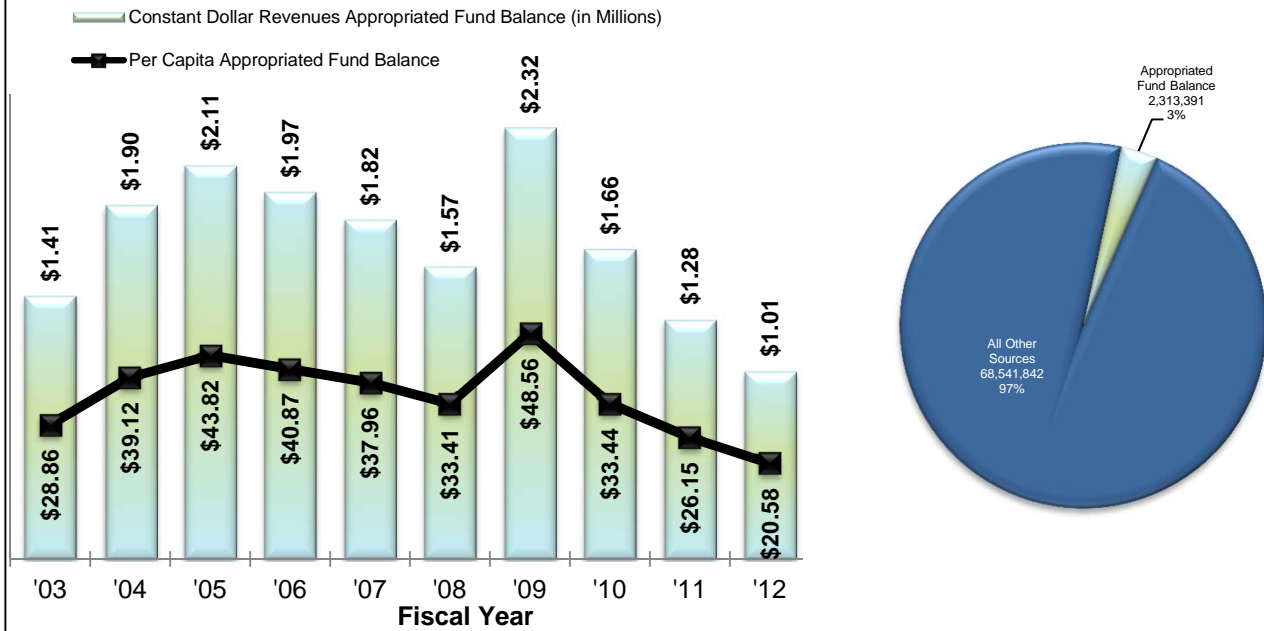

Analysis:

Transfers have increased in actual dollars, constant dollars and per capita for the ten year period shown. The increases from FY 2005 - FY 2007 are due to increases in transfers from Parks Sales Tax and Transportation Sales Tax to fund a larger percentage of the parks and street operations. This revenue source has a positive trend for the period shown. It should be noted however that funding received in the parks sales tax fund and the transportation sales tax fund can be used either for operations or capital for parks and transportation needs, respectively. There has been adequate funding to increase the amounts to the general fund during the past ten years; however, further increases will decrease the availability of funding for additional capital projects. In addition, transportation sales tax funds are also used to subsidize the transit and airport operations and provide match funding for transit and airport capital projects. Therefore, there is concern that future increases into the general fund may not be possible with the fierce competition of transportation funding for transit and airport. Management will need to annually evaluate the availability of these special revenue sources for funding and adjust expenditures accordingly. These transfers are dedicated to the specific operations of parks and transportation and cannot be used for other general fund functions. The reduction in transfers to general fund was due to less money being transferred from transportation sales tax to be used in transit and airport and other related capital projects. Transfers make up 10% of general fund revenue sources.

2012	\$2,313,391	229.6	\$1,007,618	112,414	\$20.58	(21.31%)

Description:

Legal authorization is granted through adoption of the budget to appropriate a portion of excess fund balance to partially finance General Fund expenditures. Appropriated fund balance is the revenue source that has been used to close the gap between revenues and expenditures so the General Fund budget is balanced. For budgeting purposes, the City of Columbia has appropriated fund balance as a source in each of the last ten fiscal years.

Analysis:

The City has a policy of maintaining at least 20% of general fund expenditures as an emergency fund. Amounts in excess of that level can be appropriated into the budget. These excess funds are like a savings or rainy day account for the City and they can be used to fund one-time expenditures or on-going operational costs when revenues are lower than expenses. The City must be cautious in using these funds for on-going operations as these funds can be depleted over time. The City is able to increase the amount in the rainy day account when revenues come in over budget and expenditures come in under budget. Due to prudent management by department directors, the City has increased the amount of excess fund balance in all but two (FY 2005 and FY 2009) of the past ten years even though appropriated fund balance budgeted as a revenue source in all ten years. The economic downturn in FY 2009 resulted in the largest budgeted amount of appropriated fund balance. For the period of FY 2010 to FY 2012, management has been reducing the reliance on appropriated fund balance as a general fund revenue source. This has primarily been accomplished through expenditure reductions. Management has a plan to completely eliminate the use of appropriated fund balance as a revenue source by the FY 2014 budget. Appropriated Fund Balance makes up 3% of general fund revenue sources.

Annual Budget

(THIS PAGE INTENTIONALLY LEFT BLANK)

Administrative Departments

Description

The City of Columbia has administrative departments which are funded with general city funds and provide centralized services (such as purchasing and accounting) to all of the departments. A portion of the cost of these operations is recovered from the departments outside of the General Fund in the form of a General and Administrative Fee. The allocation methodology was developed by our external auditors many years ago and is updated annually. The revenue from this fee comes into the General Fund and is used to offset the costs of the administrative departments. The remainder of these budgets are funded with general sources which means that the funding can be moved to any other department that is funded with general city funds.

City Council

The Mayor and City Council act as the legislative and policy making body for the City of Columbia. Operating under a home rule charter, the Council uses various voluntary citizen boards, commissions, and task forces as well as public hearings in the development of City policy matters. According to the City Charter, the City Council is responsible for the appointment of the City Manager, City Clerk, and Municipal Judge.

City Clerk

The City Clerk serves as the depository for all official records of the City, and the Clerk certifies City records for the courts, City departments, and citizens. The Clerk's office serves as a center for citizen inquiry, proclamation preparation and signing, and personal appearance requests. The Clerk maintains membership rosters for all boards and commissions. The City Clerk also acts as secretary to the Board of Adjustment.

City Manager

The City Manager is responsible for the general administration of the City of Columbia, an annual statement of City programs and priorities, preparation of the annual budget, 5-year capital improvements plan, preparation of Council agendas and special staff reports, and program coordination and development. The City Manager is directly responsible to the City Council for the proper administration of all the City affairs as well as implementation of policies and programs adopted by the Council.

Finance Department

Finance is responsible for the administration, direction, and coordination of all financial services of the City involving financial planning, budgeting, treasury management, investments, purchasing, accounting, payroll, business licensing, risk management, and utility customer services. With the exception of Utility Customer Services and Self Insurance, which are budgeted in other funds, all Finance Divisions are budgeted and accounted for in the General Fund.

Human Resources

Human Resources is responsible for coordinating the efforts of all City departments in the recruitment, selection, hiring, evaluation, promotion, training and development of a diverse staff of qualified and dedicated employees to serve the citizens of Columbia. General pay and benefits administration, employee health and wellness programs, and drug and alcohol testing are also the responsibility of the Department.

Law Department

Law is charged with managing all litigation in which the City is a party and advising the Council, the City boards and commissions, the City Manager, and department directors on legal matters. The Department is composed of two divisions: the City Counselor and staff manage the civil law of the City, and the City Prosecutor prosecutes ordinance violations.

City General

City General accounts for non-departmental expenditures. These include various subsidies and transfers as well as other items which are not related to a specific department. Street Lighting is accounted for in this department.

Public Works Administration

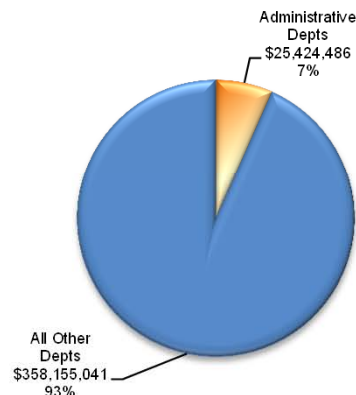

The Administration section provides management of all divisions and functions of the Department including Transit, Airport, Sewer, Parking, Solid Waste, Storm Water, Custodial and Maintenance Services, Fleet Operations, GIS, Public Improvements, and Right-of-Way acquisition.

Other General Capital Projects

General government projects that are not associated with Streets and Sidewalks, Parks and Recreation, or Public Safety, are included in Other General Government Projects.

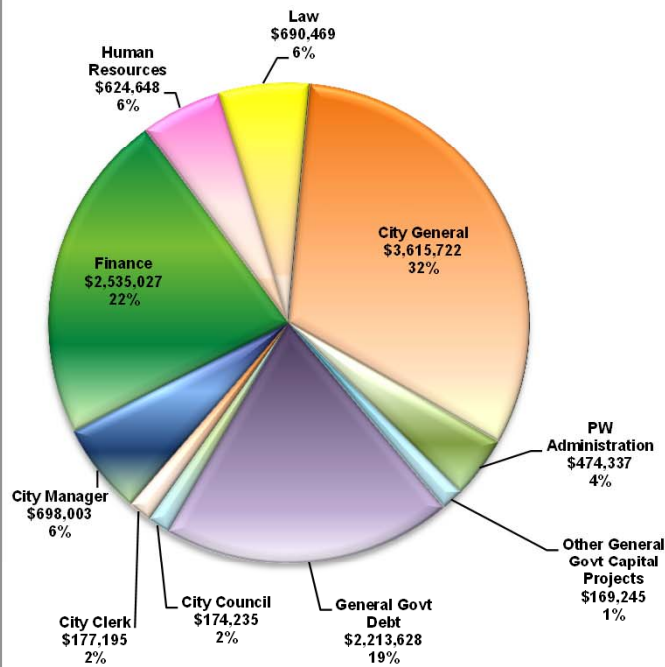

General Government Debt

Debt Service Funds are used to account for the accumulation of resources and payment of general obligation bond principal and interest from governmental resources and special obligation bond principal and interest when the government is obligated in some manner for the payment.

Description:

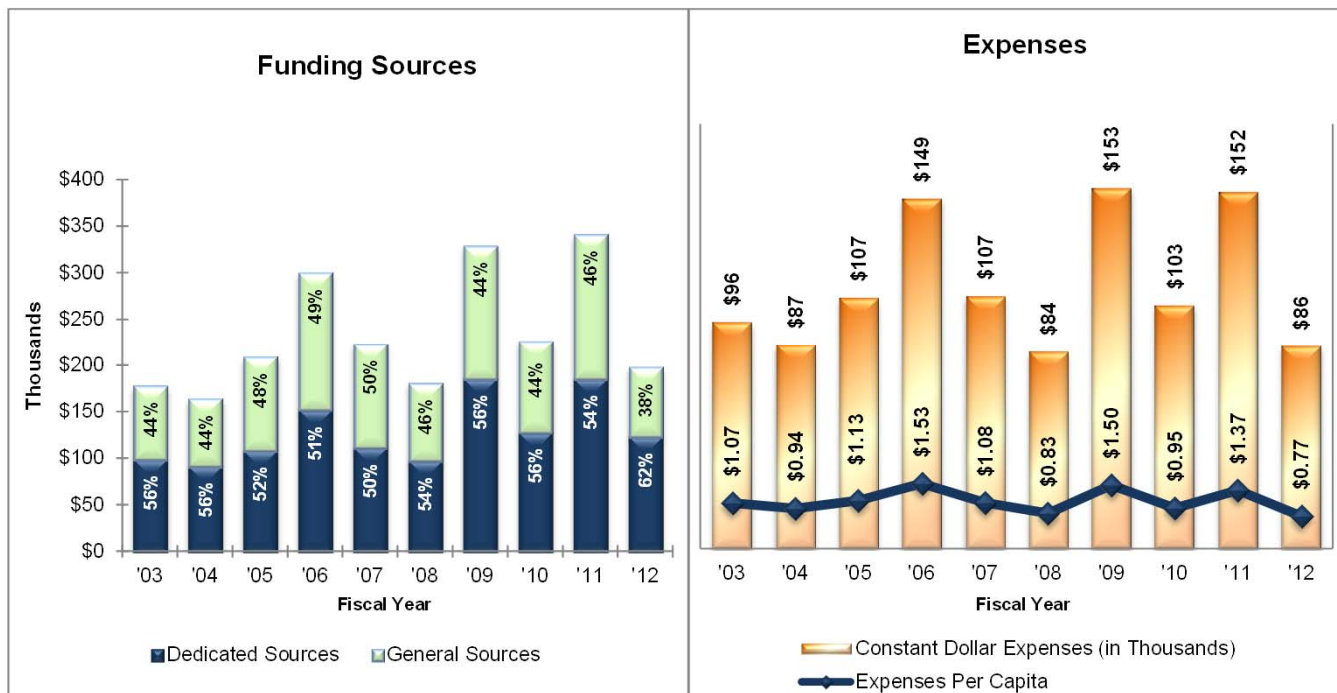

The City Council is a general fund department. Expenses related to the City Council as well as various Boards and Commissions are included in this budget. There are no permanent full-time positions allocated.

Analysis:

For the ten year period, total expenses, constant dollar expenses, and expenses per capita have decreased. Dedicated sources for this department include general and administrative charges, grant revenues, and miscellaneous revenue. A warning trend would be an increase in per capita expenses in constant dollars as this would indicate the costs are outstripping the City's ability to pay especially if spending is increasing faster than the City's major revenue sources. Therefore, there is no warning warranted for this department.

The increase in expenses for FY 2006 was due to a one-time joint project with the Columbia Housing Authority. There has been an overall decrease in expenses from FY 2007 to FY 2012. The Council moved to electronic agenda information which greatly reduced printing costs. In FY 2011, the Council reduced all departmental budgets for travel and training by one half. Further reductions were made in FY 2012 to help reduce the gap between general fund revenues and expenditures.

Description:

The City Clerk is a general fund department. Expenses include the city's cost of elections as well as staff costs for the City Clerk's office. Dedicated funding for this department comes from a general and administrative fee that is allocated to funds outside of the general fund for the services this department provides.

Analysis:

The costs have remained relatively stable for the period shown with the exception of FY 2006, FY 2009, and FY 2011. In these years, there were additional costs for elections. The cost of elections for a year depends on the number of elections for City issues and the number of entities that have issues on those ballots as the election costs are divided among all of the entities with issues on the ballot. The costs are highest when the City is the only entity on the ballot or when the City has an issue on a ballot that will have high voter turnout, such as in election years. The per capita costs have remained stable during this time period. There are no warning trends for this department.

Description:

The City Manager is a general fund department. The dedicated sources of funding come from general and administrative fees which are charged to funds outside of the general fund for services provided by this department.

Analysis:

There was a modest growth trend for the period FY 2003 - FY 2007 in constant dollars and per capita expenses decreased slightly. Beginning in FY 2006, forty percent of one of the Assistant City Manager's positions, previously split between the Human Resources and Information Technology budgets, was included in this budget. In FY 2007, the City's GIS operation began and was not included within the City Manager's budget until mid FY 2011. During FY 2011, a new internal service fund was set up and the GIS operations were transferred to that fund. Further reductions were made in FY 2012 to help reduce the gap between general fund revenues and expenditures. There are no warning trends observed for this department during the period shown.

Description:

The Finance Department is a general fund department. The areas of operation include administration and budgeting, accounting, purchasing, treasury management, and business license. The primary dedicated funding source is general and administrative charges which are charged to departments outside the General Fund for services the Finance Department provides to the other funds.

Analysis:

Total expenses show an overall increase, while constant dollar expenses and per capita expenses show a decrease for the ten year period shown. FY 2006 - FY 2010 include increases for rental space while the Daniel Boone Building was being remodeled as well as positions that were added in FY 2006, FY 2007, and FY 2008. The FY 2011 amount reflects decreases in rental costs as the department moved back to the Daniel Boone Building during FY 2010 and reduced printing costs as the Budget Document, Capital Improvement Plan, Ten Year Trend Manual, and the Combined Annual Financial Report were converted from paper to digital copies. While there were increases in constant dollar expenses for FY 2009 - FY 2010, there is a decrease in these expenses for FY 2011 and FY 2012 as further reductions were made to help reduce the gap between general fund revenues and expenditures. Therefore, there are no warning trends for this department.

Description:

Human Resources is a general fund department. Dedicated funding comes from general and administrative fees which are charged to departments outside of the General Fund for services provided by the Human Resources Department.

Analysis:

Expenses per capita were relatively stable from FY 2003 - FY 2012. The increase in FY 2011 is due to contractual services to develop a workforce training program. Once the training was developed, a group of employees were identified and have taken over the role of providing the training on an on-going basis. The ongoing cost for this training program will be in the area of printing costs to print the training materials. As the major part of the increase was a one-time expense, the FY 2012 expenses reflect a significant decrease.

Description:

The Law Department is a general fund department with two divisions: City Counselor and City Prosecutor. The City Counselor division costs are partially offset by dedicated funding from general and administrative charges which are charged to departments outside of the General Fund.

Analysis:

Total expenses in actual dollars, constant dollars, and per capita have increased over the ten year period shown. A total of 3.50 FTE positions have been added to this department to handle the increasing caseload and the red light camera program. Positions were added in FY 2005, FY 2008, and FY 2010. FY 2010 and FY 2011 reflect increases in constant dollar and per capita expenses. As this budget is funded 67% from general revenue sources, management will need to monitor future growth in this department to ensure expenditures do not increase at a faster rate than the growth of general revenue sources.

Description:

City General is a general fund department. This budget includes non-departmental expenses such as subsidies and transfers, street lighting, TIFF fees, Council Reserve, contingency, and other miscellaneous non-programmed expenses. Dedicated sources of funding include TIFF fee revenues and transfers from the transportation sales tax to pay for street lighting. Beginning in FY 2012, street lighting costs will no longer be offset by a transfer from the transportation sales tax.

Analysis:

City General actual expenses, expenses in constant dollars, and expenses per capita have increased for the ten year period shown. Special obligation bonds were issued in 2006 to finance a portion of the projects authorized by voters with the extension of the one-quarter cent Capital Improvement Sales Tax in November, 2005. These bonds will be paid off in FY 2016. Special obligation bonds were issued in 2008 to finance the construction, expansion, renovation, and equipping of the City's downtown government center. These bonds will be paid off in FY 2028. The amount in the City General department represents the lease payments being charged to General Fund departments which utilize the renovated space. The significant increase in FY 2012 is due to two factors. First, management decided to reflect most of the intragovernmental charges for general fund departments in this budget instead of within the various departmental budgets. The second factor was the City's decision to purchase the Columbia Energy Center. This purchase resulted in a loss of property tax revenues for the public school, library, and Boone County Family Resources. In an effort to compensate for the loss of the property tax revenues to these entities, the City agreed to provide these entities with a property tax phase out which will occur from FY 2012 to FY 2016. It should be noted that this budget is funded 91% with general revenue sources so management will need to continue to monitor future growth of this budget to insure it does not grow faster than general revenue sources.

Description:

Public Works Administration is a general fund department. This budget provides the management for all of the divisions and functions of the Public Works Department including Transit, Airport, Sewer, Parking Solid Waste, Custodial and Maintenance Services, Fleet Operations, Public Improvements, and right-of-way acquisition. Dedicated funding comes from general and administrative fees which are charged to departments outside the General Fund.

Analysis:

Total dollar expenses have increased while constant dollar expenses and expenses per capita have decreased during the past ten years. There is no warning trend for this department.

2012	\$626,469	\$0	\$626,469	229.6	\$272,864	(96.03%)

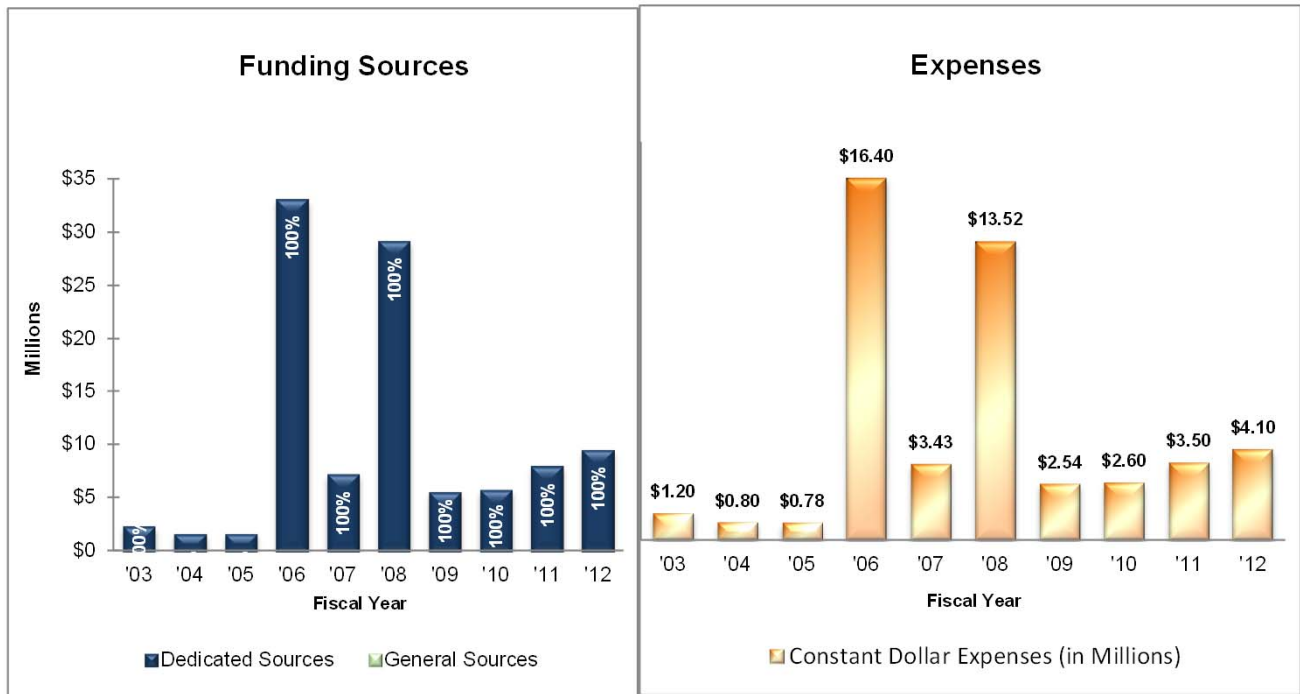

Description:

Other general government projects include those general government projects that are not associated with Streets and Sidewalks, Parks and Recreation, or Public Safety. These projects are completely funded by dedicated funding source transfers from special revenue sources such as the Public Improvement Fund.

Analysis:

FY 2006 included funding to renovate the Howard and Gentry Buildings used by City departments as well as purchase the land under the Daniel Boone Building. FY 2009 - FY 2011 included funding for the renovation and expansion of the Daniel Boone Building. The number and size of projects included in this area is dependent upon the amount of dedicated funding available to complete these projects. It is customary for funds to be accumulated for a number of years in special revenue funds such as the Public Improvement Fund and then transfer the funds into the Capital Projects Fund to fund specific projects. There are currently no warning trends associated with this budget. There are no significant projects for FY 2012 and thus the expenses have been significantly reduced.

2012	\$9,423,498	\$0	\$9,423,498	229.6	\$4,104,490

Description:

Debt Service Funds are used to account for the accumulation of resources and payment of general obligation bond principal and interest from governmental resources and special obligation bond principal and interest when the government is obligated in some manner for the payment.

Analysis:

In FY 2006, special obligation bonds were issued to finance a portion of the projects approved in November 2005 Capital Improvement Sales Tax ballot. As the capital improvement sales tax funds are received, a portion of these funds are set aside in the debt service fund to pay off the debt. In FY 2008, special obligation bonds were issued to finance construction of City's downtown government center. Financing is to be provided by property tax and lease payments from departments who utilize the renovated and expanded space. There are no warning trends associated with these funds.

Health and Environment

Description

The Health and Environment departments are a group of departments with a central mission to preserve, protect, and promote our community. These departments are diverse in that they receive their funding through one of three mechanisms: from general city funds, special revenue funds, or funds held in trust. These departments account for 3% of the total City budget.

The departments which receive general city funding include Public Health and Human Services, Community Development, Economic Development, and Cultural Affairs. While there is some funding from dedicated sources such as grants and fees and service charges, much of the funding for these departments is considered to be discretionary and, as such, can be moved from one department to any other general city funded department.

The departments that receive special revenue funding include the Convention and Visitors Bureau, Sustainability Fund, and the Community Development Block Grant Fund. The funding for these departments are dedicated and must be used to meet the specific needs of those departments.

The department which has funding held in trust is the Contributions Fund. Funds received in this department must be used for the specific purpose designated.

Health and Human Services

Public Health and Human Services promotes and protects the health, safety, and well-being of the community.

Economic Development

Economic Development provides the necessary support to encourage and facilitate the growth of the economic base in Columbia.

Cultural Affairs

Cultural Affairs enhances the vitality of the city and the quality of life for all citizens by creating an environment wherein artists and cultural organizations can thrive by fostering opportunities for creative expression and the preservation and celebration of the City's multi-cultural heritage.

Community Development

The Office of Neighborhood Services, Building and Site Development and Planning have been combined into one department to better serve the public. The goal is customer service. Neighborhood Services improves the quality of life for Columbia's residents through fairly and swiftly enforcing city codes related to residential life and building a sense of community by offering valuable volunteer opportunities, and providing resources for neighborhood leaders to solve issues independently. Building and Site Development responds to our community's building safety needs in order to deliver an effective and efficient system of services, which minimizes risk to life, health and property. Planning provides long-range land use planning, transportation, housing, community and economic development planning services to the community.

Community Development Block Grant

Community Development Block Grant Fund (CDBG) administers federal funding to improve low to moderate income neighborhoods through improvement of public infrastructure and community facilities, demolition of dilapidated buildings, and construction of replacement housing, assistance to home owners and prospective home buyers, and rehabilitation of existing housing.

Convention and Visitors Bureau

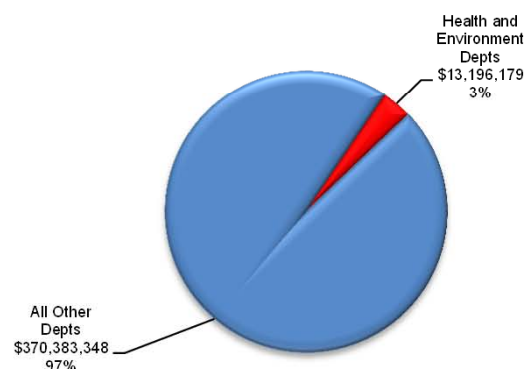

Convention and Visitors Bureau (CVB) promotes Columbia as a meeting, leisure and group tour destination through direct solicitations, tradeshow attendance, advertising and marketing.

Sustainability Fund

Sustainability Fund spearheads sustainability and energy efficiency efforts in the community.

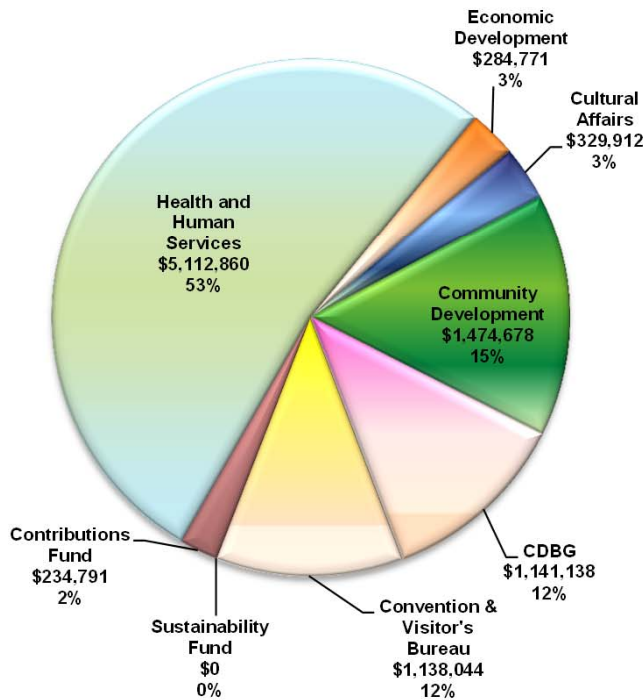

Contributions Fund

Contributions Fund manages donations to support and improve our community.

Description:

The Columbia/Boone County Department of Public Health and Human Services is a part of the General Fund and includes the following divisions: administration, community health promotion, animal control, environmental public health, community health, WIC, social services, and human services. Dedicated sources include fees and service charges (animal control, inspections, birth and death certificates, and clinic fees); state and county grants; and other local revenues. Grants comprise over 70% of the dedicated funding sources.

Analysis:

For the ten year period, expenses in constant dollar reflect an increased level for the period of FY 2007 - FY 2010 and have decreased in FY 2011 and FY 2012. As previously noted, grants are a substantial part of the dedicated revenues for this department with the life of most grants lasting one to three years. While the Health Department has been able to continue receiving new grants as old ones expire, there is substantial risk that federal and state budgets could cut these funding sources and the City could be left with the decision to either fund the services from general revenue sources or cut the services. In FY 2012, grants decreased by approximately \$451,000, while overall expenses decreased by \$493,626. It should be noted that while the graphs show the actual expenses, they do not convey the demand for services. As the economic downturn hit in FY 2009, the need for public health services greatly increased. However, the City was not able to fund the increased need. Management will need to continue to balance the general revenue sources with the need for these services throughout the general fund functions. Fees and service charges are being adjusted annually to recover a portion of the costs of providing the clinic, animal control, and inspection services.

Description:

Economic Development is a part of the general fund. It provides the necessary support to encourage and facilitate the growth of the economic base in Columbia and it staffs Regional Economic Development, Inc. (REDI), which provides other operating funds. Dedicated funding comes from a reimbursement from REDI for temporary staff costs.

Analysis:

As this budget primarily consists of personnel costs, there has been a steady increase during the past ten years. There was a decrease in FY 2009 when the department was reorganized, a position was deleted, and the manager position was vacant for six months. This budget is primarily funded with general revenue sources. Management must balance between the need to increase funding for economic development with the availability of general revenue sources to fund this operation. Management is looking for alternative funding sources to fund this operation.

Description:

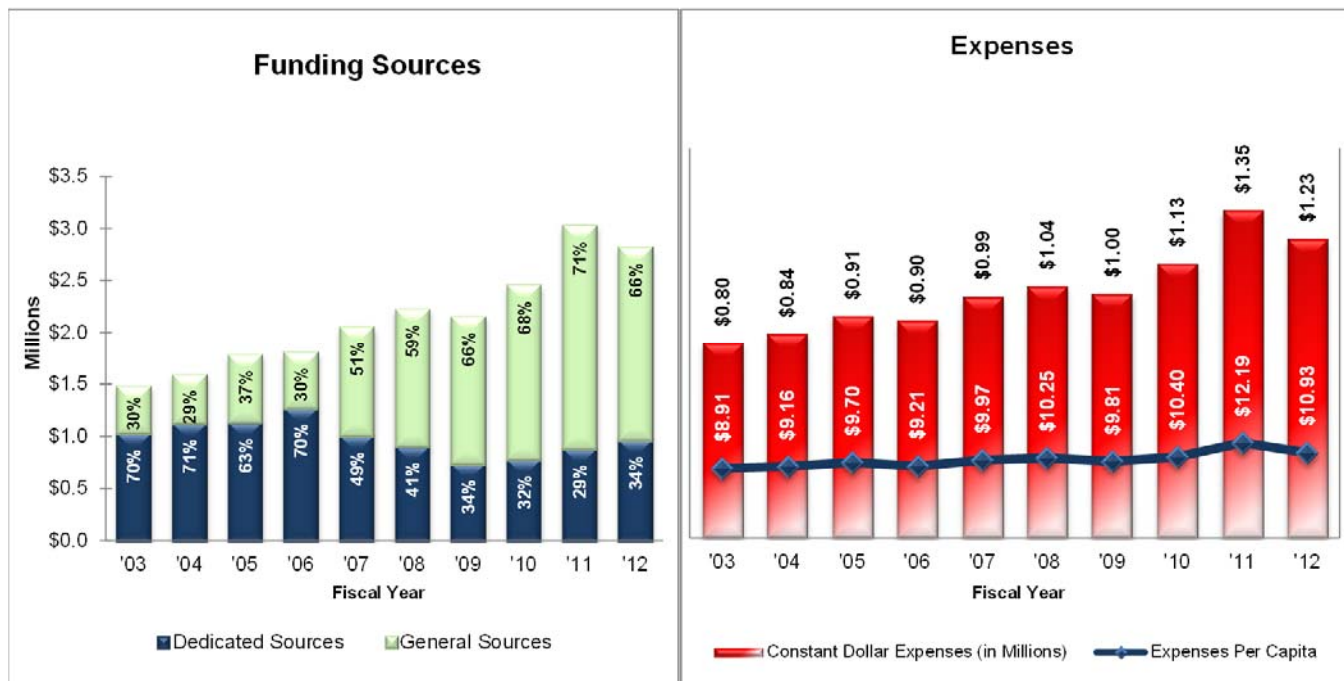

The Office of Cultural Affairs' mission is to enhance the vitality of the City and the quality of life for all citizens by creating an environment wherein artists and cultural organizations can thrive, by fostering opportunities for creative expression and the preservation and celebration of the City's artistic and multi-cultural heritage.

The Office of Cultural Affairs was a part of a special revenue fund for FY 2002 - FY 2006. During this time, it was subsidized by the General Fund for the amount of expenses above the grants and other local revenues it received. As the availability of grant funding decreased, this office was moved into the General Fund in FY 2007.

Analysis:

The FY 2012 total expenses are just slightly lower than the FY 2003 amount. Due to shrinking grants and greater demands for general revenue dollars, spending has decreased since FY 2008. Per capita expenses have decreased over 37% during the period shown. When the budget was moved from a special revenue fund into the general fund, there was a fund balance that was set aside to be used to supplement the funding for arts organizations. Using this approach, the City has not had to decrease the funding available for arts organizations during the economic downturn. However, this funding is projected to run out in FY 2013. General revenue sources for this department have increased from 70% to 85% over the ten year time period. Management will focus efforts in future years to identify other funding sources to reduce the use of general resources to fund this department.

Description:

The Community Development Department is a part of the general fund and includes the following divisions: planning, building and site development, volunteer programs, and neighborhood services. Dedicated sources include fees and service charges (permit, zoning, and inspection fees), federal and state planning grants, and other miscellaneous revenues.

Analysis:

Total expenses in constant dollars have increased 53% for the period shown and per capita expenses have increased 23%. The primary source of dedicated revenues is building and site permit fees. The graph above shows that the percent of dedicated revenues grew from FY 2003 to FY 2006 due to a strong economy. The percent dedicated decreased from 70% in FY 2006 to 34% in FY 2012. The economic downturn greatly reduced the number of building and inspection permits issued. Expenses increased in FY 2011 due to the reallocation of employees from Public Works Engineering into Building and Site Development. Due to the economic downturn in the economy, fees and services charges for building permits have not been adjusted in the past few years. There is a 75% cost recovery goal for building and site development fees which is not currently being met. This result has been an increase in general revenue sources from 30% to 66% over the past 10 years. Management will increase fees in FY 2013 to reach the 75% cost recovery goal. Close monitoring of these fees is warranted.

Description:

The Community Development Block Grant/HOME Program administers the Community Development Block Grant (CDBG) and HOME Investment Partnership programs by coordinating applications for the use of these funds with the Department of Housing and Urban Development (HUD), other city departments and outside organizations.

Analysis:

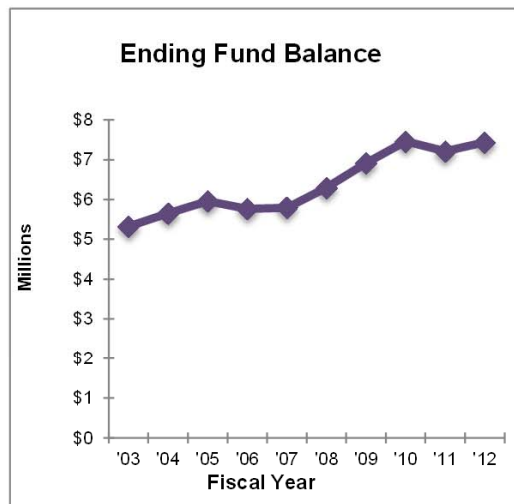

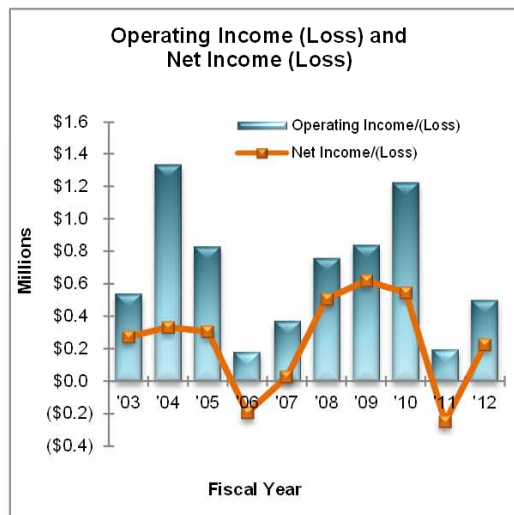

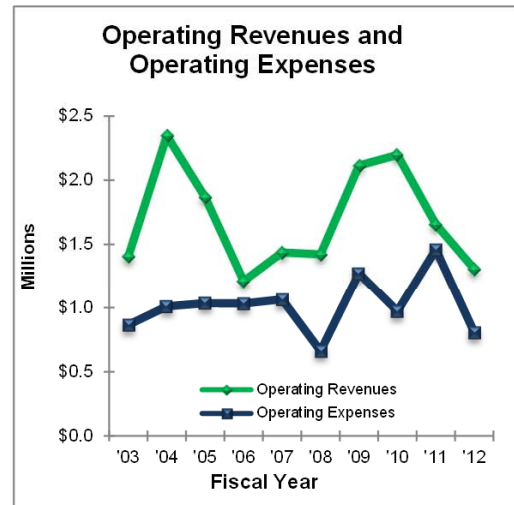

This fund is a special revenue fund which means that all of the expenses are tied directly to a dedicated revenue source. The amount available varies from year to year based on the funding allocated to the program by the federal government through a competitive process. A warning trend is warranted as the CDBG funding levels have decreased and this will result in either personnel cuts or movement of costs to the General Fund.

Description:

The Convention and Visitor's Bureau is a special revenue fund that promotes Columbia as a meeting, leisure and group tour destination through direct solicitations, tradeshow attendance, advertising and marketing. All of the funding sources are dedicated and includes a 4% hotel/motel tax, grants, interest and other local revenues. Two percent of the hotel/motel tax is designated for the enhancement or development of festivals, events and attractions.

Analysis:

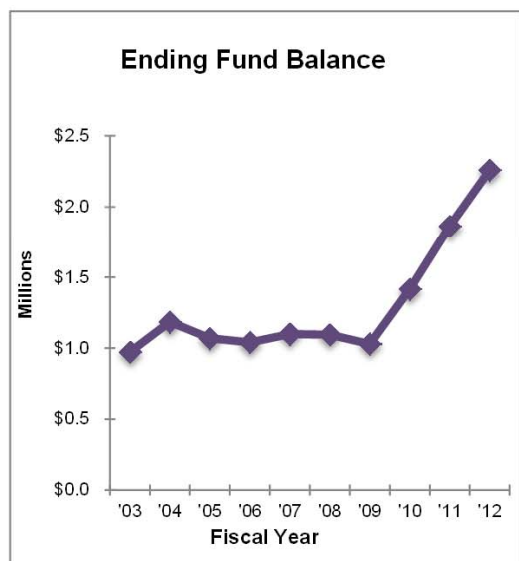

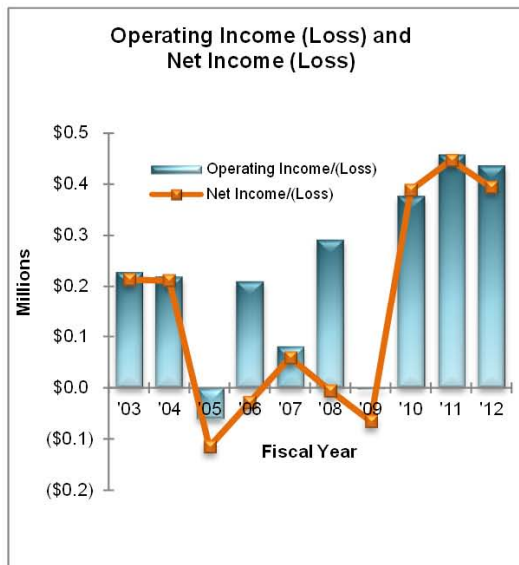

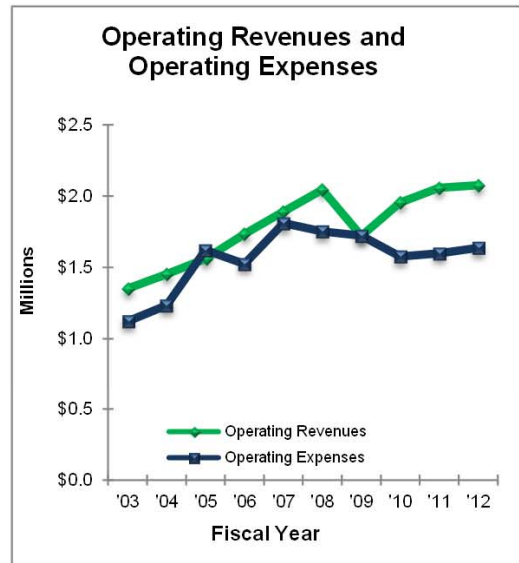

Total expenses in constant dollars have increased 18% for the period shown and per capita expenses have decreased 5%. The decrease that began in FY 2009 and continued through FY 2011 was due to the downturn in the economy. As revenues from the hotel/motel tax decreased, the department reduced their expenditures accordingly. Ending fund balance and cash and other resources have increased over the ten year period. Operating revenues have been above operating expenses. Ending cash and other resources have been above the 20% guideline. FY 2012 shows a slight increase. There are no warning trends observed for this fund.

Description:

The Office of Sustainability was established in FY 2010. Initial funding for the office came from the Energy Efficiency and Conservation Block Grant (EECBG) and a local match provided by the General Fund. Energy efficient projects have been planned and completed. The annual savings of these projects will be split between the departments that benefit from the projects and the Office of Sustainability. Once the four year grant ends, the office will be funded exclusively through the savings generated by sustainability projects.

Analysis:

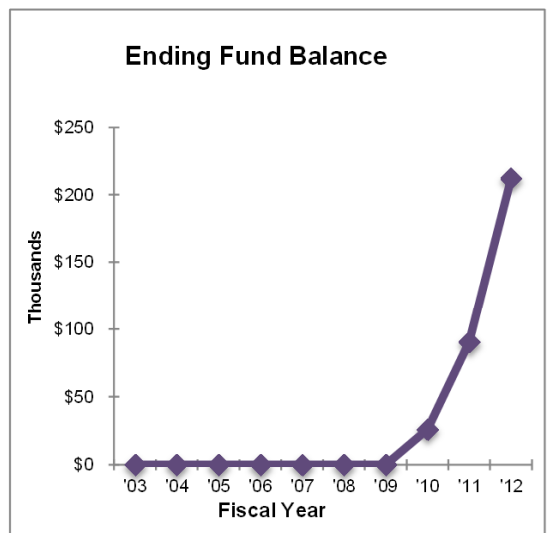

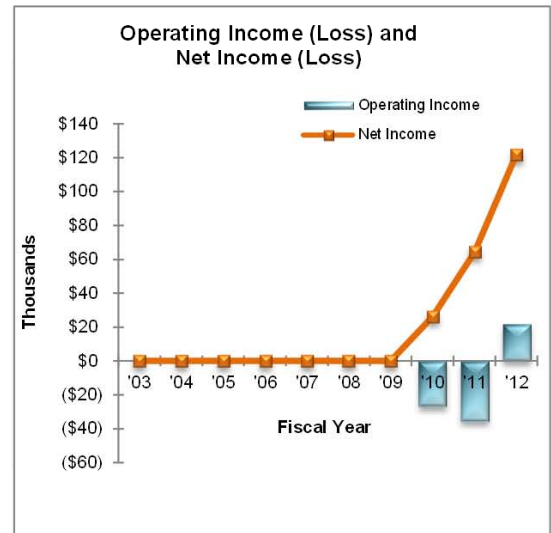

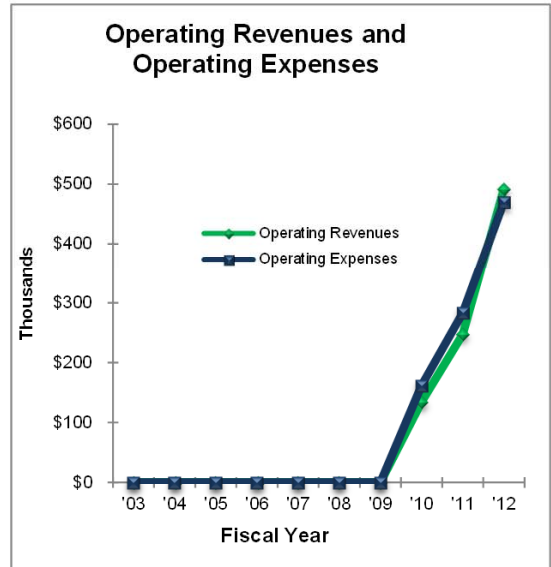

Staff and consultants were hired in FY 2010 to assess the city facilities and identify potential for retrofitting to achieve green house gas, energy and other sustainable targeted reduction goals. Energy usage was gathered for all of the facilities so comparisons could be made after improvements. Savings from retrofit projects were estimated. In FY 2011, the projects began. It will be important to assess the sustainable savings from these projects to allow for future funding of this office.

Description:

The Contributions Fund is a trust fund. All funding placed in this fund is designated for a particular purpose. This fund has three components: the Columbia Trust which includes gifts given directly to the City, Share the Light which allows donations to a variety of programs through utility bill payments, and the New Century Fund, a separate 501c3 organization with a board appointed by City Council. Once funds are placed and accumulated in this fund, they are transferred to the designated fund or department to be spent.

Analysis:

The majority of the expenses for this fund involve the transfer of donated funds to the specific fund or department designated by the donor. Thus, the expenses can greatly vary from year to year as they are based on the amount of donations. There are no warning trends for this fund.

Parks and Recreation

Description

The Parks and Recreation Department oversees over 2,900 acres of park land and maintains 74 parks and recreation facilities. A wide array of sports, recreation activities, lessons, and special events are available for citizens of all ages. Open space, parks, and trails provide opportunities to enjoy the natural beauty of Columbia. Within this section, there are four budgets which support the parks and recreation activities in the City. Each of these budgets has a separate funding mechanism and are accounted for differently. The Parks and Recreation - General Fund Operations budget is a part of the General Fund, and as such, receives a large portion of its funding from general city funds which are discretionary and can be moved from one department to any other general city funded department. The Recreation Services Fund is classified as an Enterprise Fund and therefore, is to be operated as a business through the charging of fees for services. Funding is all dedicated and cannot be moved to other departments. The Capital Projects Fund reflects the capital projects for Parks and Recreation. Funding cannot be moved to other departments. The Parks Sales Tax Fund is classified as a Special Revenue Fund and the funding received is to be used for parks purposes.

Parks & Recreations - General Fund Operations

This budget accounts for the parks and recreation program areas that do not have revenue producing capabilities. This includes Administration, a portion of Park Planning and Development, a portion of Park Management and Operations, and the C.A.R.E. program.

Recreation Services Fund

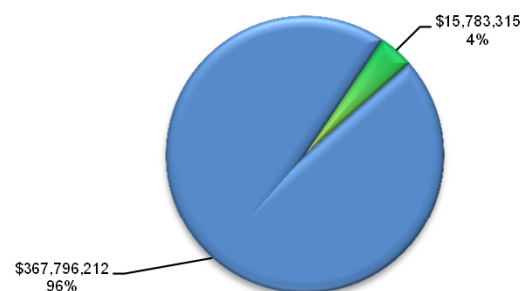

The Recreation Services Fund includes the Recreation Services Division and those costs in the Parks Services Division which are necessary for operation of facilities within Recreation Services. This includes group and individual programming to promote a high quality of life through positive cultural, psychological, emotional, and physiological development. The sections included in this fund are Sports Programming, Aquatics; Community Recreation, Golf/Concessions, Senior/Life Enrichment/Special Events Programs, Special Olympics Adaptive, and the Activity and Recreation Center (ARC). While this fund does charge users for services, this fund does not recover enough funding from fees to offset all of the costs. The rest of the costs are covered through subsidies received both from the General Fund and the Parks Sales Tax Fund. As a part of a master plan, target cost recovery ratios have been determined. The department is working to reach these recovery targets over a period of time and will require future fee increases to users.

Capital Projects Fund

The general government capital projects related to the parks system are included in the Capital Projects Fund.

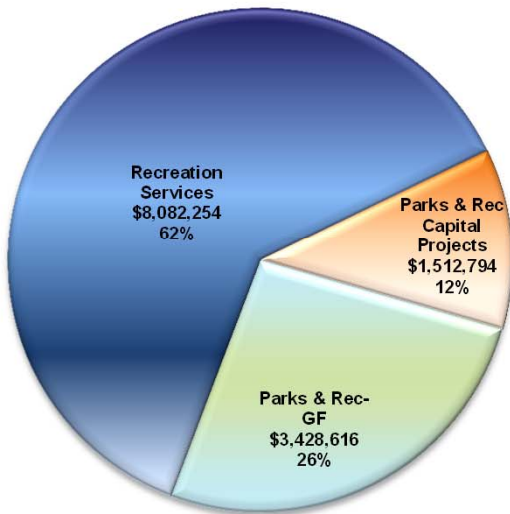

Parks Sales Tax Fund

In November of 2000, the voters of the City of Columbia passed a Local Parks Sales Tax in the amount of a one-quarter of one percent (for five years), and a one-eighth of one percent thereafter, on retail sales made in the City. These funds must be used for parks purposes. The current one-eighth of one percent temporary sales tax was approved for a five year extension by Columbia voters in November, 2010. The five year extension will continue to be used to fund renovation/ improvements to existing parks, acquisition/development of parks and additional trails and greenbelts. As a part of the original passage of the parks sales tax, the City made a commitment to the voters to maintain its General Fund support of parks at the FY 2001 budgeted level or above. This section begins on page .

Description:

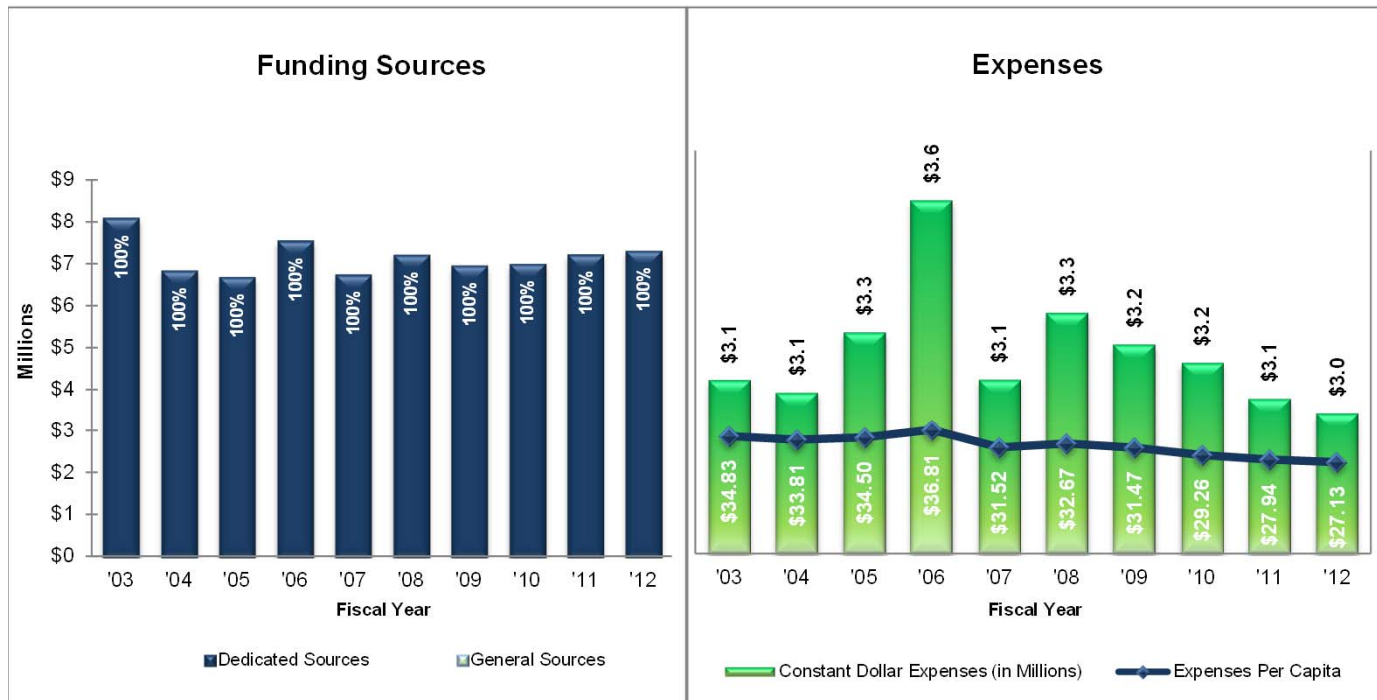

The Parks and Recreation Department has areas of operation which include Administration, Career Awareness & Related Experience (CARE) Program, Planning and Development and Parks Management. The primary dedicated funding source is from Parks Sales Tax.

Analysis:

For the ten year period, constant dollar expenses have increased 14% while per capita expenses have decreased 9%. Increases in FY 2007 were due to fleet replacement needs and increases in FY 2008 included the addition of staff to assist with planning and on-site project management for the increasing number of capital projects funded through the 2005 ballot issue. There are no warning trends observed for this department during the period shown.

Description:

The Recreation Services Department is an enterprise fund department which means user fees are charged for the services it offered and the funds are kept separate from the general fund operations. All funding is considered to be dedicated. The areas of operation include Park Services, Recreation, and Recreation Center. The primary operating revenue sources for this fund are activity fees, user fees, golf course improvement fees, rentals and sales as well as subsidies from the General Fund and Parks Sales Tax Fund.

Analysis:

For the ten year period shown, expenses without capital projects have increased 21%, while total expenses, constant dollar expenses, and expenses per capita have decreased. Management is working to reduce the amount of General Fund subsidy used to support this operation and are replacing it with Parks Sales Tax funding. Fees are reviewed annually; however, the fees are not expected to recover 100% of costs for most of the activities. A separate cost recovery goal is established for each area. The warning trend for this department is as costs increase, subsidies from the General Fund or Parks Sales Tax Fund must cover those increases and both of this sources have many other areas competing for the resources and cash balances are depleted.

From FY 2008 and FY 2012, the gap between operating revenues and operating expenses has continued to increase. Net income, ending fund balance, and ending cash and other reserves have decreased. Subsidies have been decreased; therefore the fund has been depleting cash. Currently cash is above the 20% requirement, but as the balance goes down, it will reach a point in the future when it goes below the requirement. Management will need to closely monitor the expenses and services of this fund and adjust in the future so cash is not depleted.

Description:

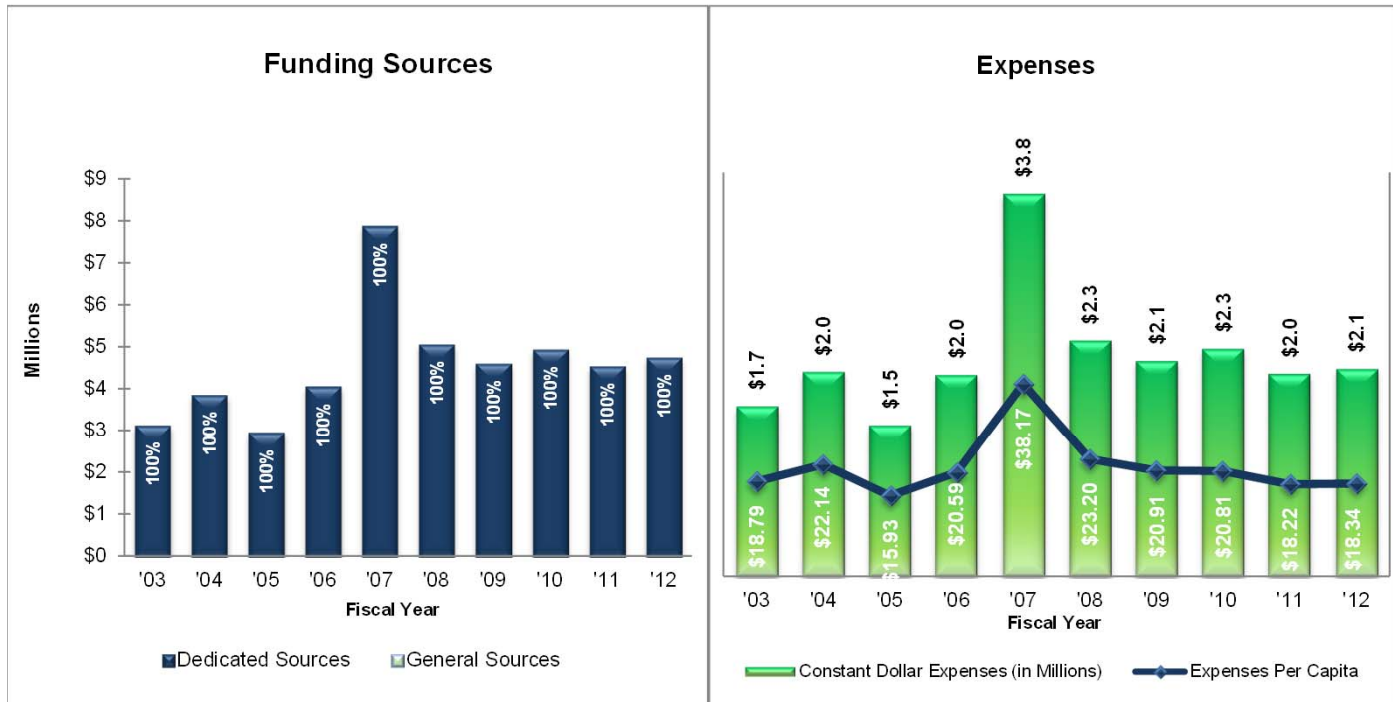

Capital projects for Parks and Recreation include the purchase of land for future parks or trails, field improvements for existing baseball/softball fields, development and construction of neighborhood parks, renovation or construction of park playgrounds, and development and construction of new trails. The primary dedicated funding source is Parks Sales Tax. The Parks Sales Tax has a 1/8% component which is temporary, and as the tax expires, a ballot issue is presented to the voters to extend the tax for another five year period. The voters are given a list of specific projects that would be completed with the extended tax as well as additional funding for annual projects that would be identified later. The Parks and Recreation department completes those projects before another ballot issue is taken to the public. The other 1/8% component is permanent and is used to fund parks operations.

Analysis:

The expenses shown for the ten year period have been for voter approved capital projects. The differences shown from year to year are due to the size and timing of the projects. A project may take more than one year to complete, but all of the funding must be appropriated before the City can enter into a construction contract. The City has had sufficient Parks Sales Tax receipts to fund all of the voter approved capital projects currently approved. The next ballot issue will occur in November, 2015. There are no warning trends observed for this area.

Description:

The Parks Sales Tax Fund is a special revenue fund that is the depository of both the one-eighth percent permanent parks sales tax and the one-eighth percent temporary parks sales tax which is voted on every five years. This sales tax was originally approved by voters in November 2000 and these funds must be used for parks purposes. Five year extensions have been approved by voters for the temporary 1/8th cent parks sales tax in November 2005 and November 2010. Parks sales tax receipts are placed in this fund as they are received. Transfers are done to move the funds to the General Fund to support park operations, to the Recreation Services Fund to support operations, and the Capital Projects Fund to fund voter approved capital projects. All of the sources in this fund are dedicated sources.

Analysis:

As with most sales taxes which are accounted for in special revenue funds, it is common to build up funds over time and then transfer the funds to the Capital Projects Fund for a particular project. Such was the case in FY 2007 when the Crane property was purchased. As was noted in the description, this fund makes transfers to the General Fund, Recreation Services Fund and the Capital Projects Fund. Although the economic downturn impacted parks sales tax receipts, the City has been able to fund all of the voter approved capital projects during this time frame.

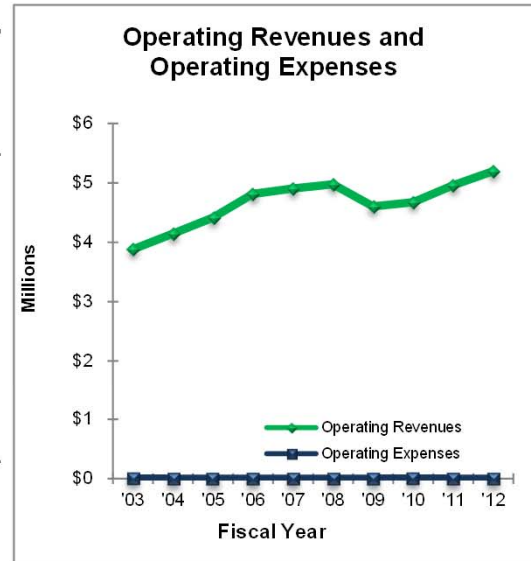

From FY 2007 to FY 2010, there was a significant decrease in ending fund balance and ending cash and other resources. This is normal and expected with this type of fund. In FY 2012 ending fund balance and ending cash and other resources increased. Since half of the parks sales tax is temporary, it is anticipated that those funds will be appropriated and expensed by the time the temporary tax expires. The twenty percent guideline is not relevant to this type of fund. There are no warning trends observed for this fund.

Public Safety Departments

Description

The City has four departments that are grouped together as Public Safety Departments. These include Police, Fire and Emergency Management, Public Safety Joint Communications, and Municipal Court. All of these departments are accounted for in the City's General Fund. While there are some grant revenues to help offset the costs of these operations, most of the funding is classified as general sources and can be moved from one department to any other department that is funded with general sources.

Police

The Police Department serves as the primary law enforcement agency for the City. Its mission is to reduce crime and improve public safety by enforcing the law, solving problems, and encouraging citizen responsibility for community safety and quality of life. Dedicated funding sources include grants and a reimbursement from the School District to partially offset the cost of the School Resource Officers.

Fire

The Fire Department is charged with protecting lives and property from fire, explosion, hazardous materials and other natural or man-made disasters, or any other situation that threatens the well-being of our citizens. Dedicated funding sources include grants and a reimbursement from the University to partially offset the cost of an assistant fire marshal.

Public Safety Joint Communications (PSJC)

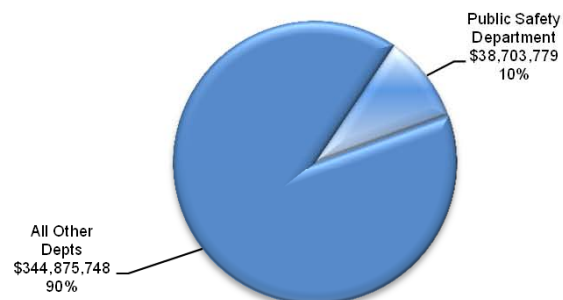

Public Safety Joint Communications (PSJC) operates the 9-1-1 Operations Center which handles all of the 9-1-1 emergency calls as well as the non-emergency calls for the Columbia/Boone County area. PSJC currently dispatches for ten user agencies in our area which include the Columbia Fire Department, Boone County Fire Protection District, Southern Boone County Fire Protection District, Columbia Police Department, Boone County Sheriff's Department, Ashland Police Department, Hallsville Police Department, Sturgeon Police Department, Boone Hospital Ambulance Service, and University Hospital Ambulance Service. In addition, we also provide assistance to other public safety agencies in our area. Dedicated funding sources include reimbursement from the Boone County Sheriff, Boone County Fire Protection District, Boone Hospital, University Hospital, and Southern Boone County; payment from Boone County for a .75 FTE position; and federal Homeland Security grants.

Emergency Management

Emergency Management strives to ensure proper plans are in place for the various multi-hazards that may impact Boone County at any time. The mission is to prepare, mitigate, respond and recover from disasters through coordination efforts between public safety, public services, government agencies, and the citizens of our community. Dedicated funding sources include SEMA and other state grant funding and a 33% cost reimbursement funding from Boone County.

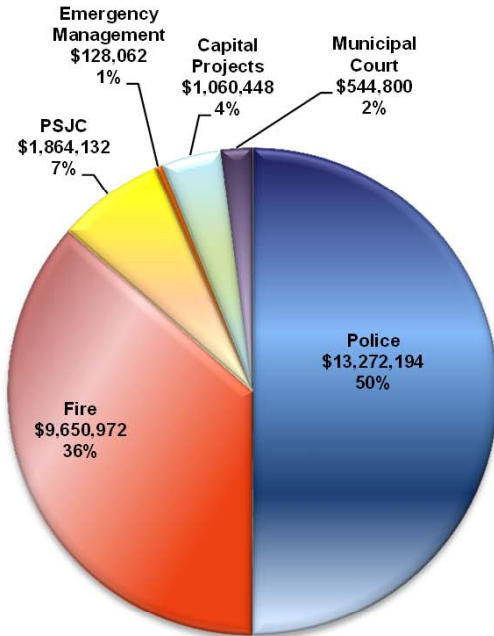

Municipal Court

Municipal Court processes violations of City ordinances resulting from citizen complaints, traffic violations, and misdemeanor arrests. Activities include processing traffic violations and recording convictions, collection of fines, scheduling of trials, preparation of dockets, serving subpoenas, and issuing and service of warrants for traffic violations and other charges. There are no dedicated funding sources for this department.

Description:

The Police Department is a General Fund department whose primary funding comes from general revenue sources. The areas of operation include administration, operations, administrative support and operations support. The primary dedicated funding source is grant revenues, alarm violations and school district reimbursements for school resource officers.

Analysis:

For the ten year period, constant dollar expenses have increased 12% and per capita expenses have decreased 11%. Personnel costs account for a significant percentage of the total expenses for this department and increases come from the addition of positions as well as changes in salaries and benefits. Over the ten year period 23 FTE positions have been added; however, this rate does not keep up with the population growth rate. There have been significant increases in police pension costs which have limited the ability of management to add more positions. The FY 2013 budget will begin to address the pension issues by placing all new employees in a different pension plan. Close monitoring of expenses is important to ensure the department is staffed appropriately so our community remains safe.

Description:

The Fire Department is a General Fund department whose primary funding source is general revenue sources. The areas of operation include administration, emergency services, departmental services and fire marshal's division. The primary dedicated funding source is grant revenue and reimbursement from the University of Missouri for fire services.

Analysis:

For the ten year period, constant dollar expenses have increased 20% and per capita expense have decreased 4%. Personnel costs account for a significant portion (89%) of the total expenses and increases come from the addition of positions and changes in salaries and benefits. While the cost of new and replacement fire trucks as well as construction of new fire stations is accounted for in the capital projects fund, the operating costs of new fire stations is accounted for in the Fire Department's operating budget. Extensions of the capital improvement sales tax, which are approved by voters every 5 years provide capital project funding. The City opened one new fire station (#9) and relocated one fire station (#7) during this ten year period. However, due to the economic downturn, one additional fire station approved by voters was not able to be built. Within the Fire Department, pension costs significantly increased during this timeframe and this resulted in the City not being able to fully staff station #2 as well as the need to leave one position authorized, but unfunded. The FY 2013 budget will address the pension issue by placing all new employees into a different pension plan. Close monitoring is needed for this department since it relies so heavily on general sources to ensure fire stations are adequately staffed as they are built.

Description:

The Public Safety Joint Communications Department is a General Fund department which receives the majority of its funding from general revenue sources. Dedicated funding comes from grant revenues with the majority coming from user agencies that reimburse the City for services performed.

Analysis:

For the ten year period, constant dollar expenses increased 8% while expenses per capita decreased 14%. Close monitoring of the department is warranted to ensure adequate funding is available for staffing and operating the 9-1-1 center. It should be noted that capital projects for Joint Communications are not reflected in this budget but are accounted for in the Capital Projects Fund where the projects must compete with Police, Fire, and Streets and Sidewalks projects for the use of capital improvement sales tax funds. Projects are identified and approved by voters every 10 years when a ballot is done to extend the one-quarter capital improvement sales tax.

Description:

The Emergency Management Department is a General Fund department. Dedicated funding comes from grant revenues which come from the state and county. The County reimburses the City for services rendered.

Analysis:

For the ten year period, constant dollar expenses decreased 4% and per capita expenses decreased 23%. It should be noted that expenses can vary significantly from year to year due to Homeland Security grants funding for specific projects. This is the case in FY 2008, FY 2009, and FY 2011. While the trend for this department appears to be negative because expenses per capita have increased, the reason for the increase is due to one-time Homeland Security grants for equipment and not due to on-going operational cost increases. Based on the ten years of data there is no overall warning trend for this department.

Description:

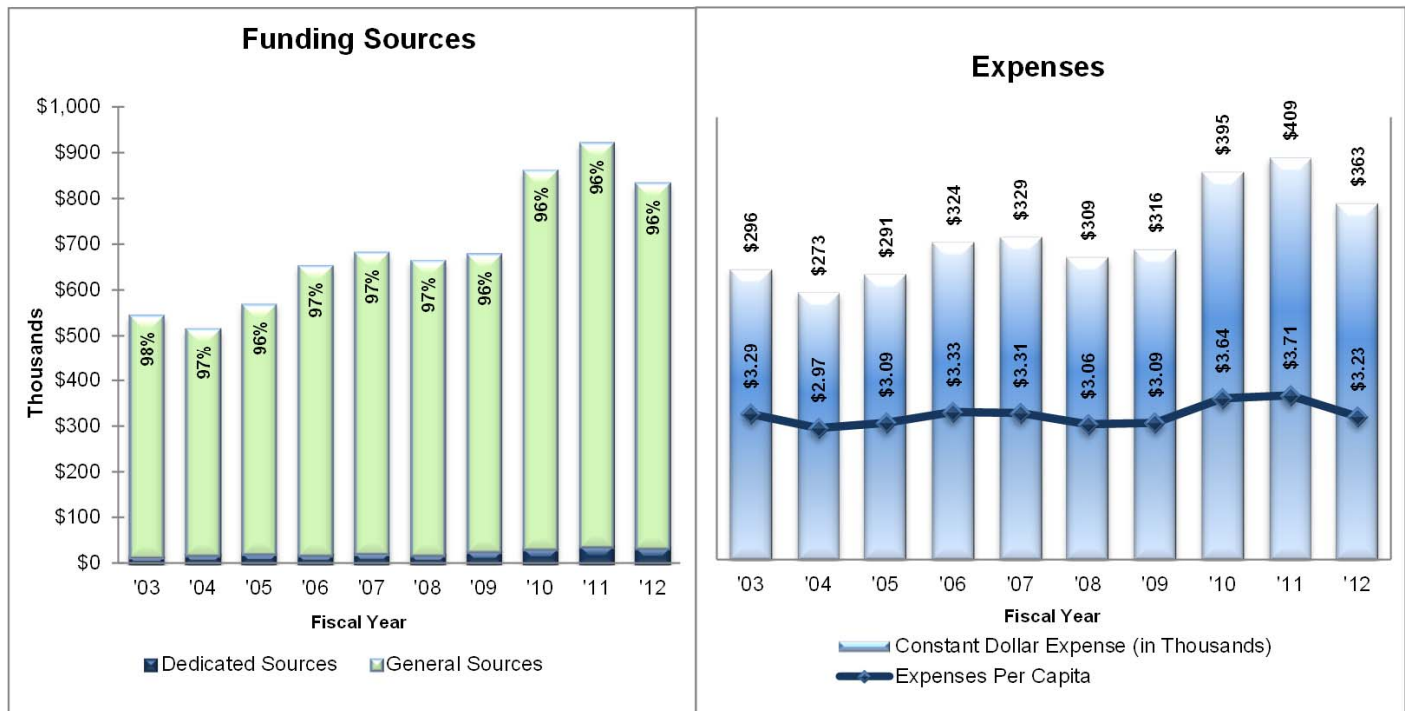

Capital Projects for Police, Fire, Joint Communications and Emergency Management are accounted for within the Capital Projects Fund. Funding for public safety capital projects comes primarily from capital improvement sales tax funds which are approved by the voters every ten years.

Analysis:

Capital project funding for Public Safety fluctuates from year to year based on the number and timing of projects that have been approved for a particular year. Although projects can be completed over several years, the City must have all of the funding for a project appropriated before a construction contract can be awarded or a fire apparatus can be ordered. The current capital improvement sales tax expires December 31, 2015. Prior to that time, a new list of public safety and street projects will be taken to the voters to approve another ten year extension of the sales tax.

Due to the economic downturn the capital improvement sales tax did not generate enough funding to do all of the fire projects. As a result, one new fire station will not be built and the corresponding additional fire apparatus will not be purchased. This indicates a warning trend for this fund as the City always strives to complete all voter approved projects before they bring another ballot issue to the voters. Another warning trend is the amount of funding generated by the quarter cent sales tax may not be sufficient to handle the growing need for funding for Police, Fire, Public Safety, Joint Communications as well as Streets and Sidewalks. Management will need to explore additional revenue sources in the future.

Description:

Municipal Court is a General Fund department which is primarily funded from general revenue sources. The areas of operation include court and traffic operations. The primary dedicated funding source is bond forfeitures and shoplifter offender program fees. Fines and court fees are considered to be general revenue sources.

Analysis:

For the ten year period, constant dollar expenses have increased 23% and per capita expenses have decreased 2%. The biggest increases occurred in FY 2010 and FY 2011 when the City implemented the red light camera program. In those years both staff and operating costs were added. Red light camera revenues offset some of the cost. The FY 2012 reduction was due to decreasing expenditures to reflect red light camera operations, as well as, reducing expenses to help close the gap between general expenditures and revenues. Management will need to closely monitor this budget in the future to ensure the red light camera program is performing as expected and make adjustments as needed.

Supporting Activity Departments

Description

Supporting activity departments are those departments that provide goods and services to other City departments on a cost-reimbursement basis. These departments are classified as Internal Service Funds.

The most significant revenue to these departments is the fees and service charges they receive from providing goods services to other City funds. All of the funding sources within these funds are dedicated and cannot be moved from one department to another.

In the City departments which receive goods and services from supporting activity departments, the fees are accounted for in the Intragovernmental Charges category. A brief discussion of the methodology used to recover these charges is included in each department's section.

Employee Benefit Fund

The Employee Benefit Fund accounts for the transactions and reserves associated with the City's medical dental, prescription drug, life and long-term disability programs for City employees, plus other benefits such as safety and service awards and sick leave buyback. Employee health and wellness programs are also managed through this fund. Coverage for health, dental, and prescription drug plans are self-insured. Other coverages are placed with commercial insurance carriers.

Self Insurance Fund

The Self-Insurance Reserve Fund accounts for the transactions and reserves associated with the City's Self-Insurance Program. This program provides coverage for the City's workers' compensation, and property and casualty claims. Claims administration is managed by the City Finance Department.

Custodial & Building Maintenance Fund

Custodial and Building Maintenance Services Fund provides custodial services to City Hall, Howard Building, Gentry Building, Sanford Kimpton (Health) Building, Wabash and Grissum Building. Building maintenance is provided to these facilities as well as the Walton Building, police buildings (excluding Training Facility) and other City facilities.

Fleet Operations Fund

The Fleet Operations Division provides preventive maintenance, mechanical repair, repair parts, acquisition support, and fuel for the vehicles and equipment belonging to the Public Works Department, the Police Department, the Fire Department and other City departments.

GIS (Geospatial Information Systems)

The Geospatial Information Services Fund (GIS) is responsible for developing, coordinating, and supporting the use of geospatial technologies, such as, computer mapping, geographic information systems, global positioning systems, remote sensing, and the accompanying spatial data across all City departments. These functions improve data quality and control, improve the quality of information and ease of information access, and reduce duplication of data and effort, all of which help the City accurately and reliably serve the public.

Information Technologies Fund

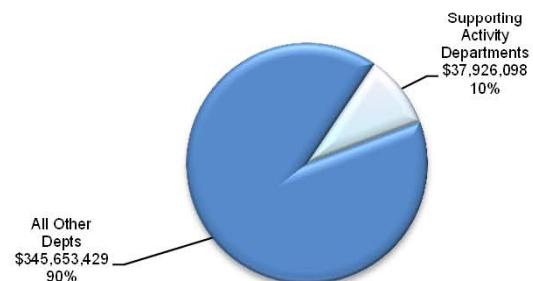

Information Technologies (I.T.) is responsible for support and administration of AS/400 midrange computers, a Wide Area Network (WAN), Local Area Networks (LANs), telecommunications (PBX), City's Web-site, personal computers (PCs), and workstations throughout all City departments. I.T. provides systems development, system enhancements, upgrades, repairs and consulting in regards to individual department needs. I.T. also works to improve the operational efficiencies of the City as a whole.

Public Communications Fund

The Public Communications Department provides direct technical and consultation services for City agencies, City Council and the public. Its umbrella covers coordination of communications strategies; print and broadcast outlets; and central document support services. It has become increasingly responsible for operation and facilitation of the City's communications network (excluding telecommunications) and meeting facilities.

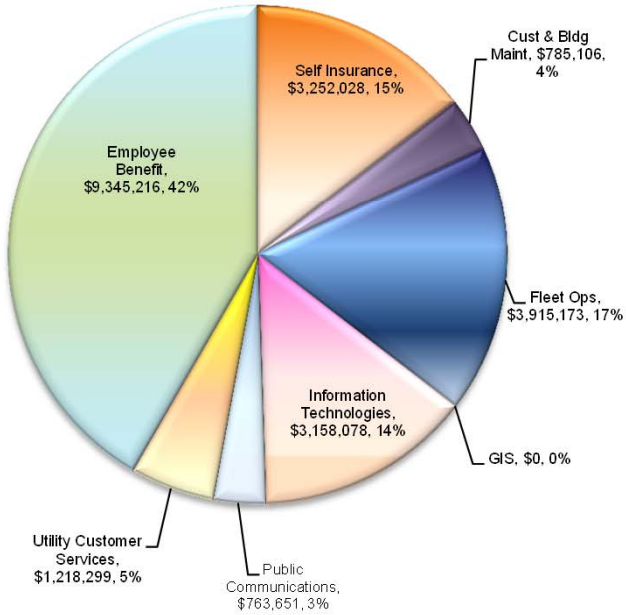

Utility Customer Services Fund

The Utility Customer Services Division (UCS) is responsible for all billing related activities for the City's electric, water, sewer, solid waste, and storm water enterprise activities. As the City's primary interface to the customers, UCS staff handles all inquiries and service orders from customers and related City departments in an efficient and customer friendly manner. Our goal is to make it easy for our customers to interact with UCS and the City of Columbia.

Description:

The Employee Benefit Fund is an internal service fund that accounts for the transactions and reserves associated with the City's medical, dental, vision, prescription drug, Medicare supplement, life and long-term disability programs for City employees and retirees. All funding sources for this fund are dedicated and come from fees and service charged for employee and retiree health insurance premiums.

Analysis:

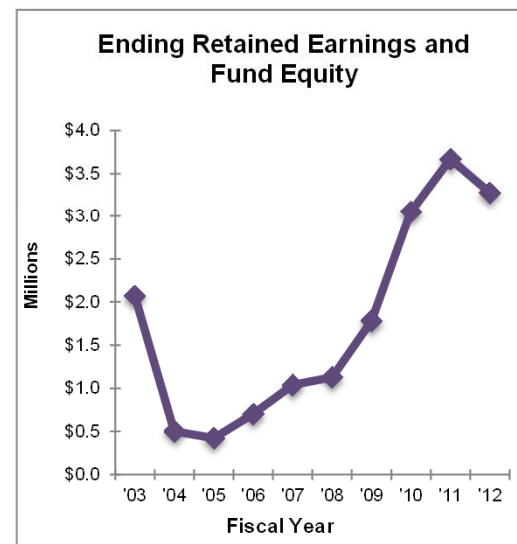

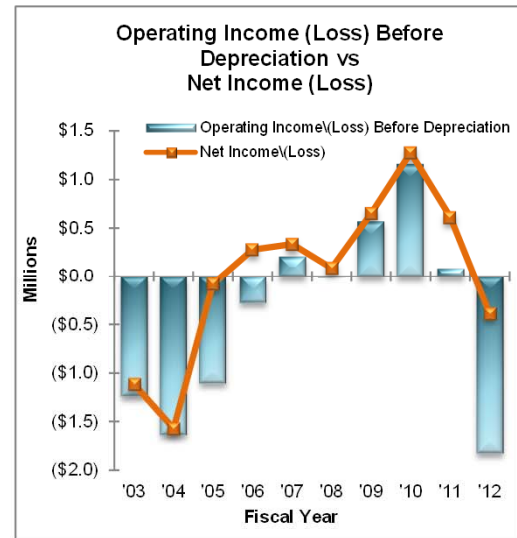

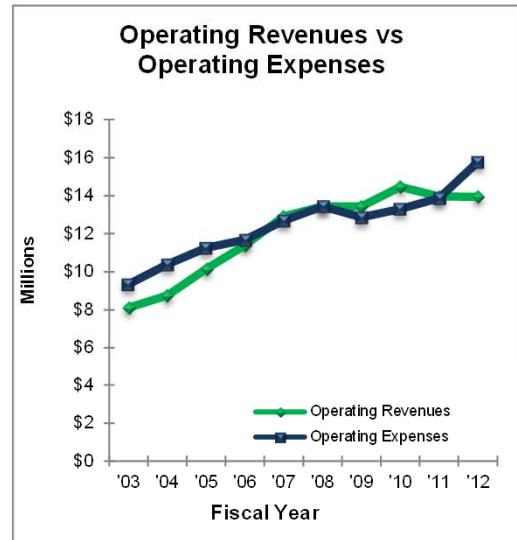

For the past ten years, constant dollar expenses have increased 36% and expenses per capita have increased 8%. The increases have been due to increases in medical expenses and insurance premiums. Management will need to closely monitor this fund to ensure changes are made within the health insurance program to limit future expense increases. Fund balance and ending cash and other resources have increased. Ending cash and other resources has been above the 20% guideline since FY 2010.

Description:

The Self Insurance Fund is an internal service fund that accounts for the transactions and reserves associated with the city's self insurance program. This program provides coverage for the city's worker's compensation and property and casualty claims. The primary dedicated funding source is self insurance charges which are charged to each fund based on three components: 50% of the cost is based on the department's five year claims cost history; 30% is based on the department's workers compensation exposure as determined by industry standards; and 20% is based on the department's vehicle exposure which is determined by the number and types of vehicles.

Analysis:

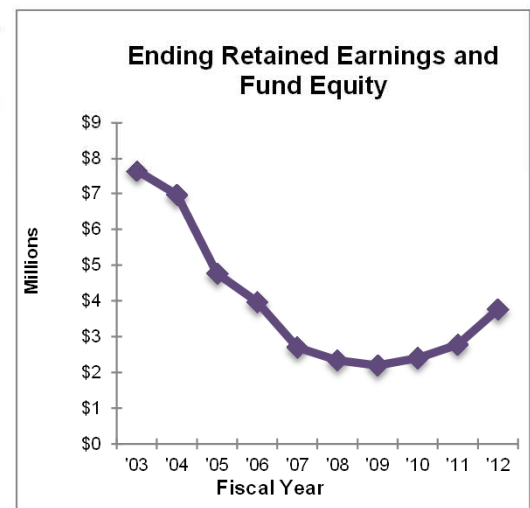

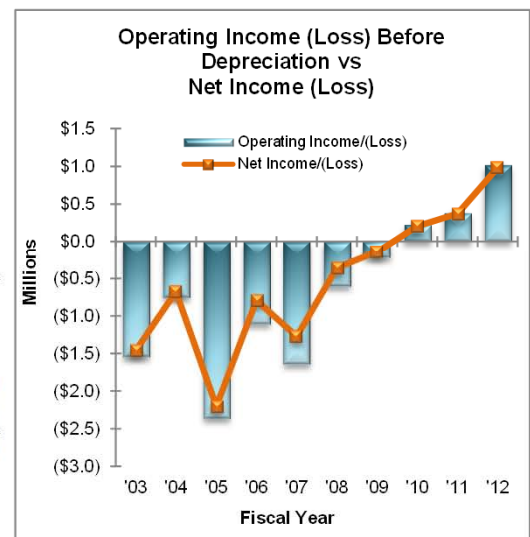

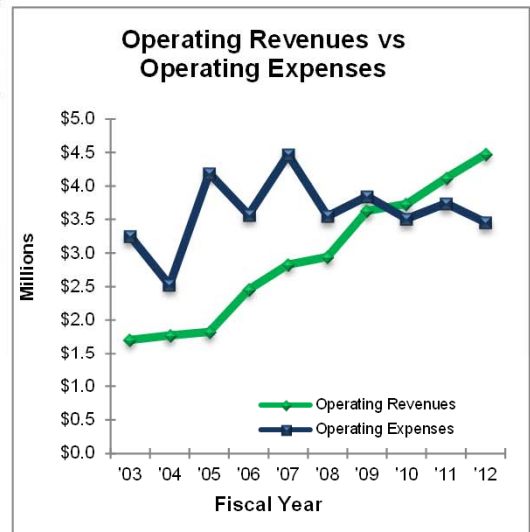

For the ten year period, constant dollar expenses have decreased 14% and expenses per capita have decreased 31%. The increases and decreases over the ten year period are due to the fluctuation in the number and size of claims as well as increase in insurance premiums. Management closely monitors this fund to ensure the fund is properly funded and premium and claim cost increases are minimized. Fund balance decreased from FY 2003 to FY 2006 but has been stable since then. Ending cash and other resources has been above the 20% guideline since FY 2008.

Description:

The Custodial and Building Maintenance Department Fund is an internal service fund that provides custodial services to city buildings downtown, along with the Sanford Kimpton, Wabash and Grissum Buildings. In addition, building maintenance services are provided to these facilities as well as the Walton Building, various police buildings (excluding the training facility) and other city facilities. All funding sources are considered to be dedicated and come from fees and service charges to funds that utilize these services on a per square foot basis. Utility bills for the Daniel Boone Building, Howard and Gentry Buildings are paid from this fund and the departments are charged back on a per square foot basis.

Analysis:

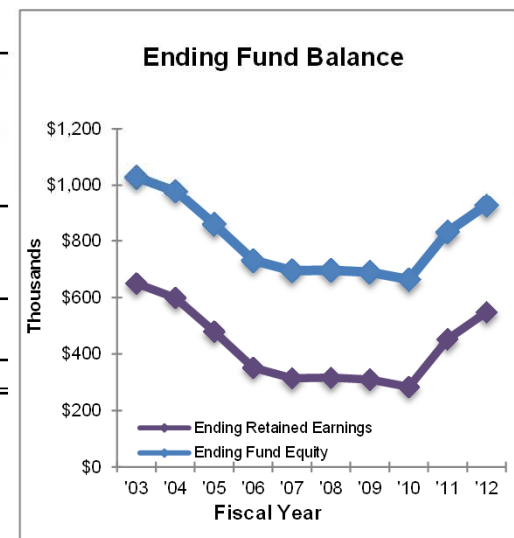

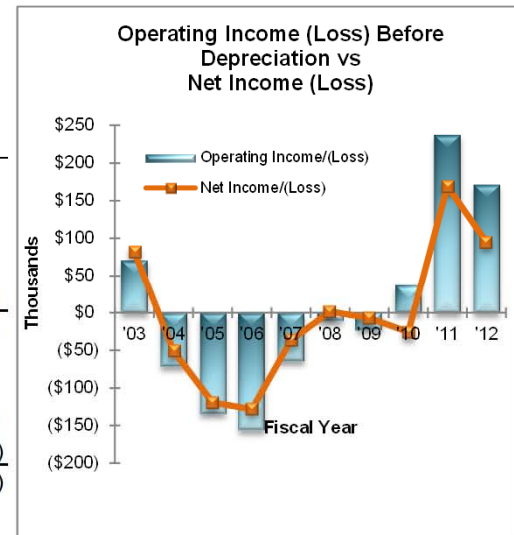

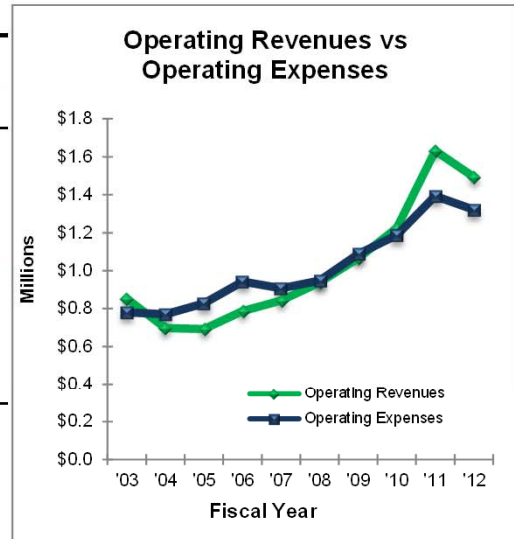

For the ten year period, constant dollar expenses have increased 46% and expenses per capita have increased 17%. In FY 2009, custodial services were added to the Wabash (Transit) building and increased at the Grissum Building. This resulted in the addition of 1.75 FTE positions. In FY 2010, Custodial and Building Maintenance services were increased in the addition and renovation of the Daniel Boone Building. Three positions were added as a result of the expanded square footage for custodial and building maintenance. Net losses occurred in FY 2004 to FY 2007 and from FY 2009 to FY 2010. These are planned uses of fund balances as internal service funds do not have a goal of making a profit. Rather, they exist to provide a service to user departments and recover their costs through fees to the user departments. Over time, fund balance and ending cash can increase because the department did not spend all of their budget. Management uses the excess cash above the 20% guideline by charging fees to departments that are lower than they should be to recover 100% of costs or purchasing one-time capital items. The result is a net loss for the year and fund balance and ending cash and other resources decreases. Ending cash and other resources has been above the 20% guideline for all years shown.

Description:

The Fleet Operation Fund is an internal service fund that provides preventive maintenance, mechanical repair, repair parts, acquisition support, and fuel for the vehicles and equipment belonging to City departments. The primary dedicated funding source is fees and service charges for labor, parts, outside work authorizations and fuel which is charged to departments based on usage of fleet goods and services.

Analysis:

For the ten year period, constant dollar expenses increased 62% and expenses per capita increased 30%. During this time period, fuel costs have more than tripled and costs of sending equipment out for repair significantly increased. This led management to the decision of adding another shift to fleet operations and this occurred in FY 2009. There has been a reduction in costs as a result. Management will look at further maintenance centralization efforts in the FY 2013 and FY 2014 budgets as Parks and Recreation and then Water and Electric vehicle maintenance come under the direction of this fund.

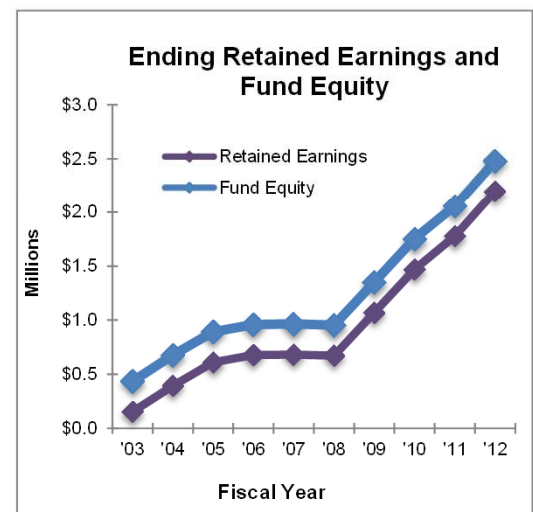

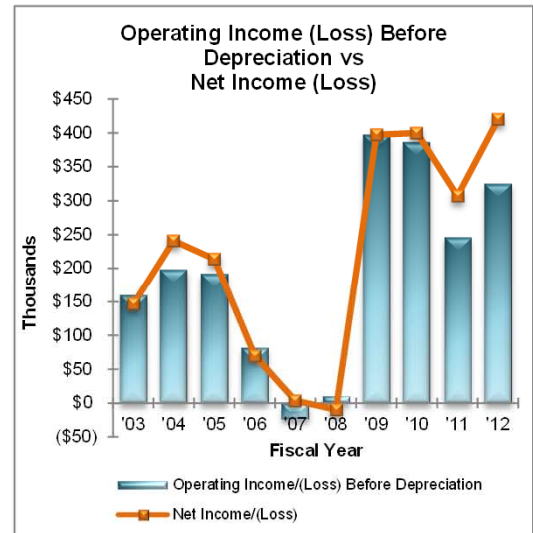

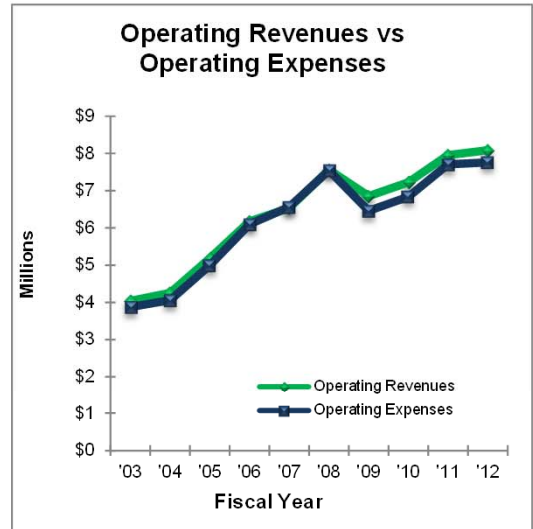

The Fleet Operations Fund experienced decreasing amounts of net income for the period of FY 2005 to FY 2007 and a net loss in FY 2008. However, net income has been positive for the period FY 2009 to FY 2012 after the third shift was added. Ending fund balance has significantly increased during the past ten years. Ending cash and other resources, while below the 20% guideline for the first nine years, is above the guideline for FY 2012. It will be important for management to set rates in the future in order to keep the cash balances above the 20% guideline.

Description:

The GIS Fund is an internal service fund that is responsible for developing, coordinating, and supporting the use of geospatial technologies such as computer mapping, geographic information systems, global positioning systems, remote sensing, and the accompanying spatial data across all City departments. The primary dedicated funding source is a fee charged to user departments based on the number of network computers in each department.

Analysis:

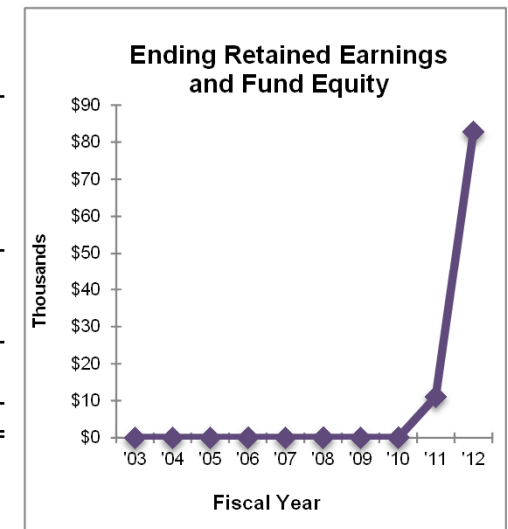

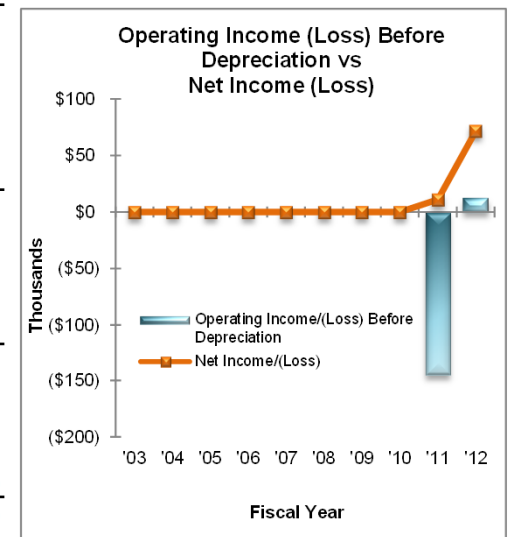

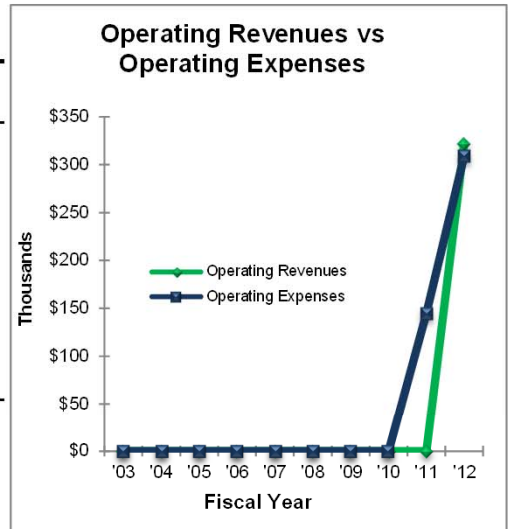

The GIS Fund was established mid-year FY 2011 when expenses were moved from the Information Technologies Department and the City Manager's budget into the newly established fund. FY 2012 reflects a full year's cost for the department.

Description:

The Information Technology(IT) Fund is an internal service fund that is responsible for support and administration of the AS/400 system, a Wide Area Network (WAN), Local Area Networks (LANs), telecommunications (PBX), personal computers (PCs), and workstations throughout all City departments. IT also provides systems development, system enhancements, upgrades, repairs, and consulting for departments. Telecommunication charges are based on actual usage. The rest of the budget is charged back to user departments on the basis of the number of network computers. The goal of an internal service fund is to recover the cost of providing the service. Over time, fund balance and ending cash can increase because the department did not spend all of their budget. Management uses the excess cash above the 20% guideline by charging fees to departments that are lower than they should be to recover 100% of costs or purchasing one-time capital items. The result is a net loss for the year and fund balance and ending cash and other resources decreases

Analysis:

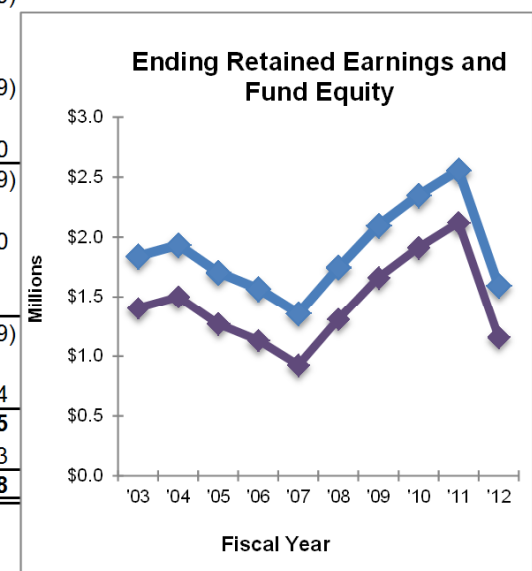

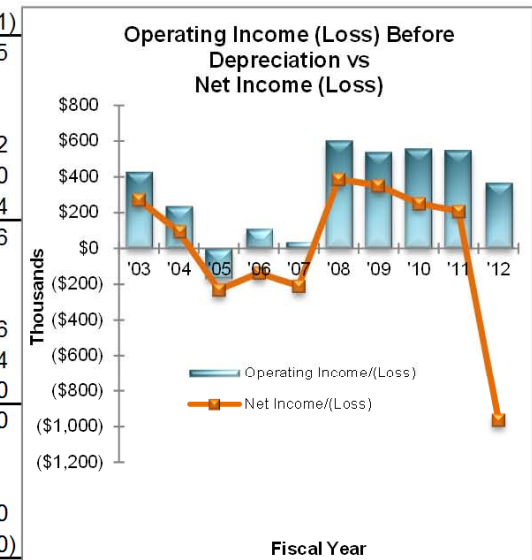

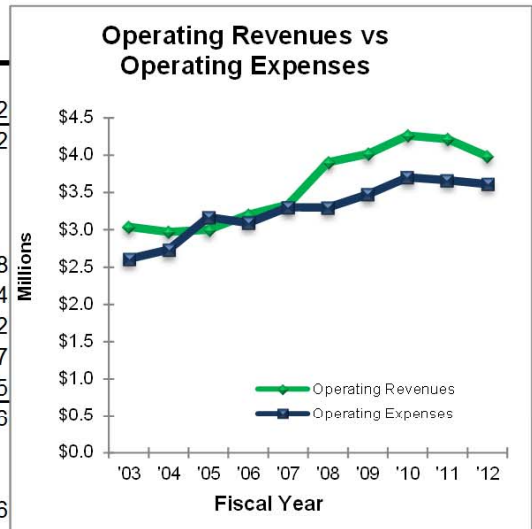

For the ten year period, constant dollar expenses increased 30% and expenses per capita increased 4%. There was a net loss for the period of FY 2005 - FY 2007 due to a management decision to use up excess fund balance as is a common practice with internal service fund departments. For the period FY 2008 - FY 2011 there was a net income and fund balance increase. In FY 2012 there was a significant net loss due to a one-time transfer of \$1 million to the Capital Projects Fund for Enterprise Resource Software. Ending cash and other resources have been above the 20% guideline for the entire period with the exception of FY 2007.

Description:

The Public Communications Fund is an internal service fund that provides direct technical and consultation services for City departments, City Council and the public. The primary dedicated funding source is CATV (cable) gross receipt taxes as well as charges to departments for postage, print shop services, and video production services. The remaining funding is recovered through a public communication fee assessed to all departments.

Analysis:

For the ten year period, constant dollar expenses increased 42% and expenses per capita increased 14%. In FY 2007 the City Channel operation was moved into this fund from the Electric Fund, a Neighborhood Specialist position was transferred in from the Planning department, and a Communication Director position was added. Upgrades to capital equipment accounted for increases in FY 2008 and FY 2009. The increase in FY 2010 was the result of the department being relocated into the renovated Daniel Boone Building and being charged a lease payment to pay for the renovations. This payment will continue until FY 2028 when the 2008 Special Obligation bonds are paid off. The decrease in FY 2012 was the result of no longer charging internal service funds intragovernmental charges.

Net income has been decreasing for the period of FY 2003 - FY 2005 and FY 2008 - FY 2009. There was a net loss in FY 2010 and FY 2011. It has been a management decision to set fees charged to departments at a level below 100% cost recovery and/or purchase capital items in an effort to use down cash balances that have built up over time. This is a common practice with internal service funds, as they exist to provide a service and not to generate a profit over time. Ending cash and other resources has been consistently above the 20% guideline for the ten year period.

Description:

The Utility Customer Services Fund is an internal service fund that is responsible for all billing related activities for the City's electric, water, sewer, solid waste, and storm water utilities. The primary dedicated funding source is a Utility Customer Service charge from the utility departments for providing these billing services.

Analysis:

For the ten year period, constant dollar expenses have increased 64% and expenses per capita have increased 31%. Increases have been due to rising bank and paying agent fees as the City began accepting credit cards during this time. Also, as the population has increased 25%, this has led to a greater demand on staff and management has had to add positions. Postage rate increases and bad debt expense increase due to the economic downturn have also contributed to overall expense increases.

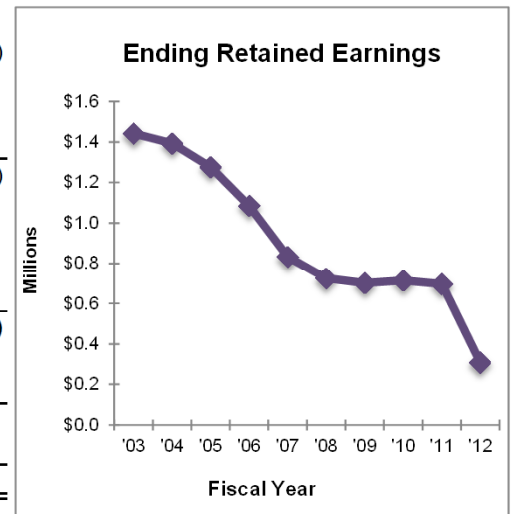

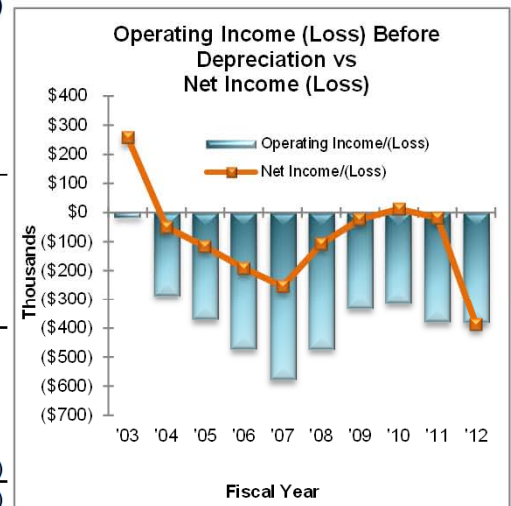

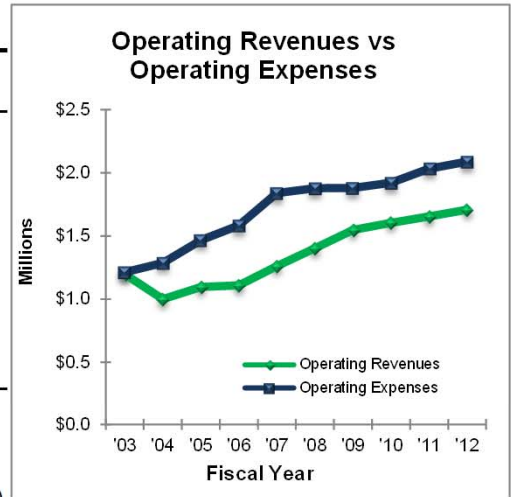

There were net losses recorded for the period FY 2004 to FY 2012. These were planned uses of fund balance by management in order to use down cash balances which had built up over time. This is a common practice in internal service funds. Ending cash and other resources has decreased for most of the period as a result but have continued to be above the 20% guideline until FY 2012. In FY 2012, there was a one-time transfer of \$300,000 to the Capital Projects Fund to help fund Enterprise Resource software.

Transportation Departments

Description

There are fourteen separate budgets that work together to provide a quality transportation system for the City. It should be noted that because of the way the City budgets the use of special revenues (such as transportation and capital improvement sales taxes) the total budget for transportation is higher than the actual dollars available for transportation purposes. For example, this section contains the Transportation Sales Tax Fund. This budget shows transfers (expenses) to Streets and Sidewalks, Transit and Airport for operating as well as for capital projects. These budgets then show the financial use of these sources in their respective expenses.

Public Works - Engineering

Engineering provides survey, design, contract administration and inspection of various public improvement projects, reviews of subdivision improvements, issuance of permits and inspection of all construction on public right-of-way.

Public Works - Non-Motorized Grant

This is a pilot project mandated by federal legislation to develop a network of transportation facilities, including sidewalks, bicycle lanes, and pedestrian and bicycle trails with the purpose of demonstrating how much walking and bicycling can replace car trips. In FY 2013 this grant was moved out of the general fund (GF) and into it's own special revenue fund (SRF).

Public Works - Streets & Sidewalks

Streets provides maintenance of 9.7 miles of unimproved streets and 507.3 miles of improved streets, snow removal on all City streets, mechanical and manual street cleaning, mowing of public right-of-ways, and utility service cut repairs. The Traffic Maintenance Division fabricates, installs, and maintains approximately 20,000 traffic control and street name signs, paints 1,040,000 feet of pavement striping, paints curbs/crosswalks/ symbols, and provides traffic signal maintenance.

Public Works - Parking Enforcement

Parking Enforcement administers the parking ordinances of the City via parking control enforcement in the central business district and the metered University streets. Parking Enforcement ensures adequate parking for downtown employees, customers, and businesses. This division works with the City Prosecutor's office, affected businesses, consumers in the identification and mitigation of problematic enforcement zones.

Transit Fund (Buses)

Transit provides public bus transportation to as many citizens as possible at the lowest possible cost, while maintaining timely and dependable service.

Regional Airport Fund

The Airport provides safe and usable Airport facilities for the operation of commercial, general aviation and military aircraft, and creates a healthy environment so that the community may access the national air transportation system and promote the economic growth of the region.

Parking Utility Fund

The Parking Utility operates, maintains, and administers five parking facilities, 9 surface lots as well as on- street parking meters.

Railroad Utility Fund

This fund operates and maintains the short line Columbia Terminal Railroad (COLT) to provide customers with safe, reliable, and efficient rail service.

Transload Facility Fund

This fund operates and maintains the Transload facility.

Capital 1/4 Cent Sales Tax Fund

This fund accounts for the one quarter cent capital improvement sales tax that was most recently passed by voters in 2006 and will expire on December 31, 2015. This sales tax is used to fund fire trucks and public safety facilities, as well as major street and sidewalk projects. These funds are transferred into Capital Projects Fund to fund specific capital projects.

Transportation Sales Tax Fund

This fund accounts for the 1/2 cent permanent sales tax that was authorized by voters on April 6, 1982. These funds are used to subsidize Airport and Transit activities, fund various road projects, and pay for street and sidewalk related activities in the General Fund.

Public Improvement Fund

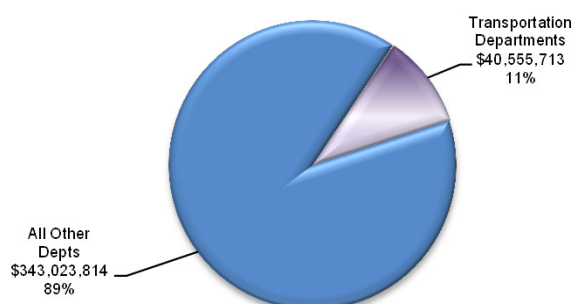

This fund accounts for the portion of the 1% general sales tax that is dedicated to the Capital Improvement Plan. Currently 4.1% of the amount of general sales taxes is dedicated to fund capital projects. These funds are transferred into the Capital Projects Fund to fund specific projects.

County Revenue

The fund accounted for the road and bridge tax revenues collected by Boone County and shared with the City. The city will no longer use this separate fund. FY 2011 was the last year the fund was used.

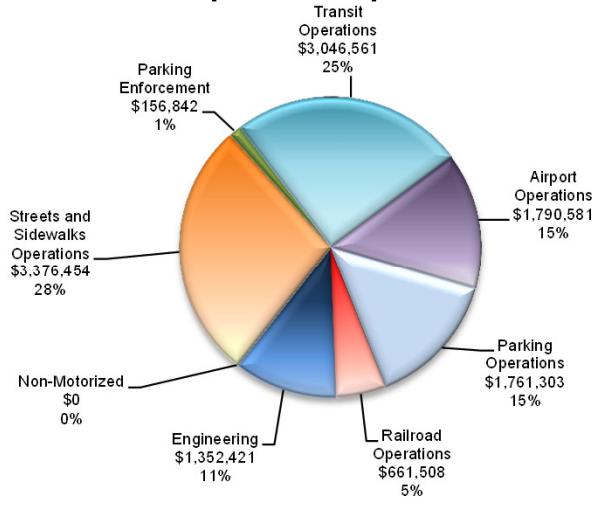

Stadium TDD

The Stadium TDD fund accounts for receipts from the Stadium TDD's: Shoppes at Stadium, Columbia Mall and Stadium Corridor.

2012	\$753,461	\$395,542	\$1,149,003	229.6	\$500,459	112,414	\$4.45	(28.04%)

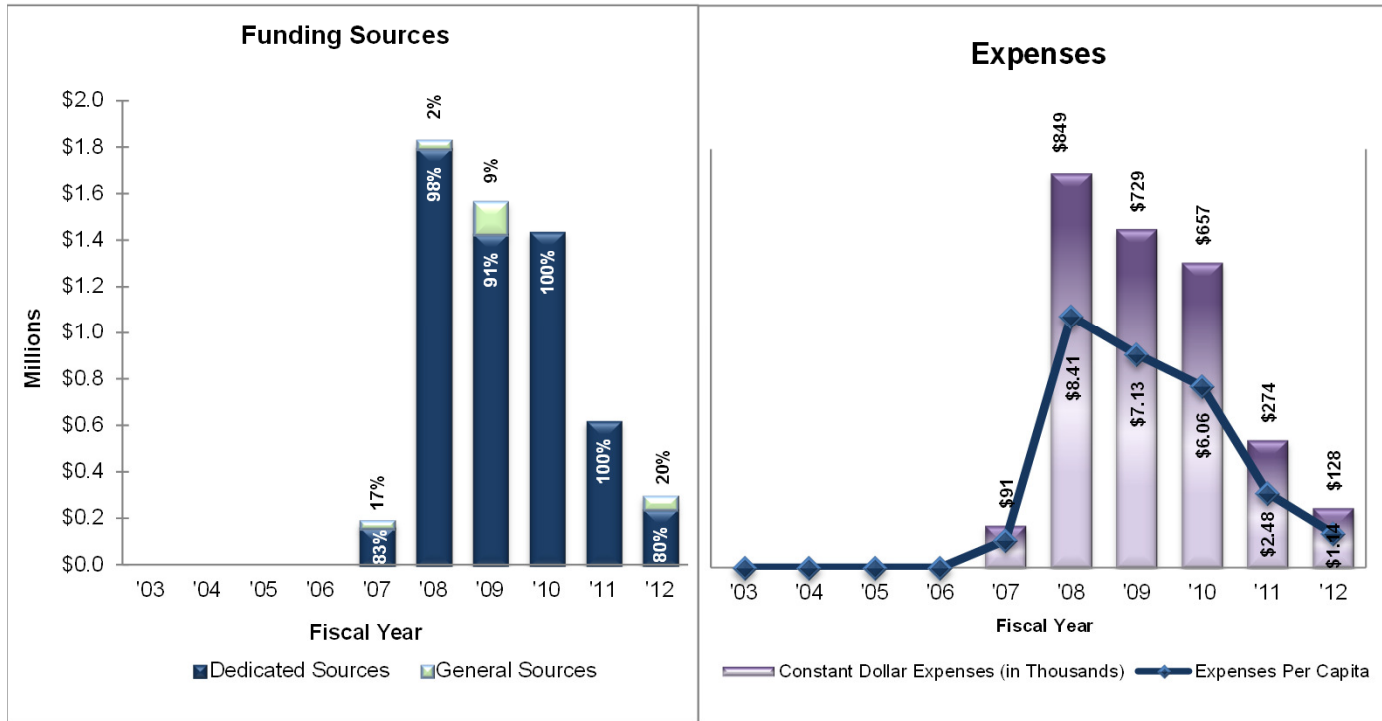

Description:

The Engineering Department is a General Fund department that provides survey, design, contract administration and construction inspection of Capital Improvement Program projects for the Public Works Department. The primary dedicated funding source motor vehicle registration fees and gasoline taxes.

Analysis:

For the ten year period, constant dollar expenses have decreased 32% and expenses per capita have decreased 46%. Most of the fluctuation occurred for the period of FY 2010 to FY 2012. This is due to a decision to charge engineering time directly to capital projects which are reflected in the Capital Projects Fund. Management will need to monitor the capital projects that engineering time needs to be allocated to each year because if the time is not charged to the Capital Projects Fund, it increases the amount of general revenue sources needed in this department. This, in turn, decreases the general revenue sources that can be allocated to the other departments within the General Fund.

Description:

The Non-Motorized Grant Department is a General Fund department which includes a pilot project funded by a federal grant to develop a network of transportation facilities, including sidewalks, bicycle lanes, and pedestrian and bicycle trails with the purpose of increasing walking and bicycling usage and replacing car trips.

Analysis:

This department received grant funding in FY 2007 and will only exist while funding is available for the pilot project. Total expenses increased in FY 2008 due to the promotion and advertising program, along with striping of bike lanes. The large decrease in FY 2011 and FY 2012 is due to the completion of a promotion and advertising program and fewer striping of bike lanes. The specific infrastructure projects are accounted for in the Capital Projects Fund.

Description:

The Street Department is a General Fund department that provides maintenance to streets, snow removal, street cleaning, mowing of right-of-ways, and utility service cut repairs. This department also fabricates, installs and maintains traffic control and street signs, pavement striping, paints curbs/crosswalks/symbols and provides traffic signal maintenance. All of the funding for this department comes from dedicated sources which include gasoline tax, transportation sales tax, and street maintenance charges.

Analysis:

For the ten year period, constant dollar expenses have increased 60% and expenses per capita have increased 28%. During this time, the number of street miles have increased 28% and the cost of materials have increased significantly as well. Management has been slowly increasing the street maintenance budget, but there is still not adequate funding allocated. It has been estimated that at current funding levels, it would take 57 years to resurface every road in Columbia. Citizen surveys have revealed dissatisfaction with current street conditions; however, funding sources such as Transportation Sales Tax are also used to subsidize the transit and airport operations as well as provide matching funds for capital grants in those operations. Management will continue to monitor this department and work to identify additional revenue sources which can be used to more adequately fund street maintenance.

2012	\$11,279,620	\$0	\$11,279,620	229.6	\$4,912,940	112,414	\$43.70	2.41%

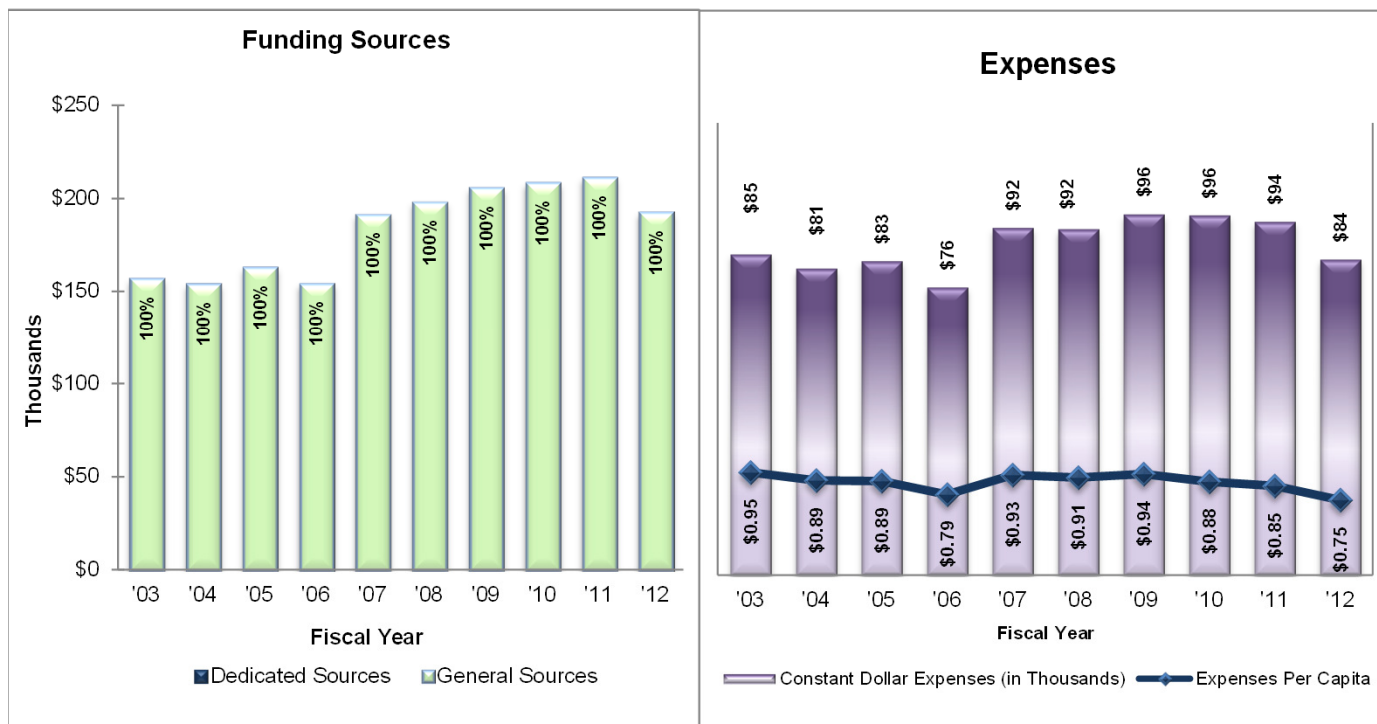

Description:

While general maintenance of streets is accounted for in the Streets and Sidewalks operating budget, new construction of streets and sidewalks as well as major maintenance of streets is accounted for in the Capital Projects Fund. All of the funding comes from dedicated sources which include capital improvement sales tax, special road district taxes, non-motorized grant, transportation sales tax, development fees, and grants. The primary source of funding comes from the temporary one-quarter cent capital improvement sales tax which is extended through passage of a ballot issue every ten years. The current extension was approved in 2005 and will continue through 2015.

Analysis:

The amount of spending can vary greatly from year to year depending on the number and size of capital projects. All of the funding for a specific capital project must be appropriated before the City can enter into a construction contract, even though the actual construction of the project may take several years. The City is on course to complete all of the 2005 ballot issue projects before the next ballot issue. Due to the economic downturn, the capital improvement sales tax receipts did not come in as was projected. However, other sources have been identified to help finish the funding for all of the street and sidewalk projects. The capital improvement sales tax funding is also used to fund public safety projects. One additional fire station, which was approved in the ballot issue, will not be built as a result of the lower receipts.

Description:

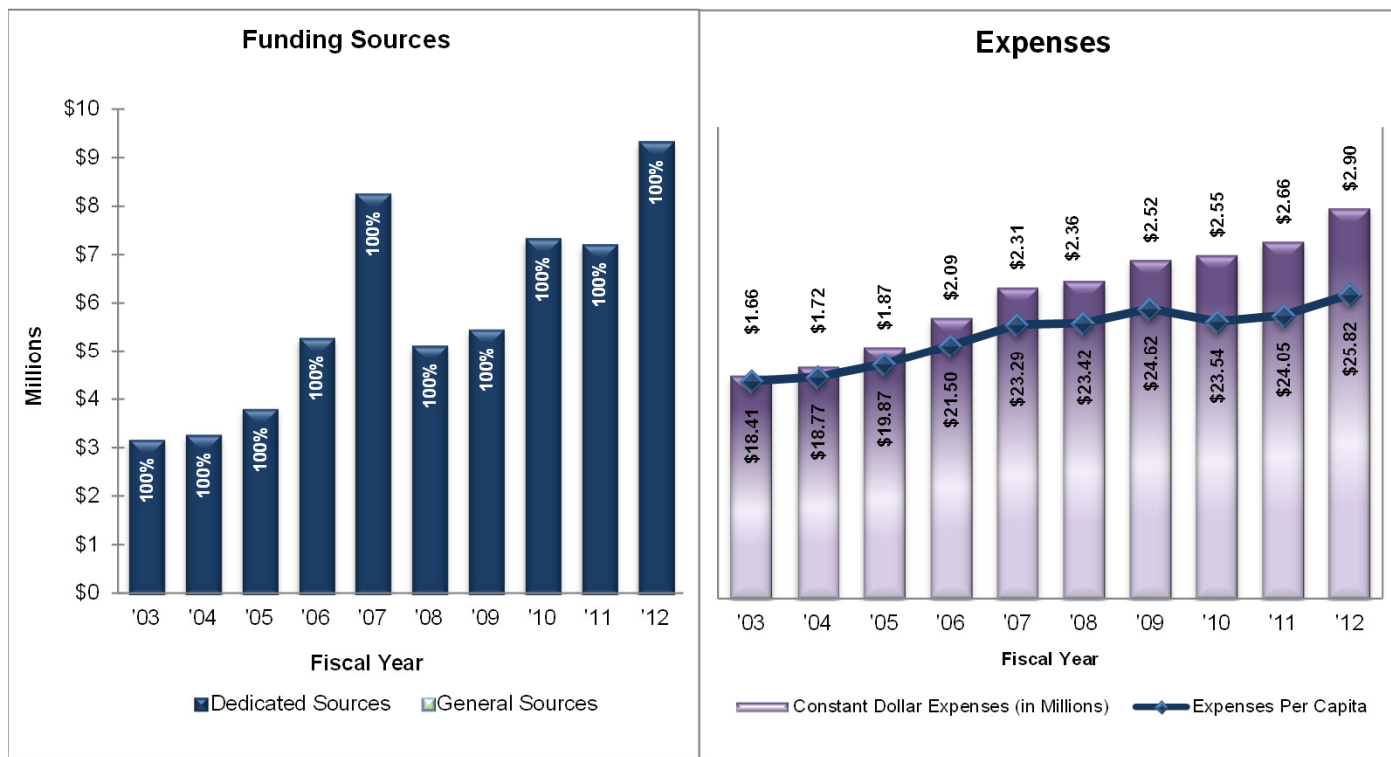

The Parking Enforcement Department is a General Fund department that is responsible for administering the parking ordinances of the City via parking control enforcement in the central business district and the metered University streets. There are no dedicated sources for this department.

Analysis:

For the ten year period, constant dollar expenses have decreased 2% and expenses per capita have decreased 21%. Expenses reflect an increased level beginning in FY 2007 which is due to the relocation of Parking Enforcement into the Howard Building which resulted in custodial and building maintenance charge increases. Staffing has remained constant over the ten year period shown. As expenses per capita have remained stable over the period, there are no warning trend associated with this department.

Description:

The Transit Fund is an enterprise fund which means it is operated like a separate business and charges fees for the service it provides. The areas of operation include, fixed route, paratransit, and university shuttle. All of the funding for this department is dedicated funding and comes from a subsidy from transportation sales tax, fares, and grants. The capital projects which include the addition and replacement of buses are funded by FTA grants with local match funds from transportation sales tax.

Analysis:

For the ten year period, constant dollar expenses have increased 75% and expenses per capita have increased 40%. On the operations side, the primary increase has been associated with rising fuel costs which have increased 370% during this period. On the capital projects side, the level of expenditures vary greatly from year to year based on the number of buses that are awarded FTA grant funding. In FY 2007, the increase in capital projects costs was due to the refurbishment of the Wabash bus station.

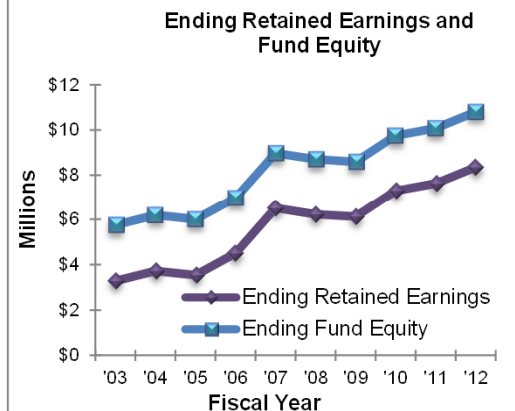

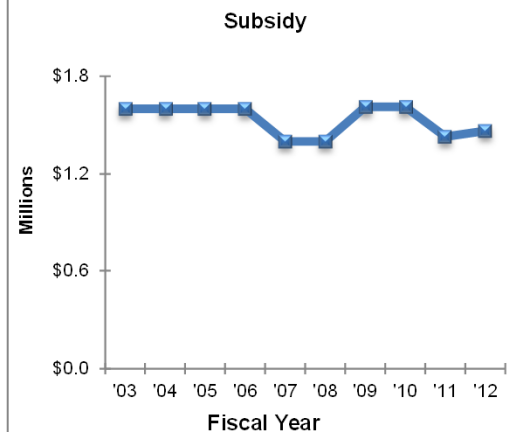

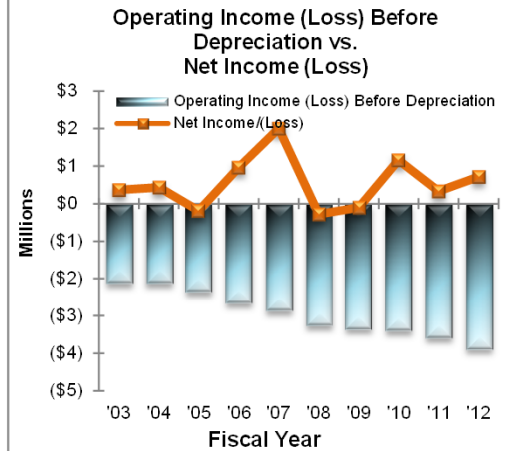

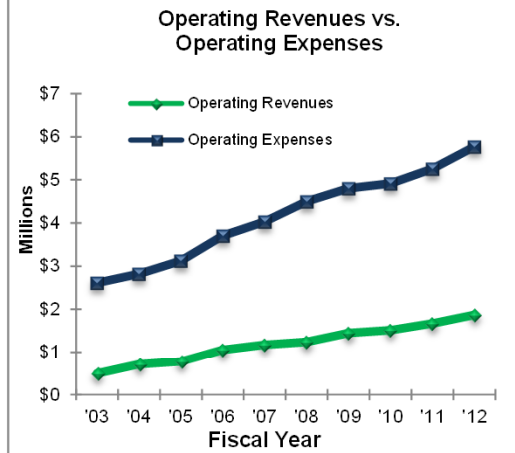

There are some serious future concerns for this fund. The gap between operating expenses and revenues continues to grow. This has resulted in ending cash and other resources significantly decreasing and is now down below the 20% guideline. Management will need to identify other sources of revenue or service level changes in order for this operation to continue in the future.

Description:

The Airport Fund is an enterprise fund which means that it is operated like a separate business. The areas of operation include administration, airfield areas, terminal areas, public safety and snow removal. All of the funding sources for this operation are considered to be dedicated sources and include subsidies from transportation sales tax, user fees, and grants. Capital projects are primarily funded by FAA grants with local match funds coming from the transportation sales tax.

Analysis:

For the ten year period, constant dollar expenses have increased 18% and expenses per capita have decreased 6%. The level of capital project funding can vary from year to year dependent on the number and size of projects and the availability of FAA grant funding.

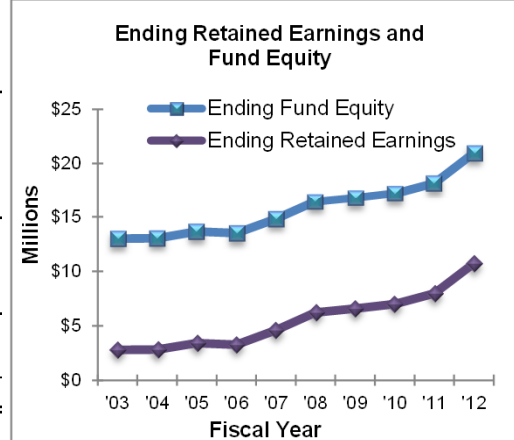

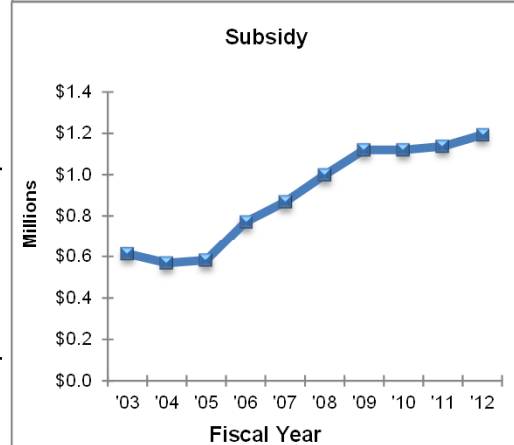

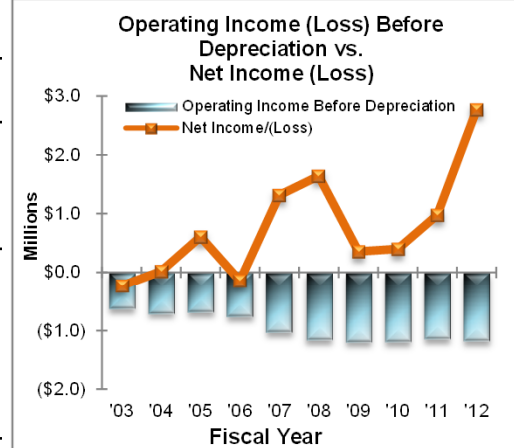

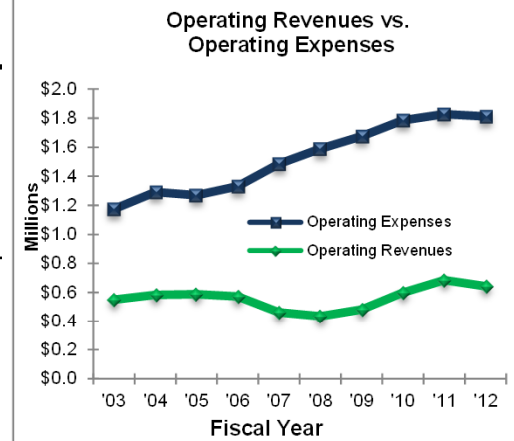

There are some areas of concern for this fund. The gap between operating expenses and operating revenues has continued to increase during this period. The subsidy from the transportation sales tax has more than doubled. Future increases in the subsidy from the transportation sales tax are contingent on the growth of the receipts as well as the competing needs from transit and streets and sidewalks. The ending cash and other resources has been below the 20% guideline for most of the period; although for FY 2011 and FY 2012 it is above the 20% guideline. In order for the airport to thrive in the future, there will be a need to significantly increase the funding for infrastructure to build larger runways and terminal enhancements to attract additional carriers so larger flights can be flown to and from Columbia. This may involve creating new partnerships and identifying additional revenue sources to fund these improvements as well as increasing

Airport Fund

Description:

The Parking Fund is an enterprise fund that operates, maintains and administers five parking facilities, nine surface lots as well as on-street parking meters. This department is also responsible for the collection of income from the parking facilities, collection and data preparation of parking and parking facility studies, and installation and maintenance of the parking meters, gates, attendant buildings and other facilities. All of the funding for this fund comes from dedicated sources.

Analysis:

For the ten year period, constant dollar expenses have increased 35% while expenses per capita have increased 8%. On the operations side, expenses decreased from FY 2003 to FY 2009. Increases in FY 2010 to FY 2012 were due to debt payments for the special obligation Build America Bonds that were issued to finance construction of the 5th and Walnut parking garage. Debt payments will continue until FY 2034. The capital projects were fairly small until the FY 2009 - FY 2011 timeframe which included the design and construction of the 5th and Walnut Street garage.

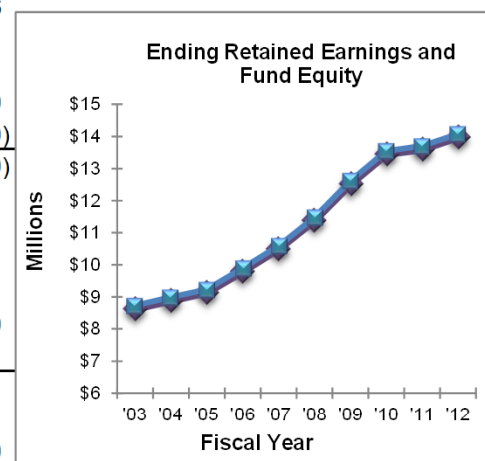

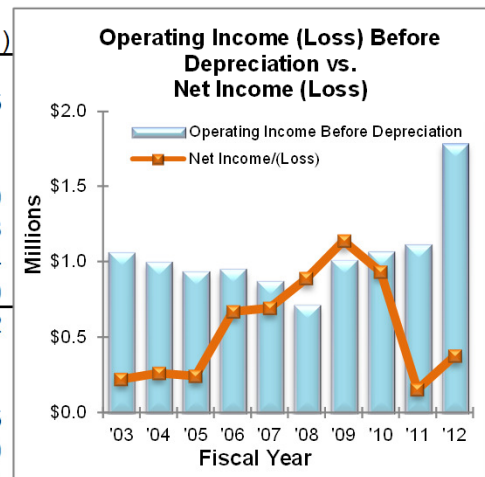

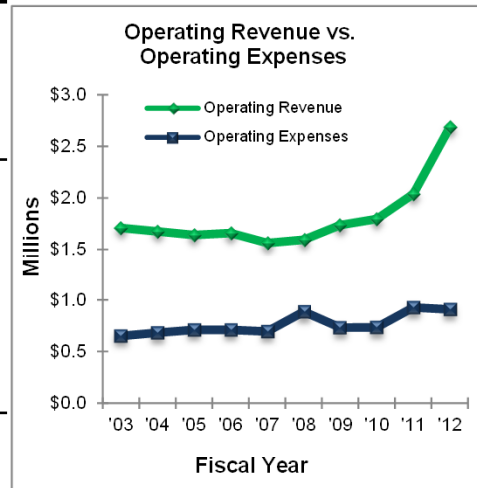

The amount of net income has been decreasing for the timeframe FY 2010 to FY 2011 due to the debt payments. This has also impacted ending cash and other resources which is now just below the 20% guideline. The total bond debt coverage ratio which includes special obligation bonds is below the 1.10 ratio for FY 2010 and FY 2011, but is at 1.30 in FY 2012. The 1.10 ratio is only for revenue bonds. Parking rates were increased late in FY 2011 which will generate approximately \$700,000 per year and will improve the future financial position of this fund.

Description:

The Railroad Fund is an enterprise fund which is responsible for the operation and maintenance of the short line Columbia Terminal Railroad (COLT). All of the funding for this fund is dedicated and comes from switching fees, coal surcharge, a subsidy from the Electric Fund, and other miscellaneous revenues.

Analysis:

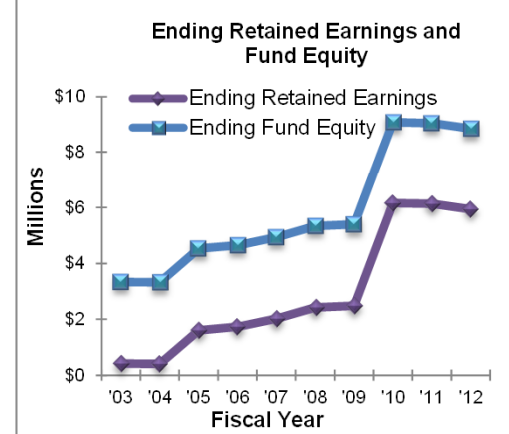

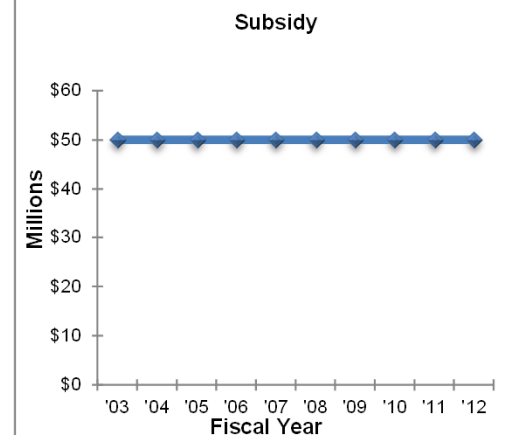

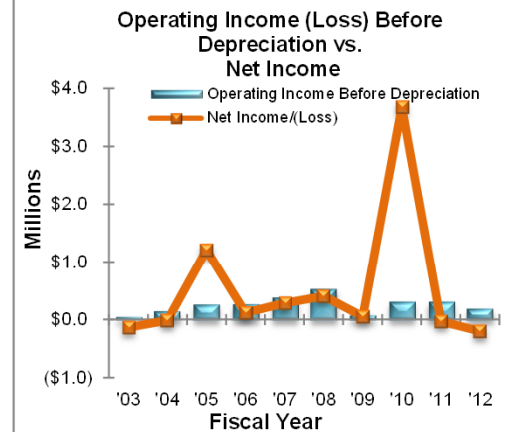

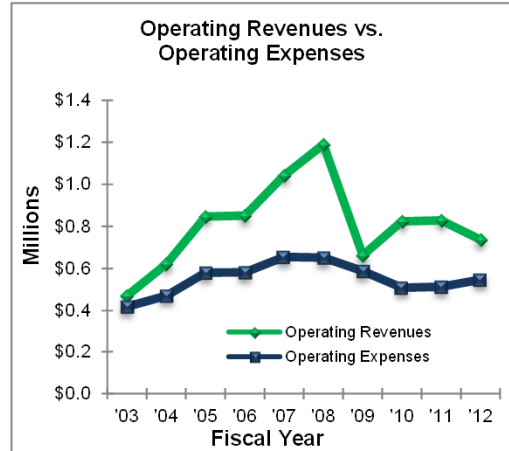

Constant dollar expenses and expenses per capita remained relatively stable from FY 2003 to FY 2010. There was a sharp increase in FY 2011 due to an entry made to transfer the Transload Facility out of the Railroad Fund. This was a one-time expense. Operating revenues decreased sharply in FY 2009 due to the economic slowdown. However, they improved in both FY 2010 and FY 2011, before slightly decreasing in FY 2012. Ending cash and other resources was above the 20% guideline for all years except FY 2011. One area of concern for this operation is the inability of the operation to generate sufficient cash to fund all of the capital project needs. There is a significant amount of infrastructure that must be maintained. The City established a coal surcharge the Electric utility pays which generates some funding; however, more funding is needed on an annual basis.

Description:

The Capital Improvement Sales Tax (CIST) Fund is a special revenue fund which accounts for the temporary one quarter capital improvement sales tax. Voters have the opportunity to pass an extension for this tax every ten years. The capital improvement sales tax is used to fund the replacement of fire trucks, construct new public safety facilities, and fund street and sidewalk capital projects. As the tax is collected, the receipts are placed in this fund. Transfers are done annually to move the funding into the Capital Projects Fund to fund those projects that were approved by the voters. All of the funding is dedicated funding and can only be used for public safety and street and sidewalk projects.

Analysis:

The expenses can vary greatly from year to year depending on the number and amount of capital project funding required. The City must appropriate all of the funding for a project before a construction contract can be awarded or a fire apparatus can be purchased even though the construction or purchase may take more than one year to complete. The City identifies specific projects when the ballot issue is taken to the voters. The City has always been able to fund and complete the projects before another ballot issue was taken to the voters. However, due to the economic downturn in FY 2009, there have not been enough capital improvement sales tax receipts to fund all of the approved projects. In Streets and Sidewalks, additional funding was identified to finish funding all projects, but in the Fire Department, there will not be sufficient funding to fund one additional fire station and the corresponding fire apparatus. The next capital improvement sales tax ballot issue will be in FY 2015.

Description:

The Transportation Sales Tax (TST) Fund is a special revenue fund that accounts for the 1/2 cent permanent transportation sales tax. The sources for this fund are dedicated and can only be used for transportation purposes. These funds are used to subsidize airport and transit activities, fund various road projects, and pay for street and sidewalk related activities in the General Fund. The transportation sales tax receipts are deposited into this fund. Then, transfers are made to move funds to the Transit Fund, Airport Fund, General Fund, and Capital Projects Fund to provide funding for operational and capital project costs.

Analysis:

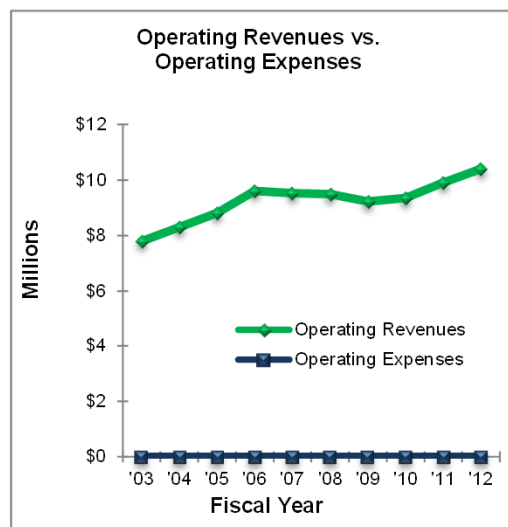

For the ten year period, constant dollar expenses have increased 7% while expenses per capita have decreased 14%. In FY 2006, the significant increase was due to a one-time transfer to the Capital Projects Fund to fund the Gans Rd @ 63 Interchange capital project. Subsidies to transit have decreased slightly to \$1.4 million in FY 2011 and FY 2012. Subsidies to airport have more than doubled over ten year period to \$1.1 million, and transfers to the General Fund to pay for street and sidewalk related activities have increased 21% over the ten year period to \$5.5 million. In addition, transportation sales taxes are used to fund the local match for FTA grant funded capital projects in transit and FAA grant funded capital projects in airport. Due to the competing needs for these funds, there is little funding left for construction of new streets. The amount of funding available to increase subsidies and street maintenance funding is contingent upon the growth of the transportation sales tax receipts. The economic downturn impacted these receipts. FY 2012 is showing some improvement in the receipts.

Description:

The Public Improvement Fund (PIF) is a special revenue fund that accounts for 4.16% of the city's 1% general sales tax. These funds are used for general government capital projects. Sales tax receipts are deposited and accumulated in this fund and then annually are transferred to the Capital Projects Fund.

Analysis:

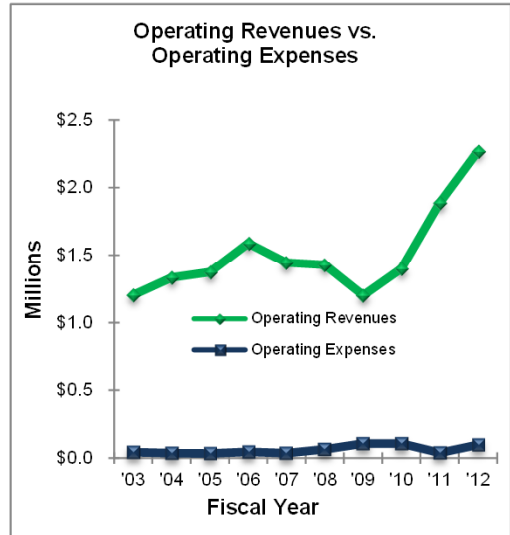

The amounts can vary greatly from year to year and are dependent upon the number and size of the capital projects. In FY 2005 the significant increase was to help fund the Chapel Hill Road Extension and Southampton Rd (Nifong to St. Farm) capital projects. In FY 2011, the increase was to help fund the Rolling Hills Road as well as the Avenue of the Columns capital projects.

Description:

The Special Road District Tax Fund is a special revenue fund that is used to account for the road and bridge tax revenues that are collected by Boone County and shared with the City per agreement. These revenues are used to improve, maintain, construct and repair streets and roads within the City limits that qualify per this agreement. The taxes are deposited into this fund and transfers are done annually to move funds into the Capital Projects Fund to fund specific capital projects.

Analysis:

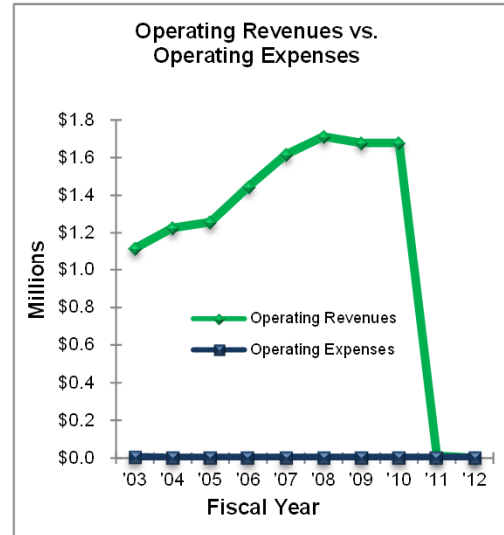

The expenses can vary greatly from year to year depending on the number and size of capital projects that need to be funded. In accordance with Governmental Accounting Standards Board Pronouncement 54, this fund no longer qualifies for presentation in the Comprehensive Annual Financial Report as a special revenue fund. As a result, beginning in FY 2012, these tax receipts will be deposited directly into the Capital Projects Fund. Therefore, the ending fund balance and cash and other resources have been reduced to \$0 at the end of FY 2011.

Description:

The Stadium TDD Fund is a special revenue fund that accounts for tax receipts from the Stadium Transportation Development District (TDD) sales tax from the Shoppes at Stadium, Columbia Mall and Stadium Corridor. These receipts are deposited and accumulated in this fund and then transfers move the funds to the Capital Projects Fund to fund specific TDD street capital projects within this transportation development district. All funding sources are dedicated.

Analysis:

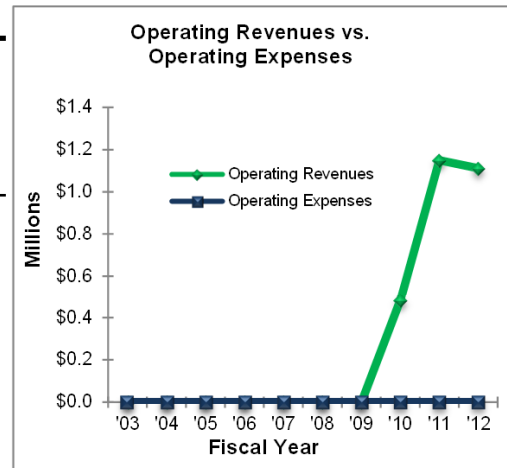

Funding of specific Stadium TDD projects began in FY 2010 and will continue through FY 2016. The City borrowed \$8.2 million from the Missouri Transportation Finance Corporation to contribute to these projects. The funds will be paid back until the loan matures in 2022.

Utility Departments

Description

The City of Columbia owns and operates the Water, Electric, Sewer, Solid Waste, and Storm Water utilities. Each of these departments are classified as enterprise fund operations which means that they are to be self-supporting activities which render services to the general public on a user-charged basis. The revenues received are dedicated to the department they are generated in and cannot be used to fund General Fund operations.

The customer service function of these utility departments is performed by the Utility Customer Services Fund, which is classified as an Internal Service Fund. Internal Service funds provide goods and services to other departments on a cost reimbursement basis. These services include the setting up of utility accounts, transfer, closing accounts, payment agreements, coordination of disconnection for non-payment, and generation and mailing of monthly bills. For these services, each of the utility departments pay a portion of the cost of the Utility Customer Services budget.

Each of these utility departments pay an intragovernmental charge to the General Fund, which is called General and Administrative Charges. This fee is used to recover the cost of functions which have been centralized with the City such as Finance, City Council, City Manager, City Clerk, Human Resources, Law and Public Works Administration for (Sewer, Storm Water, and Solid Waste). The Treasury Management division of the Finance Department is responsible for collecting the money from the utility customers.

The Water and Electric utilities also pay an amount to the General Fund as a Payment in Lieu of Taxes. This payment, with a legal authorization of City Charter Chapter 99, Article XII Section 102 states that the Water and Electric utilities will pay an amount substantially equivalent to the sum which would be paid in taxes if the utilities were owned privately. The tax is equal to 7% of gross receipts and the property tax equivalent is equal to 33.33% of net fixed assets multiplied by the City rate.

Water and Electric Utility Fund

Water and Electric Utility Fund accounts for the billing and collection of charges for water and electric service for most city residents. Revenues are used to pay for both operating expenses and capital expenditures to maintain these services.

Sanitary Sewer Utility Fund

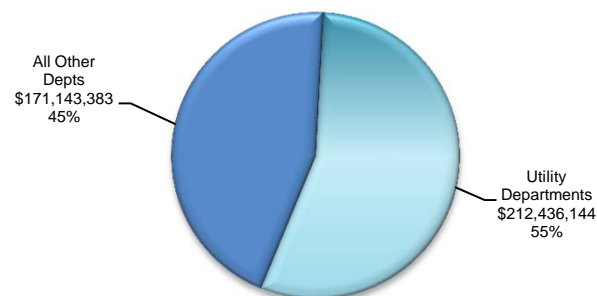

Sanitary Sewer Utility Fund accounts for the provision of sanitary sewer services to the residents of the City and a limited number of customers outside the city limits. All activities necessary to provide such services are accounted for this fund.

Solid Waste Utility Fund

Solid Waste Utility Fund accounts for the revenues and expenditures of solid waste collection and operations at the landfill and the material recovery facility.

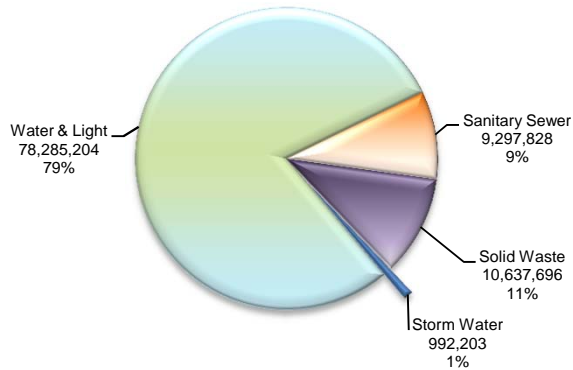

Storm Water Utility Fund

Storm Water Utility Fund accounts for storm water funding, implementation of storm water management projects, and provide maintenance to existing drainage facilities.

Description:

The Water and Electric Fund is an enterprise revenue fund department which renders services to the general public on a user-charged basis. The revenues received are dedicated to the department. The areas of operation include administration and general, production and transmission and distribution. The primary funding source is Water and Electric utility charges which are part of the monthly City utility bills. Capital project funding are approved by the voters through ballot issues.

Analysis:

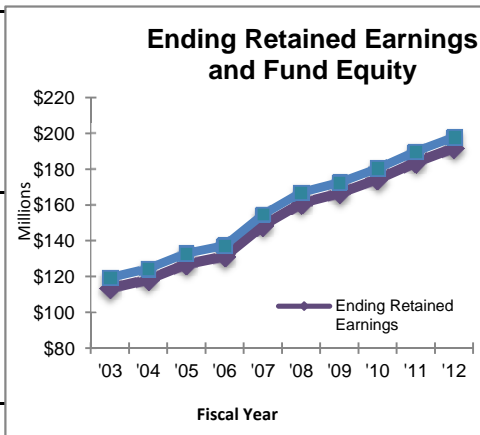

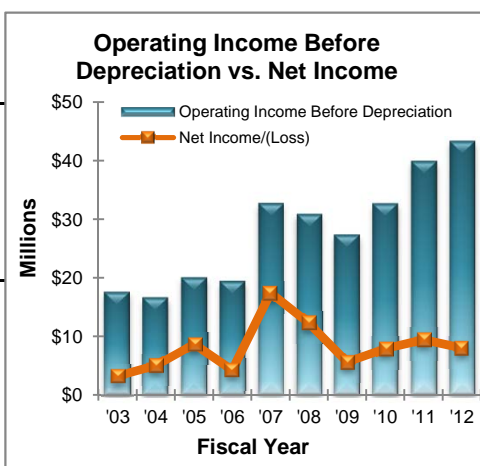

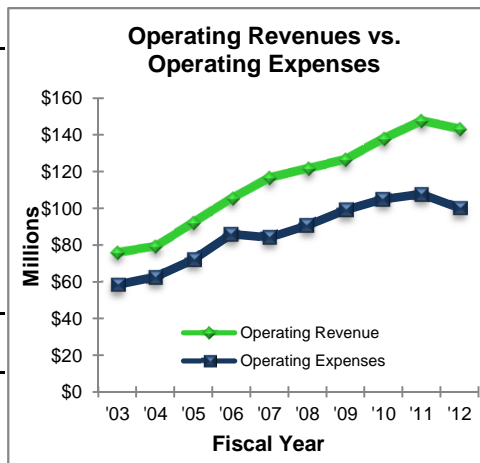

For the ten year period, there has been an overall increase in total expenses, constant dollar expenses, and per capita expenses. Ballot issues have been passed to provide funding for capital projects. Rate have been adjusted, as necessary, to provide funding for debt costs associated with voter approved ballot issues as well as to pay for increased operating costs, particularly in the area of purchased power. The debt coverage ratio has been above the 1.10 requirement for all ten years. Ending cash and other resources has been above the 20% guideline for the ten year period listed.

Description:

The Sanitary Sewer Fund is an enterprise fund which renders services to the general public on a user-charged basis. The revenues received are dedicated to the department. The areas of operation include administration, engineering, waste water treatment plant, field operations and maintenance and line maintenance. The primary funding source is sewer charges which are part of the monthly City utility bills. Capital projects are funded through voter approved ballot issues. A combination of revenue and special obligation bonds are used to finance the capital projects approved by the voters.

Analysis:

For the ten year period, constant dollar expenses and expenses per capita have increased. Significant capital project funding was used in FY 2006 and FY 2008 to FY 2011. The largest amounts occurred in FY 2010 and FY 2011 with the construction of the wastewater treatment plant expansion. Sewer rates have been adjusted, as necessary, to pay for the debt costs associated with voter approved ballot issues as well as increases in operating costs. The debt coverage ratio has remained above the 1.10 guideline for all ten years. Future budgets will include increases for operating costs associated with the completion of the WWTP expansion project. An additional rate increase is planned for FY 2013 to cover the costs associated with the capital projects approved by the voters in FY 2008. Ending cash and other resources has been above the 20% guideline for most of the period.

Description:

The Solid Waste Fund is an enterprise fund which renders services to the general public on a user-charged basis. The revenues received are dedicated to the department and cannot be used to fund General Fund operations. The areas of operation include administration, commercial, residential, landfill, university and recycling. Capital projects are funded primarily through revenues generated by user charges.

Analysis:

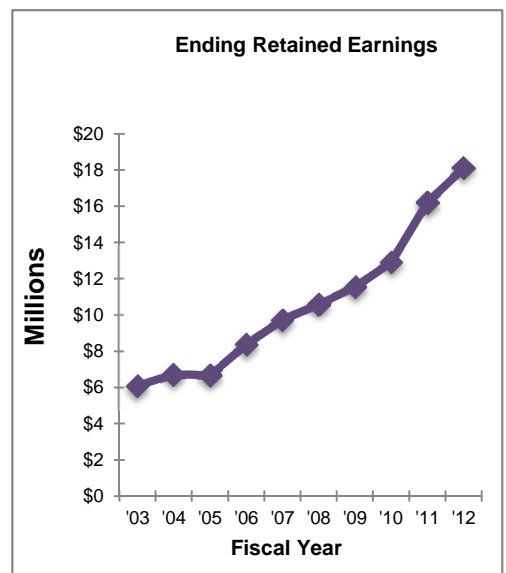

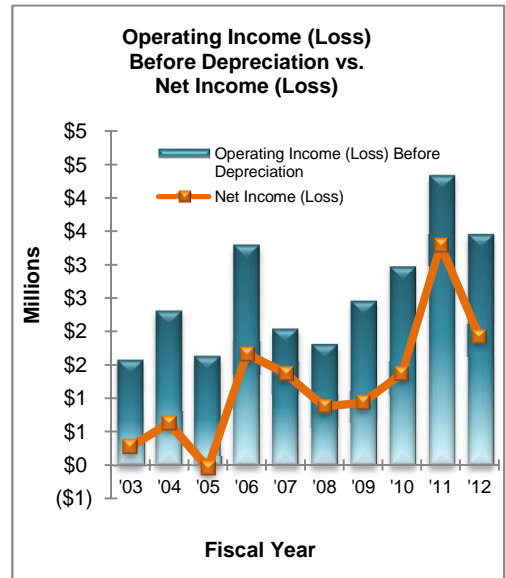

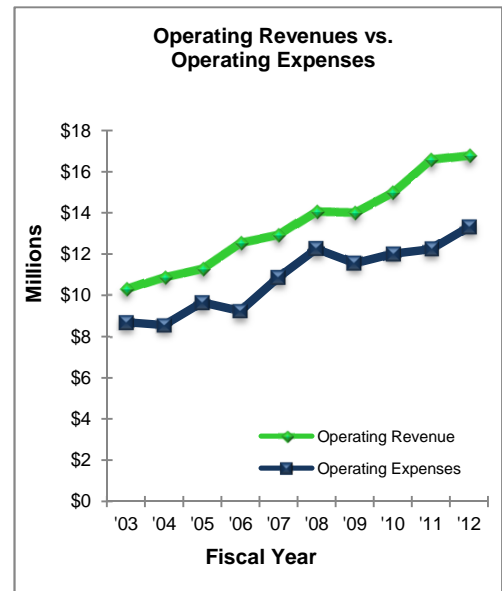

For the ten year period, constant dollar expenses have increased 19% and per capita expenses in constant dollars have decreased 5%. Capital project funding has varied from year to year with larger amounts occurring in FY 2007 and FY 2011 for the construction of landfill cells 4 and 5. The utility must balance the use of revenues between meeting operating, capital project, and fleet replacement needs. Residential rate increase occurred in FY 2004 to implement the recycling program, and other increases occurred in FY 2007, FY 2008, and FY 2011 to address rising operational cost increases, capital, and fleet replacement needs. Commercial rates were increased in FY 2009 and FY 2010 to better recover the costs of providing those services. During this ten year period, a significant operational cost increase has been in the area of fuel. The City is exploring ways to decrease these costs such as conversion of vehicles to compressed natural gas. While the initial cost of such vehicles is higher, the cost per gallon is about \$1 less and there are lower maintenance costs over the life of the vehicle. Our rates remain competitive. Net income, ending fund equity, and ending cash and other resources have all been strong for the period.

Description:

The Storm Water Fund is an enterprise fund department which renders services to the general public on a user-charged basis. The revenues received are dedicated to the department. The areas of operation include administration, engineering, education and field operations. The primary operating revenue comes from utility charges which are collected as part of the monthly City utility bill.

Analysis:

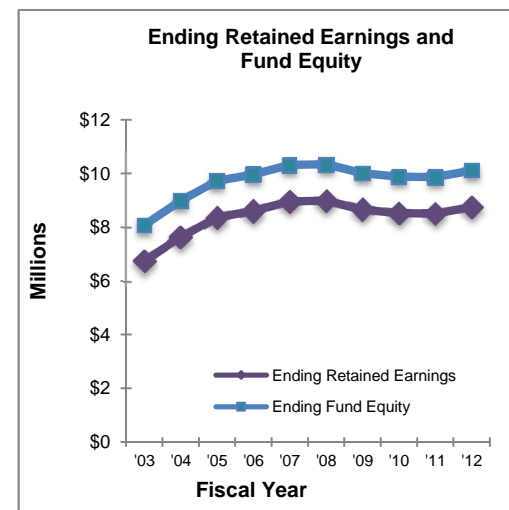

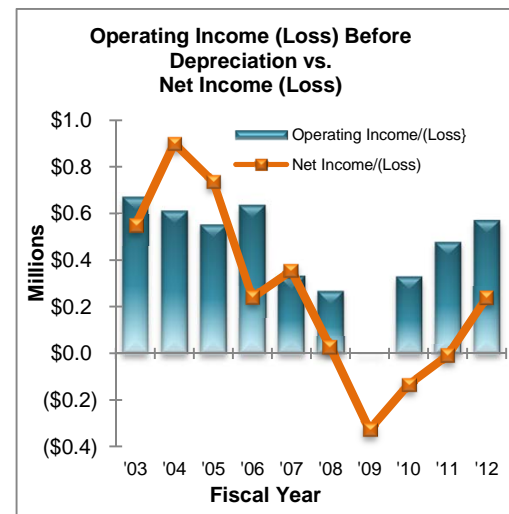

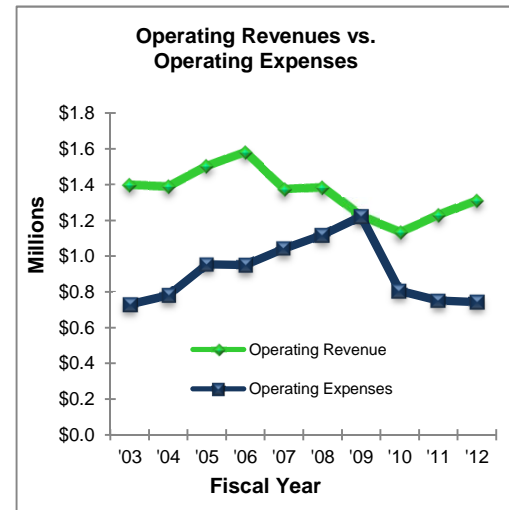

For the ten year period, constant dollar expenses and per capita expenses decreased. The Storm Water Utility operates through funding approved by voters in April of 1993. Funding sources include development charges on new construction and Storm Water Utility charges on existing improved properties. There have been no rate increases since the fund began. While the number of storm water projects identified has continued to increase, the utility does not have the funding mechanism in place to meet the need. The issues with storm water sewers is that a large number of underground pipes have reached the end of their useful life. Some have been in use far beyond their useful life and have failed, requiring emergency contract to repair. The solution to the problem consists almost entirely of capital improvements to replace the old pipes with new pipes. Council and management have been exploring ways to increase the funding available for this utility which may include identifying a list of specific storm sewer projects and placing the issue on a future sales tax ballot. There has been a net loss for FY 2009 - FY 2011; There was a small net income reflected for FY 2012. Ending cash and other resources has remained above the 20% guideline for all years except FY 2008.

Introduction to Columbia Financial Trend Monitoring System (CFTMS)

The Columbia Financial Trend Monitoring System (CFTMS) is an approach to monitoring and analyzing the financial condition of the City. The indicators used are organized around the framework illustrated on Chart "A". Several of the indicators are broken down between "General Fund" and "Utility or Enterprise Operations" to give a more precise reflection of actual operations.

Purpose of CFTMS

The purpose of the CFTMS is to enable the City to:

1. Analyze factors affecting the City's financial condition and present them in an easily understandable manner.
2. Develop the necessary indicators to:
 - a. Gain better understanding of the City's financial condition
 - b. Identify possible emerging problems before they have time to become serious problems
 - c. Identify existing problems the City may be unaware of
3. Present a method of quantifying significant amounts of complex information regarding financial condition.
4. Combine financial and nonfinancial data into the same analysis of financial condition.
5. Place events of a single year in a long-term perspective and permit the City to follow changes over time.
6. Incorporate benchmarks used by credit rating agencies into overall analysis.

The indicators comprising the CFTMS were chosen by ICMA (International City/County Management Association) because it is believed they have the most practical application for use by those examining a City's financial condition. The indicators are grouped into seven categories: revenues, expenditures, operating position, debt structure, unfunded liabilities, condition of capital plant, and community needs and resources. Most of the indicators have been identified by various cities as indicators to monitor.

It is difficult to determine which indicator or indicators are the most important. Initially, it might appear that some of the more general indicators such as revenues per capita or expenditures per capita might be most important because of the broad range of issues they cover. However, looking only at the broad indicators and not the remaining ones in each indicator group may leave important issues overlooked. Therefore, it is necessary to examine all indicators closely to determine which appear to be more relevant. The indicators focus primarily on General Fund operating issues and Enterprise Operations, where appropriate, over a ten year period. This period will most likely cover at least one short-run turn in the regional economy and should provide enough of a time perspective to monitor the emergence of any positive or negative trends.

Evaluation of CFTMS

Each trend worksheet includes a section entitled "warning trend". If an indicator is moving in a manner reflective of the warning trend, it may be considered as being potentially unfavorable. The worksheets also contain a description of the indicators, credit industry benchmarks where applicable, and a brief analysis of each indicator. These sections can be used to:

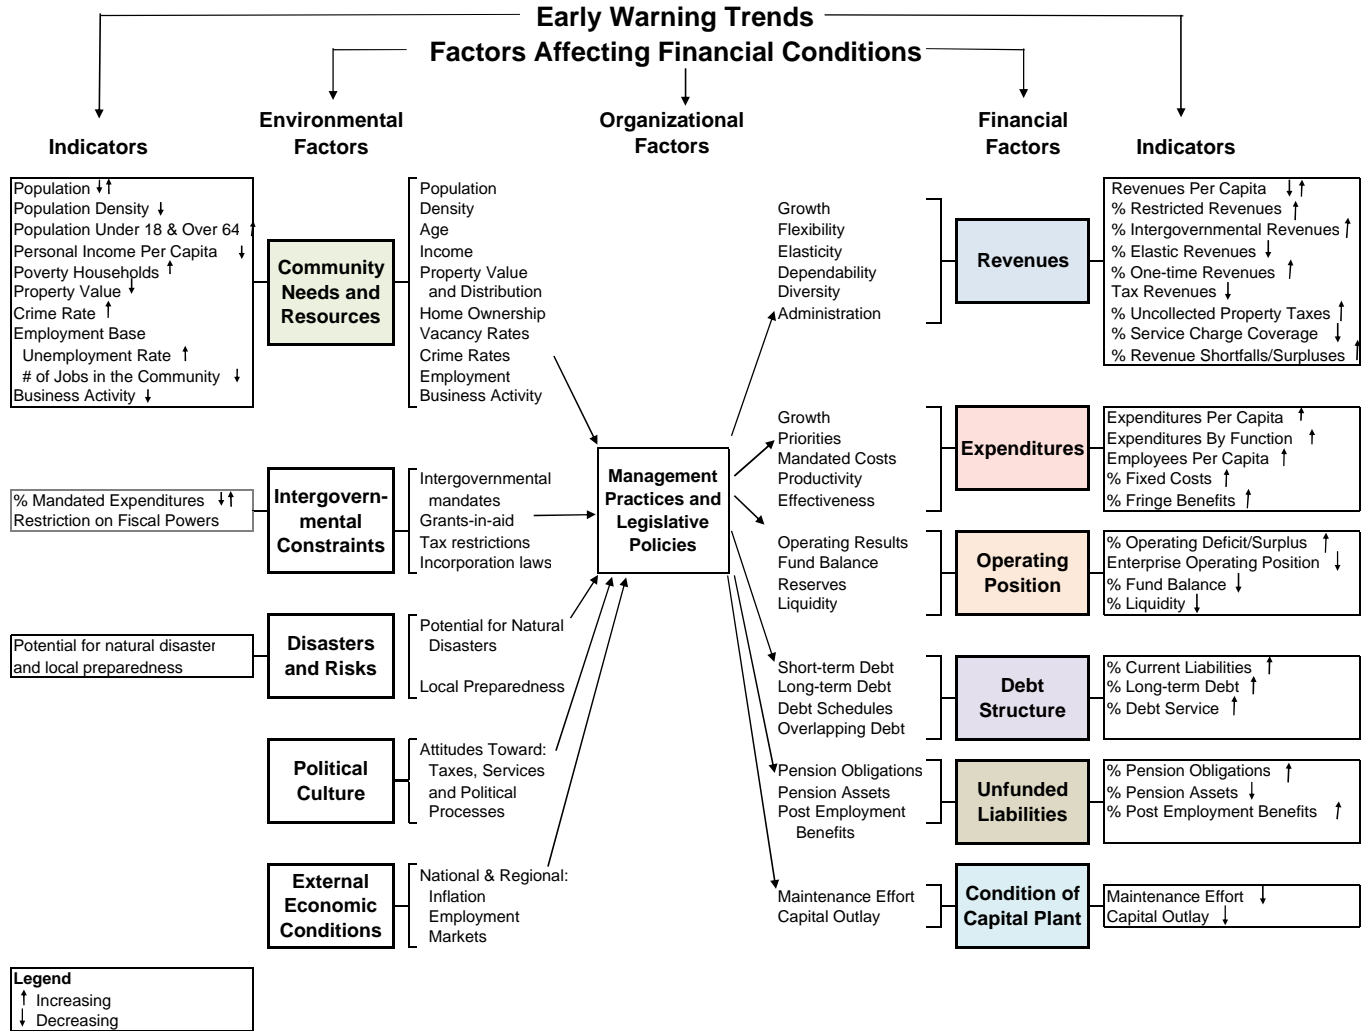

1. Examine the magnitude and acceleration of a trend
2. Compare with other trends
3. Compare trends to credit industry benchmarks
4. Determine whether a trend indicates a real or potential problem
5. Identify possible causes of a problem.

Trend Analysis

The primary tool for evaluating the indicators is trend analysis, that is, examining each indicator in a multi-year perspective over ten years. Trend analysis can provide a data base that can be used for making projections necessary for effective budgeting, capital facility planning, and general policy making. In addition, it demonstrates to bond rating firms that the City is in control of its finances even though it may experience some particular problem. Should a trend be identified as a potential problem, the following questions should be addressed to give an appropriate assessment of the trend:

1. How long has the trend been occurring? Is it improving or declining? Most likely the trend does not present an immediate problem if it has shown problems for less than three consecutive years. This depends of course on the severity of the problem indicated and the direction in which trend appears to be heading.
2. Are there mitigating circumstances? If so, they must always be weighed in order to determine if a potential problem actually exists or is significant. The underlying rule of thumb is that "no single indicator implies good or bad financial condition", it only points to situations that may require closer examination. Each potentially unfavorable trend analyzed should be done so in light of its causes and significance to the overall health of the City's finances.
3. What are the causes underlying an apparent unfavorable trend? Within each indicator, the "analysis" section attempts to determine if the trend is actually unfavorable, and, if so, what it is caused by.
4. How do trends compare to one another? Examining an unfavorable trend in a logical grouping of other trends which are positive might better indicate actual overall position.

Chart A:
Columbia Financial Trend Monitoring System

Evaluation Questions

Does the external environment provide enough resources to pay for the demands it makes?

Do management practices and legislative policies enable your government to respond appropriately to changes in the environment?

Is your government paying the full cost of operating, or is it postponing costs to a future period when revenues may not be available to pay these costs?

FY 2012 Columbia Financial Trend Monitoring System - At A Glance

Revenue Indicators	
Revenues Per Capita: General Fund	
Restricted Revenues: General Fund	
Elastic Tax Revenues: General Fund

Poverty Households	
Property Value	
Crime Rate: Clearance Rate and Violent Crime	
Employment Base	
Business Activity: Retail Sales and Business Licenses	

Revenue Indicators

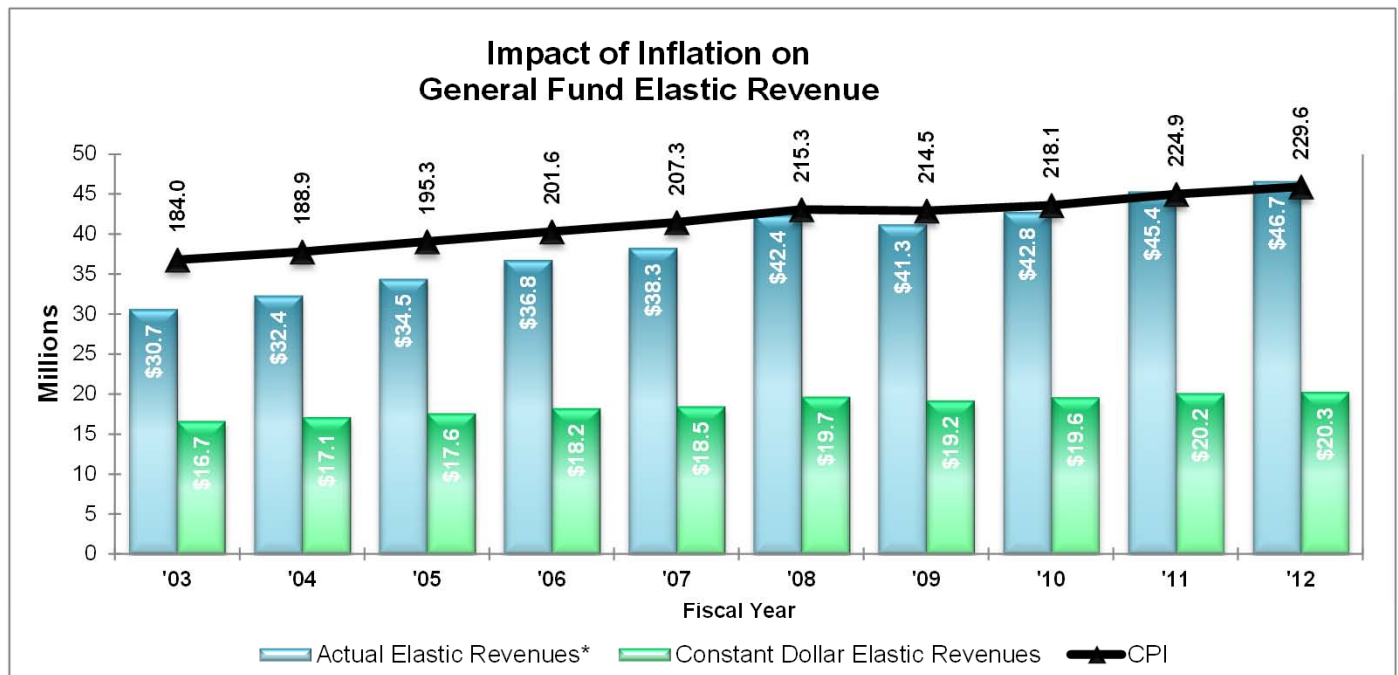

Revenues determine the capacity of a city to provide services. Important issues to consider are growth, diversity, reliability, flexibility and administration. Under ideal conditions, revenues would expand in relation to inflation and increased expenditure pressures. They would be flexible enough to allow for necessary adjustments to react to changing conditions. In addition, the sources would be diversified so as to eliminate an over dependence on any single source.

By analyzing revenues, the following problems could be identified should they exist:

- Deterioration of revenues due to inflation, etc.
- Changes in tax burden
- Inefficiency in the collection and administration of revenues
- Internal procedures or legislative policies that may adversely affect revenue yields
- Overdependence on a particular revenue source

Changes in the revenue structure can be monitored by using the following indicators:

- Revenues Per Capita: General Fund
- Restricted Revenues: General Fund
- Elastic Tax Revenues: General Fund
- Temporary Revenues: General Fund
- Tax Revenues: General Fund
- Uncollected Property Taxes: General Fund
- Service Charge Coverage: General Fund - Building and Site Development
- Revenue Shortfalls or Surpluses: General Fund

Elastic Revenues: Sales Tax, Telephone, Natural Gas and Electric Utility Taxes, Water and Electric P.I.L.O.T., Gasoline Tax, Cigarette Tax, and Motor Vehicle Tax

Only elastic revenues are used to show impact of inflation (see Elastic Tax Revenue) since not all revenues of the city will expand because of inflation. Some revenues will expand only when rate or fee changes are made. Nearly all expenditures are impacted by inflation, but this is not automatically the case with the General Fund Revenues.

Revenues per Capita:

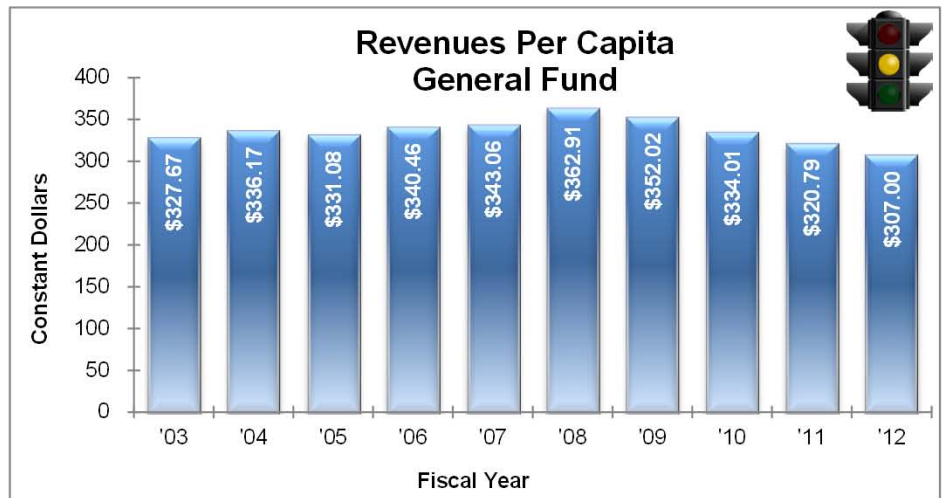

General Fund

Warning Trend:

Decreasing operating revenues per capita
(constant dollars)

Formulation:

$$\frac{\text{Operating Revenues (Constant Dollars)}}{\text{Population}}$$

Fiscal Year	Operating Revenues *	Consumer Price Index	Operating Revenues & Transfers (Constant Dollars)	Estimated Population	Operating Revenues & Transfers Per Capita in Constant Dollars
2003	\$54,210,002	184.0	\$29,461,958	89,913	\$327.67
2004	\$58,238,591	188.9	\$30,830,382	91,712	\$336.17
2005	\$60,917,104	195.3	\$31,191,554	94,211	\$331.08
2006	\$66,716,295	201.6	\$33,093,400	97,202	\$340.46
2007	\$70,693,991	207.3	\$34,102,263	99,405	\$343.06
2008	\$78,898,068	215.3	\$36,645,132	100,976	\$362.91
2009	\$77,275,976	214.5	\$36,019,883	102,324	\$352.02
2010	\$79,023,392	218.1	\$36,239,953	108,500	\$334.01
2011	\$79,689,322	224.9	\$35,427,081	110,438	\$320.79
2012	\$79,233,087	229.6	\$34,510,687	112,414	\$307.00

* Operating Revenues = General Fund Revenues + Operating Transfers from Other Funds + Appropriated Fund Balance

** Census numbers were used for 2000 and 2010. The remaining year populations are census estimates.

Description:

Examination of per capita revenue shows how revenues are changing relative to changes in the population level and rate of inflation. As population increases, it might be expected that the needs for services would increase proportionately, and therefore the level of per capita revenues should remain at least constant in real terms. If per capita revenues are decreasing, it could be that the City will be unable to maintain existing service levels unless it were to find new revenue sources or ways to save money. This reasoning assumes that the cost of services is directly related to population level.

Analysis:

Revenues per capita in constant dollars have decreased every year since FY 2008. This has been the result of an economic downturn that began in FY 2009. Since there have been three consecutive years of decline, there is a warning trend associated with this indicator. Management has responded to this decline by reducing expenditures in an effort to get expenditures more in line with revenues. In future budgets, close monitoring of revenues will continue, expenditures will be reduced, and fees and service charges will be increased as needed.

Sources:

- Population has been revised to reflect the numbers reported by the Missouri Census Data Center
- <http://www.census.gov/popest/data/intercensal/cities/files/SUB-EST00INT.csv>
- Consumer Price Index are annual archived numbers from the Bureau of Labor

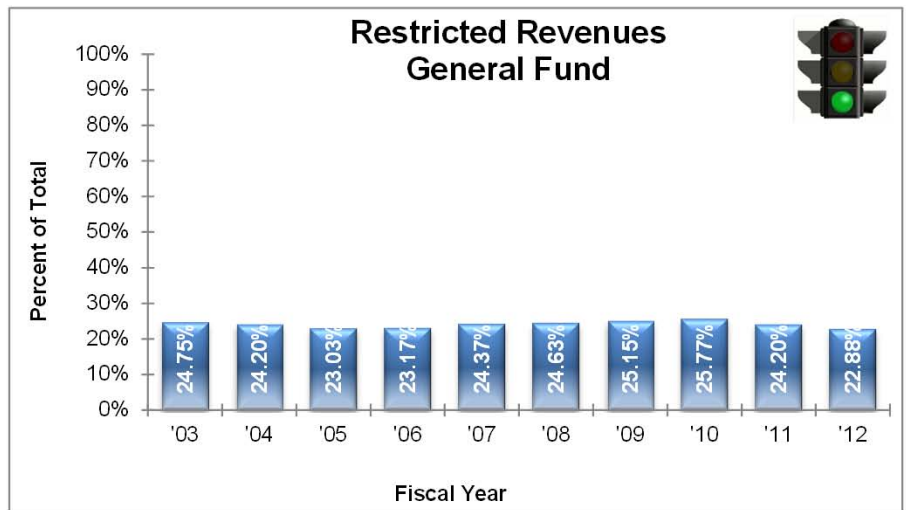

Restricted Revenues: General Fund

Warning Trend:

Increasing amount of restricted operating revenues as a percentage of operating revenues

Formulation:

$$\frac{\text{Restricted Operating Revenues}}{\text{Operating Revenues}}$$

Fiscal Year	Operating Revenues *	Restricted Operating Revenues**	Restricted Revenue as a Percent of Total
2003	\$54,210,002	\$13,419,339	24.75%
2004	\$58,238,591	\$14,090,887	24.20%
2005	\$60,917,104	\$14,028,013	23.03%
2006	\$66,716,295	\$15,459,332	23.17%
2007	\$70,693,991	\$17,228,233	24.37%
2008	\$78,898,068	\$19,436,404	24.63%
2009	\$77,275,976	\$19,431,287	25.15%
2010	\$79,023,392	\$20,365,477	25.77%
2011	\$79,689,322	\$19,281,961	24.20%
2012	\$79,233,087	\$18,132,225	22.88%

* Operating Revenues = General Fund Revenues + Operating Transfers from Other Funds + Appropriated Fund Balance

** Restricted Operating Revenues: Gasoline Tax, Grant Revenues, Transfers from Special Road District Tax, Transportation Sales Tax, Park Sales Tax and General and Administrative Fees.

Description:

A restricted revenue is one which is legally earmarked for a specific use as may be required by State law, ordinance, bond covenant or grant requirement. For example, our state requires gas tax revenues be used only for street maintenance or construction.

Should the percentage of restricted revenues increase, the City would lose freedom to adequately respond to changing conditions.

Analysis:

For the period examined, restricted operating revenues as a percent of total operating revenues has remained relatively stable. The City closely monitors all significant general fund revenues on a monthly basis. There is no warning trend observed for this indicator.

Sources:

- City of Columbia Financial Management Information Supplement - FMIS

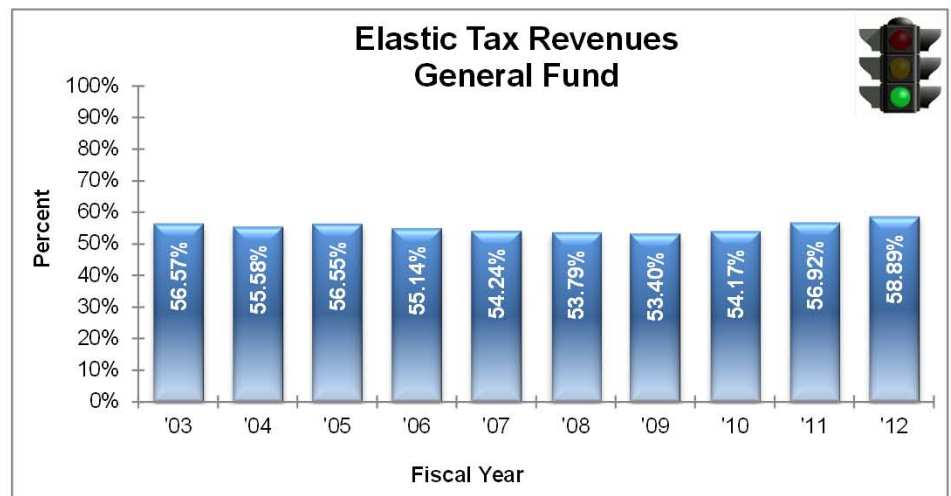

Elastic Tax Revenues: General Fund

Warning Trend:

Decreasing amount of elastic operating revenues as a percent of gross operating revenues

Formulation:

$$\frac{\text{Elastic Tax Revenues}}{\text{Operating Revenues}}$$

Fiscal Year	Elastic Tax Revenues *	Operating Revenues **	Elastic Revenues as a Percent of Operating Revenues and Transfers
2003	\$30,666,799	\$54,210,002	56.57%
2004	\$32,366,842	\$58,238,591	55.58%
2005	\$34,450,651	\$60,917,104	56.55%
2006	\$36,790,023	\$66,716,295	55.14%
2007	\$38,342,014	\$70,693,991	54.24%
2008	\$42,440,778	\$78,898,068	53.79%
2009	\$41,266,388	\$77,275,976	53.40%
2010	\$42,805,242	\$79,023,392	54.17%
2011	\$45,362,441	\$79,689,322	56.92%
2012	\$46,659,320	\$79,233,087	58.89%

* Elastic Revenues: Sales Tax, Telephone, Natural Gas and Electric Utility Taxes, Water and Electric P.I.L.O.T. Gasoline Tax, Cigarette Tax and Motor Vehicle Tax

** Operating Revenues = General Fund Revenues + Operating Transfers from Other Funds + Appropriated Fund Balance

Description:

Elastic tax revenues respond to changes in the economic base and inflation. As economic bases and inflation go up or down, elastic revenues would increase or decrease roughly the same proportion and vice versa. A good example is the sales tax which would ideally increase proportionately to any increases in its base as well as the rate of inflation. Inelastic revenues such as fixed license fees, parks and recreation fees, or user fees, are relatively unresponsive to changes in economic conditions. Yields from these revenues usually lag behind economic growth and inflation because local legislatures are often reluctant or not able to adjust them each year. In a decision handed down on December 17, 1991, the Supreme Court of Missouri held that increases in user fees or fees for services are not subject to the Hancock Amendment. This case makes a distinction between fees for service and fees that are used to raise general revenue. The Court interpreted the Hancock Amendment as not requiring a vote on fee increases which are "special revenues" and not a "tax" but requiring a vote for fee increases that are taxes in everything but name.

Analysis:

Columbia has a blend between elastic and inelastic revenues which could be expected to cushion against recession or to respond to inflationary pressures.

For the period examined, elastic tax revenues as a percent of operating revenues has remained relatively stable. There is no warning trend observed for this indicator.

Sources:

- City of Columbia Financial Management Information Supplement - FMIS

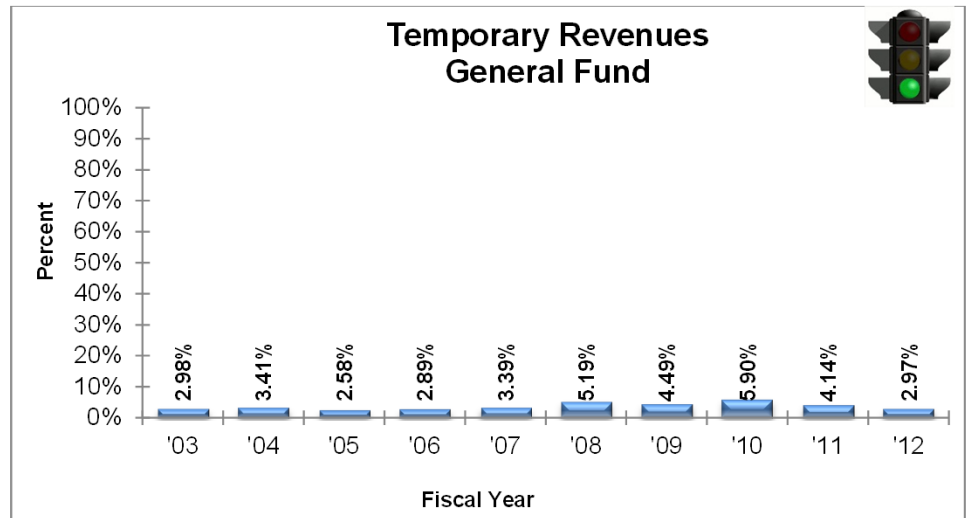

Temporary Revenues: General Fund

Warning Trend:

Increasing use of temporary revenues as a percentage of operating revenues

Formulation:

$$\frac{\text{Temporary Revenues}}{\text{Operating Revenues}}$$

Fiscal Year	Temporary Revenues*	Operating Revenues **	Temporary Revenues as a Percent of Operating
			Revenues
2003	\$1,615,855	\$54,210,002	2.98%
2004	\$1,984,748	\$58,238,591	3.41%
2005	\$1,570,008	\$60,917,104	2.58%
2006	\$1,927,292	\$66,716,295	2.89%
2007	\$2,393,224	\$70,693,991	3.39%
2008	\$4,093,818	\$78,898,068	5.19%
2009	\$3,469,203	\$77,275,976	4.49%
2010	\$4,659,208	\$79,023,392	5.90%
2011	\$3,303,120	\$79,689,322	4.14%
2012	\$2,350,639	\$79,233,087	2.97%

* Temporary Revenues: General Fund - Federal and State Grants.

** Operating Revenues = General Fund Revenues + Operating Transfers from Other Funds + Appropriated Fund Balance

Description:

A temporary revenue is one that may not continue in the same manner over time, such as an unrestricted federal grant or a loan from an external source. A continued substantial increase in dependence on such revenues may indicate the City's revenue base is becoming vulnerable.

Analysis:

A warning trend would occur when temporary revenues as a percent of operating revenues are increasing over total operating revenues. The ten year period listed shows slight increases or decreases primarily due to changes in grants received for the Health Department and Police Department. Much of the temporary revenue in the Health Department has been for specific activities that can be discontinued when the revenue source ends. The City makes every effort to identify those programs when grants are received. In FY 2008 through FY 2011, the city received a large non-motorized grant from the federal government for projects that accommodate motorists, bicyclists and pedestrians. Temporary revenues are such a small percentage of operating revenues, so there is no warning trend observed for this indicator.

Sources:

- City of Columbia Financial Management Information Supplement - FMIS

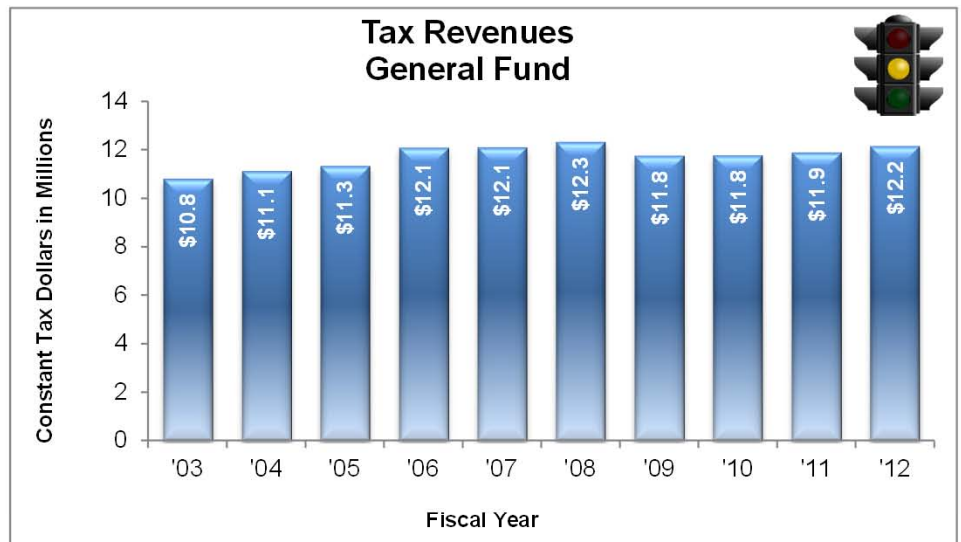

Tax Revenues: General Fund

Warning Trend:

Declining or negative growth in tax revenue (constant dollars)

Formulation:

Tax Revenues (Constant Dollars)

Fiscal Year	Tax Revenues*	Consumer Price Index	Tax Revenues in Constant Dollars
2003	\$19,894,787	184.0	\$10,812,384
2004	\$21,044,504	188.9	\$11,140,553
2005	\$22,159,560	195.3	\$11,346,421
2006	\$24,401,059	201.6	\$12,103,700
2007	\$25,115,933	207.3	\$12,115,742
2008	\$26,558,220	215.3	\$12,335,276
2009	\$25,240,145	214.5	\$11,764,938
2010	\$25,687,727	218.1	\$11,780,335
2011	\$26,768,020	224.9	\$11,900,124
2012	\$27,938,463	229.6	\$12,168,850

* Tax Revenues: Sales Tax and Total General Property Taxes (Real, Individual, Railroad, Financial and Penalties and Interest)

Description:

Tax revenue has historically been an important source of revenue to most cities, particularly smaller cities, due to the limited range of their revenues. A decrease in constant dollar tax revenues may indicate one of the following:

Property Taxes:

1. Decline in City's property value from age or neglect, decline in City's economic well being, or decreasing population
2. Inability of taxpayers to pay taxes or inefficient collection procedures
3. Conscious effort to reduce reliance on revenue sources in light of adverse reactions by the public to the tax in recent years
4. Appraisal practices which do not reassess property on a frequent enough basis to keep pace with the rate of inflation

Sales Taxes:

1. Is the sales tax rate so high it is encouraging consumers to shop in other communities?
2. Are retail outlets relocating outside the community?
3. Are retailers properly collecting sales tax?

Analysis:

During the late 1970's the City made a conscious policy decision to decrease the City's reliance on property tax. This reduced reliance on property tax as a prime revenue source has been a positive factor in helping the City achieve flexibility by reducing its reliance on inelastic revenues and putting more importance on elastic revenues such as sales tax.

The decrease in FY 2009 was due to a downturn in the economy which impacted sales tax. FY 2011 and FY 2012 show a slight increase in constant dollar tax revenues. Because sales taxes are a major revenue source for the General Fund, management monitors this revenue on a monthly basis, and expenditures are adjusted quarterly if the City does not meet its sales tax projections.

- City of Columbia Financial Management Information Supplement - FMIS
- website - <http://www.stats.bls.gov>
- Consumer Price Index are annual archived numbers from the Bureau of Labor

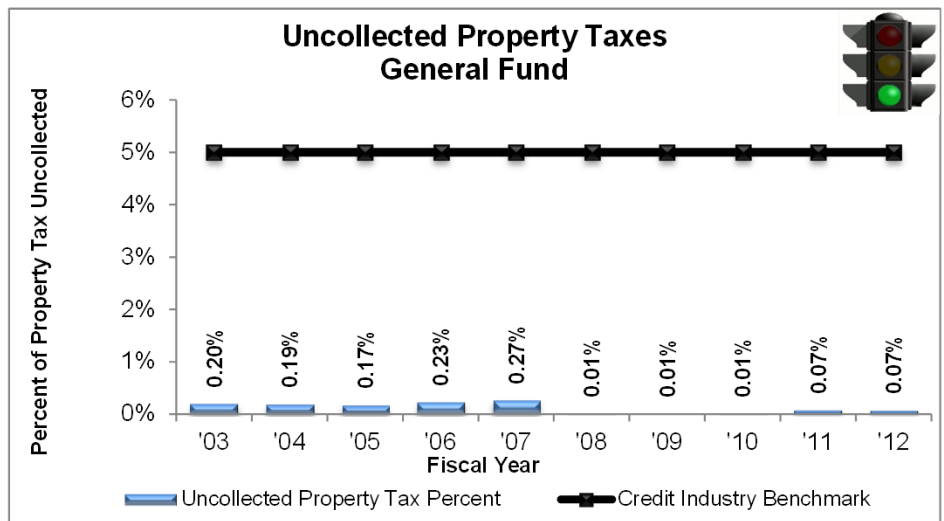

Uncollected Property Taxes: General Fund

Warning Trend:

Increasing amount of uncollected property taxes from current levy as a percentage of net current property tax levy

Formulation:

$$\frac{\text{Allowance for Uncollected Property Taxes (Current Levy)}}{\text{Net Property Tax Levy (Current Levy)}}$$

Fiscal Year	Net Current Property Tax Levy *	Allowance for Uncollected Property Taxes	Uncollected Property Taxes as a Percent of Levy
2003	\$4,473,073	\$8,988	0.20%
2004	\$4,683,536	\$8,759	0.19%
2005	\$4,790,935	\$8,181	0.17%
2006	\$5,699,585	\$13,146	0.23%
2007	\$6,168,905	\$16,400	0.27%
2008	\$6,644,677	\$574	0.01%
2009	\$6,812,948	\$370	0.01%
2010	\$6,893,193	\$565	0.01%
2011	\$6,876,040	\$5,115	0.07%
2012	\$7,097,767	\$5,017	0.07%

*Total General Property Taxes (Real, Individual, Railroad, Financial and Penalties and Interest)

Description:

Each year a certain percentage of the net current tax levy goes uncollected either because property owners are unable to pay or collection procedures are not as effective as they might be. If the percentage grows over time, it could be an indication of overall decline in economic health (local, regional or national). Such a trend is particularly troublesome to communities where property tax revenues make up large percentages of total revenues.

Credit Industry Benchmarks:

Credit rating firms consider that a city will normally be unable to collect 2 to 3 percent of its property taxes each year. If uncollected property taxes as a percent of levy fall within a 5 to 8 percent range, credit rating firms consider this a negative factor.

Analysis:

While the percent of uncollected property taxes have varied for the past ten years, it has always been below 0.3% which is significantly below the 2-3% rate deemed acceptable by the credit rating industry. There is no warning trend observed for this indicator.

Although the future trend of uncollected property taxes should be monitored closely, a factor which might lessen the trend somewhat is the fact that the total tax collections (current and past due) exceeded the net current tax levy for the past ten years.

Sources:

- City of Columbia Financial Management Information Supplement - FMIS

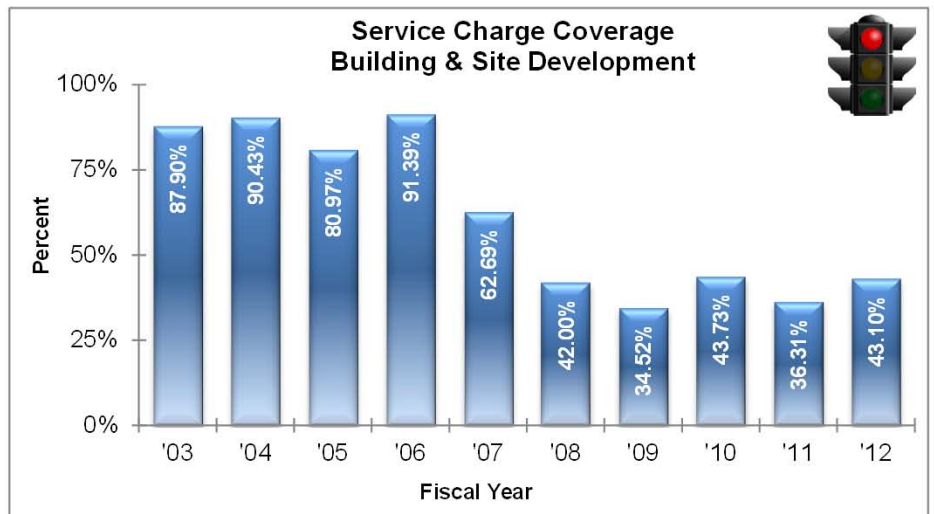

Service Charge Coverage: General Fund Building and Site Development

Warning Trend:

Decreasing revenues from service charges as a percent of total expenditures for providing related services

Formulation:

$$\frac{\text{Revenue from Fees \& Service Charges}}{\text{Expenditures for Related Services}}$$

Fiscal Year	Revenue from Fees and Service Charges*	Expenditures for Related Services**	Service Charge Coverage
2003	\$688,996	\$783,873	87.90%
2004	\$746,508	\$825,529	90.43%
2005	\$746,393	\$921,782	80.97%
2006	\$847,130	\$926,938	91.39%
2007	\$615,557	\$981,906	62.69%
2008	\$443,802	\$1,056,780	42.00%
2009	\$345,471	\$1,000,735	34.52%
2010	\$355,700	\$813,443	43.73%
2011	\$418,527	\$1,152,719	36.31%
2012	\$470,122	\$1,090,845	43.10%

* Fees and Service Charges: Protective Inspection 2002-2008, Building and Site Development 2009-2011 Revenues include Building, mechanical, plumbing and electrical permits and plan review fees.

** Expenditures for related services: Protective Inspection 2002-2008, Building and Site Development 2009-2011. Expenditures are 85% of all operating expenses and capital outlay is not included.

Description:

Service charge coverage refers to the extent which fees and charges cover costs of providing a service. As coverage declines, the burden on other revenues to support the services increases. The above charge focuses on the fees for building and site development.

Analysis:

Council has adopted a policy to recover 75% of the cost associated with constructing both private and commercial construction development in the city.

The service charge recovery has decreased since FY 2006. Several reasons for this decrease are as follows: the economic downturn, an additional position was placed in the Building and Site division which was not a part of the original calculation, and management made the decision not to increase fees during the economic downturn. However, the result has been an increasing amount of general revenue sources being used to support this operation. Management will address these fees as a part of the FY 2013 budget process and fees will be raised to meet the Council's 75% cost recovery goals and reviewed annually thereafter to ensure the fees allow the cost recovery goals to be maintained.

Revenue Surpluses/ (Shortfalls): Estimated Revenues vs. Actual Revenues - General Fund

Warning Trend:

Increase in revenue deficiencies as a percent of operating revenues

Formulation:

$$\frac{\text{Revenue Surplus/(Deficit)}}{\text{Estimated Budgeted Revenues}}$$

Fiscal Year	Operating Revenues*	Estimated Budget Revenues**	Revenue Surplus or (Deficit)	Surpluses (Deficits) as a Percent of Budgeted Revenues
2003	\$54,210,002	\$52,034,008	\$2,175,994	4.18%
2004	\$58,238,591	\$55,324,383	\$2,914,208	5.27%
2005	\$60,917,104	\$59,408,227	\$1,508,877	2.54%
2006	\$66,716,295	\$63,049,422	\$3,666,873	5.82%
2007	\$70,693,991	\$67,171,337	\$3,522,654	5.24%
2008	\$78,898,068	\$70,258,112	\$8,639,956	12.30%
2009	\$77,275,976	\$74,933,880	\$2,342,096	3.13%
2010	\$79,023,392	\$76,232,748	\$2,790,644	3.66%
2011	\$79,689,322	\$76,114,775	\$3,574,547	4.70%
2012	\$79,233,087	\$79,721,657	(\$488,570)	(0.61%)

* Operating Revenues = General Fund Revenues + Operating Transfers from Other Funds + Appropriated Fund Balance

** Budgeted Revenue include all revenues in the general fund approved by council at the time the budget was adopted. It does not include any mid-year amendments

Description:

This indicator examines the difference between revenue estimates and revenues actually received during the fiscal year. Major discrepancies that continue year after year can be an indication of an erratic economy, inefficient collection procedures, or inaccurate estimating techniques. It can also be an indication that revenue estimates are being made optimistically high or conservatively low.

Analysis:

For the period shown, revenue estimates have been well within a 6% tolerance range of actual revenues for the General Fund for all years except FY 2008. In FY 2008, the City received a federal non-motorized grant. This illustrates that the current forecasting techniques are producing revenue projections that are substantially better than 94% of actual revenues. The FY 2011 amount as a percent of Estimated Budgeted Revenues is at 4.70% increase which is due primarily to the receipt of a Federal Grant for non-motorized transportation and the economy showing some signs of improvement as sales tax receipts came in above the estimate. FY 2012 is 0.61% below the estimate.

(THIS PAGE INTENTIONALLY LEFT BLANK)

Expenditure Indicators

Expenditures are a rough measure of a city's output effort. Generally, when a city spends more in constant dollars it is either providing more services or it is providing higher quality services.

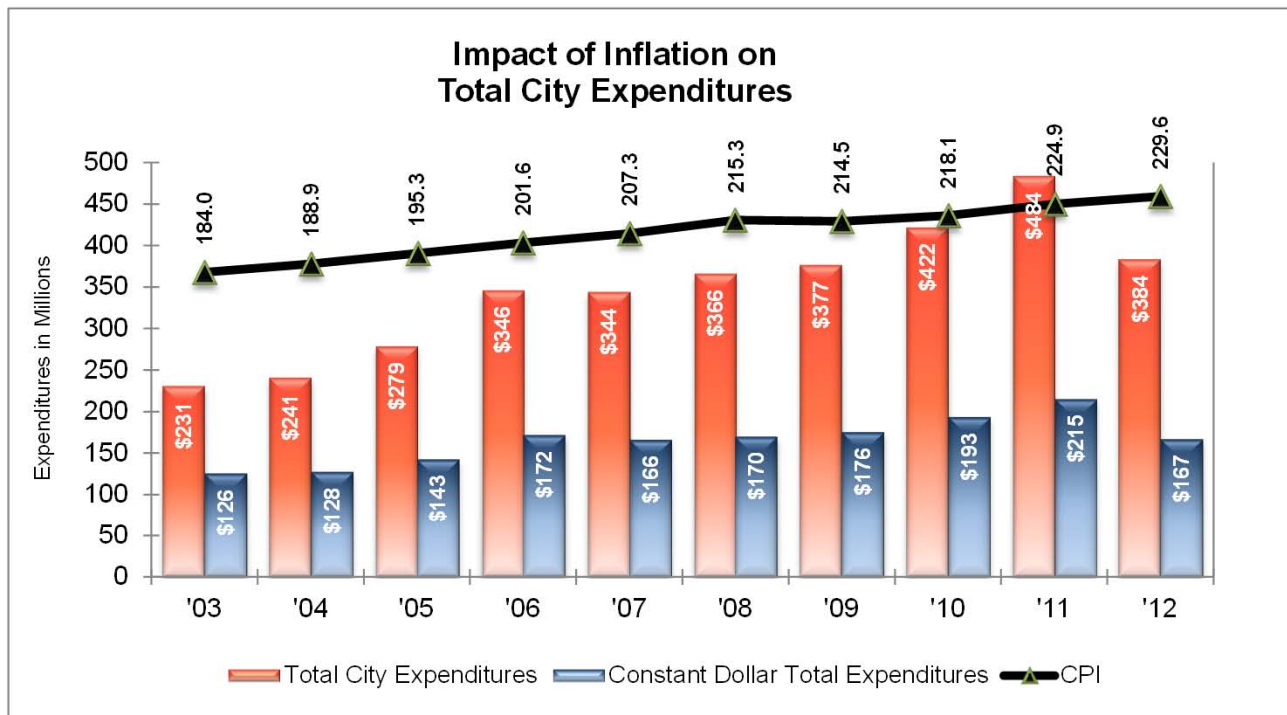

Most cities are required to have balanced budgets; however, there are a number of subtle ways to balance an annual budget yet create possible long-run imbalances. Some of the more common ways are to use bond proceeds for operations, defer maintenance, or defer pension funding. In each case, the budget remains balanced, but long-run budgets could be developing deficits.

Expenditures represent a level of "fixed costs", or expenditure flexibility, as well a measure of the City's ability to adjust service levels in relation to changing economic, political, and social conditions. The higher the fixed costs, the smaller the city's ability to make appropriate adjustments. As the percentage of fixed costs increases, the flexibility of spending decreases.

Ideally, a city will have an expenditure growth rate that does not exceed its revenue growth rate and will have maximum spending flexibility to adjust to changing factors. Review of city expenditures can identify certain of the following should they exist: undesired growth in fixed costs, ineffective budgetary controls and decline in personnel productivity.

Changes in the expenditure patterns can be monitored by using the following indicators:

- Expenditures Per Capita: General Fund
- Expenditures Per Capita: Utilities
- Expenditures By Function
- Employees Per Thousand Population: General Fund
- Employees Per Thousand Population: Utilities
- Fixed Costs: General Fund
- Fixed Costs: Utilities
- Expenditures Over/Under Budget: General Fund

Expenditures Per Capita:

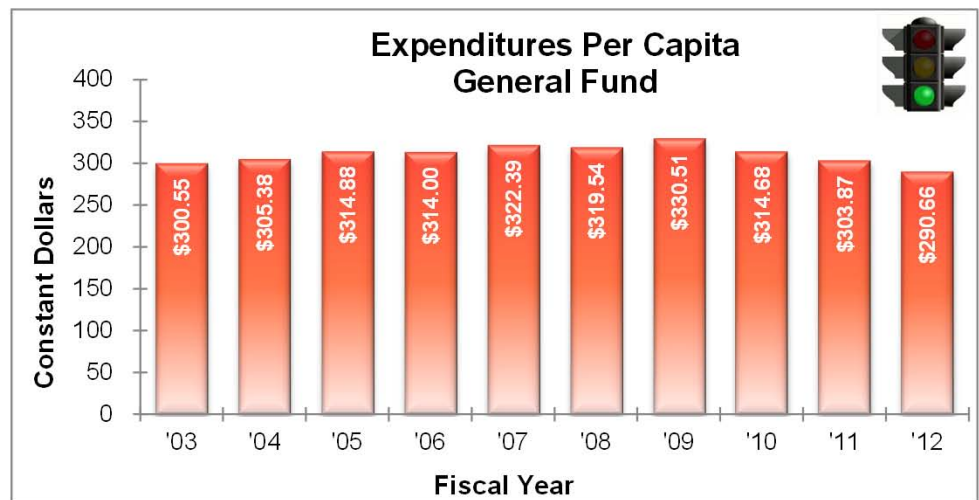

General Fund

Warning Trend:

Increasing operating expenditures (constant dollars) per capita

Formulation:

$$\frac{\text{Operating Expenditures (Constant Dollars)}}{\text{Population}}$$

Fiscal Year	Operating Expenditures *	Price Index	Constant Dollar Expenditures	Estimated Population**	Per Capita Expenditures In Constant Dollars
2003	\$49,723,710	184.0	\$27,023,755	89,913	\$300.55
2004	\$52,905,356	188.9	\$28,007,070	91,712	\$305.38
2005	\$57,935,849	195.3	\$29,665,053	94,211	\$314.88
2006	\$61,530,716	201.6	\$30,521,188	97,202	\$314.00
2007	\$66,433,679	207.3	\$32,047,120	99,405	\$322.39
2008	\$69,468,759	215.3	\$32,265,579	100,976	\$319.54
2009	\$72,554,174	214.5	\$33,818,956	102,324	\$330.51
2010	\$74,450,327	218.1	\$34,142,756	108,500	\$314.68
2011	\$75,487,905	224.9	\$33,559,278	110,438	\$303.87
2012	\$75,016,214	229.6	\$32,673,990	112,414	\$290.66

* Operating Expenditures = Total General Fund expenses including Operating Transfers to Other Funds.

** Census numbers were used for 2000 and 2010. The remaining year populations are census estimates.

Description:

Expenditures per capita reflect changes in expenditures relative to changes in population. Increasing per capita expenditures can indicate that the cost of providing services is increasing at a pace beyond the community's ability to pay. In addition, if increases are occurring which cannot be explained by the addition of other services, it may indicate declining productivity--spending more to deliver the same level of services.

Analysis:

For the period shown, operating expenditures in actual dollars have increased 51% and operating expenditures in constant dollars have increased 21%, while per capita expenditures in constant dollars have decreased 3%. The population continues to increase and demand for city services continue to grow; however not at a pace beyond the community's ability to pay. Since the overall trend fluctuates only slightly per capita for the period shown, there is no immediate cause for concern with this indicator. The City regularly monitors revenues and expenditures to prevent problems in the future.

Expenses per Capita: Utilities

Warning Trend:

Increasing operating expenses (constant dollars) per capita

Formulation:

$$\frac{\text{Operating Expenses (Constant Dollars)}}{\text{Population}}$$

Fiscal Year	Utility Operating Expenses*	Consumer Price Index	Constant Dollar Expenses	Estimated Population	Per Capita Expenses In Constant Dollars
2003	73,365,001	184.0	\$39,872,283	89,913	\$443.45
2004	77,614,857	188.9	\$41,087,801	91,712	\$448.01
2005	88,409,025	195.3	\$45,268,318	94,211	\$480.50
2006	102,315,405	201.6	\$50,751,689	97,202	\$522.13
2007	102,370,001	207.3	\$49,382,538	99,405	\$496.78
2008	110,704,415	215.3	\$51,417,962	100,976	\$509.21
2009	119,513,635	214.5	\$55,707,703	102,324	\$544.42
2010	125,364,589	218.1	\$57,491,924	108,500	\$529.88
2011	128,658,075	224.9	\$57,196,873	110,438	\$517.91
2012	123,254,571	229.6	\$53,684,643	112,414	\$477.56

* Operating expenses do not include: Interest expense, Loss on Disposal of Assets, Miscellaneous Expense and Transfers From Other Funds.

Utility Funds include: Water, Electric, Sewer, Solid Waste and Storm Water.

Description:

Expenses per capita reflect changes in expenditures relative to changes in population. Increasing per capita expenditures can indicate that the cost of providing services is increasing at a pace beyond the community's ability to pay. In addition, if increases are occurring which cannot be explained by the addition of other services, it may indicate declining productivity--spending more to deliver the same level of services.

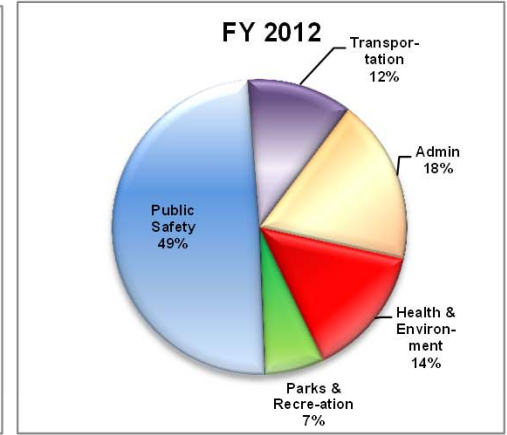

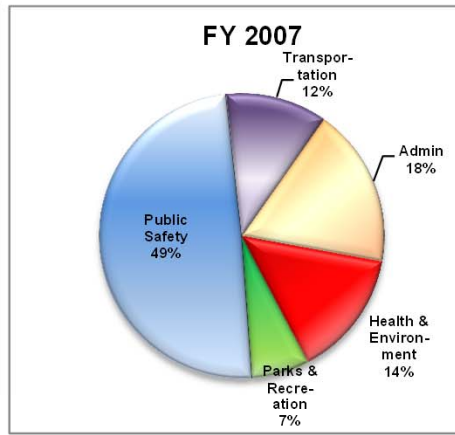

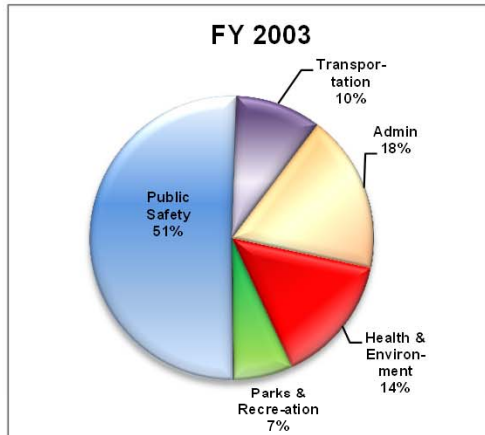

Analysis:

For the period shown operating expenditures in constant dollars have increased 35%, while per capita expenditures in constant dollars have increased 8%. The increase in operating expenses is primarily due to the increase in purchased power costs in the Electric utility where the costs have increased \$38 million in the past ten years. Utility rates are adjusted to cover voter approved capital projects as well as increases in operating expenses. Purchase power decreased significantly in FY 2012. The City regularly monitors these expenses.

Expenditures by Function: General Fund

Warning Trend:

Increasing operating expenditures for one function as a percentage of total net operating expenditures.

Formulation:

General Fund Operating Expenditures By Function
Total Net Operating Expenditures

General Fund Function	Operating Expenditures FY 2003	Operating Expenditures FY 2007	Operating Expenditures FY 2012
Administrative	\$9,083,735	\$12,083,391	\$14,935,602
Health & Environment	\$7,341,991	\$9,542,331	\$10,249,346
Parks & Recreation	\$3,428,616	\$4,377,743	\$4,868,669
Public Safety	\$25,460,160	\$32,796,396	\$36,475,187
Transportation	\$4,886,072	\$7,653,370	\$9,321,027
	\$50,200,574	\$66,453,231	\$75,849,831

Description:

General Fund expenditures by function shows a more detailed breakdown of local government's general fund expenditures and can provide additional analysis of the cause of increase in spending over time. There should not be substantial increases over time in any one particular functional group.

Analysis:

Increases occur if there is an increase in service or an addition of a new service. Increases in services or additional services should be offset by increases in revenues. Additional increases may be caused by mandated services which may be offset by state or federal funding.

The expenditures for all areas in the functional groups have been very stable over the 10 year span. There is no warning trend observed for this indicator.

Employees Per Thousand Population: General Fund

Warning Trend:

Increasing number of municipal employees per thousand population

Formulation:

Number of General Fund Employees
Per Thousand Population

Fiscal Year	General Fund Employees	Estimated Population	Employees Per Thousand Population
2003	583.48	89,913	6.49
2004	594.18	91,712	6.48
2005	605.03	94,211	6.42
2006	618.58	97,202	6.36
2007	632.04	99,405	6.36
2008	644.49	100,976	6.38
2009	656.10	102,324	6.41
2010	668.55	108,500	6.16
2011	662.48	110,438	6.00
2012	669.40	112,414	5.95

Notes:

Census numbers were used for 2000 and 2010. The remaining year populations are census estimates.

Description:

Because personnel costs are a major portion of General Fund operating expenditures (over 60%), plotting changes in the number of employees per thousand population is another way to measure changes in expenditures. A substantial increase in employees per thousand population might indicate that expenditures are rising faster than revenues, that the City is becoming more labor intensive, services are expanding, or personnel productivity is declining.

Analysis:

The yearly increases in General Fund employees have been mainly due to new city programs and population growth. There has been an overall decrease in employees per thousand population over the ten year period shown. There is no warning trend observed for this indicator.

Sources:

- City of Columbia Annual Budget
- <http://www.census.gov/popest/data/intercensal/cities/files/SUB-EST00INT.csv>

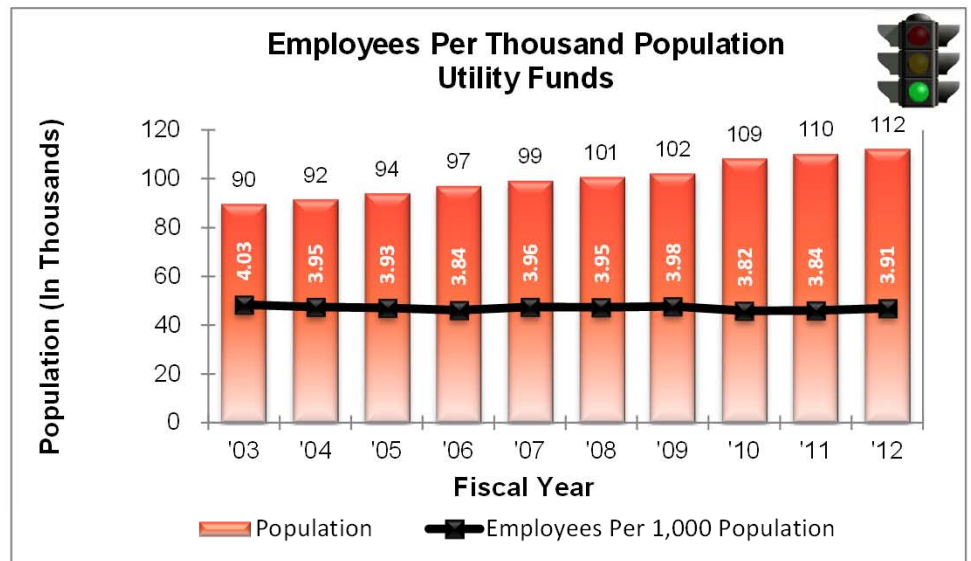

Employees Per Thousand Population: Utility Funds

Warning Trend:

Increasing number of municipal employees per thousand population

Formulation:

$$\frac{\text{Number of Utility Fund Employees}}{\text{Per Thousand Population}}$$

Fiscal Year	Utility Fund Employees	Estimated Population	Employees Per Thousand Population
2003	362.52	89,913	4.03
2004	362.52	91,712	3.95
2005	370.02	94,211	3.93
2006	373.52	97,202	3.84
2007	393.61	99,405	3.96
2008	398.61	100,976	3.95
2009	407.35	102,324	3.98
2010	415.00	108,500	3.82
2011	423.92	110,438	3.84
2012	439.25	112,414	3.91

Census numbers were used for 2000 and 2010. The remaining year populations are census estimates.
Utility Funds include: Water, Electric, Sewer, Solid Waste and Storm Water.

Description:

Due to the capital intensive nature of the Utility funds, personnel costs are not as major a component as they are to the General Fund. They do warrant close monitoring however, because of the implications attached to increases in personnel. Increases in the number of employees per thousand population may indicate that these funds are becoming more labor intensive, that demands for services are rapidly increasing, or productivity is declining. The impact of increased personnel costs has a potential impact on utility rates.

Analysis:

For the period shown, employees per thousand population have experienced an overall decrease. The service efforts of the City's utilities are closely related to services offered to the population, rendering employees per thousand population as the best indicator because it ensures that employees growth is not outstripping growth of the community. Since there has not been any substantial increase for the period listed, there is no negative trend observed for this indicator.

Sources:

- City of Columbia Annual Budget
- <http://www.census.gov/popest/data/intercensal/cities/files/SUB-EST00INT.csv>

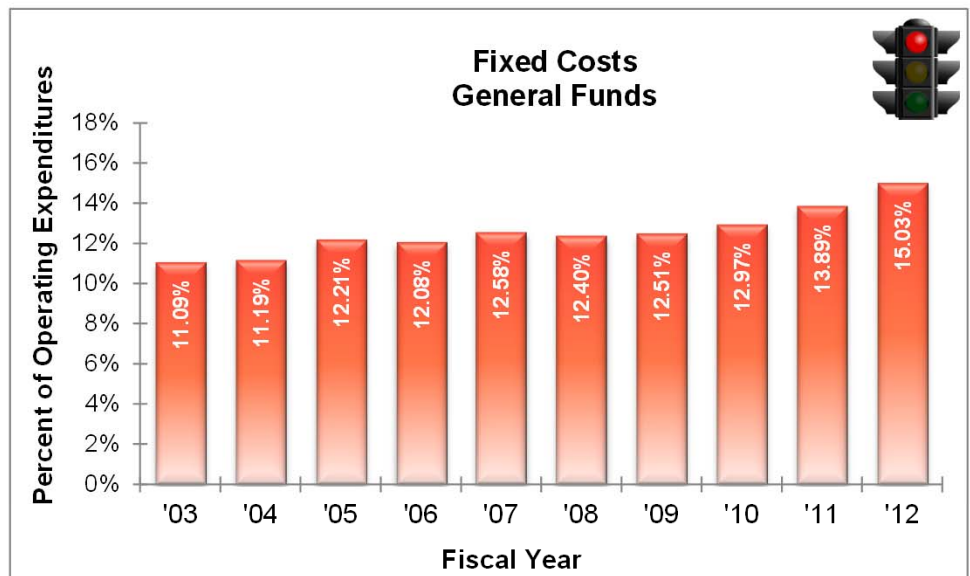

Fixed Costs: General Funds

Warning Trend:

Increasing fixed costs as a percent of operating expenditures and transfers

Formulation:

$$\frac{\text{Fixed Costs}}{\text{Operating Expenditures}}$$

Fiscal Year	Total Fixed Costs *	Operating Expenditures **	Fixed Costs As A Percent Of Operating Expenditures
2003	\$5,512,366	\$49,723,710	11.09%
2004	\$5,921,139	\$52,905,356	11.19%
2005	\$7,073,207	\$57,935,849	12.21%
2006	\$7,434,156	\$61,530,716	12.08%
2007	\$8,354,517	\$66,433,679	12.58%
2008	\$8,614,440	\$69,468,759	12.40%
2009	\$9,075,762	\$72,554,174	12.51%
2010	\$9,654,382	\$74,450,327	12.97%
2011	\$10,485,532	\$75,487,905	13.89%
2012	\$11,274,967	\$75,016,214	15.03%

* Fixed Costs: City's Pension Contributions, Debt Service & Lease Costs, Salaries of Key Personnel and Insurance Costs.

** Operating Expenditures = Total General Fund expenses including Operating Transfers to Other Funds.

Description:

The operating expenditures of every city are partly composed of expenditures over which the City has little short-run control. These expenditures are referred to as "mandatory," or "fixed" costs. They include expenditures to which the City has some type of legal commitment such as debt service, pension benefits, insurance, and salaries of certain key City officials.

The level of fixed costs is important because the higher the level, the less flexibility the City has to adjust its budget in response to changing economic conditions. This is especially important during periods of financial retrenchment since many of the City's expenditures cannot be reduced; therefore, levels of service may suffer.

Analysis:

Fixed costs as a percent of operating expenditures has increased every year since FY 2006. This is a significant warning trend. A key component of this increase has been the rising pension and health insurance costs. Management has been working with current city personnel to develop a plan to reduce pension costs/liabilities for the City in the future. A plan has been implemented which places new hires into a different pension plan. This will help to reduce the city's unfunded liability portion of the pension plan. The new plan requires an increase in the amount of service for all new hires on or after October 1, 2012. Over time fixed costs as a percent of operating expenditures will be reduced.

Fixed Costs:

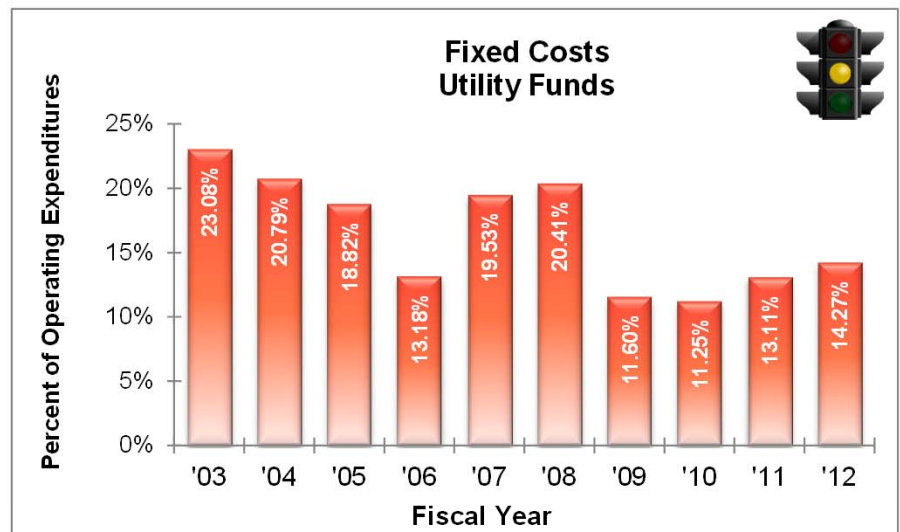

Utility Funds

Warning Trend:

Increasing fixed costs as a percent of operating expenditures and transfers

Formulation:

$$\frac{\text{Fixed Costs}}{\text{Operating Expenditures}}$$

Fiscal Year	Total Fixed Costs *	Operating Expenditures **	Fixed Costs As A Percent Of Operating Expenditures
2003	\$17,081,565	\$74,015,769	23.08%
2004	\$16,277,746	\$78,296,864	20.79%
2005	\$16,774,742	\$89,119,391	18.82%
2006	\$13,578,439	\$103,025,982	13.18%
2007	\$20,131,580	\$103,065,502	19.53%
2008	\$22,773,134	\$111,591,328	20.41%
2009	\$13,942,643	\$120,244,842	11.60%
2010	\$14,182,226	\$126,098,609	11.25%
2011	\$16,982,915	\$129,587,439	13.11%
2012	\$17,719,387	\$124,165,408	14.27%

* Fixed Costs: City's Pension Contributions, Debt Service & Lease Costs, Salaries of Key Personnel and Insurance Costs.

** Total Operating Expenditures for Water, Electric, Sewer, Solid Waste, Storm Water and Parking

Utility Funds include: Water, Electric, Sewer, Solid Waste and Storm Water.

Description:

The operating expenditures of every city are partly composed of expenditures over which the City has little short-run control. These expenditures are referred to as "mandatory," or "fixed" costs. They include expenditures to which the City has some type of legal commitment such as debt service, pension benefits, insurance, and salaries of certain key City officials.

The level of fixed costs is important because the higher the level, the less flexibility the City has to adjust its budget in response to changing economic conditions. This is especially important during periods of financial retrenchment since many of the City's expenditures cannot be reduced; therefore, levels of service may suffer.

Analysis:

Fixed costs as a percent of operating expenditures decreased beginning in FY 2009. As a result of the economic downturn, the City has been able to refinance many of the outstanding debt issues at much lower interest rates and interest costs have been greatly reduced. Although there is no warning trend observed for this indicator, the indicator is increasing which warrants close monitoring in the future.

Fringe Benefits:

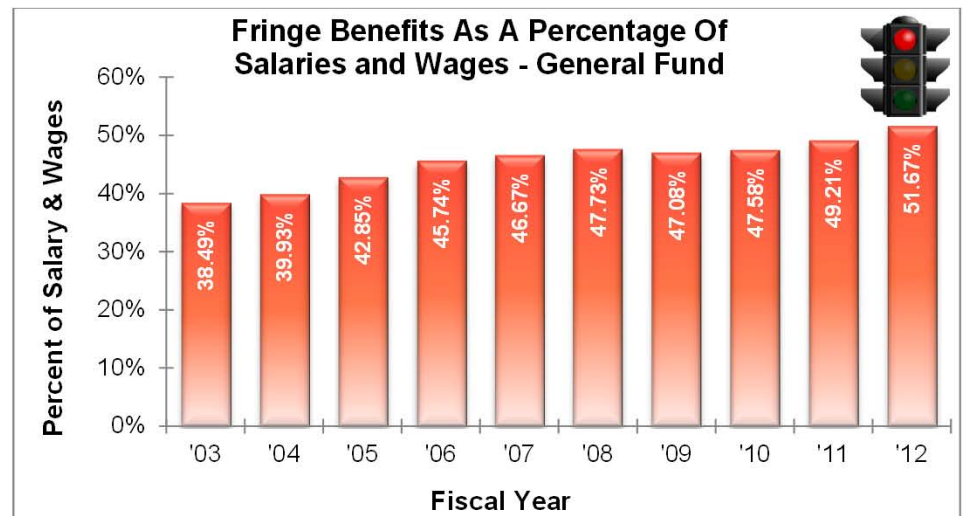

General Fund

Warning Trend:

Increasing fringe benefit expenditures as a percent of salaries and wages

Formulation:

$$\frac{\text{Fringe Benefit Expenditures}}{\text{Salaries and Wages}}$$

Fiscal Year	Cost of Fringe Benefits *	Salaries And Wages	Benefits As a Percent Of Salaries & Wages
2003	\$9,419,764	\$24,473,087	38.49%
2004	\$10,215,263	\$25,585,845	39.93%
2005	\$11,493,666	\$26,820,342	42.85%
2006	\$12,622,350	\$27,593,115	45.74%
2007	\$14,032,492	\$30,064,808	46.67%
2008	\$14,656,614	\$30,707,290	47.73%
2009	\$15,185,797	\$32,253,082	47.08%
2010	\$15,643,756	\$32,882,153	47.58%
2011	\$16,362,929	\$33,251,616	49.21%
2012	\$17,207,284	\$33,299,072	51.67%

* Benefits: LAGERS, Police and Firefighters Retirement Fund, Life and Health Insurance, Social Security, Disability Insurance, Sick Leave Buyback Incentive, Deferred Compensation, and Other Benefits (which include service awards, safety awards and retirement sick leave payments)

Description:

The most common forms of fringe benefits are pension plans and health and life insurance. Together, they can represent a significant cost to the City. Some benefits, such as life and health insurance, require immediate cash outlays. Some, like pension benefits, can be deferred. Because of the complex nature of the funding and recording of fringe benefits, these costs can inadvertently escalate and place a financial strain on a city -- one that is not readily identifiable.

Analysis:

The salaries and wages figure used in this indicator covers all salaries and wages including seasonal employees who are not eligible for most of the benefits listed in this indicator, i.e., sick leave incentive, insurance, retirement, etc. The percentage may be higher for certain employee groups who have negotiated fringe benefits in the past or whose pension amounts have increased significantly during the timeframe listed.

Certain factors such as increases or decreases in pension contributions; cost of social security; health insurance costs; and workers' compensation have had an impact on the City's cost of fringe benefits and caused these amounts to vary from year to year.

- FY 2002: an enhancement occurred to the Police and Fire Pension
- FY 2003: City changed from the LT 10 plan to the L-6 plan in the LAGERS pension
- FY 2005: increases in health insurance and the fire and police pension
- FY 2006: increases in health insurance and the fire pension
- FY 2007 and FY 2008: increases in health insurance and the fire/police pensions.

Pension costs have increased at a significant rate for the past several years as salaries remained relatively stable. The City worked during FY 2011 and FY 2012 to establish a plan to begin reducing the costs of all pensions. New hires beginning on Oct 1, 2012 will be placed in different pension plans from current employees. Over time this percent should decrease.

Fringe Benefits:

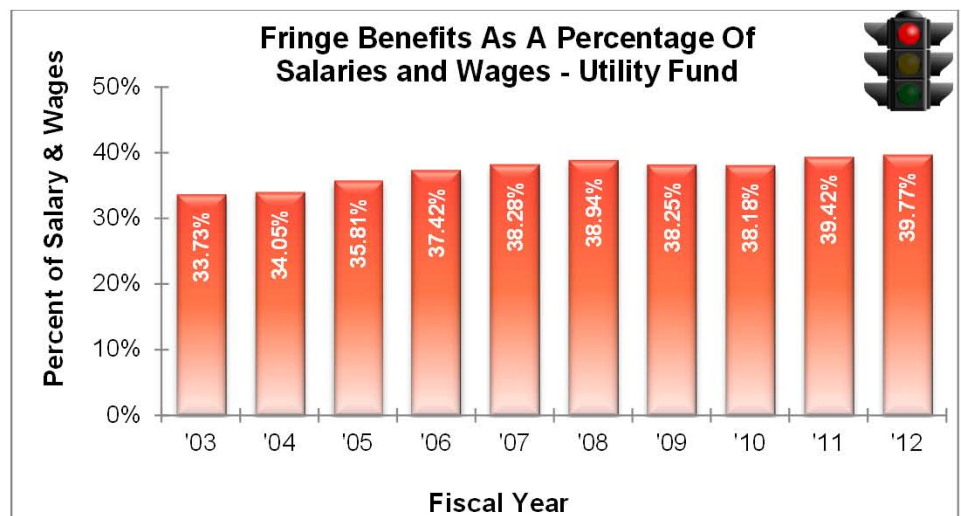

Utility Fund

Warning Trend:

Increasing fringe benefit expenditures as a percent of salaries and wages

Formulation:

$$\frac{\text{Fringe Benefit Expenditures}}{\text{Salaries and Wages}}$$

Fiscal Year	Cost of Fringe Benefits *	Salaries And Wages	Benefits As a Percent Of Salaries & Wages
2003	\$4,746,776	\$14,074,283	33.73%
2004	\$4,987,270	\$14,646,465	34.05%
2005	\$5,537,582	\$15,465,922	35.81%
2006	\$6,074,789	\$16,235,535	37.42%
2007	\$6,541,464	\$17,089,746	38.28%
2008	\$7,186,384	\$18,457,078	38.94%
2009	\$7,451,449	\$19,481,409	38.25%
2010	\$7,548,624	\$19,773,061	38.18%
2011	\$7,903,339	\$20,050,975	39.42%
2012	\$8,196,824	\$20,612,392	39.77%

* Benefits: LAGERS, Police and Firefighters Retirement Fund, Life and Health Insurance, Social Security, Disability Insurance, Sick Leave Incentive, Deferred Compensation, and Other Benefits (which include service awards, safety awards and retirement sick leave payments)

Utility Funds include: Water, Electric, Sewer, Solid Waste and Storm Water.

Description:

The most common forms of fringe benefits are pension plans and health and life insurance. Together, they can represent a significant cost to the City Utility Funds, often exceeding 25% of salaries and wages. Some benefits, such as life and health insurance, require immediate cash outlays. Some, like pension benefits, can be deferred. Because of the complex nature of the funding and recording of fringe benefits, these costs can inadvertently escalate and place a financial strain on a city -- one that is not readily identifiable.

Analysis:

The salaries and wages figure used in this indicator covers all salaries and wages including seasonal employees who are not eligible for most of the benefits listed in this indicator, i.e., sick leave incentive, insurance, retirement, etc. The percentage may be higher for certain employee groups who have negotiated fringe benefits in the past.

Certain factors such as increases or decreases in pension contributions; cost of social security; health insurance costs; and workers' compensation have had an impact on the City's cost of fringe benefits and caused these amounts to vary from year to year.

FY 2002: an enhancement occurred to the Police and Fire Pension

FY 2003: City changed from the LT 10 plan to the L-6 plan in the LAGERS pension

FY 2005: increases in health insurance and the fire and police pension

FY 2006: increases in health insurance and the fire pension

FY 2007 and FY 2008: increases in health insurance and the fire/police pensions.

Pension costs have increased at a significant rate for the past several years as salaries remained relatively stable. The city worked during FY 2011 and FY 2012 to establish a plan to begin reducing the costs of all pensions. New hires from Oct 1, 2012 on will be placed in different pension plans from current employees. Over time this percent should decrease.

Expenditures (Over)/Under Budget: General Fund

Warning Trend:

Consecutive years of actual expenditures over budgeted expenditures

Formulation:

$$\frac{\text{Amount (Over)/Under Budget}}{\text{Budgeted Expenditures}}$$

Fiscal Year	Operating Expenditures*	Budgeted Expenditures**	Amount (Over)/Under Budget	Percent (Over)/Under Budget
2003	\$49,723,710	\$52,034,008	\$2,310,298	4.44%
2004	\$52,905,356	\$55,324,383	\$2,419,027	4.37%
2005	\$57,935,849	\$59,408,227	\$1,472,378	2.48%
2006	\$61,530,716	\$63,049,422	\$1,518,706	2.41%
2007	\$66,433,679	\$67,171,337	\$737,658	1.10%
2008	\$69,468,759	\$70,258,112	\$789,353	1.12%
2009	\$72,554,174	\$74,933,880	\$2,379,706	3.18%
2010	\$74,450,327	\$76,232,748	\$1,782,421	2.34%
2011	\$75,487,905	\$76,114,775	\$626,870	0.82%
2012	\$75,016,214	\$77,980,072	\$2,963,858	3.80%

* Operating Expenditures: Total general fund expenses including operating transfers to other funds.

** Budgeted Expenditures include all expense in the general fund approved by council at the time the budget was adopted. It does not include any mid-year appropriations

Description:

This indicator examines the difference between budgeted expenditures and actual expenditures during the year. Major discrepancies that continue year after year can be an indication of an erratic economy, or inaccurate estimating techniques. It can also be an indication that expenditure estimates are being made optimistically low or conservatively high.

Analysis:

The City has analyzed this indicator since FY 1977 and has consistently maintained actual expenditures under budget. Actual expenditures have consistently been under budgeted expenditures for the period shown. This illustrates an on-going effort to produce a reliable and consistent forecast of expenditures.

Management has begun a plan to reduce budgeted expenses down to the level of budgeted revenues so no appropriated fund balance will be needed to close the gap between revenues and expenses. This plan will be completed with the FY 2014 budget. It is anticipated that the percentage under budget will decrease as a result of this change. There is no warning trend observed with this indicator.

(THIS PAGE INTENTIONALLY LEFT BLANK)

Operating Position Indicators

Operating position refers to a city's ability to:

1. Balance its budget on a current basis
2. Maintain reserves for emergencies
3. Maintain sufficient cash to pay bills on a timely basis (liquidity)

Balancing the Current Budget

During a typical year, a city will usually generate either an operating surplus or an operating deficit. An operating surplus develops when current revenues exceed current expenditures -- a deficit develops when the reverse occurs. Deficits are funded by using reserves from prior years. Surpluses increase reserves. An operating surplus or deficit may be created intentionally as a result of a conscious policy decision, or unintentionally because of the difficulty of precisely predicting revenues and expenditures or trends in the underlying local and national economies.

Reserves

Reserves are built through the accumulation of operating surpluses. Such reserves are maintained to meet various unforeseen contingencies as follows:

- Loss of a revenue source
- Economic pressures from a downturn in the economy
- Unanticipated expenditures due to losses from a natural disaster not covered by insurance or external aid

Liquidity

Liquidity refers to the flow of cash in and out of the city treasury. Cities often receive the bulk of their revenues at infrequent intervals during the year. It is to a city's advantage to have good liquidity in the event of an unexpected delay in receipt of revenues, an unexpected decline, or a loss of a revenue source.

An analysis of operating position can identify the following problems should they occur:

- A pattern of continuing operating deficits
- Decline in revenues
- Decline in liquidity
- Ineffective revenue forecasting techniques
- Ineffective budgetary control

Changes in the expenditure patterns can be monitored by using the following trends:

- Excess of Revenues over Expenditures: General Fund
- Enterprise Operating Position: Recreation Services
- Enterprise Operating Position: Transit
- Enterprise Operating Position: Airport
- Enterprise Operating Position: Parking
- Enterprise Operating Position: Railroad
- Enterprise Operating Position: Water and Electric
- Enterprise Operating Position: Sewer
- Enterprise Operating Position: Solid Waste
- Enterprise Operating Position: Storm Water
- Fund Balance: General Fund
- Liquidity: General Fund
- Liquidity: Water and Electric
- Liquidity: Sewer
- Liquidity: Solid Waste

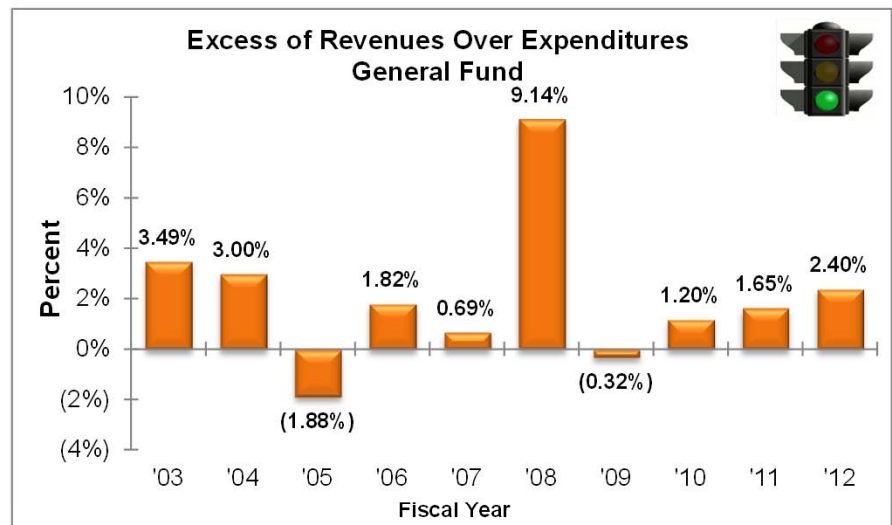

Excess of Revenues Over Expenditures: General Fund

Warning Trend:

Increasing amount of general fund operating deficits as a percent of operating revenues and transfers

Formulation:

$$\frac{\text{General Fund Operating (Deficits)/Surpluses}}{\text{Operating Revenues}}$$

Fiscal Year	General Fund Operating Surplus/(Deficit)*	Operating Revenues **	General Fund Operating Surplus/ (Deficit) As A Percentage Of Operating Revenues
2003	\$1,891,263	\$54,210,002	3.49%
2004	\$1,745,541	\$58,238,591	3.00%
2005	(\$1,147,015)	\$60,917,104	(1.88%)
2006	\$1,213,384	\$66,716,295	1.82%
2007	\$487,116	\$70,693,991	0.69%
2008	\$7,214,312	\$78,898,068	9.14%
2009	(\$247,378)	\$77,275,976	(0.32%)
2010	\$945,091	\$79,023,392	1.20%
2011	\$1,313,361	\$79,689,322	1.65%
2012	\$1,903,482	\$79,233,087	2.40%

Notes:

* Not including encumbrances or appropriated fund balance

** Operating Revenues = General Fund Revenues + Operating Transfers from Other Funds + Appropriated Fund Balance

Description:

An operating deficit will occur as operating expenditures exceed operating revenues. However, this does not necessarily mean the budget will be out of balance. Reserves (fund balances) and transfers are sometimes used to cover the difference. However, it does mean that the government is spending more than it is receiving. Continuing use of reserves and the unjustifiable transfer of funds to balance the deficit may indicate a revenue/expenditure problem. The existence of an operating deficit in one year is not cause for concern, but frequent and increasing deficits can indicate that current revenues are not supporting current expenditures and that serious problems may lie ahead.

Credit Industry Benchmarks:

A current year operating deficit would be considered a minor warning signal, and the reasons and manner of funding would be carefully examined before it was even considered a negative factor. However, the following situations would be looked at with considerably more attention and would probably be considered negative factors:

1. Two consecutive years of operating fund deficits
2. A current year deficit greater than the previous year's deficit
3. A current operating fund deficit in two or more of the last five years
4. An abnormally large deficit (5% to 10% of operating revenues) in any one year.

Analysis:

For the period shown, there have been two years (FY 2005 and FY 2009) where there was a deficit. For each of these years the City used excess reserves from previous years to balance the budget. In FY 2008 the City was awarded a large non-motorized federal grant which caused a significant inflow of revenues. There is no warning trend for this indicator as the past two years have shown an operating surplus.

Enterprise Operating Position: Recreation Services

Warning Trend:

Reduction in working capital (constant dollars)

Formulation:

Working Capital in Constant Dollars

Fiscal Year	Working Capital *	CPI	Working Capital (Constant Dollars)
2003	\$920,196	184.00	\$500,107
2004	\$1,226,225	188.90	\$649,140
2005	\$1,520,411	195.30	\$778,500
2006	\$1,843,250	201.60	\$914,311
2007	\$2,132,935	207.30	\$1,028,912
2008	\$1,848,946	215.30	\$858,765
2009	\$1,887,194	214.54	\$879,659
2010	\$1,769,213	218.06	\$811,357
2011	\$1,740,140	224.94	\$773,605
2012	\$1,746,799	229.59	\$760,834

**Working Capital: Current Assets less Current Liabilities*

Description:

Enterprise fund programs that exist in the City of Columbia include: Water, Electric, Recreation Services, Airport, Transit, Railroad, Parking Garages, Refuse Collection, Storm Water and Sewer. Enterprise systems are typically subject to the laws of supply and demand, and managers of enterprise programs who raise user fees or rates may find that revenues actually decrease because customers limit their consumption or decrease the use of the service.

Profit and loss data may not tell the entire picture about the operation. This indicator provides additional analysis of the "financial health" of the operation. Changes in working capital (current assets minus current liabilities) provide an additional measurement of the financial condition and helps assess the ability of the operation to generate funding for capital outlay and improvements.

Analysis:

Over the ten year period, Recreation Services working capital increased from FY 2003 to FY 2007 and decreased from FY 2009 to FY 2012. Some fee increases have occurred; however, there is no intent to fully recover the costs of recreation services from user fees. The City has established cost recovery goals based on the type of activity. This operation is subsidized by both the General Fund and the Parks Sales Tax Fund. As expenses increase to provide these services, there is a larger need for those two resources to cover the increase or cash reserves will be reduced. Management will need to annually review the cost recovery by activity and either raise fees, cut activities, or increase the use of subsidy. This indicator is exhibiting a warning trend because the last two years indicated decreases in the amount of working capital.

2012	\$713,590	229.59	\$310,811

*Working Capital: Current Assets less Current Liabilities

Description:

Enterprise systems are typically subject to the laws of supply and demand, and managers of enterprise programs who raise user fees or rates may find that revenues actually decrease because customers limit their consumption or decrease the use of the service.

Profit and loss data may not tell the entire picture about the operation. This indicator provides additional analysis of the "financial health" of the operation. Changes in working capital (current assets minus current liabilities) provide an additional measurement of the financial condition and helps assess the ability of the operation to general funding for capital outlay and improvements.

Analysis:

The transit system working capital has experienced an overall decrease from FY 2004 through FY 2012. There are two main contributing factors to this decrease. First, fuel costs have more than tripled during this timeframe. The Transit operation uses a lot of fuel and thus rises in fuel costs significantly impact the costs. The City is unable to raise fare prices enough to cover the increase in fuel costs. Second, there has been increased demand for transit services by college students living off campus. This demand has resulted in running more buses to large complexes and increasing the hours of operation for these routes.

The Transit operation is subsidized by the transportation sales taxes. Therefore, as the working capital decreases, management is left with the tough decisions of cutting services or utilizing more transportation sales tax funding to keep the operation going. Transportation sales tax funding is also used to subsidize the airport operation, provide funding for streets and sidewalks, and provide match funding for airport and transit capital grants. Therefore, future growth of the subsidy is dependent on the growth in the sales tax and the other competing demands for the funds.

Management has been evaluating other partnership possibilities to provide the funding to keep this operation going and improve the service to our customers.

2011	\$434,476	224.94	\$193,153
2012	\$563,931	229.59	\$245,625

*Working Capital: Current Assets less Current Liabilities

Description:

Enterprise systems are typically subject to the laws of supply and demand, and managers of enterprise programs who raise user fees or rates may find that revenues actually decrease because customers limit their consumption or decrease the use of the service.

Profit and loss data may not tell the entire picture about the operation. This indicator provides additional analysis of the "financial health" of the operation. Changes in working capital (current assets minus current liabilities) provide an additional measurement of the financial condition and helps assess the ability of the operation to generate funding for capital outlay and improvements.

Analysis:

The airport fund working capital decreased overall from FY 2002 to FY 2009. The airport operation has a significant amount of infrastructure to maintain. While FAA grants provide a significant portion of the funding, the City must be able to provide the matching funds. FAA grants are competitive and subject to the availability of funding within the federal budget.

Currently the airport operation is being subsidized with transportation sales taxes. The funding for airport competes with transit and streets and sidewalks operations and capital needs. Therefore, the growth in subsidy is contingent on the both growth of the transportation sales tax and the competing needs of transit and streets and sidewalks.

In order for the airport to thrive in the future, there will be a need to significantly increase the funding for infrastructure to build larger runways and terminal enhancements so additional carriers and larger flights can be flown to and from Columbia. This may involve creating new partnerships and identifying additional revenue sources to fund these improvements.

This indicator exhibits a significant warning trend as there are not sufficient working capital available to handle the present or future needs of the airport.

Changes in working capital (current assets minus current liabilities) provide an additional measurement of the financial condition and helps assess the ability of the operation to generate funding for capital outlay and improvements.

Analysis:

Working capital increased from FY 2003 to FY 2008. In FY 2009 working capital decreased due to the design and construction of a new parking garage at 5th & Walnut. As the project is completed and the spaces are rented, the working capital will increase. Rate increases occurred late in FY 2011 which are estimated to generate an additional \$700,000 per year. FY 2012 had a negative working capital number due to an increase in cash used for the Short Street garage project coupled with unearned revenue for future rent payments by REDI. Management will closely monitor this indicator to ensure working capital does not continue to decrease.

*Working Capital: Current Assets less Current Liabilities

Description:

Enterprise fund programs that exist in the City of Columbia include: Water, Electric, Recreation Services, Airport, Transit, Railroad, Parking Garages, Refuse Collection, Storm Water and Sewer. Enterprise systems are typically subject to the laws of supply and demand, and managers of enterprise programs who raise user fees or rates may find that revenues actually decrease because customers limit their consumption or decrease the use of the service.

Profit and loss data may not tell the entire picture about the operation. This indicator provides additional analysis of the "financial health" of the operation. Changes in working capital (current assets minus current liabilities) provide an additional measurement of the financial condition and helps assess the ability of the operation to generate funding for capital outlay and improvements.

Analysis:

The Railroad operation has a significant amount of infrastructure. However, the operation does not generate enough working capital to adequately fund infrastructure replacement. The City established a coal surcharge the Electric utility pays which generates some funding for infrastructure replacement; however more funding is needed on an annual basis. Therefore, this indicator exhibits a warning trend that needs to be closely monitored in the future.

Changes in working capital (current assets minus current liabilities) provide an additional measurement of the financial condition and helps assess the ability of the operation to generate funding for capital outlay and improvements.

Analysis:

The Water and Electric utility has experienced an overall increase in working capital for the ten year period shown; therefore there is no warning trend for this indicator. It is important for the utility to have a strong working capital position in order to have funding to maintain the extensive infrastructure of the utility. Water and Light is considering a formal cash reserve policy which would place the reserve at 25% because of the capital intensive nature of the operations, however, the policy has not been finalized or approved at this time. This higher level utilizes a utility basis approach and is widely used in the electric industry and is part of course work provided by the American Public Power Association. Management adjusts rates to ensure the cost of providing the service is recovered as well as debt payments for voter approved capital improvements.

Enterprise systems are typically subject to the laws of supply and demand, and managers of enterprise programs who raise user fees or rates may find that revenues actually decrease because customers limit their consumption or decrease the use of the service.

Profit and loss data may not tell the entire picture about the operation. This indicator provides additional analysis of the "financial health" of the operation. Changes in working capital (current assets minus current liabilities) provide an additional measurement of the financial condition and helps assess the ability of the operation to generate funding for capital outlay and improvements.

Analysis:

Sewer's operating position remains relatively stable with slight fluctuations from year to year. The Waste water treatment plant expansion has had a major impact on Sewer's operating position. The project was approved by voter's in the FY 2008 ballot issue. Rates are adjusted annually to cover the cost of providing the service as well as debt payments on voter approved capital projects. There have been increases in the working capital for the past three years. Therefore, there are no warning trends observed with this indicator.

Enterprise Operating

Position: Solid Waste

Warning Trend:

Reduction in working capital (constant dollars)

Formulation:

Working Capital in Constant Dollars

Fiscal Year	Solid Waste Working Capital*	CPI	Working Capital (Constant Dollars)
2003	\$1,644,855	184.00	\$893,943
2004	\$3,808,643	188.90	\$2,016,222
2005	\$2,944,330	195.30	\$1,507,593
2006	\$3,774,345	201.60	\$1,872,195
2007	\$4,992,860	207.30	\$2,408,519
2008	\$5,459,259	215.30	\$2,535,617
2009	\$4,966,240	214.54	\$2,314,864
2010	\$6,707,191	218.06	\$3,075,903
2011	\$5,475,693	224.94	\$2,434,301
2012	\$7,285,970	229.59	\$3,173,470

*Working Capital: Current Assets less Current Liabilities

Description:

Enterprise fund programs that exist in the City of Columbia include: Water, Electric, Recreation Services, Airport, Transit, Railroad, Parking Garages, Refuse Collection, Storm Water and Sewer. Enterprise systems are typically subject to the laws of supply and demand, and managers of enterprise programs who raise user fees or rates may find that revenues actually decrease because customers limit their consumption or decrease the use of the service.

Profit and loss data may not tell the entire picture about the operation. This indicator provides additional analysis of the "financial health" of the operation. Changes in working capital (current assets minus current liabilities) provide an additional measurement of the financial condition and helps assess the ability of the operation to generate funding for capital outlay and improvements.

Analysis:

Solid waste has maintained a strong operating position over the ten year period shown. This has permitted the utility to expand the landfill operation center, establish a bioreactor program and construct a new fueling station. The utility was able to secure grant funding for new sustainability programs during FY 2009 and FY 2010 which had a positive impact on working capital. Unlike the other utilities, capital projects must be funded from operations, so a strong working capital position is important.

2012	\$1,098,574	229.59	\$478,494

*Working Capital: Current Assets less Current Liabilities

Description:

Enterprise fund programs that exist in the City of Columbia include: Water, Electric, Recreation Services, Airport, Transit, Railroad, Parking Garages, Refuse Collection, Storm Water and Sewer. Enterprise systems are typically subject to the laws of supply and demand, and managers of enterprise programs who raise user fees or rates may find that revenues actually decrease because customers limit their consumption or decrease the use of the service.

Profit and loss data may not tell the entire picture about the operation. This indicator provides additional analysis of the "financial health" of the operation. Changes in working capital (current assets minus current liabilities) provide an additional measurement of the financial condition and help assess the ability of the operation to generate funding for capital outlay and improvements.

Analysis:

The storm water utility has struggled over the ten year span. Operations were funded by fees approved by voters in April 1993, which included development charges on new construction and existing improved properties. Funding has been minimal due to a slowing economy and a reduction in new construction. The infrastructure for this utility is significant. There are a large number of underground pipes that have reached the end of their useful life. Some have been in place far beyond their useful life and have failed, requiring emergency contracts to repair them. There is a huge list of infrastructure replacement needs and not enough funding to replace them.

There is a significant warning trend observed with this indicator because of the large amount of funding needed for infrastructure replacement and the working capital not be sufficient to fund those replacements. Management will need to develop a solution in the near future to increase the funding available to meet the needs of this utility.

Fund Balance: General Fund

Warning Trend:

Declining unreserved fund balance of general fund as a percent of net operating revenues

Formulation:

$$\frac{\text{General Fund Unreserved Fund Balance}}{\text{Operating Revenues}}$$

Fiscal Year	General Fund Unreserved/ Undesignated Fund Balance	Operating Revenues *	Fund Balance As A Percent Of Revenues
2003	\$11,489,854	\$54,210,002	21.2%
2004	\$12,149,115	\$58,238,591	20.9%
2005	\$11,522,093	\$60,917,104	18.9%
2006	\$12,953,572	\$66,716,295	19.4%
2007	\$11,242,815	\$70,693,991	15.9%
2008	\$16,078,993	\$78,898,068	20.4%
2009	\$17,154,195	\$77,275,976	22.2%
2010	\$18,759,242	\$79,023,392	23.7%
2011	\$23,660,321	\$79,689,322	29.7%
2012	\$25,955,804	\$79,233,087	32.8%

Note:

* Operating Revenues = General Fund Revenues + Operating Transfers from Other Funds + Increase in Obligations Under Capital Leases + Appropriated Fund Balance

Description:

Most communities maintain some type of reserves in order to meet unforeseen contingencies. There exist no set rules for determining at what levels these reserves should be maintained. Much depends on such factors as the kind of natural disasters or hardships the City is subject to, the flexibility of the City's revenue base, national economic conditions, and the City's overall financial health.

In evaluating the desirable, or prudent, level at which reserves should be maintained to ensure sufficient flexibility to meet special needs the following should be considered:

1. What is the potential for revenue deficits?
2. What is the degree of reliance on intergovernmental revenues and the likelihood of significant portions of these revenues being discontinued in the short-run?
3. What type of insurance program does the City have?
4. What kind of losses are likely from natural disasters that would be ineligible for federal and state aid?
5. What is the City's short-term and long-term borrowing capability?
6. How much liquidity exists in City funds (see General Fund Liquidity indicator)?

Analysis:

The Council has recently adopted a minimum fund balance percentage requirement of 20% for the General Fund. Prior to that time, the minimum fund balance percentage requirement was 16%. FY 2005 to FY 2007 are the only years the fund balance percentage was lower than the new 20% requirement. FY 2011 and FY 2012 are significantly above the minimum requirement; therefore, there is no warning trend observed with this indicator.

2009	\$29,728,463	\$4,107,855	7.24
2010	\$31,739,450	\$5,685,015	5.58
2011	\$32,619,706	\$5,122,677	6.37
2012	\$33,661,252	\$4,252,393	7.92

* Applicable Receivables: Accounts Receivable, Net Taxes Receivable, Grants Receivable, Accrued Interest, Due from Other Funds, and Loans Receivable (less inventory and prepaid expenses)

Description:

A good measure of a city's short-run financial condition is its cash position. "Cash position" includes cash, marketable securities, as well as other assets that can quickly be converted into cash. The level of such assets is referred to as liquidity. Liquidity is a measure of a City's ability to pay its short-term obligations. The immediate effect of insufficient liquidity is inability to pay bills in a timely manner. This can jeopardize the City's relationship with its vendors and can reduce the effectiveness and savings of the competitive bidding process associated with purchasing.

Low or steadily declining liquidity can indicate that the city has, or is, overextending itself in the long run. The first sign of a liquidity problem is a cash shortage. A standard ratio of liquidity used to analyze commercial entities is the quick ratio, or "acid test," that is, cash, marketable securities, and accounts receivable (within 30 days) divided by current liabilities. If the ratio is approaching one, or less than one, the commercial entity is considered to be facing liquidity problems.

Credit Industry Benchmarks:

If the ratio is less than one, it is considered to be a negative factor, but would be mitigated if a prior trend of three years or more indicates that the ratio will exceed one in the following year. A three-year trend of less than one would be considered a negative factor.

Analysis:

The General Fund liquidity ratio has been well over the 1.00 benchmark for the past ten years. There is no warning trend for this indicator.

Analysis:

The City of Columbia's Parking Utility fund liquidity ratio has been well above 1.00 for nine of the past ten years. The FY 2012 liquidity ratio fell below the industry benchmark due to an increase in cash used for the Short Street garage project coupled with unearned revenue for future rent payments by REDI. One year below the benchmark is not a warning trend for this indicator, however, management will need to keep a close eye on parking activities.

Debt Structure Indicators

Debt is an effective way to finance capital improvements to even out short-term revenue flows, but its misuse can cause serious financial problems.

Debt structure is important to analyze because debt is an explicit expenditure obligation that must be satisfied when due. Debt is an effective and logical method of financing capital improvements, but its misuse can cause serious financial problems. Even a temporary inability to repay can result in loss of credit rating, increased cost of future borrowing, and loss of autonomy to the state and regulatory bodies.

The most common forms of long-term debt are general obligation and revenue bonds. Even when these types of debt are used exclusively for capital projects, cities need to be careful that their outstanding debt does not exceed their ability to repay as measured by the wealth of the community in the form of property value or personal or business income. Another way to evaluate ability to repay is to consider the amount of principal and interest of debt service that the City is obligated to repay each year.

Under the most favorable circumstances, a city's debt would remain proportionate to its size and tax base; would not extend past the useful life of the facilities which it finances; would not be used as an instrument to balance the operating budget; would not require a repayment schedule that would be an excessive burden on operating expenditures; and would not be at a point which would jeopardize the city's credit rating.

An examination of the debt trends can reveal the following:

- Inadequacies in cash management procedures or expenditure controls
- Increasing reliance on long-term debt
- Decreasing expenditure flexibility (due to increased fixed costs in the form of debt services)
- Use of short-term debt to finance current operations
- Sudden large increases or decreases in future debt service
- The amount of additional debt that the community can absorb.

Changes in the debt structure can be monitored by using the following indicators:

- Current Liabilities: General Fund
- Current Liabilities: Water and Electric
- Current Liabilities: Sewer
- Current Liabilities: Storm Water
- Current Liabilities: Solid Waste
- Current Liabilities: Parking
- Debt Service: Water and Electric
- Debt Service: Sewer
- Debt Service: Parking

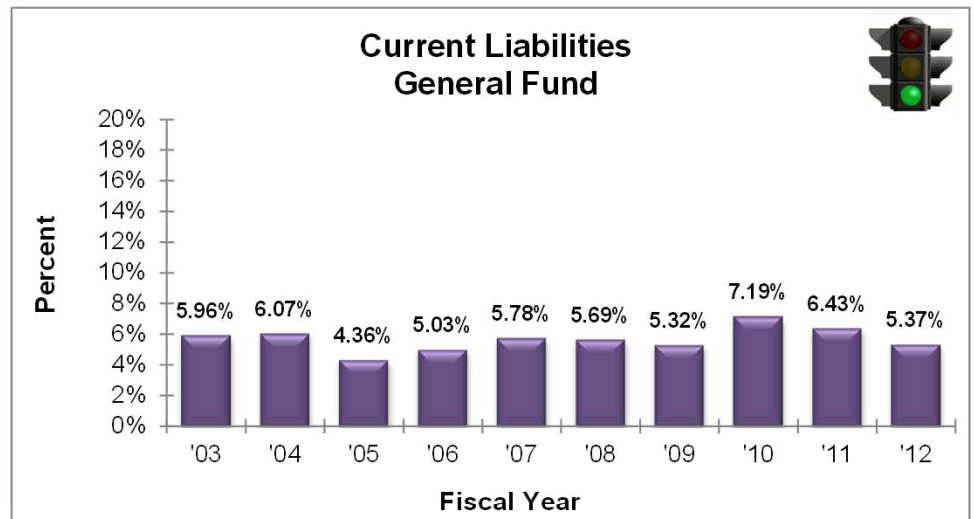

Current Liabilities: General Fund

Warning Trend:

Increasing Current Liabilities as a Percent of Operating Revenues

Formulation:

$$\frac{\text{Current Liabilities}}{\text{Operating Revenues}}$$

Fiscal Year	Current Liabilities	Operating Revenues *	Current Liabilities As A Percentage Of Operating Revenues
2003	\$3,232,139	\$54,210,002	5.96%
2004	\$3,532,872	\$58,238,591	6.07%

* Operating Revenues: General Fund Revenues plus Operating Transfers from Other Funds and Appropriated Fund Balance

Description:

Current liabilities are defined as the sum of all liabilities which come due within a one-year period. Current liabilities could include short-term debt, the current portion of long-term debt, accounts payable, accrued payroll and other current liabilities.

Analysis:

Current liabilities as a percentage of operating revenues have remained below 7.5% for the ten year period shown. Although FY 2010 increased to 7.19% it still falls below 7.5% with FY 2011 and FY 2012 showing decreasing amounts. There is no debt obligation outstanding for the general fund. There is no warning trend observed for this indicator.

2010	\$131,031	\$2,716,925	4.82%
2011	\$207,854	\$2,548,364	8.16%
2012	\$679,926	\$3,208,335	21.19%

* Operating Revenues: Operating, investment, and miscellaneous revenues and transfers

Description:

Current liabilities are defined as the sum of all liabilities which come due within a one-year period. Current liabilities could include short-term debt, the current portion of long-term debt, accounts payable, accrued payroll and other current liabilities.

Analysis:

The percent of current liabilities to operating revenues has been below 10% for all ten years except for FY 2008 and FY 2012. There was a significant increase in the percent from FY 2011 to FY 2012 based on unearned revenue for future rent from REDI which increased parking's liability. Close monitoring of this indicator is occurring. A rate increase that started in FY 2011 should generate \$700,000 additional funding annually which will help the City's ability to pay its short-term liabilities.

* Debt Services - principal and interest payment.

** Net Operating revenues include operating, investment and miscellaneous revenue

Description:

Debt service is the amount of principal and interest that a local government must pay each year on long term debt plus any interest on short-term debt. Debt service can be a major part of a government's fixed costs and an increase may indicate excessive debt and create financial strain.

Credit Industry Benchmarks:

Debt service exceeding 20% of operating revenues is considered a potential problem. Ten percent is considered acceptable.

Analysis:

Over the ten year period shown, the Water and Electric fund's debt service percentage has consistently been well below the credit industry benchmark of 20%.

* Debt Services - current principal and interest payment.

** Net Operating revenues include Operating Revenues plus Intergovernmental Revenues

Description:

Debt service is the amount of principal and interest that a local government must pay each year on long term debt plus any interest on short-term debt. Debt service can be a major part of a government's fixed costs and its increase may indicate excessive debt and create financial strain.

Credit Industry Benchmarks:

Debt service exceeding 20% of operating revenues is considered a potential problem. Ten percent is considered acceptable.

Analysis:

Since FY 2006, debt service as a percentage of net operating revenues has been above the 20% credit industry benchmark. Management is aware of this issue and has responded with a parking rate increase. This increase took effect in July, 2011 and it is estimated to generate \$700,000 per year. This will help to lower this percentage in future years. Management will continue to closely monitor this indicator.

Unfunded Liability Indicators

An unfunded liability is a liability that has been incurred during the current or a prior year that does not have to be paid until a future year, and for which reserves have not been set aside. It is similar to long-term debt in that it represents a legal commitment to pay at some time in the future. Due to their potential magnitude, if these types of obligations are permitted to grow over a long period of time, they can have a substantial affect on a city's financial condition.

Most unfunded liabilities have significant potential to affect a local government's financial condition because:

1. They do not show up in ordinary records in any way, making it difficult to assess their impact
2. They build up gradually over time, and it is not easy to notice them until they become severe

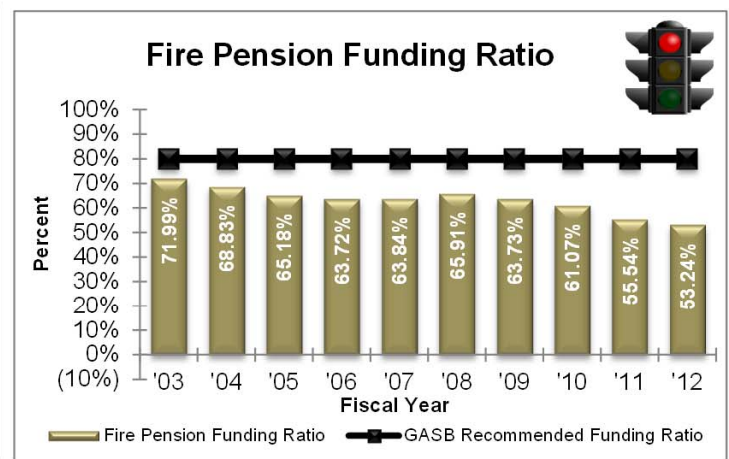

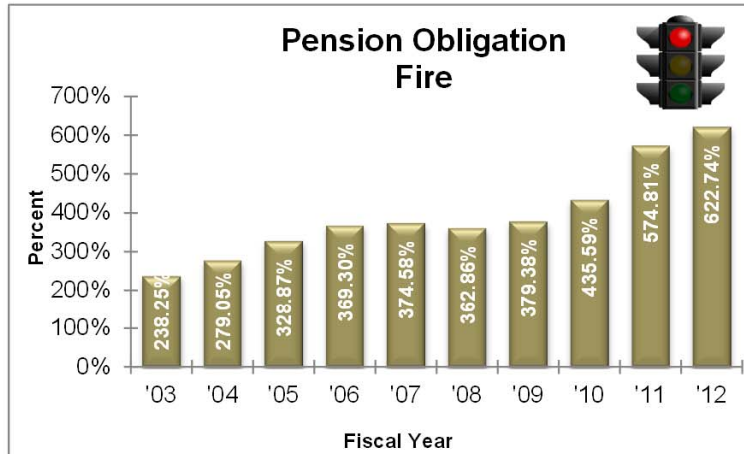

An analysis of a government's unfunded liabilities can answer the following questions:

- Is the pension liability increasing? How fast is it growing? how much is unfunded?
- Are pension contributions, pension system assets, and investment earnings keeping pace with the growth in benefits?
- Is the amount of unused vacation and sick leave per employee increasing?
- Are policies for the payment of unused vacation and sick leave realistic compared to the government's ability to pay?
- Are the costs of future insurance premiums for retirees a significant obligation for the local government?

Changes in the unfunded liabilities can be monitored by using the following indicators:

- Pension Obligations: Fire (General Fund)
- Pension Obligations: Police (General Fund)
- Pension Obligations: LAGERS (All Funds)
- Pension Assets: Fire
- Pension Assets: Police
- Pension Assets: LAGERS
- Post Employment Benefits: General Fund
- Post Employment Benefits: All Other Funds

Pension Obligations: Fire (General Fund)

*Pension obligation: Unfunded actuarial accrued liability

** Funding ratio is the actuarial value of pension plan resources as a percentage of actuarial accrued liability

*** ARC: Annual required contribution: includes both the cost of pension benefits earned by employees during the current period and an additional amount designed to amortize the unfunded actuarial accrued liability over a period not to exceed 30 years.

Description:

Pension plans represent a significant expenditure obligation for local governments. Generally accepted accounting principles (GAAP) require that the cost of defined benefit pension plans be accrued as an expense by employers, regardless of whether the employer funds the full obligation. The present value of the projected cost of pension benefits earned by employees is referred to as the "actuarial accrued liability." The difference between the projected cost and the value of the resources of the pension is the "unfunded actuarial accrued liability." The annual required contribution (ARC) is an actuarially determined cost that includes both the cost of pension benefits earned by employees during the current period and an additional amount designed to amortize the unfunded actuarial accrued liability over time. The funding ratio expresses the actuarial value of pension plan resources as a percentage of the actuarial accrued liability. The Governmental Accounting Standards Board (GASB) recommends a funding ratio of 80%.

Analysis:

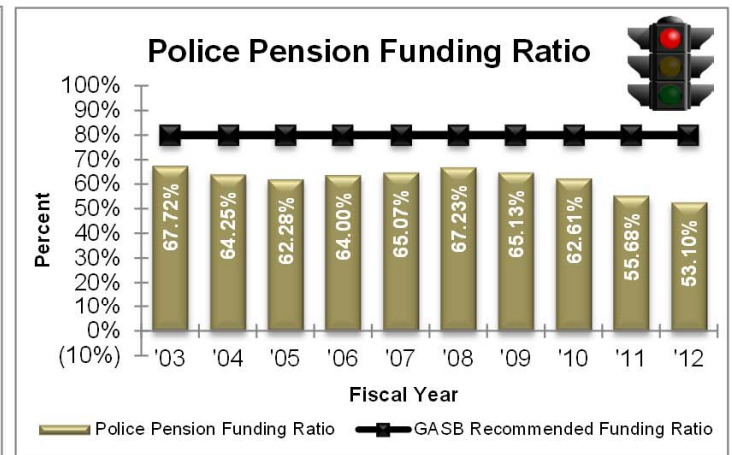

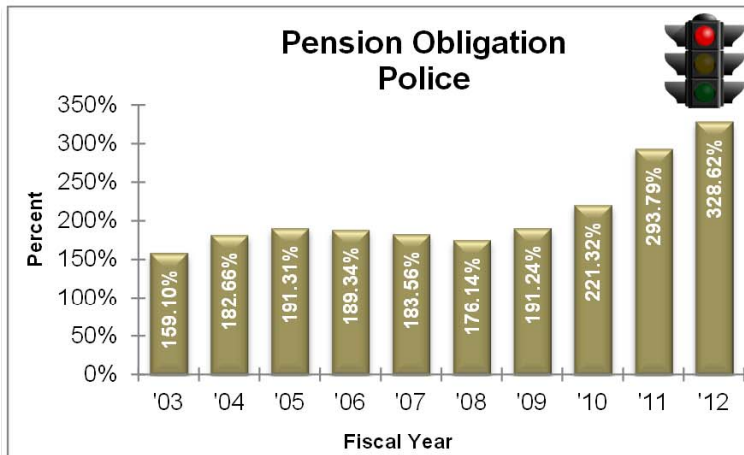

The cost to fund the fire pension has increased significantly over the past several years due to a combination of pension plan changes and interest earned on pension assets decreasing due to the economic downturn. Management has responded to this situation by establishing a task force and the solution involves placing all personnel hired on or after October 1, 2012 into a different pension plan. The city should begin to see decreases in the unfunded liability, but this will occur slowly.

The funding ratio has been below the GASB recommended level for all ten years. Changes mentioned above will help to raise the funding ratio to the GASB recommended level in the future. The City has fully funded the annual required contribution (ARC) for all years shown.

*Pension obligation: Unfunded actuarial accrued liability

** Funding ratio is the actuarial value of pension plan resources as a percentage of actuarial accrued liability

*** ARC: Annual required contribution: includes both the cost of pension benefits earned by employees during the current period and an additional amount designed to amortize the unfunded actuarial accrued liability over a period not to exceed 30 years.

Description:

Pension plans represent a significant expenditure obligation for local governments. Generally accepted accounting principles (GAAP) require that the cost of defined benefit pension plans be accrued as an expense by employers, regardless of whether the employer funds the full obligation. The present value of the projected cost of pension benefits earned by employees is referred to as the "actuarial accrued liability." The difference between the projected cost and the value of the resources of the pension is the "unfunded actuarial accrued liability." The annual required contribution (ARC) is an actuarially determined cost that includes both the cost of pension benefits earned by employees during the current period and an additional amount designed to amortize the unfunded actuarial accrued liability over time. The funding ratio expresses the actuarial value of pension plan resources as a percentage of the actuarial accrued liability. The Governmental Accounting Standards Board (GASB) recommends a funding ratio of 80%.

Analysis:

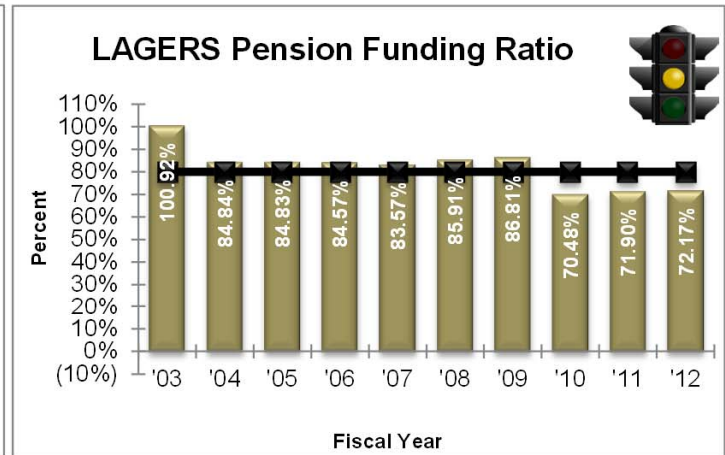

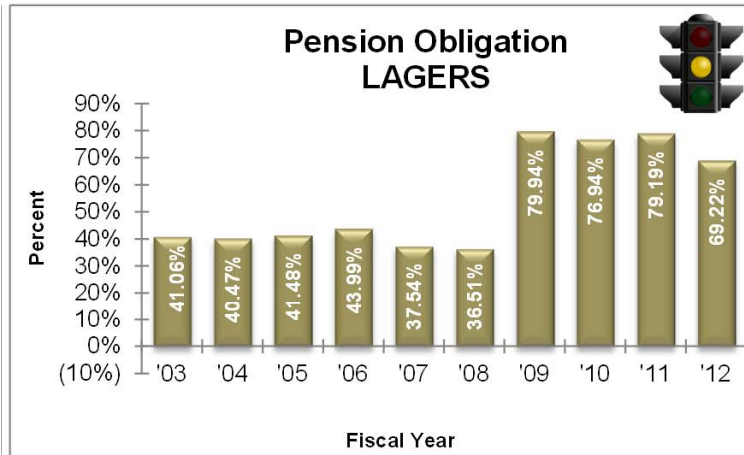

The cost to fund the police pension has increased significantly over the past several years and is largely due to a decrease in the interest earned on pension assets that was due to the economic downturn. Management has responded to this situation by establishing a task force and the solution involves placing all personnel hired on or after October 1, 2012 into a different pension plan. The city should begin to see decreases in the unfunded liability, but this will occur slowly.

The funding ratio has been below the GASB recommended level for all ten years. Changes mentioned above will help to raise the funding ratio to the GASB recommended level in the future. The City has fully funded the annual required contribution (ARC) for all years shown.

2012	\$30,322,532	\$43,809,004	69.22%	90,666,624	120,989,156	72.17%	100%

*Pension obligation: Unfunded actuarial accrued liability

** Funding ratio is the actuarial value of pension plan resources as a percentage of actuarial accrued liability

*** ARC: Annual required contribution: includes both the cost of pension benefits earned by employees during the current period and an additional amount designed to amortize the unfunded actuarial accrued liability over a period not to exceed 30 years.

Description:

Pension plans represent a significant expenditure obligation for local governments. Generally accepted accounting principles (GAAP) require that the cost of defined benefit pension plans be accrued as an expense by employers, regardless of whether the employer funds the full obligation. The present value of the projected cost of pension benefits earned by employees is referred to as the "actuarial accrued liability." The difference between the projected cost and the value of the resources of the pension is the "unfunded actuarial accrued liability." The annual required contribution (ARC) is an actuarially determined cost that includes both the cost of pension benefits earned by employees during the current period and an additional amount designed to amortize the unfunded actuarial accrued liability over time. The funding ratio expresses the actuarial value of pension plan resources as a percentage of the actuarial accrued liability. The Governmental Accounting Standards Board (GASB) recommends a funding ratio of 80%.

Analysis:

In 2003 the actuarial entry age changed substantially as the city changed its plan from LT10 to L-6 which increased the city's cost to the pension plan. In FY 2009 the value of the assets dropped substantially causing a large increase to the unfunded accrued liability amount. Pension costs have been and will continue to be closely monitored by City management. A decision was made to place all personnel hired on or after October 1, 2012 into a plan that requires increased years of service in order to collect full retirement benefits. The city should begin to see slight decreases in the unfunded liability amount.

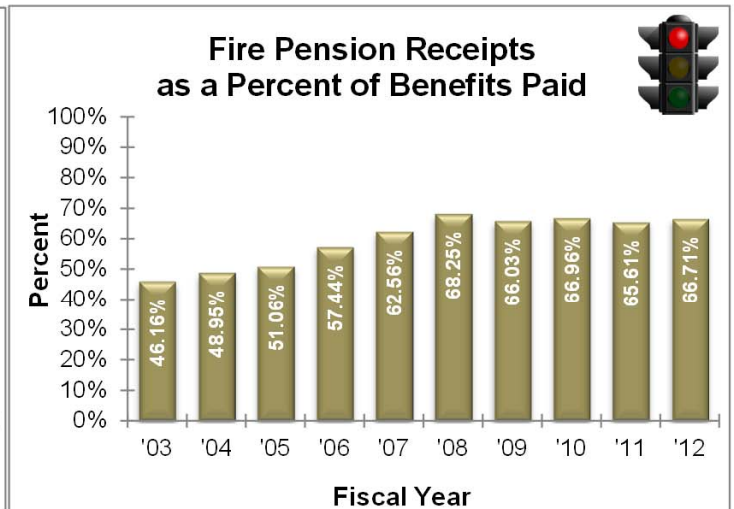

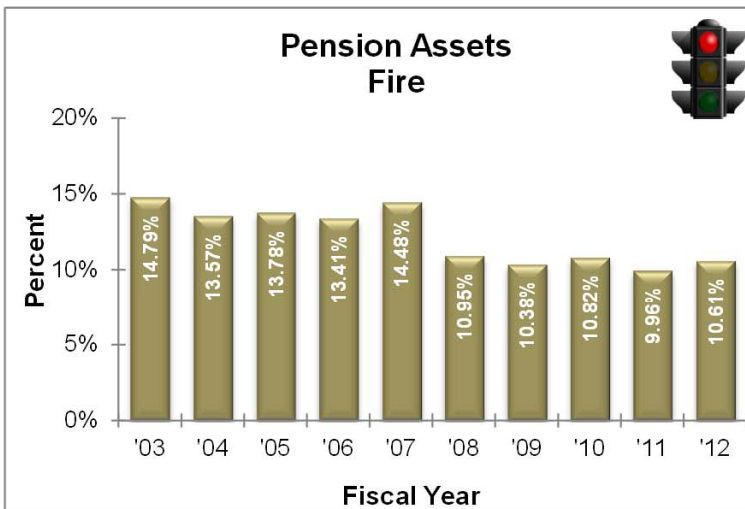

The funding ratio was above the GASB recommended level from FY 2003 to FY 2009. It has been below the recommended level for the past three years. Changes mentioned above will help to raise the City's funding ratio back up to the GASB recommended level in the future. The City has fully funded the annual required contribution (ARC) for all years shown.

*Pension benefits: benefits paid to retirees

Description:

A pension plan's assets are held primarily as cash or investments. A decline in the ratio of plan assets to benefits is a warning trend that needs to be monitored. An additional ratio to consider is the annual amount of pension receipts as a percentage of annual benefits paid, which focuses more specifically on a pension plan's ability to meet its current cash obligations.

Analysis:

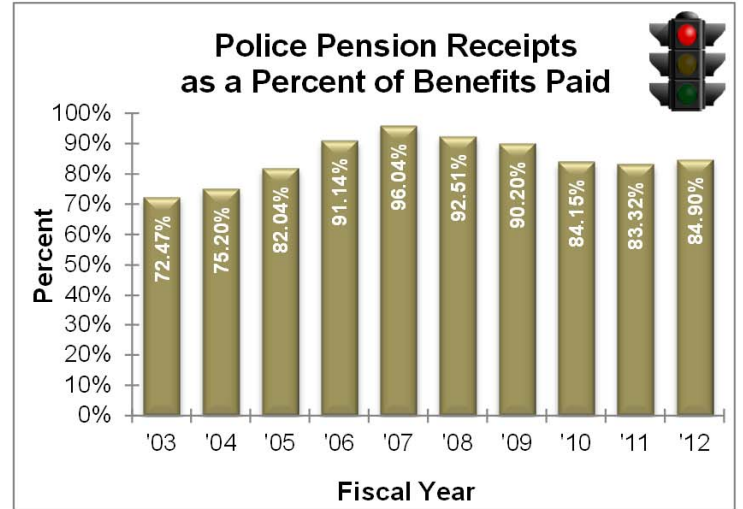

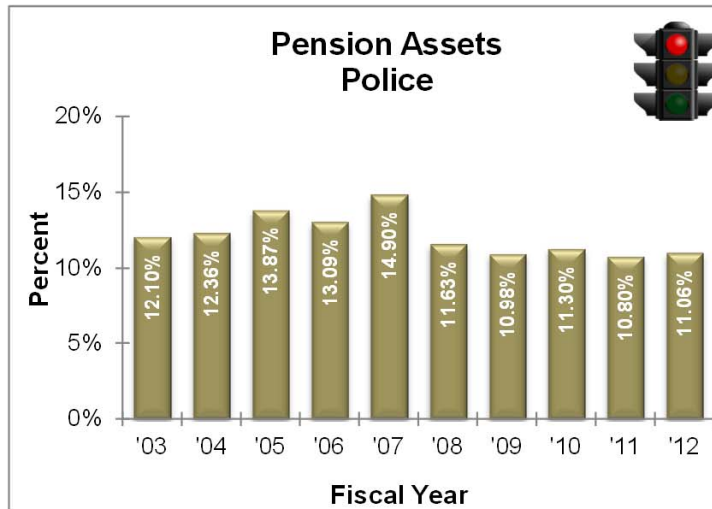

Both police and fire pensions have been closely monitored for several years. Although the trends are decreasing, the city has already taken steps to begin addressing the problem. In FY 2012 city staff, city management and a task force appointed by the mayor worked together to develop a plan to reduce the city's pension liability. All new hires from October 1, 2012 will be placed into a new retirement plan that will require an increase in length of service.

*Pension benefits: benefits paid to retirees

Description:

A pension plan's assets are held primarily as cash or investments. A decline in the ratio of plan assets to benefits is a warning trend that needs to be monitored. An additional ratio to consider is the annual amount of pension receipts as a percentage of annual benefits paid, which focuses more specifically on a pension plan's ability to meet its current cash obligations.

Analysis:

There has been a decrease in the pension assets as well as the percent of assets to benefits paid which is primarily attributed to the economic downturn that decreased the interest earned on pension assets. The City has developed a plan to decrease our liability. New employees will be placed in a different pension plan that does not include the ability to retire when the years of service and employee's age is equal to 80.

Post Employment Benefits: General Fund

Warning Trend:

Increasing post employment benefits liability per municipal employee

Formulation:

$$\frac{\text{Total liability for post employment benefits}}{\text{Number of Municipal Employees}}$$

Fiscal Year	Total Liability for Post Employment Benefits*	Number of General Fund Employees	Total Post Employment Liability Per Employee
2003	\$1,692,513	583.48	\$2,901
2004	\$1,778,091	594.18	\$2,993
2005	\$1,857,376	605.03	\$3,070
2006	\$1,864,558	618.58	\$3,014
2007	\$2,040,365	632.04	\$3,228
2008	\$5,084,759	644.49	\$7,890
2009	\$4,533,144	656.10	\$6,909
2010	\$4,215,401	668.55	\$6,305
2011	\$4,388,703	662.48	\$6,625
2012	\$4,466,853	669.40	\$6,673

*Total liability for post employment benefits includes: unused sick leave, unused vacation leave, unused floating holidays and the unfunded liability for retiree health insurance. At the time of production the OPEB report was not finalized so 2011 numbers were used.

Description:

Local governments usually allow their employees to accumulate some portion of unused sick leave and vacation to be paid at termination or retirement. Although "leave" benefits initially represent only the opportunity costs of not having work performed, these benefits become a real cost when employees are actually paid for their accumulated leave, either during their employment or at termination or retirement.

Analysis:

The cost per employee was relatively stable prior to FY 2008 when GASB required all municipalities to provide and account for the cost of the unfunded liability for retiree health insurance. The City does have a sick leave buyback program which allows employees to sell back unused sick leave hours above 1,040 (required to maintain) up to a maximum of 144 hours per year at 50% of their salary. At retirement, employees can sell unused sick leave at \$2/hour which is put into an HSA type account and can be used by the retiree to pay insurance premiums. All employees (except unclassified employees) have a maximum number of unused vacation hours they can carry over from year to year and this number is dependent upon the years of service the employee has. Upon retirement or termination from the City the employee can be paid for unused vacation hours. Management has set aside funds in the General Fund to pay the portion of this liability that is realized each year as employees retire. The retiree portion of this liability will be eliminated when the City stops subsidizing retiree health care premiums in FY 2014. This monitor should be closely monitored in the future to ensure the liability does not become too large a cost to the City.

(THIS PAGE INTENTIONALLY LEFT BLANK)

Condition of Capital Plant Indicators

The bulk of a city's wealth is invested in its physical assets such as streets, buildings, utility networks and equipment. If these assets are not properly maintained or are allowed to become obsolete, the results can include a decrease in the usefulness of the assets, a decline in personnel productivity, or an increase in eventual maintenance and replacing costs. Ultimately, this can cause a decline in the attractiveness of the City as a place to live and do business.

Maintenance and replacement is often deferred because it is a relatively painless temporarily way to reduce expenditures and ease financial strain. If deferral is continued, however, it can create serious problems that become exaggerated because of the size of the investment that capital facilities represent. Some of the problems associated with deferred maintenance are:

- Creation of safety hazards and other liability exposures that may result
- Reduction in the residential and business property value
- Decreased efficiency of equipment and personnel
- An increase in the eventual cost of bringing the facility up to acceptable standards that would occur, i.e. if the capping of a street were put off so long that the street had to be completely restructured
- Potential for creating an unfunded liability in the form of a maintenance and replacement backlog
- Costs will increase in the long run due to inflationary pressures, especially construction costs.

The condition of capital plant is difficult to monitor because few local governments maintain comprehensive, centralized records of fixed assets apart from enterprise funds. Nevertheless, changes in condition of capital plant can be monitored to a certain extent using the following indicators:

- Maintenance Effort: Streets and Sidewalks
- Maintenance Effort: Electric Utility
- Maintenance Effort: Water Utility
- Capital Outlay: General Fund
- Capital Outlay: Water and Electric
- Capital Outlay: Sewer
- Capital Outlay: Solid Waste
- Capital Outlay: Storm Water

Maintenance Effort: Streets and Sidewalks

Warning Trend:

Declining levels of expenditures for maintenance of streets and sidewalks

Formulation:

$$\frac{\text{Maintenance Expenditures for Streets}}{\text{Number of Miles of Streets}}$$

Fiscal Year	Maintenance Expenditures Streets & Sidewalks	CPI	Constant Dollar Expenditures	Number Of Street Miles *	Maintenance Expend. Per Mile Of Street in Constant Dollars
2003	\$2,931,440	184.00	\$1,593,174	330.10	\$4,826
2004	\$3,508,103	188.90	\$1,857,122	371.44	\$5,000
2005	\$4,356,869	195.30	\$2,230,860	390.50	\$5,713
2006	\$4,128,593	201.60	\$2,047,913	399.00	\$5,133
2007	\$4,726,116	207.30	\$2,279,844	426.00	\$5,352
2008	\$4,918,815	215.30	\$2,284,601	450.67	\$5,069

2012	\$5,885,474	229.59	\$2,563,471	507.30	\$5,053

* Street Miles: Improved Streets.

Description:

The condition of a city's long-lived assets such as its streets, sidewalks and bridges is significant because of their tremendous costs and the far-reaching implications should they be allowed to decline. The decline of these assets may affect business activity, property value and operating expenditures. Deferral of maintenance on the assets and their subsequent erosion can also create a significant unfunded liability.

Over the long run, maintenance expenditures should remain relatively stable in relation to the amount of assets to be maintained. If in the long run, the ratio between maintenance expenditures and the amount of assets appears to be declining, it may be a sign that the City is deteriorating and maintenance costs are being deferred to a future period when costs will be significantly higher.

Analysis:

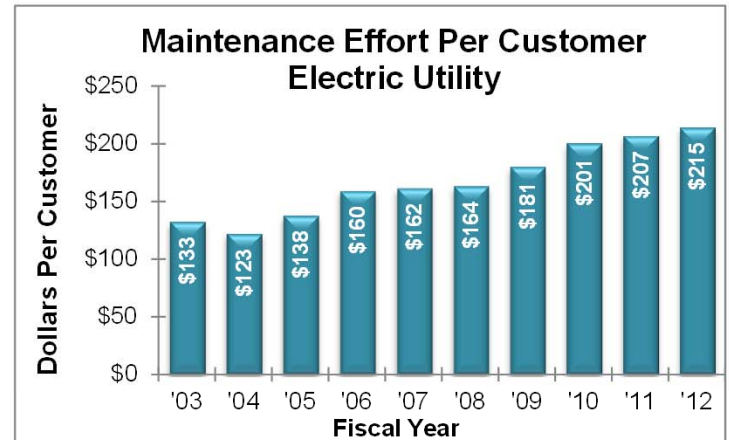

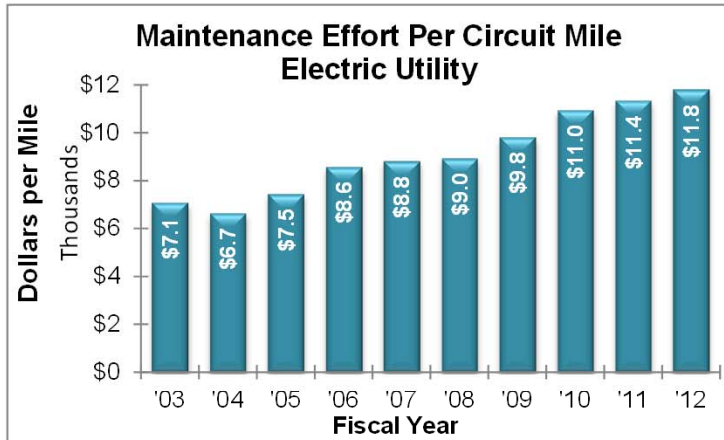

For the period shown, maintenance expenditures per mile of street in constant dollar have remained relatively stable. However, there is not adequate funding available for street maintenance. It has been estimated that at current funding levels, it would take 57 years to resurface every road in the City. In citizen surveys, the citizens have expressed their dissatisfaction with the condition of streets. Management needs to find additional revenue sources that can be used to increase the funding available for street maintenance.

	2012	\$9,892,966	836	46,100	\$11,834	\$215

*O & M - Operations and Maintenance for Transmission and Distribution

Description:

The condition of the City's Electric utilities assets is significant because of the tremendous cost associated with system repair and replacement. Deferral of essential repairs and maintenance to these assets and their subsequent deterioration can create a significant unfunded liability for the utilities.

Over the long run, maintenance expenses will likely remain constant, but vary up and down from year to year. If the ratio between maintenance expenses and number of customers or miles is declining in the long run, it may be a sign that the utility's assets are beginning to deteriorate and the utility is not keeping pace with the maintenance needed.

If maintenance expenses are being deferred to a future time, then maintenance costs will increase because of inflationary pressures and more advanced asset deterioration which requires more extensive repairs.

Analysis:

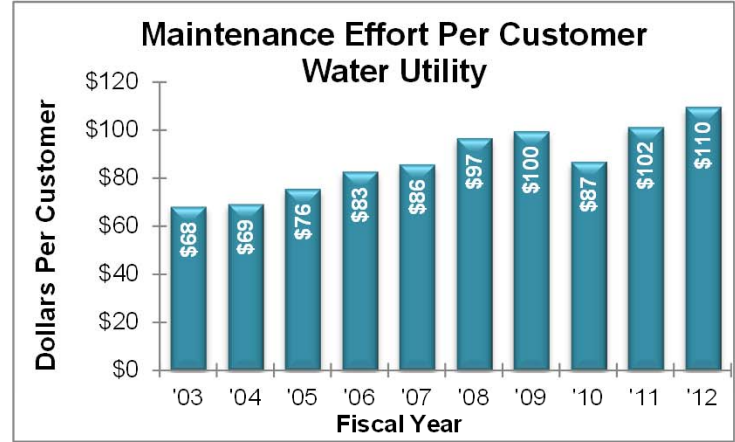

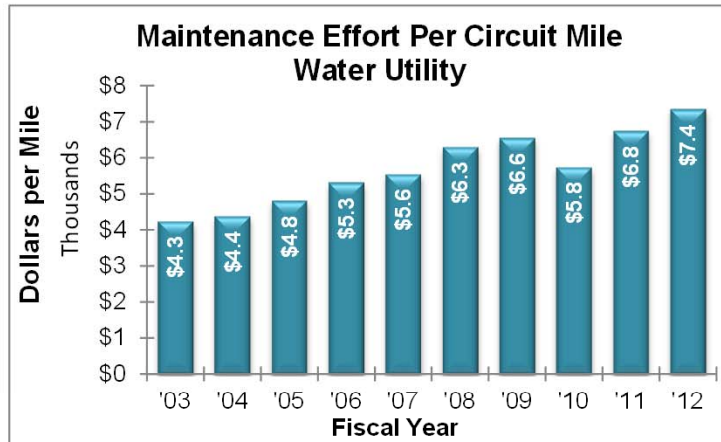

There have been increases in both the maintenance effort per circuit mile and the maintenance effort per customer for the ten year period shown. The City has a high reliability rate with its electric service to customers. There are no warning trends observed with this indicator.

*O & M - Operations and Maintenance for Transmission and Distribution

Description:

The condition of the City's Water utilities assets is significant because of the tremendous cost associated with system repair and replacement. Deferral of essential repairs and maintenance to these assets and their subsequent deterioration can create a significant unfunded liability for the utilities.

Over the long run, maintenance expenses will likely remain constant, but vary up and down from year to year. If the ratio between maintenance expenses and number of customers or miles is declining in the long run, it may be a sign that the utility's assets are beginning to deteriorate and the utility is not keeping pace with the maintenance needed.

If maintenance expenses are being deferred to a future time, then maintenance costs will increase because of inflationary pressures and more advanced asset deterioration which requires more extensive repairs.

Analysis:

There has been an overall increase in the maintenance effort per circuit mile and the maintenance effort per customer for the ten year period shown. There are no warning trends observed with this indicator.

Sources:

- Circuit miles and number of customers provided by the Water and Electric Department
- City of Columbia Financial Management Information Supplement - FMIS

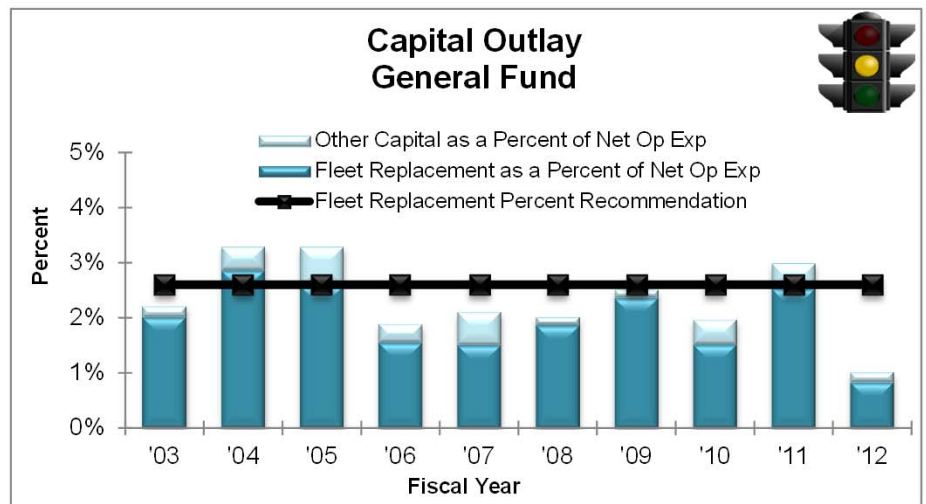

Capital Outlay: General Fund

Warning Trend:

A three or more year decline in capital outlay from operating funds as a percentage of net operating expenditures

Formulation:

* Net operating expenditures include operating expenditures and transfers to other funds.

Description:

The expenditure for operating equipment purchased from the operating budget is usually referred to as capital outlay. Capital outlays refer to equipment with an estimated useful life in excess of one year and an initial cost of a minimum of \$5,000. Capital outlay does not include capital budget expenditures for construction of capital facilities such as streets or bridges as those are classified as capital projects.

The purpose of capital outlay in the operating budget is to replace worn-out equipment or add new equipment to enhance operations on a regular basis. The level of capital outlay is a rough indicator of whether or not the City's stock of equipment is being maintained in good condition. However, this does not account for the adequacy of routine repair and maintenance. Over a number of years, the relationship between capital outlay needs and operating expenditures should remain about the same.

If the ratio is declining in the short-run (one to three years), it could mean that the City's needs have temporarily been satisfied since most equipment lasts more than one year. If the decline persists for more than three (3) years, it may indicate that capital outlays are being deferred. Such a practice can result in the use of obsolete or inefficient equipment and the creation of future unfunded liabilities.

Analysis:

Given the type, replacement schedule and replacement cost of rolling stock in the General Fund, a recommended level of replacement would be 2.6% of net operating expenditures. During FY 2006 to FY 2010 and FY 2012, there was significantly lower capital outlay purchased and that was primarily due to the economic downturn and rising personnel costs associated with pension and health insurance. The FY 2011 amount is above the recommended level. Management will need to fund capital outlay at the recommended level in the future to ensure timely replacement of rolling stock and other capital outlay items and keep repair costs low.

Description:

The expenditure for operating equipment purchased from the operating budget is usually referred to as capital outlay. Capital outlays refer to equipment with an estimated useful life in excess of one year and an initial cost of a minimum of \$5,000. Capital outlay does not include capital budget expenditures for construction of capital facilities such as streets or bridges as those are classified as capital projects.

The purpose of capital outlay in the operating budget is to replace worn-out equipment or add new equipment to enhance operations on a regular basis. The level of capital outlay is a rough indicator of whether or not the City's stock of equipment is being maintained in good condition. However, this does not account for the adequacy of routine repair and maintenance. Over a number of years, the relationship between capital outlay needs and operating expenditures should remain about the same.

If the ratio is declining in the short-run (one to three years), it could mean that the City's needs have temporarily been satisfied since most equipment lasts more than one year. If the decline persists for more than three (3) years, it may indicate that capital outlays are being deferred. Such a practice can result in the use of obsolete or inefficient equipment and the creation of future unfunded liabilities.

Analysis:

A significant amount of capital outlay in FY 2003 was due to significant costs at the power plant. These are not costs that need to be budgeted every year. A review of the rolling stock for the Water and Electric Utility recommends a capital outlay amount of approximately 0.9% of net operating expenditures. Given this recommendation, the past three years have fallen below this level; therefore, close monitoring of this indicator is warranted.

2012	\$149,046	\$266,344	\$415,390	\$9,145,955	1.63%	2.91%	4.54%

Description:

The expenditure for operating equipment purchased from the operating budget is usually referred to as capital outlay. Capital outlays refer to equipment with an estimated useful life in excess of one year and an initial cost of a minimum of \$5,000. Capital outlay does not include capital budget expenditures for construction of capital facilities such as streets or bridges as those are classified as capital projects.

The purpose of capital outlay in the operating budget is to replace worn-out equipment or add new equipment to enhance operations on a regular basis. The level of capital outlay is a rough indicator of whether or not the City's stock of equipment is being maintained in good condition. However, this does not account for the adequacy of routine repair and maintenance. Over a number of years, the relationship between capital outlay needs and operating expenditures should remain about the same.

If the ratio is declining in the short-run (one to three years), it could mean that the City's needs have temporarily been satisfied since most equipment lasts more than one year. If the decline persists for more than three (3) years, it may indicate that capital outlays are being deferred. Such a practice can result in the use of obsolete or inefficient equipment and the creation of future unfunded liabilities.

Analysis:

A review of the rolling stock for this utility suggests an annual capital outlay of 4.86% of net operating expenditures as a recommended level. There were half of the years in the past ten years where that level occurred. In FY 2010, the amount was significantly less, but the percent was increased to the recommended level in FY 2011. Fleet replacements for FY 2012 were significantly below the recommended level. Management will need to closely monitor this indicator in the future to ensure proper funding for capital outlay.

Community Needs and Resources Indicators

Community needs and resources encompass economic and demographic characteristics such as population, employment, personal income, property value and business activity. This category treats a city's financial condition and community needs and resources as different sides of the same coin. On one side, they describe the community's wealth and its ability to generate revenues; on the other side, they describe demands which the community will make on local government, i.e. public safety, capital improvements and additions, and social services.

The needs and resources of a community are closely interrelated to one another; changes in one trend affect the other, and the changes are often cumulative. An example of this is the interrelationship and cumulative affects which changes in population can have on the community's needs and resources.

A community which is experiencing a gradual population growth could expect accompanying increases in its business activity. This increase could then create additional jobs which would stimulate retail sales and housing demand. A cycle of events such as this would act to place the finances of the City on solid ground. On the other hand, a declining population accompanied by a decrease in jobs would tend to cause people to look elsewhere for employment, causing further decline in population. As a result, retail sales and housing demand would be expected to suffer a similar decline, further depressing the local economy.

If a city were to experience a decrease in population, it could not balance the loss of revenue by decreasing expenditures by a corresponding reduction. The City must maintain certain levels of service (lighting, streets, police and fire services). Many of these expenditures remain regardless of population decline.

In fact, a city may be forced to raise taxes and rates to make up for lost revenues, placing a larger burden on the remaining population. As economic conditions decline and taxes rise, the City could become a less desirable place to live if the declining cycle continued.

A community's economic and demographic characteristics are sensitive to decisions regarding long-range planning and development. Therefore, this group of indicators should prove valuable by providing information for financial forecasting. An examination of local economic and demographic characteristics can identify the following situation:

- A decline in the tax base as measured by population, property value, employment, or business activity
- A need to shift public service priorities because of a change in the age or income of the residents or in the type or density of physical development
- A need to shift public service priorities because of a change in the age or income of the residents or in the type or density of physical development
- A need to reassess public policies if, for example, the jurisdiction has lost businesses to surrounding communities, or national or regional economic conditions have changed

Changes in the community can be monitored using the following indicators:

- Population
- Population Density
- Population: Over 64 and under 18
- Personal Income Per Capita
- Poverty Households
- Crime Rate: Clearance Rates and Violent Crimes vs. National Rate
- Employment Base
- Business Activity: Retail Sales and Business Licenses

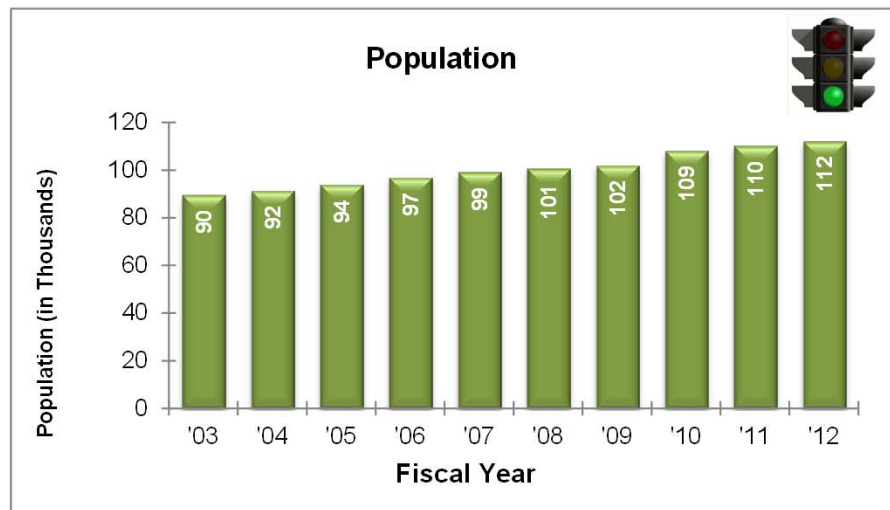

Population

Warning Trend:

A decreasing rate of growth or a sudden increase in population

Formulation:

Population

Fiscal Year	Estimated Population	Growth Rate
2003	89,913	2.37%
2004	91,712	2.00%
2005	94,211	2.72%
2006	97,202	3.17%
2007	99,405	2.27%
2008	100,976	1.58%
2009	102,324	1.33%
2010	108,500	6.04%
2011	110,438	1.79%
2012	112,414	1.79%

Description:

The exact relationship between population changes and other economic and demographic factors has not yet been made clear. However, the evidence seems to indicate that changes in population can have a direct effect on city revenues because population levels appear to be at least indirectly related to such issues as employment, income, and property value. Sudden and substantial increases in population can create immediate pressures for new capital outlays on infrastructure, and for higher levels of service. In the case of annexations, where much of the capital infrastructure is already in place, the pressure may not be as great. However, there still may need to be an expansion of operating programs.

A decline in population would, at first glance, appear to relieve the pressure for expenditures because there would be less population to service. In reality, however, a city is rarely able to reduce expenditures in the same proportion as it is losing population, at least not in the short run. First, many of a city's costs, such as debt service, pension and governmental mandates, are fixed and cannot be reduced in the short run.

Second, if the out migration is composed of middle and upper income households, then the City is left with a more expensive type of population to service, the poor and the aged, who characteristically rely most heavily on government services. Finally, because of the interrelationship between population levels and other economic and demographic factors, a decline in population tends to have a cumulative negative affect on city revenues, the further the decline, the more adverse the affects on employment, income, housing and business activity.

Analysis:

The City of Columbia has experienced positive, manageable population growth over the ten year period listed. There are no warning trends associated with this indicator.

Population Density

Warning Trend:

Decreasing population density

Formulation:

$$\frac{\text{Population}}{\text{Jurisdiction area in square miles}}$$

Fiscal Year	Estimated Population	Square Miles	Population Density
2003	89,913	55.87	1,609
2004	91,712	55.87	1,642
2005	94,211	55.87	1,686
2006	97,202	57.48	1,691
2007	99,405	58.25	1,707
2008	100,976	59.92	1,685
2009	102,324	59.92	1,708
2010	108,500	60.08	1,806
2011	110,438	63.36	1,743
2012	112,414	64.13	1,753

Description:

One of the local conditions that affect the production of public goods and services is the population density within the community. This indicator measures the cost of providing services by a municipality or government. Some communities have compact areas with a higher population base. This makes the cost for services such as police, fire, street maintenance etc. less costly per household.

Analysis:

Population density trend is keeping pace with population. There was a slight decrease in FY 2011 based on an increase in the street miles. The city is keeping pace with fundamental services it provides. There are no warning trends observed with this indicator.

2009	18.20%	9.30%	27.50%	102,324	18,623	9,516
2010	18.84%	8.48%	27.32%	108,500	20,441	9,201
2011	18.50%	9.00%	27.50%	110,438	20,431	9,939
2012	N/A*	N/A*	0.00%	112,414	N/A*	N/A*

* FY 2012 estimates not available at the time of printing

Description:

The percentage of individuals living in the community who are under 17 and over 65 is a measure of the community's needs. The indicator helps to assess the level of needs, both current and future. These population groups need more services than the average individual.

Analysis:

Information is available for FY 2005 to FY 2009 and for FY 2011. During this period, there has been no significant increase in these age groups. Therefore, there are no warning trends associated with this indicator.

Personal Income Per Capita

Warning Trend:

Decline in the level, or growth rate of personal income per capita (Constant Dollars)

Formulation:

$$\frac{\text{Median income (constant dollars)}}{\text{Population}}$$

Fiscal Year	Median Household Income	Consumer Price Index	Personal Income in Constant Dollars	Population	Personal Income Per capita (constant dollars)
2003	\$35,994	184.0	\$19,562	89,913	\$0.22
2004	\$36,749	188.9	\$19,454	91,712	\$0.21
2005	\$37,051	195.3	\$18,971	94,211	\$0.20
2006	\$38,260	201.6	\$18,978	97,202	\$0.20
2007	\$40,347	207.3	\$19,463	99,405	\$0.20
2008	\$40,326	215.3	\$18,730	100,976	\$0.19
2009	\$42,800	214.5	\$19,950	102,324	\$0.19
2010	\$35,793	218.1	\$16,415	108,500	\$0.15
2011	\$45,427	224.9	\$20,195	110,438	\$0.18
2012	N/A*	229.6	N/A*	112,414	N/A*

* FY 2012 estimates not available at the time of printing

Description:

Personal income per capita is one measure of a community's ability to pay taxes: the higher the per capita income the more property tax and sales tax can be generated by the community. If income is more evenly distributed a higher per capita income will usually mean less dependency on governmental services such as transportation, recreation, and welfare. Credit rating firms use per capita income as an important measure of a local government's ability to pay on debt.

Analysis:

Personal income per capita has decreased 18% over the past ten years. The significant decrease in FY 2010 is a result of the higher unemployment rate due to the economic downturn which began in FY 2009. FY 2011 does show some improvement but it is still much lower than the FY 2002 amount. This indicator should be monitored closely in the future.

Poverty Rate

Warning Trend:

Increasing poverty rate

Formulation: Poverty Rate

Fiscal Year	Poverty Rate
2003	
2004	
2005	20.30%
2006	20.70%
2007	20.40%
2008	23.00%
2009	20.60%
2010	26.10%
2011	24.30%
2012	N/A*

* FY 2012 estimates not available at the time of printing

Description:

An additional indicator to change in personal income is the increase in poverty rate. This indicator can signal a future increase in the level and cost for services because low-income households have relatively higher needs and a relative lack of personal wealth.

Analysis:

Information is available for FY 2005 to FY 2011. During this time the poverty rate has had an overall increase. This is a warning trend that will need to be closely monitored as the increase in poverty rate can create more demand for city services with no income to pay for those services.

- US Census Bureau
- GIS Department, City of Columbia

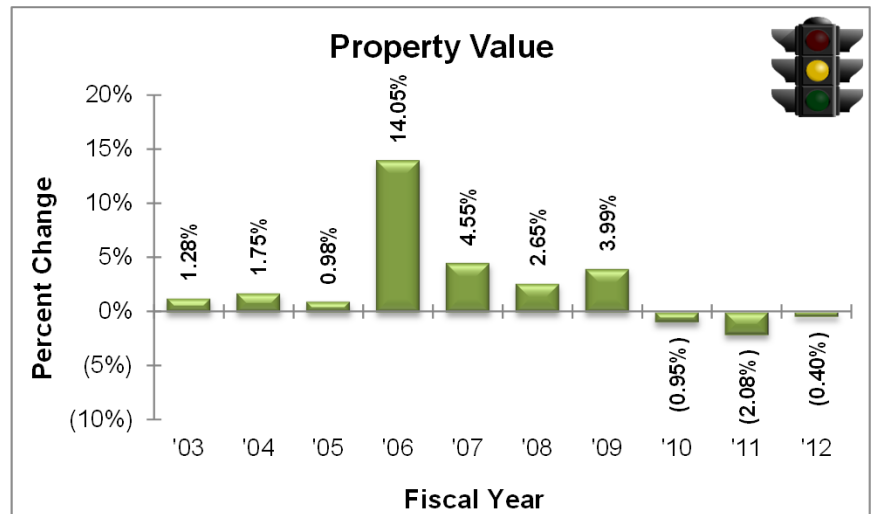

Property Value

Warning Trend:

Declining or negative growth in market value of residential, commercial and industrial property

Formulation:

$\frac{\text{Change in Property Value (Constant Dollars)}}{\text{Property Value Prior Year (Constant Dollars)}}$

Fiscal Year	Total Market Value Of Property	Consumer Price Index	Property Value In Constant Dollars	Percentage Change In Property Value (Constant Dollars)
2003	\$4,450,247,350	184.0	\$2,418,612,690	1.28%
2004	\$4,648,539,062	188.9	\$2,460,846,512	1.75%
2005	\$4,853,192,612	195.3	\$2,484,993,657	0.98%
2006	\$5,713,406,342	201.6	\$2,834,030,924	14.05%
2007	\$6,141,975,733	207.3	\$2,962,844,058	4.55%
2008	\$6,548,424,667	215.3	\$3,041,492,532	2.65%
2009	\$6,785,163,254	214.5	\$3,162,700,725	3.99%
2010	\$6,830,813,429	218.1	\$3,132,595,952	(0.95%)
2011	\$6,899,642,329	224.9	\$3,067,339,292	(2.08%)
2012	\$7,013,851,058	229.6	\$3,054,946,234	(0.40%)

Description:

Property value is important to cities who rely heavily on the property tax as a substantial portion of their revenue. If a city does not lower or increase its tax rate, then the higher the aggregate property value, the greater the revenues produced. Cities experiencing population and economic growth will likely see a growth in property values -- at least in the short run. This is because in the short run the supply of housing is fixed, and the increase in demand due to growth will force prices up. The reverse tends to be true for declining areas.

The extent to which declining property value (constant dollars) affects city revenues depends on the City's reliance on the property tax.

Analysis:

In calendar year 2005 there was a general reassessment of all properties. When major reassessments occur, the growth in subsequent years will generally be much smaller. The City continues to experience growth in both commercial and residential areas. While the market value of property increased in FY 2010, FY 2011, and FY 2012 the adjustment for inflation caused the property value in constant dollars to decrease.

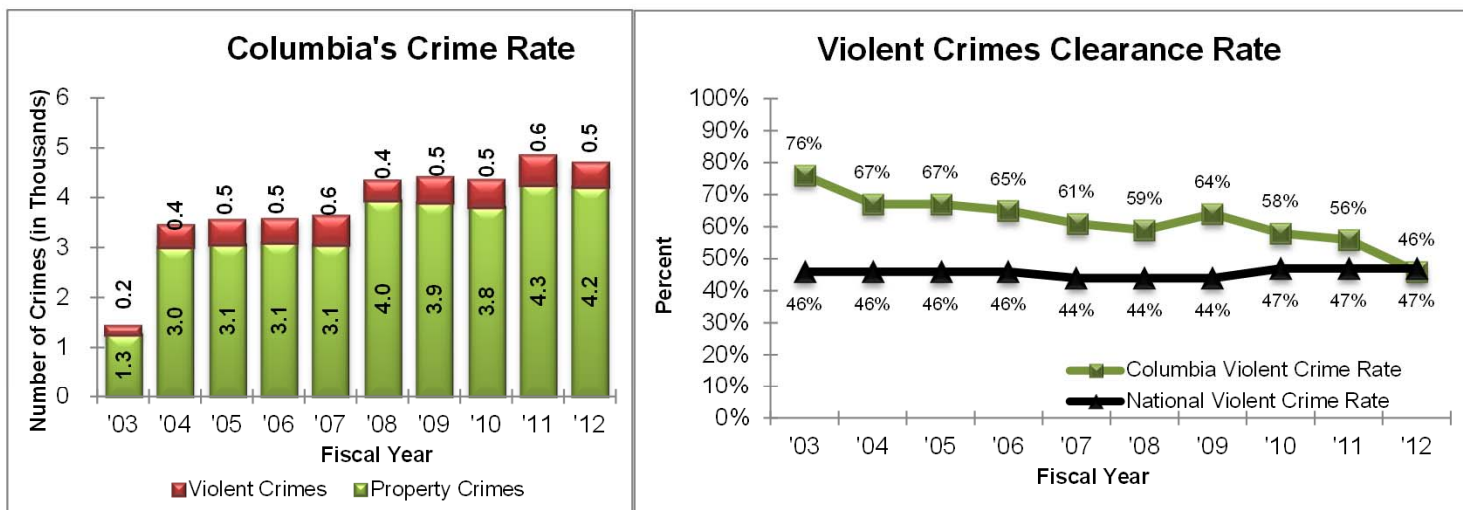

Although the growth fluctuates significantly over time, it is of little consequence to the City as it does not rely on property tax revenues as a major source for financing its general government operations. This source makes up approximately 9% of general fund revenue sources. The general property tax rate has remained constant at \$0.41 per \$100 assessed valuation for the ten year period, and there has been no general obligation property tax levy. The general property tax rate is just slightly below the levy allowed.

The City will continue to closely monitor this revenue source.

Crime Rate

Warning Trend:

Increasing crime rate

Formulation:

Crime rate

Fiscal Year	Number of Violent Crimes	Number of Property Crimes	Total Number of Crimes	Columbia's Violent Crimes Clearance Rate	National Violent Crimes Clearance Rate
2003	159	1,264	1,423	76.0%	46.0%
2004	429	3,015	3,444	67.0%	46.0%
2005	478	3,067	3,545	67.0%	46.0%
2006	459	3,105	3,564	65.0%	46.0%
2007	567	3,063	3,630	61.0%	44.0%
2008	387	3,951	4,338	59.0%	44.0%
2009	501	3,906	4,407	64.0%	44.0%
2010	530	3,816	4,346	58.0%	47.0%
2011	583	4,263	4,846	56.0%	47.0%
2012	476	4,221	4,697	46.0%	47.0%

Description:

Crime rate captures a negative aspect of a community that can affect its present and future economic development potential. The crime rate also measures the demand on public services in the forms of public safety expenses. Violent crimes include homicide, rape, robbery, and assault. Property crimes include burglary, larceny, and auto theft. Clearance rates are used as a measure of the crimes solved by the police.

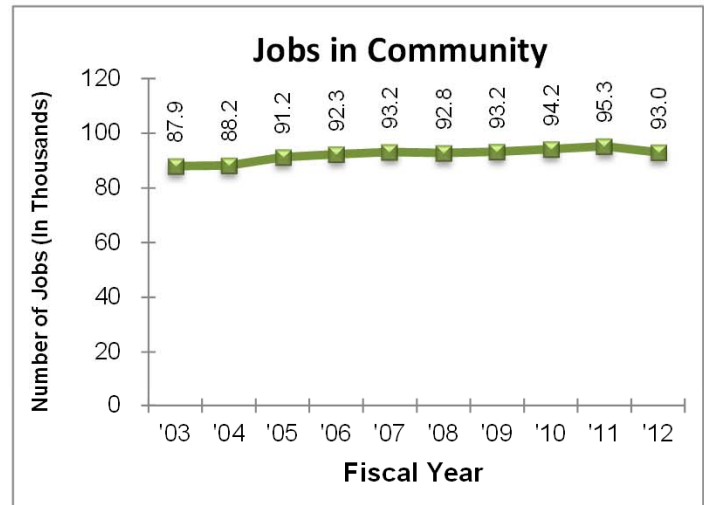

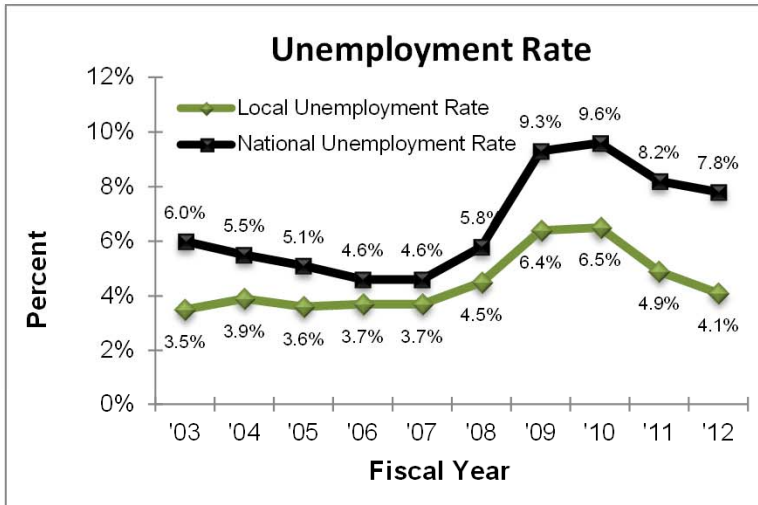

Analysis:

Over the ten year period Columbia's crime rate has shown an overall increase with most of the increase in property crimes. During this time, Columbia's violent crime clearance rate has been well above the national rate for all years except FY 2012. However, Columbia's violent crime clearance rate has shown a steady decline over the past ten years. Over the past ten years, the population has increased 25%, the number of square miles has increased 15%, and the number of sworn officers have increased 18%. Management will need to closely monitor this trend to ensure adequate staffing as the city's population and area increases.

Employment Base

Warning Trend:

Increasing rate of unemployment or a decline in number of jobs provided within the community

Formulation:

Unemployment Rate and Number of Jobs in the Community

Fiscal Year	Local Unemployment Rate	National Unemployment Rate	Jobs In Community - Civilian Labor Force
2003	3.5%	6.0%	87,936
2004	3.9%	5.5%	88,214
2005	3.6%	5.1%	91,210
2006	3.7%	4.6%	92,316
2007	3.7%	4.6%	93,159
2008	4.5%	5.8%	92,777
2009	6.4%	9.3%	93,236
2010	6.5%	9.6%	94,216
2011	4.9%	8.2%	95,300
2012	4.1%	7.8%	93,000

* All figures have been restated to reflect annual amounts for each year reported by the Bureau of Labor
FY 2011 figures reflective of June 2012 reporting period.

Description:

Unemployment and jobs in the community are considered together because they are closely related; and for purposes of this discussion are referred to as "employment base." In addition, for comparative purposes, the national unemployment rate is included. Employment base is important because it is directly related to the levels of the business activity and personal income. Changes in the number of jobs provided by the community are a measure of and an influence on business activity. Changes in rate of employment of the community's citizens are related to changes in personal income and thus, are a measure of and an influence on the community's ability to support its local business sector.

If the employment base is growing, if it is sufficiently diverse to provide against short-run economic fluctuation, or downturn in one sector, and if it provides sufficient income to support the local business community, then it will have a positive influence on the city's financial condition. A decline in employment base as measured by the number of jobs, or the lack of employment, can be an early warning sign that overall economic activity will decline and thus, that governmental revenues may decline (or at least not increase at the expected rate), particularly sales tax revenues.

Analysis:

The current economic factors have had an impact on the economy in Columbia. Although the unemployment base has been sufficiently diverse to cushion against temporary economic downturns in any particular sector, most employment fluctuations have been associated with national manufacturing firms located in Columbia. Such jobs comprise less than 10% of the City's total work force and have been effected by the current economic factors on a national level. The City of Columbia's largest workforce sector is the education, health and social services area which has enabled the City to continue to stay well below the national unemployment rate. The number of civilian jobs have increased 6% during this period.

Business Activity: Retail Sales and Business Licenses

Retail Sales (in Constant Dollars)

Business License Accounts

	Fiscal Year	Estimated Retail Sales	Retail Sales Growth	Consumer Price Index	Retail Sales In Constant Dollars	Business License Accounts
Warning Trend:	2003	\$1,608,167,400	3.35%	184.0	\$874,004,022	4,489
Decline in business activity as measured by retail sales (Constant Dollars) or a reduction in the number of business licenses	2004	\$1,706,044,600	6.09%	188.9	\$903,146,956	4,521
	2005	\$1,811,119,300	6.16%	195.3	\$927,352,432	4,627
	2006	\$1,950,101,600	7.67%	201.6	\$967,312,302	4,807
	2007	\$1,975,706,800	1.31%	207.3	\$953,066,474	4,982
	2008	\$2,076,490,400	5.10%	215.3	\$964,450,286	5,008
Formulation:	2009	\$1,921,501,200	(7.46%)	214.5	\$895,650,261	4,933
Retail Sales (Constant Dollars)	2010	\$1,959,805,400	1.99%	218.1	\$898,762,428	4,859
	2011	\$2,074,241,900	5.84%	224.9	\$922,135,290	4,849
	2012	\$2,173,169,500	4.77%	229.6	\$946,543,621	4,886

Description:

The level of retail sales can affect the City's financial condition in two ways. First, it directly affects revenue yields to the extent that they are reliant on sales tax receipts. And second, the effect is indirect to the extent that changes in retail sales affect other demographic and economic areas such as employment base, personal income, etc. This in turn can create further declines in such business activity.

The number of business license accounts can affect the City's financial condition in two ways. First, it can assist prediction of sales tax revenue yields and, second, it is an indication of business activity that could affect other demographic and economic areas, including the employment base, personal income levels and property values. Changes in business license activity tend to be cumulative.

Analysis:

Retail sales growth has fluctuate significantly over the ten year period. Sales tax figures continue to be closely monitored on a monthly basis. Retail sales were extremely sluggish from FY 2007 through FY 2010. The city experienced what appears to be a slight increase in sales in the local economy for FY 2011 and FY 2012, however, City Staff continue to be cautious with estimates and actual expenditures while monitoring this activity.

The number of business license accounts has increased by 9% for the period shown although there has been a slight decline since FY 2009. This increase is the result of additional light manufacturing facilities locating in Columbia, growth in locally owned businesses and small retail shops. The total number of home occupations licensed in FY 2011 was 1,036 compared to the total number of home occupations in FY 2012 which is 947. This is a decrease of (8.59%) compared to the previous year.
