

# HIRING A PROFESSIONAL ARBORIST

## THE KEY TO HEALTHY TREES!

Arborists are trained in the proper care of trees

### WHAT IS AN ARBORIST?

Arborists specialize in the art and science of caring for and maintaining individual trees. They have the knowledge, training, and equipment to provide proper tree care.

### WHAT SERVICES DO ARBORISTS PROVIDE?

In addition to planting, pruning, and removing trees, arborists can diagnose and treat pests and diseases, and manage soil to improve tree health. They can even provide consulting and legal expert services.

The ISA promotes the professional practice of arboriculture

### ISA® CERTIFIED ARBORISTS

Certified Arborists are individuals who have passed a comprehensive examination developed by the International Society of Arboriculture (ISA), demonstrating their high level of tree care knowledge. Learn more at [isa-arbor.com](http://isa-arbor.com).
