

Capital Improvement Projects

For the Fiscal Year Ending September 30, 2024

Capital Improvement Program - Overview - City of Columbia, Missouri FY 2023

What is a Capital Improvement Program?

The City of Columbia's Capital Improvement Program (CIP) is a multi-year plan for capital investments in the City's infrastructure, facilities, and equipment. It is designed to address the challenges of supporting future infrastructure needs, while also addressing the City's current facility requirements. It includes items such as roads, bridges, sidewalks, public utilities, drainage projects, recreational facilities, building, and equipment. A CIP is important because it connects city development, comprehensive plans, and financial plans. Projects within the CIP are intended to reflect the community's values and goals, and also the overall policy goals of the City Council, including existing city-wide long range plans.

Columbia's City Charter provides policy for the Manager to follow in developing a CIP:

"The City Manager shall also secure an estimate of all capital projects pending and those which it is recommended should be undertaken (a) within the budget year, and (b) within the next five (5) succeeding years. In preparing the budget, the city manager shall review and may revise the estimates, as the manager may deem necessary."

Article 5. Section 35.

The City of Columbia's master plans are the basis for the CIP. Columbia has several master plans designed to reflect the long-term needs and goals of each department. These plans are formulated to establish long term development plans that reflect Council policies. These long term plans are periodically revised and updated to reflect the City's changing needs. The CIP is meant to contain projects that fulfill these long-term needs and goals.

City of Columbia Master Plans

- Community Development Department Master Plans
 - Sidewalks
 - Bicycles
 - Columbia Imagined: The Plan for How We Live and Grow
 - 2040 Long Range Transportation Plan
 - Metro Greenbelt/Trails
 - CATSO Major Roadway Plan and Transportation Improvement Plan
- Fire Master Plan
- Airport Master Plan
- Parks and Recreation Master Plan
- Transit: Long Range Plan, Para-Transit, CBD
- Wastewater and Storm Water Integrated Management Plan
- Water and Light
 - Electrical distribution
 - Water distribution
 - Water system
- COLT (Railroad)
- Downtown Columbia Charrette Report (2010)

The CIP manual is intended as a communication device, giving the public an opportunity to view the City's proposed plans for capital investment as well as providing the necessary link for offering feedback to the City Council and the City staff.

How is the CIP Document organized?

The CIP Document is grouped by department and includes a department narrative, a cover page with actuals from prior two years, anticipated current year, and proposed upcoming year, and report pages for all projects planned within the next five years. Each narrative includes information on what projects are upcoming, an update on current projects, and details on how projects in the department are funded.

The cover page includes information on the upcoming fiscal year as well as the prior three years. A graph shows the life-to-date authority compared to the actual expenditures, per department. Capital Improvement Projects are budgeted *life-to-date*, which means that authority budgeted in one fiscal year may be spent in another fiscal year. Directly below the graph is the data that feeds the graph. The information here shows the life-to-date authority, or appropriation. The table shows the expenditures in three categories: Prior Year Expenditures, Current Year Expenditures, and Encumbrances. The Total Remaining Authority by year is the Life-to-Date Appropriation less those three expenditures. The amount in the Proposed FY 2024 column reflects the remaining authority, plus the total amount of appropriations planned for FY 2024. The Fiscal Impact section of the summary page details the planned funding sources for FY 2024 – where relevant, a pie graph is featured.

The report pages include information such as the name of the project, status, ward, fiscal year construction begins, the total amount appropriated, amount spent to date, funding still needed, and any amounts that are unfunded and/or will require passage of a future ballot in order to be funded and proceed. If a funding source shows a negative amount, it is likely that the negative amount was transferred to another project.

How is the CIP developed?

The CIP begins as a planning document, which gives the City an opportunity to prioritize and coordinate existing and future capital project needs. It is prepared under the direction of the City Manager with the assistance of the Planning and Finance Departments. The City staff review of capital projects has proven to be almost a year-round process, with all city departments continually reexamining and prioritizing their capital needs. However, the capital financing process is most involved from January through May each year. During this period City staff is responsible for compiling project needs, reviewing cost estimates, identifying financing options and planning a program schedule. Meetings are scheduled with each department to review, add, modify and prioritize all project requests. The Planning and Zoning Commission are invited to review the CIP Dashboard in June. The proposed CIP is considered by City Council during the annual budget process. Following approval from the Council, it then becomes a financial document so the City can determine capital projects that are within its current and future fiscal capacity. A summary of the CIP process is provided below.

Schedule	Task
January	Projects are discussed within departments
February	Project priorities are discussed between departments and City administration
March	Final project requests are submitted by departments
March/April	Requests are reviewed by the City Manager and updated online on the CIP Dashboard.
June/July	The Planning & Zoning Commission reviews the CIP Dashboard.
July	Public hearing is held on the CIP. A five year CIP, with funding needs, is presented to

	Council with budget document and the public is given the opportunity to comment.
August	Budget hearings are held. The public has additional opportunities to comment.
September	Budget hearing incorporating final revisions and adoption of yearly CIP with approved adjustments. Revised CIP document is prepared to reflect any changes made during the budget process.

Deciding which CIP projects to move forward and determining project timing are both very important to serving the needs of the City of Columbia. During the initial stages of the annual CIP process, departments prioritize CIP project requests based on six different categories ranging from Urgent to Deferrable. Using common criteria for determining and prioritizing CIP projects is critical to formulating long-term and short-term plans that reflect the City's values and goals.

Various citizen committees may be formed and appointed by the Council to evaluate projects to be funded through proposed ballot issues. A recent example was the committee formed to assist with passage of the Transportation Sales Tax issue approved by voters in November 2005, which included a list of priority projects to be funded by this tax as part of the CIP.

How are projects in the CIP funded?

The City of Columbia Finance Department evaluates the City's ability to pay for proposed capital projects. This is accomplished by reviewing past revenue and expenditure trends, as well as forecasting future revenues and expenditures for the course of the CIP period. The purpose of this process is to determine the amount of revenue, reserves, and fund balances available from existing sources to pay for capital investments to meet community needs. The following is a list of funding sources for City of Columbia CIP:

Capital Improvement Sales Tax

The City of Columbia uses the Capital Improvement Sales Tax to meet capital needs for Public Safety and Transportation. This is a temporary one-quarter cent (0.25%) sales tax which was first approved in 1991 and must be approved by voters to be extended. In August, 2015 voters approved the extension of the sales tax which will expire on December 31, 2025.

Parks Sales Tax

Columbia voters approved a one-quarter cent (0.25%) Parks Sales Tax in April, 2000. Half of this tax, or one-eighth cent (0.125%), is a permanent tax to support operational costs as well as limited capital projects. The remaining one-eighth cent is temporary and must be presented to the voters to be extended. This temporary portion has been used for capital projects, including construction of new parks and trails. The current one-eighth temporary tax was extended by voters in November 2021, for ten years, and will expire March 30, 2032.

Development Charges

When a building permit is issued for new construction, the City of Columbia assesses a fee, currently \$0.50 per square foot. Revenue from this fee is used for construction of collector and arterial streets.

County Revenue

This revenue originates with Boone County's one-half cent (0.50%) sales tax for road and bridge maintenance. Boone County has agreed to share a portion of the revenue with local municipalities. The City of Columbia utilizes this funding source to improve, maintain, construct and repair city streets and roads. This County tax was renewed by voters in 2018 for a 10-year period, and expires in 2028.

Transportation Sales Tax Fund

This fund accounts for the City's one-half cent (0.50%) sales tax used to fund transportation-related projects. Examples include the public mass transportation system, construction and maintenance of streets, roads, bridges and airports, to the extent of tax revenues.

Designated Loan Fund

This fund includes monies set aside to provide loans to various Enterprise and Internal Service Funds.

Public Improvement Fund

The Public Improvement Fund was established to account for and disburse the portion of 1% General Revenue sales tax proceeds which have been allocated for the Capital Improvement Plan. The fund receives a portion of the city sales tax and is allocated for a wide range of public improvements to the City which includes general government projects. The amount of the one cent General Fund Sales Tax allocated to capital improvements from FY 01 to FY 19 was 4.1%. In FY 20, City Council approved an amendment to reallocate 2.1% of the General Sales tax back to the General Fund.

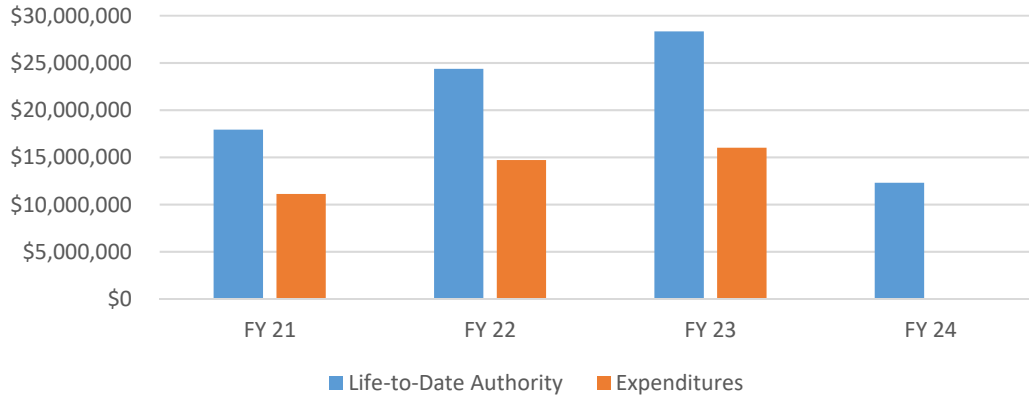

Bond Funds

Utility funds (Water, Electric, and Sewer) may obtain voter approval for bond issues to help finance their capital project needs.

Enterprise Revenue

Enterprise Funds (Railroad, Water, Electric, Airport, Solid Waste, Sewer, Storm Water, and Parking) generate their own revenue which may be used to finance their capital project needs.

To-Date Authority vs. Expenditures

Capital Projects Authority

	Actual FY 2021	Actual FY 2022	Anticipated FY 2023	Adopted FY 2024
Total Life to Date Appropriation	\$17,922,751	\$24,360,937	\$28,332,602 *	\$12,293,208 ***
Prior Year Expenditures	\$10,975,186	\$11,299,650	\$14,702,129 *	
Current Year Expenditures	\$142,922	\$3,402,322	\$1,302,416 **	
Encumbrances	\$191,092	\$93,904	\$689,849 *	
Total Remaining Authority	\$6,613,551	\$9,565,061	\$11,638,208	

* This is current as of June 2023

** Includes estimate from department

*** Includes FY 24 budget request of \$655,000

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Projects planned in FY 24 are funded through the Public Improvement Fund and Convention & Visitor's Bureau (CVB).

FY 24 Funding Sources

General Government Capital Projects

A Look Ahead

Long term capital planning for General Government needs includes capital projects for public facilities and other community-related capital projects the City chooses to support. Examples include community-based capital projects in the City's central business area. The City has worked closely with the Special Business District and other groups to provide funding for improvements to the central business area of the City. Capital contingency funds are also budgeted in this section.

Current Projects

There is \$655,000 in appropriations planned for General Government Capital Projects for FY 24. The majority of this appropriation is for Daniel Boone Building Repairs (\$500,000). An additional \$100,000 is for HVAC work at the Health Department. The remainder is made up of \$40,000 for major maintenance in public buildings and \$15,000 for Walton Building improvements. Excluding the Walton Building, these projects are funded through our Public Improvement Fund. The Walton Building, which is where the Convention & Visitors Bureau (CVB) is housed, is funded through a transfer from CVB.

Funding Sources

The City primarily uses local funding sources to meet its capital improvement needs for General Government projects. However grant funds are utilized whenever possible. The amount of the one cent General Fund Sales Tax allocated to capital improvements for FY 24 is 2%.

*** Includes FY 24 budget request of \$3,861,849

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Parks & Recreation Capital Projects are primarily funded through the Park Sales Tax. This tax was renewed by the voter's in FY 21.

Beginning in FY 24, Rec Services capital projects will be included in Parks & Recreation.

Note: In FY 24, Rec Services and Parks & Rec capital projects were combined into one fund.

FY 24 Funding Sources

Parks & Recreation Capital Projects

A Look Ahead

Long-term capital planning in the Parks and Recreation Department takes place in three categories of capital projects; parks, trails and recreation facilities. Staff uses master plans, the recommendations of the Parks and Recreation Commission, and public input to assist in the planning process. In addition to the large easily identifiable projects, staff has established a generic “annual needs” program which provides funding for projects that are desirable, necessary, and meet needs identified in a master plan, although a specific project may not be identified at this point in time. These annual funds are often utilized as the City’s matching funds for various state and federal grants.

The long-term capital plan is guided by the *2013 Parks, Recreation and Open Space Master Plan*. This planning document is the result of extensive public input, numerous public and focus group meetings to ascertain citizens’ recreation facility needs and the results of two city-wide surveys. Public hearings were held by both the Parks and Recreation Commission and the City Council prior to their adoption of the Master Plan in October 2013.

The long-term capital plan for trails and greenbelts is derived from both the 2013 Trails Plan and the *2013 Parks, Recreation and Open Space Master Plan*. Public input played a key role in the development of the recommendations made in both of these planning documents. Public hearings were held by the Park and Recreation Commission, the Planning and Zoning Commission, and City Council as part of the approval process of the Trails Plan.

Parks and Recreation staff periodically reviews the condition of the various facilities used to provide recreation programs and services. Citizens also provide feedback on needed improvements and/or enhancements to these facilities. The capital plan for these facilities is developed using such input, as well as guidance from the *2013 Parks, Recreation and Open Space Master Plan*. Parks and Recreation staff periodically reviews the condition of the various facilities used to provide recreation programs and services.

Current Projects

- \$300,000 - Albert-Oakland Park Improvements - Proposed improvements include the replacement of shelters #2 and #3 and adjacent playground, renovations to the tennis and pickleball courts, and renovations to the Albert-Oakland Family Aquatic Center bathhouse.
- \$275,000 - ARC Facility Improvements - Proposed improvements include the replacement of the water play structure in the Waterzone and all rubber flooring in the aquatics offices and meeting room. The water play structure and flooring are original to the building and over 20 years old. Capital funds will also be used to improve access points in the building, make building foundation repairs and paint the natatorium ceiling. Funding was also included in FY2023.
- \$907,000 - Douglass Park Skate Park and Aquatic Facility Improvements - The project will include phase II improvements to the skate park, improvements to the existing basketball courts and renovations to the aquatic facility bathhouse. Funding comes from Park Sales Tax revenue, a private donation and a Community Revitalization Grant from the Missouri Department of Economic Development.
- \$350,000 - Gans Creek Recreation Area Improvements - Proposed improvements will include the construction of a small shelter, 6 to 8 mile natural surface trail on the east side of park. Funding will also be used to add a playground and additional cross country small shelters at the running facility. Funding includes a \$125,000 donation from the Frank W. Morris Memorial Trust.
- \$200,000 - Gates Nature Area Development - This project will include development of the 65-acre park property. Proposed improvements could include parking, trails, neighborhood park features and interpretive signage. Park development and amenities will be selected through the public improvement process.
- \$40,000 - Golf Course: Golf Cart Building Improvements - This project will include renovations of the existing cart storage building at L.A. Nickell Golf Course. Renovations include improving the electric service to allow for electrification of the golf cart fleet, enclosing the building to improve security, new concrete floor and new exterior fencing. Funding was also included in FY2023.
- \$200,000 - Orr Street Park Development - This project will focus on the development of the 2-acre Orr Street park property including site cleanup, open space, walking trail and landscaping. Funding was also included in FY2023.

- \$350,000 - Rock Quarry Park Improvements - Proposed improvements to the park include replacement of the existing playground, parking lot improvements, refurbishment of the tennis courts and renovations to the Rock Quarry Home.
- \$350,000 - Twin Lakes Recreation Area Improvements - Proposed improvements could include replacement of the current aquatic facility, parking renovations and new shelter.
- \$100,000 - Waters-Moss Jones House Renovations - This project will include renovations to the Jones house at Waters-Moss Memorial Wildlife Area to convert the building into a space for rent or use by park staff.
- \$150,000 - Westwinds Park Improvements - Project includes playground replacement, replacing existing playground safety surfacing, gravel trail improvements and misc improvements such as signs, fencing and retaining wall replacement.

Funding Sources

Parks and Recreation capital projects are primarily funded with a temporary one-eighth cent park sales tax. This tax was first effective in April 2001 and was extended by voters through ballots held in 2005, 2010, 2015 and 2021. The current tax was approved by voters for a ten-year extension and will expire March 31, 2032. This tax is the primary funding source for the department's capital improvement program.

After extensive public and user group input, staff recommends to Council a list of projects from the CIP for consideration of funding by the park sales tax along with an implementation schedule. These projects are tied to the ballot issue via legislation and commit the projects for completion.

Another CIP funding source is the Recreation Services User Fees (RSR). A portion of fees paid by park users are set aside to provide funding for capital projects at recreational facilities. Currently, RSR is being used to repay the City's designated loan fund for the construction of the Columbia Sports Fieldhouse Phase I construction. It is anticipated that based on an estimated loan payment of \$120,000 per year, this loan will be paid off in 2028. Additionally, user fees charged at the City's two golf courses (GCIF) and the Activity & Recreation Center (ARC) may only be used for those facilities.

Staff is continuously searching for funding opportunities through various grants and donations. Grants have also provided significant funding for the parks and trail system in Columbia.

Fiscal Impact:

- Albert-Oakland Park Improvements - Staff anticipates minimal impact related to expenses as the maintenance should remain relatively the same.
- ARC Facility Improvements - The improvements replace the existing water play structure and flooring that is over 20 years old. These improvements will reduce the required maintenance for the water play structure.
- Douglass Park Skate Park and Aquatic Facility Improvements - Staff anticipates minimal impact related to expenses as the maintenance should remain relatively the same.
- Gans Creek Recreation Area Improvements - Annual maintenance estimates for the park, after all construction is completed, are estimated at \$3,000 to \$4,000 and include mowing, utilities, maintenance, trash service and shelter cleaning. The Columbia Trail Association has agreed to assist with the trail maintenance.
- Gates Nature Area Development - Annual maintenance estimates for the park, after all construction is completed, are estimated at \$4,000 to \$6,000 and include mowing, utilities, maintenance, trash service and cleaning shelters.
- LAN Golf Course: Golf Cart Building Improvements - Staff anticipates minimal impact as the project will improve the existing facility and provide the opportunity to convert from gas golf carts to electric golf carts.

- Rock Quarry Park Improvements- Staff anticipates minimal impact related to expenses as the maintenance should remain relatively the same.
- Twin Lakes Recreation Area Improvements - Staff anticipates minimal impact related to expenses as the maintenance should remain relatively the same.
- Waters-Moss Jones House Renovations - Any increased maintenance expenses would likely be offset by rental revenue.
- Westwinds Park Improvements - Staff anticipates minimal impact to expenses as the maintenance should remain relatively the same.

Strategic Plan Alignment

The Parks & Recreation Department's Capital Improvement Projects (CIP) align with the Strategic Plan's Priorities Areas in Organizational Excellence and Reliable Infrastructure. Organizational Excellence outcome objective four is to improve the residents' and visitors' experience across City services. ARC Improvements include the replacement of the water play structure and renovations to the water slide. These popular features are 20 years old and original to the facility. The ARC is the only public indoor aquatic facility in Columbia.

Reliable Infrastructure Outcome Objective One is to maintain and expand Columbia's infrastructure. All of the Parks & Recreation Department's Capital Improvement Projects lend themselves to accomplishing this outcome objective. The proposed ARC improvements previously mentioned will extend the lifespan of the pool and features by 15-20 years. The Douglass Pool improvements project will include the renovation of the existing bathhouse, improving the usability of the facility. Playground replacements at Twin Lakes Recreation Area, Rock Quarry Park and Douglass Park ensure there are safe playgrounds in place at each park for the next 20 to 25 years.

Reliable Infrastructure Outcome Objective Two is to improve Columbia's infrastructure to equitably expand where infrastructure is lacking. The current list of projects for FY2024 include the development and renovation of various parks and facilities throughout Columbia.

Reliable Infrastructure Outcome Objective Three is to Prepare Columbia's natural and built environments for the impacts of climate change. In an effort to continue moving towards fleet electrification, the Department is also planning on renovating the existing cart shed at LA Nickell Golf Course. This renovation would include similar cart charging infrastructure as the one at Lake of the Woods and will be able to accommodate an equal number of electric golf carts. Improvements at Twin Lakes Recreation Area, Orr Street property, Rock Quarry Park and Gans Creek Recreation Area will include the planting of new trees at each site improving the City's tree canopy inventory.

CAAP Alignment

The LA Nickell Cart Shed improvements align with the CAAP priorities for renewable energy and clean transportation. Shifting from gas powered golf carts to electric will reduce the facility's greenhouse gas emissions as well as move in the direction of fleet electrification.

The ARC Improvements project aligns with the City's CAAP goals to reduce greenhouse gas emissions. The existing boiler is original to the facility and was rated at 85% efficiency when it was installed during the facility construction over 20 years ago. Due to calcification and part degradation, it is estimated by an engineer to currently be operating at approximately 50% efficiency. The replacement boiler is rated at 97% efficiency and will greatly reduce the energy consumption required to heat all non-aquatic facility water for the entire facility.

Improvements at Douglass Park align with the CAAP goals to reduce energy consumption. The basketball courts, bathhouse, and swimming pool will all receive new LED lighting.

Improvements at Twin Lakes Recreation Area, Orr Street property, Rock Quarry Park and Gans Creek Recreation Area will include the planting of new trees at each site improving the City's tree canopy inventory.

Annual land acquisition funding allocates \$150,000 per year for the acquisition of parks, greenways, and natural areas, allowing the Department to continue to increase Columbia's natural resource inventory. This funding is the only dedicated funding in the City's budget dedicated to the preservation of green space in Columbia. As the City continues to grow outward, it is crucial to continue to utilize these funds for acquisition of land for future park and natural area development.

* This is current as of June 2023

** Includes estimate from department

*** Includes FY 24 budget request of \$3,581,544

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Funding for Public Safety Capital Projects primarily comes from Capital Improvement Sales Tax. For FY 24, proposed projects include replacing a 2009 quint and work on the Molly Thomas Bowden Neighborhood Policing Center.

Public Safety Capital Projects

A Look Ahead

The Columbia Fire Department has identified several capital projects to support the operations of the growing community. Fire Station #5, located at the corner of Ballenger Lane and Ria Street, is an aging structure in need of immediate structural corrections. An evaluation on alternative locations for Fire Station #5 to adjust for growth and call demand will also be considered. Fire Station #4, located on Oakland Gravel Road and Fire Station #6 on Chapel Hill Road, are two additional older stations within the city and require remodels due to a lack of recent upgrades. A remodel of Fire Administration on Orr St is also on the horizon within the next few years to adjust office space for new support positions within the department. As we continue to adapt to the growing community, we will evaluate the need to expand services to include the positioning of Fire Station #12 and future fire facilities. Several fire stations will require roof repairs or replacements, as well as concrete repairs to station parking lots and the bay aprons. All of these construction projects will help support the City's Strategic Plan with the Safe Neighborhoods section to improve the city's fire protection coverage. These construction projects will be planned using recommendations from the CAAP to ensure that we are being good stewards of the environment.

The Fire department will continue replacing a fire apparatus each year following the vehicle replacement master plan schedule. As well, with the addition of Fire Stations #10 and #11, the department will require an additional fire apparatus for each station to be purchased and placed in service immediately. Quint 11 has been ordered and should be delivered in the fall of 2024 and Quint 10 will be ordered by late summer of 2023. Several other front line and specialty fire apparatus are in line for replacement in the next five years.

The Columbia Police Department's capital improvement plans respond to community growth and support the strategic priorities of Safe Neighborhoods and Organizational Excellence. Building designs will take CAAP priorities, especially those relating to energy use and vehicle emissions, into account. In FY 2024, work on Phase 2 of the Molly Thomas Bowden Neighborhood Policing Center is planned. Completing this center is a priority to fulfill CPD's commitment to establish a center that responds to the needs of residents in north Columbia. Additional future projects include, in priority order:

- Providing adequate storage for evidence supports Organizational Excellence. As the steward for items used during criminal prosecutions, the Department must maintain evidence in a secure, controlled environment, sometimes for many years. The Department is evaluating space in a building adjacent to Police headquarters to see if it could be adapted for proper storage.
- A proposed new facility in south Columbia would support Safe Neighborhoods in an area that continues to grow and develop. Its function would be similar to that of the Molly Thomas Bowden Neighborhood Policing Center.
- As Department staff transitions to north and south locations, the Department's downtown location can be remodeled to more effectively house administrative personnel and contribute to Organizational Excellence.

Current Projects

The Fire department is currently underway with two large capital projects. Fire Station #11 is under construction in the southwest section of the city with anticipated opening in the fall of 2023. A site acquired in June of 2023 for Fire Station #10 in the east section of the city is set to begin the public improvement process. It is desired the process will pave the way to retrofit the current structure on the site into usable space to service the area and prepare for the permanent Fire Station #10 to be designed and built in 2025. Challenges to both of these projects have caused an increase in funding needed to complete the expansions due to rising construction and material costs.

Funding Sources

The city utilizes primarily local funding sources to meet its capital improvement needs for public safety; however grant funds are utilized whenever possible.

Sales taxes from the Capital Improvement Sales Tax make up a substantial amount of funding for public safety. In 1991, 1995, 1999, 2005 and 2015 Columbia voters extended the ¼ Cent Capital Improvement Sales Tax ballot issues that included listings of specific projects to be funded with this tax. The current tax expires in December 2025.

Public Safety

Total Remaining Authority	\$12,923,953	\$20,899,377	\$23,711,108	

* This is current as of June 2023

** Includes estimate from department

*** Includes FY 24 budget request of \$6,342,769

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Projects are funded by Capital Improvement Sales Tax, County Road Tax Rebate, Public Improvement Fund/Development Fees, and Misc. Revenues.

In FY 24, projects will be funded through the County Road Tax Rebate, Development Fees, and Capital Improvement Sales Tax.

FY 24 Funding Sources

Streets and Sidewalks Capital Projects

A Look Ahead

Projects that are planned to be constructed over the next five years include the following:

Ash Street Improvements - This project will include the construction of bike and pedestrian improvements along both sides of Ash Street between Providence Road and Clinkscales Road. The non-motorized improvements will address goals in both the Strategic Plan/Infrastructure and the CAAP.

Garth Avenue Improvements - This project will include completing major maintenance of Garth Avenue between Business Loop 70 and Thurman Street. The improvements will include sidewalk repairs, filling in sidewalk gaps, concrete pavement repair, curb and gutter repair, and an asphalt overlay. Both the sidewalk improvements and the pavement repairs will address Strategic Plan/Infrastructure goals. The repair and construction of sidewalks will address CAAP goals.

Forum Boulevard Improvements - This project will include improving Forum Boulevard from Chapel Hill Road to Woodrail Avenue to include additional driving lanes, turn lanes, bike lanes, sidewalks, and intersection improvements. The project will also include replacement of the bridge over Hinkson Creek. The non-motorized improvements will address goals in both the Strategic Plan/Infrastructure and the CAAP.

Route K and Old Plank intersection improvements - This project will include the construction of a roundabout at the State Route K and Old Plank Road intersection. The project will also include construction of sidewalks and crosswalks.

Sidewalk projects - Various sidewalk improvement projects will be completed throughout the City over the next few years to fill in sidewalk gaps and to repair existing sidewalks. Sidewalk project locations include the north side of Chapel Hill Road between Fairview Road and Rock Face Court; the south side of Broadway between Stadium Boulevard and West Boulevard; the northwest side of Scott Boulevard between Christian Fellowship Road and Silvey Street; the south side of Grindstone Parkway between Veterans United Drive and Norfleet Drive; and the north side of St. Charles Road between Clark Lane and Demaret Drive. Funds will also be included for the sidewalk cost share program. The sidewalk improvements will address goals in both the Strategic Plan/Infrastructure and the CAAP. Many of these locations are also included in the Sidewalk Master Plan.

Current Projects

Projects that are in final design or are ready for construction include the following:

Ridgemont Bridge replacement - This project includes the replacement of the bridge on Ridgemont over County House Branch. The construction of the bridge will include two driving lanes, and an 8-foot wide sidewalk on the south side of the bridge. The bridge will be constructed such that it can be expanded to include a 5-foot wide sidewalk on the north side of the bridge. The construction of the bridge is anticipated to be completed in the fall/winter of 2023.

Sexton Road sidewalk replacement - This project includes the reconstruction of the sidewalk along the south side of Sexton Road between Garth Avenue and Mary Street. The project also includes improvements to the two mid-block pedestrian crossings. Construction of the project is anticipated to be completed in the spring of 2024.

Greek Town sidewalk improvements - This project includes the reconstruction of portions of existing sidewalks along the streets surrounded by Providence Road, Kentucky Boulevard, Tiger Avenue, and Rollins Street. The project also includes the construction of new sidewalks along Curtis Avenue to fill in the sidewalk gaps. This is a cost share project between the City and the University of Missouri. Construction of the project is anticipated for the summer of 2024.

Hinkson Avenue sidewalk improvements - This project includes the construction of sidewalks to fill in

the sidewalk gaps on the south side of Hinkson Avenue between Nichols Street and College Avenue and construction of sidewalks on both sides of Nichols Street. This is a cost share project and construction is anticipated for the fall/winter of 2023.

Funding Sources

Funding sources include ¼-cent capital improvement program sales tax, county road rebate tax, development fees, developer contributions, transportation sales tax, and various federal and state grants. The ¼-cent capital improvement program sales tax is a temporary sales tax shared with public safety (fire and police). It has been extended by voters every 10 years (2016-2025).

* This is current as of June 2023

** Includes estimate from department

*** Includes FY 24 budget request of \$3,431,942

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

There is funding planned for three Transit projects in FY 24 - two are related to annual transit projects and bus replacement and the other is for the Grissum Bus Barn.

Funding for these projects comes from FTA (Federal Revenues) local match funding and a transfer from Transportation Sales Tax.

FY 24 Funding Sources

Transit Capital Projects

A Look Ahead

In FY23, GoCOMO moved forward with a comprehensive transit study conducted by a consulting firm.

Over the next five years, GoCOMO will, as funding, infrastructure, and availability allow, replace vehicles at the end of their useful life with Low or No emission vehicles, with a priority on electric buses.

Current Projects

Vehicle replacement is an on-going priority. With vehicle availability at or near a standstill due to manufacturing delays, GoCOMO is ordering vehicles, but with the understanding that fulfillment may be several years in the future. The upgrade to the video surveillance around Wabash station for security purposes has been completed.

Funding Sources

GoCOMO applies for funding through grants offered by the FTA and MoDOT for both vehicle replacement and operating expenses. Transportation Sales Tax proceeds provide local matching funds required by the FTA. GoCOMO remained fare-free for FY 23, so no matching funds are available through the fare system.

Annual Bus replacement - PT053

1560

Description: Federal Grant for on-going bus replacement, This project is where the federal money will be appropriated if the grant is awarded. The local match is located in CIP #1549. ** Includes estimate from department

*** Includes FY 24 budget request of \$2,567,565

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Airport has one capital project planned for FY 24 - RW 2-20 Spall Repairs of TW B. This project will be funded with an FAA Grant, and a 10% matching grant from Transportation Sales Tax (TST).

Airport Capital Projects

A Look Ahead

The Capital Improvements Plan (CIP) budget is updated annually. The CIP is a multi-year plan for capital expansion and the replacement of aging facilities. As part of preparing the CIP, airport runways, taxiways, aprons and all associated airfield and public infrastructure are evaluated for adequacy and replacement requirements. The airport staff and contract Consulting Engineers develop recommendations for the CIP based on the Airport Master Plan, existing infrastructure conditions, and FAA or TSA requirements. These recommendations then go through a review process that includes the Airport Manager, Economic Development Director, City Manager, and finally the Columbia City Council.

Various evaluation tools are utilized to prepare recommendations outlined in the annual CIP. These include routine inspections for evaluation and projection of future traffic quantities and types through Airport Master Plan updates, and the evaluation of existing and projected operating practices.

In addition, we have active safety, security and preventive maintenance programs in place to identify problem areas that may require inclusion in the CIP. These programs include:

1. Three daily inspections of all airfield areas by Airport Safety Officers
2. FAA issued CertAlerts and Advisory Circulars
3. Wildlife Hazard Management Plan
4. TSA issued Airport Security Plan 1542 amendments
5. Monthly and annual inspections by Airport Maintenance personnel in compliance with the FAA-approved pavement maintenance plan
6. Periodic crack filling and sealing of all airfield paved areas in accordance with the pavement maintenance plan
7. Annual compliance inspection by FAA officials
8. Annual compliance inspection by TSA officials

Current Projects

Glycol Recovery System

This system will capture runoff from aircraft deicing. This will ensure that the glycol is recycled. This project is expected to be completed in 2024.

Airport Master Plan Update

The last master plan update was done in 2008. The Runway 2 Extension project was the last project in that master plan. The new master plan will cover projects for approximately 20 years. This planning project will begin in August 2023 and is expected to be complete in 2024.

Car Rental and Airport Administration Design and Construction

The design for the rental car facility began in 2023 and is expected to conclude in six months.

The construction is expected to begin in early 2024.

Airport Terminal Boarding Bridge

The FAA is funding a fourth boarding bridge for the new terminal. This bridge will complete the airside needs of the new terminal.

Runway 2-20 Isolated Rehabilitation Project

A PCI survey was completed in 2023 and this data will determine the scope of rehabilitation needed for Runway 2-20 in early 2024.

Funding Sources

Funding for the airport CIP program is a combination of Federal Airport Improvement Program (AIP) grants, Missouri Department of Transportation (MoDOT), and City of Columbia matching funds from various sources, including transportation sales tax revenues. This Federal funding generally covers 90% of qualifying project costs. For major runway projects, AIP discretionary funding may be available (also at 90%) for amounts greater than entitlement fund balances.

The City passed a temporary 1% hotel tax in August of 2016 to fund some of the new Airport terminal project costs including issuing a bond. Other sources that will be used to fund the projects associated with the new Airport terminal include bonding on passenger facility charges, CARES funds, FAA grants, and transportation sales taxes.

Total Remaining Authority	\$1,082,446	\$1,137,318	\$1,288,596	

* This is current as of June 2023

** Includes estimate from department

*** Includes FY 24 budget request of \$300,000

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Parking Capital Projects are funded through parking revenue. In FY 24, staff is proposing \$300,000 in funding for repair and maintenance of the downtown parking ramp.

Parking Utility Capital Projects

A Look Ahead

The Parking Utility will over the next five years seek to install, in conjunction with the city-wide fleet electrification project, level 2 charging stations in public areas. The Utility will also continue to upgrade surveillance cameras and lighting throughout city parking structures and elevators for maximum security. Yearly analysis of garage and lot conditions will continue so as to keep all parking resources operating in the best condition possible.

Current Projects

The security fencing project for the 5th/Walnut structure is completed. The top floor was completed in February 2022 and fencing for the individual level panel openings was completed in April 2023. The major maintenance for the 8th/Cherry structure is in process and expected to be completed by August 11, 2023. Camera and server upgrades are in progress, as well.

Funding Sources

As the Parking Utility is a self-funding entity, all funding for projects will come from revenues related to parking permits and metered spaces.

Ramp Maintenance and Repair PK078

** Includes estimate from department

*** Includes FY 24 budget request of \$100,000

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Railroad Capital Projects are funded through enterprise revenue. In FY 24, staff is proposing \$100,000 in funding for four annual projects.

Railroad Capital Projects

A Look Ahead

The Capital Improvements Plan (CIP) Budget is updated annually. The CIP is a multi-year plan for capital expansion and replacement of aging facilities and infrastructure. As part of preparing the CIP, the short line railroad is evaluated for adequacy and replacement requirements. The railroad engineering staff develops recommendations for the CIP based on the condition of existing infrastructure, other public projects impacting the railroad, railroad traffic conditions, railroad customer requirements, and railroad operating requirements. These recommendations then go through a review process including the Director of Water & Light, the City Manager, the Railroad Advisory Board (a citizen advisory board), and finally the Columbia City Council.

Various evaluation tools are utilized to make recommendations outlined in the annual CIP. These include evaluation of existing infrastructure conditions through routine inspections, review of maintenance records, evaluation and projection of future traffic quantities and types, evaluation of existing and projected operating practices, and use of detailed analytical models to predict failure rates and asset lives.

Current Projects

Annual maintenance projects continue to be worked on as funding is available.

The Railroad received a grant from the Missouri Department of Transportation (MoDOT) to replace ½ mile of tie and rail. This project is currently being bid and will begin construction in the spring 2023.

Funding Sources

Funding for the railroad CIP program is a combination of enterprise revenue and funding from other governmental entities.

** Includes estimate from department

*** Includes FY 24 budget request of \$1,650,000 from enterprise revenues

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year

Fiscal Impact

The budget includes the major capital improvements that are outlined in our Capital Improvement Program. Projects will cause an incremental impact on operational costs.

Funding for Water Capital Projects primarily comes from Enterprise Revenue generated by the Water Utility and the 2018 Water Ballot bond sales. For FY 24, the requested \$1,650,000 in new funding is from Enterprise Revenue.

Water Capital Projects

A Look Ahead

The Capital Improvements Plan (CIP) Budget is updated annually. The CIP is a multi-year plan for capital expansion and replacement of aging facilities and infrastructure. As part of preparing the CIP, the water system is evaluated for adequacy and replacement requirements. The water utility engineering staff develops recommendations for the CIP after consultation with the water distribution and water production staff. These recommendations then go through a review process including the Director of Water & Light, the City Manager, the Columbia Water & Light Advisory Board (a citizen advisory board), and finally the Columbia City Council.

Various evaluation tools are utilized to make the recommendations outlined in the annual CIP. These include evaluation of fire flows and system pressure; evaluation of customer growth patterns; communication with inter-connected systems; and the evaluation of needs to upgrade smaller size lines and/or replace older lines due to a history of breaks.

In addition, an active preventive maintenance program is in place to identify problem areas that may require inclusion in the CIP. This program includes:

- 1.) Formal monthly inspections of pump stations and storage facilities.
- 2.) Annual flushing and testing of distribution systems.
- 3.) Sampling and monitoring of supply wells.
- 4.) Cooperation and compliance with State operated agencies such as the Department of Natural Resources

Current Projects

These capital investments in the water system will help insure continued reliable service. A bond proposal was approved by voters on August 7, 2018.

Water Treatment Plant Upgrade Phase 1

Project will restore capacity of the existing McBaine Water Treatment Plant, modernize the facility, and provide planning for future phases of improvements. Staff has entered into a contract with HDR Engineering, Inc. for the design of the project. The contract includes pilot testing and evaluation of treatment alternatives to be incorporated into a future phase of improvements. Construction will be funded with a future bond sale.

Southeast Pressure Zone

This project will construct a pump station to provide a new pressure zone in the Southeast portion of the City's water service territory to increase water pressure and the level of service to customers in this area. Staff has entered into a contract with Black and Veatch for design services and to assist site selection for the new pump station.

New Elevated Storage

Staff is currently evaluating suitable locations for a new water tower in the Southwest portion of the City's water service territory. The project provides water system reliability within the City's main pressure zone.

West Ash Pump Station

This project will modernize this pump station with new controls and electrical gear to ensure continued reliability of the facility. Staff has entered into a contract with HDR Engineering Inc. for design services on this project.

Funding Sources

Funding for the water CIP program is a combination of revenue bonds and enterprise revenue. In general, an attempt is made to balance funding between these two sources, with more reliance on bond funding when undertaking projects lasting a long period of time. Staff has evaluated the capital plan to place a higher emphasis on production and storage upgrades during the next several years. A ballot issue was approved by voters in August 2018. These revenue bonds will provide funding for numerous identified projects for the period FY 2019 - FY 2023. Enterprise revenue and prior year appropriations will provide funding for other CIP projects in FY 2024.

** Includes estimate from department

*** Includes FY 24 budget request of \$4,350,000

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

This includes the major capital improvements that are outlined in our Capital Improvement Program. Funding for Electric Capital Projects primarily comes from Enterprise Revenue generated by the Electric Utility.

Due to the significant delay in the major substation and transmission projects and the requirement to spend down funds from the bond sale, transfers between enterprise funded projects and bond funded projects may be necessary to ensure bond funds are spent within the required time period.

Electric Capital Projects

A Look Ahead

The electric system is regularly evaluated for adequacy and replacement requirements to develop the multi-year CIP to plan for capital expansion and replacement of aging facilities and infrastructure. The engineering staff of the electric utility develops recommendations for the CIP after consultation with the electric distribution and electric production staff. These recommendations then go through a review process that includes the Utilities Director, the City Manager, the Columbia Water & Light Advisory Board (a citizen advisory board), and finally the Columbia City Council.

Evaluation of potential CIP projects includes evaluation of circuit loading after system peak; evaluation of customer growth patterns; communication with inter-connected systems; and, evaluation of the need to upgrade lower voltage lines and/or replace older lines due to a history of faults. The Integrated Electric Resource and Master Plan (IERMP) was completed in 2021 and presented to the City Council in December 2021. This plan includes recommended improvements to distribution circuits and substations. Staff is working to program the identified improvements into the Capital Improvement Program as funding becomes available.

In addition, an active preventive maintenance program is in place that can identify problem areas that may require inclusion in the CIP. This includes:

- 1.) Formal monthly inspections of electric substations.
- 2.) Periodic oil testing of distribution transformers and other major equipment.
- 3.) Infra-red scans of electric substations every six months.
- 4.) Infra-red scans of transformers at large industrial customers annually.
- 5.) Eleven tree-trimming crews to maintain clearances on overhead lines.

These projects closely align with the Strategic Plan goals of organizational excellence and reliable infrastructure. Improving existing electric infrastructure reduces the occurrence of outages.

Current Projects

The FY24 Capital Improvement Plan includes projects to add an additional station class transformer and switchgear lineup to the Perche Creek Substation and to replace two existing transformer and switchgear lineups at the Bolstad Substation. Work at Perche Creek Substation will also include replacing circuit breakers that are past their useful life. Additionally, staff is working to develop a plan to implement and fund Advanced Metering Infrastructure (AMI) that will allow for remote meter reading, the ability to better monitor load, and the implementation of more advanced rate structures in the future.

Funding Sources

Funding for the electric CIP program is a combination of revenue bonds and enterprise revenue. The City Council approved a 6.9% rate adjustment in June 2023. The last multi-year revenue bond was passed by voters in 2015. Funds from the initial sale of bonds were appropriated to projects in FY 2015 and FY 2016. Some major projects that were intended to be funded with the first sale of bonds were delayed to incorporate input from the IERMP. At this time, bond funds for the new substation will be reallocated to upgrade existing substations, with City Council approval. Future sales of the 2015 approved bonds will likely occur with City Council direction concerning transmission projects. Funding for several annual projects will come from enterprise revenue.

Electric

* This is current as of June 2023

** Includes estimate from department

*** Includes FY 24 budget request of \$3,895,000

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Sanitary Sewer Utility Capital Projects are funded by enterprise revenue collected from ratepayers and revenue bond funds approved by voters in 2013. FY 24 includes \$3,895,000 of enterprise revenue to fund future rehabilitation projects and construction for two Private Common Collector Elimination projects, as well as design work for an additional five Private Common Collector Elimination Projects.

Sanitary Sewer Utility Capital Projects

A Look Ahead

In 2018, the City Council adopted the Wastewater and Stormwater Integrated Management Plan (IMP) for the Sewer and Storm Water Utilities. The goal of the IMP is to develop an adaptable and affordable long-term plan that addresses the City's wastewater and stormwater management needs and meets Clean Water Act requirements. Sewer Utility staff started implementation of the 5-year Action Plan recommendations presented in the IMP and will utilize the recommendations to inform future Sewer Utility CIP budgets. The Sewer Capital Improvement Plan includes approximately \$3 million each year to fund rehabilitation of the sewer system. Rehabilitation work not only improves the operational efficiency of the system, but improves water quality of the streams adjacent to the sewer system. The next five years also includes multiple Private Common Collector Elimination (PCCE) sewer improvement projects. These PCCE projects eliminate poor and deteriorated private sewer systems that pollute the environment due to lack of maintenance. These projects closely align with the Strategic Plan goals of organizational excellence and reliable infrastructure. Improving existing sewer infrastructure reduces the occurrence of building backups and sewer overflows which improves local water quality and the resilience of existing housing. These improvements align with the Housing and Health and Safety Goals of the Climate Action and Adaptation Plan (CAAP).

Current Projects

The Sewer Utility is completing work on three Private Common Collector Elimination (PCCE) sewer improvement projects. Each of these projects included many residential landowners and some with multiple phases of construction. Smaller PCCE projects have been completed in this year and more will be completed in the next year. Eight PCCE projects will receive either design or construction funding in FY 2024. Two other sewer projects are completing the bidding process, and another is beginning construction.

The Sewer Utility should complete the Sewer Rehabilitation #9 project in the next year and move forward with Sewer Rehabilitation #10 project. These sewer system rehabilitation projects reduce inflow and infiltration by "no-dig" methods. Rehabilitating the sewer system can reduce the incidence of building backups and sanitary sewer overflows.

The design build project for the Automated Debris Removal System at the Constructed Wetlands started in FY 2023 and will continue through FY 2024.

Supply chain and pricing increases will continue to be a challenge in FY 2024 and will affect construction and rehabilitation costs.

Funding Sources

Funding for the sanitary sewer utility CIP program is a combination of revenue bonds and enterprise revenue. In FY 2013, Columbia voters approved a \$32 million ballot issue for the primary purpose of rehabilitating the existing sewer collection system to address inflow and infiltration. This ballot issue also included funding for elimination of private common collector sewers, sewer extension improvements and digester improvements at the Columbia Wastewater Treatment Plant. Some FY2024 projects are being funded with bond funds remaining from the 2017 issuance of sewerage bonds approved by voters in 2013. The remaining funds are from enterprise revenue collected from user rates. The most recent operating revenue rate increase occurred in 2018. A Utility Rate Study completed in FY 2022 shows that operating rate increases will be required to implement and fund the work outlined in the Wastewater and Stormwater Integrated Management Plan, the CIP and regular operations of the Sewer Utility.

** Includes estimate from department

*** Includes FY 24 budget request of \$1,234,038

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Funding for Solid Waste Capital Projects primarily comes from Enterprise Revenue generated by the Solid Waste Utility. For FY 24, \$1,234,038 is planned to be appropriated for additional funding needed for the heavy equipment storage shelter at the landfill and a vehicle wash bay.

Solid Waste Utility Capital Projects

A Look Ahead

The multi-year Capital Improvement Plan (CIP) budget is updated annually. Collections, Recovery and Disposal functions of the utility require facility expansions periodically to account for collections, administrative, material recovery and disposal space needs as well as regulatory compliance requirements. Evaluation for CIP needs is influenced by the quantity of material collected for disposal and recovery, the volume of space available for disposal, and the age/condition of existing facilities.

The Solid Waste Management Master Visioning Plan was developed in summer 2008 to outline a direction for the future. The plan was updated in 2011, 2018 and again in 2019. The visioning plan includes types of collection, equipment, landfill and material recovery programs. A cost of service study was conducted in 2021 to determine rates required to sustain and expand the utility as the City grows and industry standards and regulations evolve.

Bioreactor Landfill Cell #6 was completed in December of 2018 and is the last disposal cell that can be constructed within the permitted airspace. The existing permitted landfill disposal area is anticipated to reach capacity between 2026 and 2031. A Landfill Site Master Plan has been completed and was adopted by the Council in April 2018. This master plan identifies how the City's Landfill property can be utilized for future disposal purposes. In October 2018, the utility began the multi-year regulatory process of permitting additional landfill space on the current Columbia Landfill property.

The utility completed construction of a new recycling drop off facility on the Parks Management property in 2022. The utility continues to evaluate City owned property to construct additional recycling drop off sites, in an effort to keep pace with the growing use of existing sites. Additionally, the utility recently initiated a comprehensive evaluation of the utilities' recycling and waste diversion program.

Current Projects

- Landfill Expansion Permitting began in FY 2019. This is a multi-year, three phase project to get authority for a new bioreactor landfill disposal area within the footprint of the City's existing Landfill property. The project involves extensive subsurface and geotechnical evaluations, public involvement and community outreach, landfill conceptual design, landfill permit application, and necessary regulatory support to get approvals from MDNR.

The first and second phases have been completed. This work included the Preliminary Site Investigation, the Detailed Site Investigation Work Plan and landfill conceptual design, all of which have been approved by the Missouri Department of Natural Resources.

The third and final phase began in FY 2022. This work will include the Detail Site Investigation submittal and the landfill permit application. It is anticipated that this phase will be completed in CY 2023. Once this is complete, the design of Bioreactor Landfill Cell #7 can begin.

- Material Recovery Facility Phase 1 began in FY2023 and anticipated to be completed in the fall of CY 2023. The project involves conducting a comprehensive evaluation of the City's residential and commercial recycling program (collections and Material Recovery Facility capacity) in order to determine necessary program improvements to achieve the

City's waste diversion goals. The project will evaluate residential & commercial collections, the Material Recovery Facility, materials currently being recycled, additional materials that could be recycled and methods for marketing recycled materials in order to ensure that the recycling and waste diversion program meets the goals established in Columbia's Climate Action and Adaptation Plan.

- Construction improvements to the existing Landfill fueling station were completed in FY2023. The improvements allow Solid Waste vehicles to refuel at the Landfill, making Solid Waste operations more efficient.

CIP projects scheduled for fiscal year 2024:

- Construct a vehicle storage shelter for approximately 20 solid waste collection vehicles at the landfill.
- Construct a vehicle wash bay facility which consists of constructing a building addition onto the south end of the existing Solid Waste Administration and Collection Facility.

Funding Sources

Funding is primarily derived from enterprise revenue. In addition, since the early 1990's the City has taken advantage of available grant funding to expand recovery efforts (recycling, composting, waste minimization).

Note: Capital Projects are budgeted Life-to-Date. This means funding appropriated in one year may be spent in another.

Fiscal Impact

Storm Water Utility Capital Projects are funded by enterprise revenue collected from development charges and ratepayers with the rates initially approved by voters in 1993 and rate increases approved by voters in 2015. The FY 24 Capital Projects plan includes \$2,120,000 of enterprise revenue and \$2,839,589 will be funded using American Rescue Plan Act (ARPA) funds from the Department of Natural Resources (DNR).

Storm Water Utility Capital Projects

A Look Ahead

In 2018, the City Council adopted the Wastewater and Stormwater Integrated Management Plan (IMP). The goal of the IMP is to develop an adaptable and affordable long-term plan that addresses the City's wastewater and stormwater management needs and meets Clean Water Act requirements. Storm Water Utility staff continue to implement the recommendations presented in the 5-year Action Plan of the IMP and will utilize the recommendations to inform future Storm Water Utility CIP budgets. More than 15 storm water improvement projects are planned to be funded over the next five years, as funding allows. The 5 year action plan in the Integrated Management Plan includes projects that address flooding and resiliency by improving deteriorated and undersized storm water systems. Where appropriate and feasible, future projects will also incorporate green infrastructure to improve water quality and resilience. These projects closely align with the Strategic Plan goals of organizational excellence and reliable infrastructure. Flood resilience and green infrastructure align with the Natural Resource Goal of the Climate Action and Adaptation Plan (CAAP) to reduce negative impacts from storm water runoff and flooding.

Current Projects

The Storm Water Utility recently completed a stormwater improvement project at Bray Avenue to help reduce flooding.

The City Storm Water Utility was approved for ARPA reimbursement funds from the Missouri Department of Natural Resources for the following projects and amounts:

- Nebraska Ave: \$619,660.60
- Calvert Drive \$2,219,928.20
- Stormwater Pipe Lining: \$796,446.25

This results in more than \$3,500,000.00 of federal reimbursement for these projects. The projects will need to be completed by December 31, 2026 and City staff will work towards completion of these projects.

There are more than six projects currently in design that could begin construction in FY 2024, including Nebraska Avenue, Crestridge Drive, Royal Lytham & Fallwood, Bernadette, Ross Street Outlet, and Alan Lane. Additionally, staff is designing Calvert Drive, a multi-year storm water improvement project that will have significant improvements to Hinkson Creek water quality and neighborhood flooding in the area. The Capri Drive project is slated to begin construction in FY 2024.

Supply chain and pricing increases will continue to be a challenge and will affect construction costs in FY 2024.

Funding Sources

Funding for the storm water CIP program is by enterprise revenue approved by voters in 1993. A storm water ballot issue was approved by voters in the April 2015 election. The approval of the ballot issue allowed the Storm Water Utility rates to be increased over a five year period. The first incremental increase was approved with the FY 2016 budget, the final incremental increase was approved with the FY 2020 budget. These increases provided additional funding to increase

maintenance and replacement of existing storm water infrastructure and allow for completion of projects currently identified in the CIP. A cost of service study and revenue sufficiency analysis completed in FY 2022 shows that operating rate increases are not recommended in the immediate future. The analysis recommended steps towards including an impervious area rate structure for residential properties to replace the current main floor area rate structure. The City will be receiving more than \$3.5 million in reimbursement from MDNR ARPA funds. This should delay the need for a rate adjustment in the next year. Rate increases, required to be approved by the voters, will be necessary in the future to continue to implement and fund the work outlined in the Wastewater and Stormwater Integrated Management Plan and regular operations of the Storm Water Utility.
