Overview

Columbia Parks and Recreation has prepared lists of capital improvement projects by category, which are included in the sections listed below. These projects, based on information gathered during the public input stages, trend analysis, and combined with Department recommendations, represent capital needs that are anticipated during the next five to ten years. This information is used to determine development and acquisition priorities that are identified annually in the City's Capital Improvement Program.

Park Construction Crew at Longview Park

It is important to note that in 2010, the Department of

Justice made substantial revisions to the original 1991 Americans with Disabilities Act (ADA). For the nearly 20 percent of the national population with disabilities, the ADA removed architectural and social barriers that had prevented them from enjoying the same privileges of living in the United States as able-bodied citizens. The most recent revisions left facility managers facing a host of challenges in interpretation and implementation, as well as a need to fully embrace universal design.

In order to meet the ADA's March 2012 compliance deadline, the City of Columbia underwent an extensive process with an outside consultant to complete an assessment of City facilities. This report identified various compliance projects in 33 parks and recreation facilities at an estimated cost of approximately \$800,000. The projects ranged in scope from lowering bathroom mirrors to replacing sidewalks. Staff has analyzed the reports and prioritized and scheduled projects based on need, usage, feasibility, and funding. Some of the projects were started and completed in 2012. Work that does not qualify as capital improvements will be funded out of the annual park maintenance operating budget. Therefore, ADA compliance projects are not covered in this document due to the completion of and action initiated on the assessment report.

Capital Improvement projects that have secured funding (such as those funded by the 2010 Park Sales Tax Ballot) are not included in Sections I or II. Projects from the 2010 Park Sales Tax Ballot that are scheduled for funding in 2014 -2016 are included in Section III. (For a complete list of projects funded by the 2010 Park Sales Tax Ballot, consult the Parks and Recreation website at www.GoColumbiaMo.com - search: "Park Sales Tax").

Park acquisition and development is discussed in Chapter 9. Trail acquisition and development is discussed in Chapter 10. Once the property is acquired and funding is secured for development, these park and trail development projects will ultimately be included in the five-year Capital Improvement Program as part of the City's annual budget process.

Recommended capital improvements included in this chapter are divided into three sections: Section I: Existing Facilities Section II: New Facilities Section III: Proposed FY 2014 Capital Improvement Program All proposed project costs are provided as a basic budget for future planning. The "FAL" designation in the project description indicates the Department is anticipating using parks staff or Force Account Labor to conduct the work. These costs are based on 2013 dollars.

Section I summarizes needed capital improvement projects for parks and facilities that the City owns or manages and are currently unfunded. Many of these projects consist of repairs, renovations, and replacement of existing facilities. This chapter also identifies new areas or facilities that have not yet been constructed. The list of these projects are derived from existing individual park master plans or based on standard park development. These projects are organized by individual parks in alphabetical order.

Section II highlights needs for new parks and facilities. This includes proposed capital improvement projects that require further master planning efforts before a suitable park is selected. For example, there is high demand for a multi-use indoor sports field house or basketball court gymnasium where several existing parks would be suitable for this project. However, it is prudent to conduct further public input, individual park master planning, and engineering analysis prior to selecting a site.

Section II also includes projects that could be developed in cooperation with other public or private agencies or organizations. In 2001, the Columbia Public School District and the City cooperatively constructed an eight-court tennis complex. Planning efforts, land, and financial resources were shared equally by the two agencies. The final product is an excellent tennis complex that was economically constructed for the benefit of Columbia citizens. The Department is recommending that further joint-use projects be considered.

Section III is the Capital Improvement Program. This program is the primary method used by the City of Columbia to implement public improvements. While Sections I and II summarize the list of all identified possible improvement projects, it is the Capital Improvement Plan that places them in priority order. The plan is prepared and adjusted annually and serves as a critical component of the comprehensive City budget. It provides an effective planning tool for identifying current and future improvements along with funding sources. In essence, the Parks and Recreation Department's Capital Improvement Program (CIP) functions as the "Action Plan" component of this 2013 P&R Master Plan.

The Parks and Recreation CIP plan in Section III will be included in the proposed Fiscal Year 2014 City of Columbia Annual Budget (subject to revision during the Council approval process.) A well-rounded Capital Improvement Program will aid Columbia to reach the Community Visioning recreation goal as expressed below.

Imagine Columbia's Future - Recreation Goal

"Columbia's recreational needs and desires will be met through effective public and private partnerships that provide outstanding, exciting and diverse recreational facilities such as, but not limited to, an ice skating rink, golf courses, tennis courts, soccer fields, ball fields, ball parks and swimming pools. These facilities will be placed appropriately throughout the city to allow easy access for everyone."

Section I - Existing Facilities

The following proposed projects are unfunded. Items in the City's FY13 Capital Improvement Program (CIP) that have a proposed, yet unsecured funding source (such as grants) are also contained in this list. CIP projects that have secured funding (such as those funded by 2010 Park Sales Tax) are not included in this list.

Estimated costs as shown below represent contracted work, unless otherwise indicated as force account labor (FAL). Where (FAL) is shown, costs are for materials only.

Park Construction Crew at Smiley Lane Park

See Appendix A for more information on each park.

Definitions

<u>Misc. park improvements (FAL)</u>: Basic repair of existing or new items such as signs, drinking fountains, bike racks, fencing, walkways, etc.

<u>Repair</u>: Minor construction improvements. Item remains basically as originally built. <u>Renovate</u>: Major construction improvements. Original structure remains the same.

Replace: Original item removed and a new item is constructed.

		ESTIMATED
LOCATION	<u>PROJECT</u>	COST
Again Street Pa	rk	
	Misc. park improvements (FAL)	\$10,000
	Replace medium playground	\$50,000
	Install synthetic playground safety surface	\$50,000

Section II – New Facilities (Location Undetermined)

The following proposed capital improvement projects were recommended via online park-user surveys, user group meetings, and numerous public input meetings. All categories require additional master planning to determine suitable locations at either existing or future parks. All facilities will meet ADA requirements and require restrooms and adequate parking – unless already provided at chosen location - to accommodate high use traffic. Estimated costs assume utilities are present.

If a facility is selected for possible funding, it is recommended that further planning, including the use of engineering consultants and an operating pro-forma analysis be conducted.

I. Tourism Development Facilities

The following proposed capital improvement projects were identified due to their ability to become a tourist destination site, as well as providing recreational facilities for residents.

- A. Campground (RV and tent camping)\$250,000 \$750,000Sites with camp grill, electricity, water, and sewer that is accessible by a one-way road system. Includes support facilities such as a restroom/bathhouse.
- B. Disc golf (championship course) \$180,000 \$510,000
 Certified PDGA 18-hole minimum golf course with total minimum hole length of 7,000 feet. Includes multiple concrete tee pads per hole, targets, and signs.
- C. Multi-use indoor sports field house \$3,000,000 \$5,000,000 Indoor synthetic turf field house for soccer, baseball, softball games and practices. Includes support amenities such as restrooms, locker rooms, concessions and offices.
- **D.** Synthetic Turf Sports Complex (10 12 fields) \$15,000,000 \$20,000,000 Synthetic turf field designed to host major tournaments. Fields could be used for sports such as football, rugby, lacrosse, ultimate Frisbee, etc. Includes support amenities such as shelters, restrooms, concession stands and spectator seating.

Did you know?

According to a New York Times readers' poll, Missouri is America's favorite state for camping -- beating out Colorado, Montana, and New York.

II. Community Facilities

The following proposed capital improvement projects were identified as primarily providing for recreation and competitive league and tournament play for residents. All facilities also have the potential to increase tourism related events. Due to lack of available space, there are no existing developed parks recommended to house the following facilities. Costs provided are for development only and do not include land acquisition.

 A. Indoor Facilities <u>Description</u> Indoor pickleball (4 – 6 courts) Community/recreation center Roller derby flat rink Racquetball courts (2 – 4 courts) 	<i>Estimated Cost</i> \$2,400,000 \$15,000,000 \$300,000 - \$450,000 \$450,000 - \$900,000
B. Outdoor Facilities	
<u>Description</u>	Estimated Cost
Archery practice range	\$80,000
• Archery special use park	\$150,000
(Develop parking at approximately 85 acres of wo	oded, rolling terrain)
• Bike park with BMX Track	\$550,000
• Bike polo court (2 – 4 lighted courts)	\$240,000
• Bocce ball courts (4 – 6 courts)	\$30,000
• Community garden plots (2 acre lot)	\$18,500
Community greenhouse	\$30,000
• Dog park (3 – 5 acre facility without water feature) \$60,000
• Equestrian trail (8 miles)	\$30,000
 Mountain bike trails (2 – 5 miles) 	\$5,250
• Racquetball courts (2 – 4 courts)	\$45,000 - \$90,000
Remote-controlled aircraft area	\$55,000
• Skate park (10,000 – 25,000 sq. ft.)	\$300,000 - \$750,000
• Winter sports park	\$250,000

III. Cooperative Joint-Use Facility

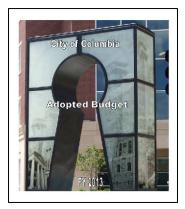

While any of the proposed facilities in this document are suitable for cooperative development and operation, the facilities below were specifically discussed as possible sponsorship between school districts, other governmental agencies, organizations, and private partners.

<u>Description</u>	Estimated Cost
Indoor competition/recreation pool	\$4,000,000 - \$6,000,000
• Tennis bubble (4 courts)	\$380,000
Nature/interpretative center	\$2,500,000 - \$4,000,000
• Elementary school gymnasium expansion (per school cost – new construction only)	\$150,000
Central Missouri Events Center	\$1,250,000

Section III - Capital Improvement Program

In order to plan for the most efficient and cost-effective parks and recreational facilities, a Capital Improvement Program (CIP) is developed and annually updated. This is conducted as part of the annual City budget; as each department prepares a five-year capital improvement program to address the capital needs of current and future years. It enables the scheduling of projects that represent citizen priorities and are within the fiscal capabilities of the City.

The following pages represent the Department's proposed Fiscal Year 2014 Capital Improvement Program. The "Current Budget FY-13" column represents current projects that have been approved and are being initiated by the Department. Upon adoption of the overall City budget by the City Council, projects under the column heading "Adopted Budget FY-14" are those projects that will be approved for that fiscal year. The next four years, FY-2015 to FY-2018, include projects that have some priority and may have funding available or planned. The projects listed in FY-14 have the highest priority and are listed in a

separate column in the spreadsheet. Longer-range projects (FY-15 and beyond) have been considered; but uncertainties of the future, such as, specifics on costs, locations, and funding affect their development status.

As the CIP is updated each year, some of these projects are scheduled as priorities when funding permits. Some projects may continue to be shown four to five years out in the priority schedule, as funding may not be available or citizen priorities force other new projects ahead. For example, the development of an outdoor aquatic facility has been identified in the CIP since 2002; but due to lack of funding, it has remained four to five years out. If funding through a grant or private donor becomes available for an aquatic facility, the project could easily be moved up in priority.

Beyond FY-14, cost estimates become less accurate and unforeseen changes could significantly alter the estimates and priorities of future CIP projects. Beyond the adopted budget year, there are no guarantees that projects will actually be built. However, it is important to include future projects in the CIP so they are identified and funding sources can be reserved or pursued.

The systematic approach of the CIP focuses attention on Columbia's needs, goals, and financial capabilities. It helps reduce scheduling conflicts and maintain a sound financial program. Each fiscal year, the City must select from its list of needed and desired projects those that are within its fiscal capability and that best serve Columbia's citizens. Annual review and revision of the Capital Improvement Program ensures the program remains responsive to changing demands and priorities of the community.

Conclusion

As with all planning documents, the Recommended Capital Improvements Chapter is considered to be a "living document" that will be continually updated and revised in order to meet the growing needs of Columbia's citizens. There are three primary goals of this chapter:

- 1. Identify all major maintenance and renovation projects.
- 2. Identify new facility needs.
- 3. Develop a five-year Capital Improvement Program.

It is understood that the list of projects realistically exceeds the amount of finances that are currently available. However, it is important to identify all park and facility capital improvement needs, as funding may become available through unknown sources, such as private donations, grants, future ballot issues, and/or partnerships with other governmental or private parties.

The list of recommended capital improvements is evaluated each year through the City's fiveyear Capital Improvement Program (CIP). It is through the CIP that priority projects are identified. The plan is prepared and adjusted annually and serves as the critical component of the comprehensive City budget. Citizen input is continually sought and is officially solicited during individual park planning sessions, Parks and Recreation Commission meetings, and various public hearings held during the City Council meetings.

Columbia is extremely fortunate that the community has supported the renewal of the 1/8-cent Park Sales Tax, which is the major funding source for parks and recreation capital improvement projects. During the economic downturn of the past several years, many parks and recreation departments were forced to terminate large numbers of employees, close facilities, such as swimming pools and recreation centers, cancel program offerings, and even close parks and trails. Columbia had to make several reductions during this period, but due to the dedicated Park Sales Tax, the Parks and Recreation Department was able to minimize the impact this reduction had on its citizens. As Columbia continues to grow, the Park Sales Tax is critical in keeping up with the city's growth and citizens' expectations of a high-quality, comprehensive park system.

Columbia has the four key elements needed to implement a successful capital improvement program:

- 1. An updated Parks, Recreation and Open Space Master Plan
- 2. Dedicated funding sources (Park Sales Tax, Golf Course Improvement Fund, Recreation Center Improvement Fund, and Recreation User Fee Fund)
- 3. Interactive citizen input process
- 4. Annual priority evaluation process through the Capital Improvement Program, as part of the City's annual budget process

These key elements enable the Parks and Recreation Department to achieve its mission to "improve our community's health, stability, beauty, and quality of life by providing outstanding parks, trails, recreational facilities, and leisure opportunities for all Columbia citizens."
