City of Columbia, Missouri

Risk Management
Annual Report
Fiscal Year 2016
Dear 2016 Risk Management Annual Report Reader,

I think the saying “time flies when you are having fun” applies to most of us here in the City. Or maybe time flies because there are so many opportunities for each of us to fill our days. Either way, the last year seems to have flown by for all of us in Risk Management, and I am guessing for anyone looking at this 2016 Risk Management Annual Report.

The good news is Risk Management has seen a moderation in the number of claims and the costs in all areas. The not so good news is we have continued to have some employees seriously injured as a result of work activities, and many of our vehicles accidents appear to be from preventable causes like backing, hitting fixed objects, or rear-ending another vehicle.

Another big plus is the amount of regular safety training conducted by or offered through Risk Management. It is my belief that anytime we can prevent an accident or injury involving our employees, vehicles, and citizens, we are all ahead. Conducting training isn’t enough though, we need everyone to help us look out for the hazards and possible causes of loss. Think of yourselves as associate risk managers, with the benefit of being able to turn the tough stuff over to our office.

Who is ready to step up and be part of the solution? Looking for a lot of good people.

Sarah Perry
**Accomplishments**

- Work cooperatively with Human Resources and the Legal Department to implement a City-wide transitional duty program.
- Development and implementation of online vehicle accident reporting to increase the City’s responsiveness.
- Training offered to City employees in the areas of Stress and Depression Prevention; Evacuation/Severe Weather Safety; Fire Safety/Extinguisher Use; and Animal Awareness & Rabies.
- Revision of the City’s evacuation and shelter within plans to protect employees and visitors to our facilities.

**Goals**

- Institution of an annual driver license review program.
- Establishment of policies and programs for Lockout/Tagout, Confined Space, and Trenching and Excavation.
- Formalize traffic control/flagger training which is compliant with MoDOT requirements.
- Further development of driver safety programs.
The City of Columbia has elected to “self-insure” a portion of potential losses. This self-insurance retention is similar to the deductible individuals elect to take on personal vehicle and home insurance policies. Like those deductibles, the City retains a portion of the claim costs to save money on premiums, to experience flexible cash flow, and to promote the City’s attention to safety and loss prevention.

The self-insurance retention is funded through contributions from every department and division. The amount needed for future claims is identified through an annual actuarial study. From this study, the City calculates the amount departments and divisions will contribute to ensure adequate funding.

The funding amount for City departments is based upon three components:

- 50% of the cost is based on a department or division’s five-year claims cost history.
- 30% of the cost is based on a department or division’s workers’ compensation exposures, as determined by industry rates.
- 20% of the cost is based on a department or division’s vehicle exposure, which is determined by the number and type of vehicles.

The five-year claims cost history is used to help smooth out the cost of large claims. The workers’ compensation exposure recognizes certain jobs have more exposure to claims (such as firefighters, law enforcement, and linemen) than others (such as employees who work in an office). The vehicle exposure recognizes that certain vehicles have more exposure to claims (such as fire trucks, buses, police cars) than other vehicles.

Insurance Coverage

In addition to the City’s self-insurance retention, the City purchases excess insurance and coverage for special risks and exposures. What follows is a list of the City’s insurance coverages, carriers, and retention/deductibles for the upcoming fiscal year, 2017.

**Property / Inland Marine / Boiler and Machinery Coverages**

Insurance for City-owned buildings, vehicles, and equipment:

- Insurance Provider – FM Global Insurance Company
- Retention/Deductible (per claim) - $100,000/$100,000/$250,000

**Excess Workers’ Compensation**

Insurance for employees with work related injuries or illnesses:

- Insurance Provider – Safety National Casualty Corporation
- Retention/Deductible (per claim) - $750,000 - Police, Fire, Electrical & Power Plant workers/ $500,000 all other employees

**Package Liability Program**

- Insurance Program Provider – States Risk Retention Group
- Retention/Deductible (per claim) - $500,000

**Health Department Professional Liability**

- Insurance Provider – Allied World Surplus Lines Insurance
- Retention/Deductible (per claim) - $5,000

**Crime Coverages**

- Insurance Provider – National Union Fire Insurance of Pittsburgh (AIG)
- Retention/Deductible (per claim) - $50,000
Insurance Coverage

Airport Liability
- Insurance Provider – Global Aerospace, Inc.
- Retention/Deductible (per claim) - $10,000

Railroad Liability
- Insurance Provider – Liberty Surplus Insurance Corporation
- Retention - $25,000

Railroad Rolling Stock
- Insurance Provider – Hanover Insurance Company
- Retention/Deductible (per claim) - $1,000

Network Security & Privacy (Cyber Liability)
- Insurance provider – National Union Fire Insurance of Pittsburgh (AIG)
- Retention/Deductible (per claim) – $25,000

How is the City’s Insurance Purchased?

The City of Columbia uses the services of an insurance broker to identify the best insurance coverages for the most affordable costs. The broker is selected using a bid process conducted through the City Purchasing division. This bid process takes place at a minimum of every five years to select a broker knowledgeable about the needs of a public entity with our exposures.

Annually the broker goes to the insurance market, and obtains bids from carriers for the City’s insurance coverages. All the bids and information are provided to the City for analysis and selection by Risk Management.
Risk Management Services

Insurance Procurement

While the City of Columbia does self-insure most of its losses, excess coverage is purchased to cover potential losses that exceed the City’s self-insurance retention levels. Coverages include workers’ compensation, property, and liability (auto, general, law enforcement, public officials), as well as special coverages including crime, airport, railroad, and health professional insurance.

Coverage placement with insurance providers is coordinated by Risk Management, with assistance from a contracted insurance broker. The City’s broker for fiscal year 2016 was Marsh Incorporated.

Claims Management

All claims are coordinated by Risk Management. However, because of legal requirements associated with claims as well as the process time involved, the City contracts with a claims administrator to handle some property, workers’ compensation, and liability claims. Corporate Claims Management, Incorporated (CCMI) is the City’s claims administrator. Depending on the value, complexity, or process time, a claim may be handled internally, by Risk Management staff, or externally, by CCMI. In addition to claims handling, CCMI also assists the City with loss reporting and legislative updates.

Safety & Loss Prevention

This is a broad resource, which covers training; development of safety policies and procedures; department-specific safety issues; attendance at safety committee meetings; and accident review, just to name a few. The safety section of this report contains descriptions of recently implemented safety policies and available safety resources.

Contract Review

Risk Management works with Purchasing, Legal, and other City departments to develop and review contract language in order to protect the City’s assets.
Executive Safety Committee

Risk Management chairs the Executive Safety Committee, which is comprised of delegates from most City departments, and is tasked with the coordination of safety activities. The Executive Safety Committee uses accident and injury information to develop appropriate safety programs, with the mission of controlling injuries and accidents involving City of Columbia employees, property, citizens, and visitors.

Certificates of Insurance

Risk Management coordinates issuing proof of the City’s insurance coverage to outside companies and entities.

Emergency Evacuation & Planning

Risk Management coordinates emergency evacuation planning; building and floor monitors; and emergency drills to promote better response in emergency situations.

Restitution Assistance

Risk Management assists City departments with recovering money owed to them for the repair or replacement of damaged City infrastructure. Risk Management recovered $29,570 in fiscal year 2016 and $80,775 in fiscal year 2015.

Risk Management Google Site

Risk Management maintains a Google site, which is used to share safety and claim information with the Executive Safety Committee, department or division safety committees, City administration, and employees.
Columbia is self-insured for the first $500,000 of loss for most employees and the first $750,000 for those employees in high-risk occupations. Excess insurance is purchased to manage those claims that may exceed these self-insurance retention levels.

Columbia witnessed a decrease in both the number and cost of workers’ compensation claims during fiscal year 2016. Compared to the average of the four preceding fiscal years, the number of claims in fiscal year 2016 were down 14.83%, and the cost of those claims was down 47.29%.

The City of Columbia is self-insured against the loss of property for the first $100,000 (with a few exceptions) per occurrence. An excess blanket property policy is purchased annually, and insures City-owned property up to $550 million. The City’s property policy also covers licensed vehicles and mobile equipment property up to $10 million.

The number of property claims in fiscal year 2016 was 33.3% lower than the previous fiscal year, and was 61.9% lower than the average of the four preceding fiscal years.

Not only did the number of property claims fall in fiscal year 2016, the cost of those claims was also down, both compared to the previous fiscal year, 38.82% lower, and to the average of the four preceding fiscal years, 8.73% lower.

The majority of the incurred property claim cost, $184,399, can be attributed to the three largest claims; a refuse truck that caught fire, water damage from a broken sprinkler head in City Hall, and building damage at the Material Recovery Facility.
The City of Columbia is self-insured against liability claims up to the first $500,000 per occurrence. Excess insurance provides coverage up to $3 million per occurrence with an annual policy limit of $10 million.

A variety of losses can be covered under liability claims. A liability claim, for instance, could be anything from a claim of negligent infrastructure repair to a claim of civil rights violations. The number of liability claims in fiscal year 2016, 146, was 15.12% lower than the previous fiscal year, and 8.46% lower than the average of the four preceding fiscal years.

While the number of liability claims in fiscal year 2016 was lower than the previous year, the cost of those claims was considerably higher. The cost of liability claims in fiscal year 2016 was 115.87% higher than the cost of those claims in fiscal year 2015, and was 44.55% higher than the average cost of the four preceding years. Of the $827,310 incurred for liability claims in fiscal year 2016, auto liability accounted for $706,126 and general liability accounted for $121,184.
Safety Program

Safety Program Overview

- Coordinate and conduct quarterly safety programs.
- Develop City-wide safety policies and programs based on regulatory standards or industry best practices.
- Lead and coordinate City-wide safety and loss prevention efforts.
- Write and publish safety articles, lesson plans, and manuals.
- Perform industrial hygiene monitoring, analysis, and training.
- Investigate injuries and accidents for the purpose of safety procedure and program improvement.
- Administer City facility and asset loss control, and property insurance recommendations.

City-Wide Safety Policies

- The Hot Work Policy is intended to prevent fires from starting as a result of any hot work that gives off sparks and is performed in areas not designated as hot work areas. This policy follows OSHA regulation 1910.252, which outlines general procedures for conducting hot work safely.

- The Respiratory Protection Program guides the proper use, care, and training required to endure the correct use of respiratory protection equipment. This program adheres to standards outlined in OSHA regulation 1910.134.

- The Supervisor’s Investigation Report Policy mandates an investigation following any employee injury that requires professional medical treatment. The goal of the investigation is to prevent the same type of injury from happening again in the future. OSHA does not provide a specific standard requiring accident investigations in the workplace; however, OSHA does highly recommend such a program.

- The Motor Vehicle Seat Belt Policy requires all City employees to wear seat belts when in City vehicles. This policy exceeds the state requirements by including equipment such as forklifts and backhoes in addition to motor vehicles. The Missouri Revised Statutes, Chapter 307, Section 307.178 requires seat belt use in motor vehicles.
Safety Program

City-Wide Safety Policies

♦ The Hazard Communication Policy outlines requirements for the safe use and management of hazardous chemicals in the workplace, and complies with OSHA 1910.1200 standard.

♦ The High Visibility Apparel Policy requires employees who are working around traffic or heavy equipment to wear class 2 or class 3 reflective apparel. The Federal Highway Administration (FHWA) has revised the Code of Federal Regulations to incorporate the provisions of the 2009 Manual on Uniform Traffic Control Devices (MUTCD), which is applicable to all public roadways.

Safety Resources

♦ Ergonomic Risk Reduction - Ergonomics examines a worker’s relationship to work, work tools, and the work environment. Ergonomic risk reduction and training services are offered to all City departments. Workstation ergonomic intervention follows the guidance provided by the Department of Health and Human Services, National Institute for Occupational Safety and Health

♦ Respiratory Protection Fit Testing and Training - Respiratory protection is fit tested to ensure respirators will keep out airborne contaminates combined with training for proper use and care.

♦ Safety Articles - Articles on a variety of topics are written regularly with the purpose of providing timely and pertinent safety information to City employees. Articles are published on the mycolumbiamo.com employee website.

♦ Noise Level Monitoring - City areas with excessive noise are surveyed using a noise dosimeter following the guidance from OSHA’s 1910.95 standard, and from the data gathered, it is determined if a hearing conservation program is necessary.

♦ Indoor Air Quality - Indoor air pollution stem from a variety of sources, and can lead to discomfort and illness in workers. An investigation is performed and recommendations for improvement are offered.
Safety Program

Safety Resources

- **Air Sampling** - City facilities are monitored for specific air pollutants to ensure contaminants do not pose a health hazard for employees. When determining hazardous levels of airborne contaminants, Risk Management refers to [OSHA's 1910.1000 Table Z1](https://osha.gov/pls/oshaweb/owadisp.show_document?p_table=standards&p_id=15192) limits for air contaminants.

- **City-wide Safety Manual** - Risk Management periodically updates and publishes the City-wide safety manual.

- **Standardized Equipment Training** - Risk Management, in partnership with City University, has developed and administers a basic employee training program, which covers basic hazards involved with operating common pieces of equipment. This program ensures all employees who use certain pieces of equipment receive a consistent, base level of training specific to that equipment.

- **Facility Inspection and Training** - This program involves regularly scheduled safety inspections at City facilities and provides training for employees for proper safety inspection techniques, how to identify problems in facilities, and the proper procedures to follow in order to correct any deficiencies.

- **Seatbelt Awareness Campaign** - Risk Management and the Executive Safety Committee have implemented a campaign to encourage seat belt use among City employees. In addition to encouraging safety conversations about seat belt use, new “Buckle Up” street signs have been posted near parking areas at City facilities and high-visibility seatbelt covers have been purchased for all City vehicles.
Safety Program

Safety Training Programs

Risk Management and the Executive Safety Committee work together each year to develop quarterly safety training programs for City employees. During fiscal year 2016, we are proud to say, 1,553 city employees attended safety training programs.

Fiscal Year 2016 Quarterly Training Topics

1st Quarter – Stress & Depression Management

This training centered on common thinking errors and the process of changing those thoughts. Participants were given tools and resources to use outside of the training session. Training was provided by John Scalise, Rehabilitation Services Manager at Job Point.

2nd Quarter – Evacuation and Severe Weather Safety

Risk Management presented this training, which focused on City facility evacuation procedures and severe weather safety. Training topics included the City’s new evacuation plans, how to prepare for and respond to specific emergencies, and how to properly shelter during a tornado or severe weather event.

3rd Quarter - Fire Safety & Extinguisher Use

This training was presented by the Columbia Fire Department. Attendees learned the basics of fire extinguisher use, understanding the differences between types of fire extinguishers, when it is safe to extinguish a fire using a portable fire extinguisher, and the basics of fire prevention.

4th Quarter – Animal Awareness & Bite Prevention

Columbia/Boone County Animal Control personnel presented this training program, which included how to prevent animal bites, how to protect yourself if you are attacked, and what to do if you are bitten.
Actual Cash Value - Cost of replacing damaged or destroyed property with comparable new property, minus depreciation and obsolescence. For example, a 10-year-old sofa will not be replaced at current full value because of a decade of depreciation.

Additional Insured - A person or organization that enjoys the benefits of being insured under an insurance policy, in addition to whoever originally purchased the insurance policy.

Aggregate Limit - Usually refers to liability insurance and indicates the amount of coverage that the insured has under the contract for a specific period of time, usually the contract period, no matter how many separate accidents might occur.

Automobile Liability Insurance - Coverage if an insured is legally liable for bodily injury or property damage caused by an automobile.

Broker - Insurance salesperson that searches the marketplace in the interest of clients, not insurance companies.

Case Management - A system of coordinating medical services to treat a patient, improve care and reduce cost. A case manager coordinates health care delivery for patients.

Casualty Insurance - That type of insurance that is primarily concerned with losses caused by injuries to persons and legal liability imposed upon the insured for injury or damage to property of others.

Confidence Level - The statistical certainty that an actuary's funding forecasts will be sufficient.

Deductible - Amount of loss that the insured pays before the insurance kicks in.

Employers Liability Insurance - Coverage against common law liability of an employer for accidents to employees, as distinguished from liability imposed by a workers' compensation law.
**Errors & Employment Practices Liability** - Insurance coverage for claims other than bodily injury and direct property damage arising out of actual or alleged “wrongful acts” such as errors, omissions, misstatements, malpractice, civil rights violations, discrimination, sexual harassment, and wrongful employment practices involving employee hiring, promotion, or termination.

**Exclusions** - Items or conditions that are not covered by the general insurance contract.

**Excess Insurance** - A policy covering an insured against claims greater than a deductible or self-insured retention amount.

**General Liability Insurance** - Insurance designed to protect business owners and operators from a wide variety of liability exposures. Exposures could include liability arising from accidents resulting from the insured’s premises or operations, products sold by the insured, operations completed by the insured, and contractual liability.

**Incurred But Not Reported (IBNR)** - Insured losses that have occurred but have not been reported to a primary insurance company.

**Indemnity Payments (as used in this report)** - Workers’ compensation claim payments made to employees for loss of wages or loss of use of a body part resulting from a job related injury. The term Indemnity Payments is used to include temporary disability, permanent disability, industrial disability, commutations, and special case claims payments made to employees under Missouri law and to distinguish them from payment of medical bills.

**Liability Insurance** - Insurance coverage that offers protection against claims alleging that negligence or inappropriate action resulted in bodily injury or property damage to another party.

**NCCI** - A U.S. insurance rating and data collection bureau specializing in workers' compensation. NCCI also produces a number of manuals that govern the details of how Workers’ Compensation insurance premiums are calculated.
**Negligence** - Failure to act within the legally required degree of care for others, resulting in harm to them.

**Premium** - The price of insurance protection an insurer or governmental internal service fund charges to insure a particular risk.

**Replacement Cost** - The cost of replacing property without a reduction for depreciation. By this method of determining value, damages for a claim would be the amount needed to replace the property using new materials.

**Reserves** - Monetary amounts recorded as expenses which are estimates of future claims payments arising from events occurring during the current and prior fiscal years.

**Risk Management** - The process of identifying, analyzing, selecting and implementing the most cost effective techniques to eliminate, reduce, transfer, or finance exposures to loss.

**Self-Insurance** - Risk management approach in which an entity sets aside a sum as a protection against probable losses, instead of transferring the risk by purchasing an insurance policy.

**Self-Insured Retention** - The amount of claim payments specified in an insurance policy that the insured agrees to pay directly, in addition to claim investigation and defense costs, before the insurer (excess insurance) will begin to be responsible for claims handling and claim payment expenses.

**Subrogation** - The right of an insurer (including self-insured entity) to pursue a third party that caused a loss to the insured. This is done as a means of recovering the amount of damage or paid for the loss.

**Tort** - A wrongful act, injury, or damage arising from violation of civil law.

**Workers’ Compensation** - The statutory system prescribed by state law for employers to provide medical care and loss of income benefits to employees sustaining a job related injury or death due to an accident or occupational disease.
